One sedative prescription argues that high price supports will restore agriculture to health. High supports in themselves have not been helpful. Recent history is replete with examples. In 1954, for instance, price supports on dairy products stood at 90 percent of parity but all milk at wholesale sold at 84 percent of parity. This year, with supports at 77 percent of parity, all milk at wholesale has sold at 85 percent of parity, since supply is now more closely balanced with demand.

Another sedative-type prescription has insisted that low price supports would help the farmer by reducing production. This is unsound. All primary producers tend to produce to the best of their ability, no matter what the price. Farmers produce from fence row to fence row—and I've never yet seen the farmer who decided in the spring whether or not he would plant the back

40, depending on the price he could receive for his commodities.

So let us now toss into a cocked hat the bromides that high supports or low supports in themselves will serve to bring production to a controllable level, thus raising farmers' income.

Now, what steps should our Nation follow to provide sound assistance to farmers?

Probably the best way to survey the recommendations is to assemble all in a "cause and cure" order, matching the causes of the farm problem with the suggested cures.

First cause: Government-stored commodities are depressing prices.

Cure: Congress should enact legislation to insure that Government-stored commodities will not be sold on the domestic market for less than 105 percent of full parity.

Under the operation of our present law, whenever the market price reaches 105 percent of the current support level, plus normal carrying charges, surpluses come back onto the market, holding prices down at the support level. Under our price support programs, we made an effort to withdraw commodities from the market in order to create a lesser supply, thereby attempting to balance supply and demand, holding prices to the support level. The program of selling at 105 percent of parity serves to hold prices down below the support level, making it a price ceiling rather than a price floor.

By taking this remedial step, Congress could act to relieve the psychological and actual price depressant influence of the surplus. After harvest, if this action were taken, prices could then work up toward full parity in the marketplace, meaning increased income for farmers.

Second cause: Production from land continues greater than demand.

Cure: Enactment of a payment-in-kind program which would use the surpluses themselves, through negotiable certificates, to pay farmers to reduce production.

The payment-in-kind program would have a twofold effect. First, it would serve to bring surpluses down to a normal carryover level. Second, it would balance supply and demand.

May I say here that the objective should always be to balance supply and demand—not to eliminate all Government-held commodities? We must continue to hold adequate stocks of food in reserve just as we hold other resources for future use.

Third cause: Farmers' costs have increased greater than their gross income.

Cure: Continued support of anti-inflation measures.

Inflation is a familiar word to American farmers—because inflation is a very real enemy of agriculture. Farmers have been hit harder by cheap money than any other group of Americans. The fact that for years major national leaders have been warning of inflation, have been urging a greater awareness of its dangers, makes the problem no less acute. The trouble is that because "inflation" is a familiar byword in America, we may become less than alert to its menace.

Anti-inflation measures are never popular. They call for more than a determination to balance the U.S. budget. Spending for spending's sake without worry of red ink deficits is a time-recorded temptation, especially in an election year.

But farmers who are concerned in improving their status in our economy will continue to urge that Congress and the administration discharge a full measure of responsibility in enabling our country to live within its means. Thrift in practice is no less important in Government than in farm management and household planning.

By holding down inflation, the Government halts a possible stampede of rising costs which could plague the farmer and jeopardize his future along with all other Americans.

Fourth cause: Farmers' bargaining power has not been fully developed.

Cure: Encouragement for expanded marketing agreements and orders as well as an intensified search for new uses and new markets for farm commodities.

Because the people of agriculture have not yet fully developed their bargaining power, they are not receiving the prices to which they are entitled. The cure lies in greater encouragement for marketing agreements and orders—as well as with an expanded research.

Few Americans have a greater stake in research than farm people. Laboratory findings to pave the way for new uses of farm products may have direct bearing on farming's future. Yet, unfortunately, only 1 percent of the total budget allotted to agriculture has been devoted to research.

We cannot afford to neglect research. To inadequately provide for this vital arm of the total operation is not a saving—but a costly oversight which can shortchange today's needs and tomorrow's demands.

Believing that Congress had a responsibility to be of concrete assistance to agriculture, on February 29, 1960, I introduced H.R. 10770, which would provide a payment-in-kind program for products of wheat, corn, oats, rye, barley, grain sorghums, soybeans, and flaxseed, and would provide that Government-held grains not be sold for less than 105 percent of full parity. No action has been taken by the Congress on this bill.

In order that immediate action be taken, I introduced on August 22, 1960, House Joint Resolution 794, a joint resolution which would in broader language provide for a payment-in-kind program for the above-named grains.

Under the payment-in-kind proposal, farmers would have the opportunity to idle their wheat and corn and other feed grain acreage in return for rental payments in kind from surplus Government stocks. The payments would actually be made in the form of negotiable certificates which cooperating farmers could either sell or redeem for the surplus grains. The exact rate of payment would be based on local land values and production costs.

Farmers participating in the program would be required to idle at least 10 percent of their wheat allotments or corn or feed grain acreages. In addition, the idled land must be devoted to protective vegetative cover which could not be harvested or grazed. The program would apply to approximately 60 percent of the Nation's cultivated land, emphasizing the continuing importance of land retirement and soil conservation in the national interest and in furtherance of a sound national agricultural policy.

The resolution would also increase the release price on Government-held stocks to 105 percent of full parity, plus reasonable carrying charges, a provision that the Commodity Credit Corporation, whenever a commodity was sold due to its going out of condition, replenish its stocks forthwith by purchase from the market.

Oats provides an excellent example of how this provision would operate. Last year the demand for oats was strong because of the small crop. Market prices advanced. CCC, however, was able to dispose of its stocks at 63 percent of parity—5 percent above the current support price of 60 percent of parity—plus carrying charges. This tended to keep prices down even though oat supplies were in seasonal balance. Under the new proposal, CCC would not be able to release its stocks of oats for less than 105 percent of parity—5 percent above the full parity price.

I am disheartened, as I realize now this session is drawing to a close and it is impossible to enact this greatly needed piece of legislation which would have the greatest beneficial effect on farmers' prices at this time when farm income is low.

In January, if I am returned to Congress, I will work with renewed vigor for this type of program, for Government policies which will keep our total economy sound, that is, holding inflationary or recessionary aspects to a minimum. And, if the conferees on the agricultural research bill do not compromise their differences this session, I will be working next session for increased research for new uses and new markets for the products which we are raising in such great abundance on our American farms.

This, coupled with our humanitarian programs providing food for needy people at home and abroad, I believe will help farmers' income increase to the point where farmers can again receive their proportionate share of national income.

NICAP UFO Report

EXTENSION OF REMARKS

OF

HON. LEONARD G. WOLF

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. WOLF. Mr. Speaker, under leave to extend my remarks, I include an urgent warning by Vice Adm. R. H. Hillenkoetter, former Director of the Central

Intelligence Agency, that certain potential dangers are linked with unidentified flying objects—UFO's. Admiral Hillenkoetter's request that Congress inform the public as to the facts is endorsed by more than 200 pilots, rocket, aviation, and radar experts, astronomers, military veterans, and other technically trained members of the National Investigations Committee on Aerial Phenomena. Among them are Rear Adm. H. B. Knowles; Col. Joseph Bryan III, U.S. Air Force Reserve; Lt. Col. Jas. McAshan, USAFR; Lt. Col. Samuel Freeman, U.S. Army Reserve, Aviation; Mr. J. B. Hartranft, president, Aircraft Owners Pilots Association; Capt. R. B. McLaughlin, Navy missile expert; Mr. Frank Rawlinson, physicist, National Aeronautical and Space Agency; Dr. Leslie Kaeburn, space consultant, University of Southern California; former Air Force Maj. William D. Leet, with three officially reported UFO encounters while an Air Force pilot; Frank Halstead, 25 years as curator, Darling Observatory; Rear Adm. D. S. Fahrney, former chief of the Navy missile program; Col. R. B. Emerson, U.S. Army Reserve, head of Emerson Testing Laboratories; Prof. Charles A. Maney, astrophysicist, Defiance University; Capt. W. B. Nash, Pan American Airways.

The "NICAP Report on Secrecy Dangers," with documented evidence on UFO's, was first submitted confidentially to me, and to several other Members of Congress, including Senator LYNDON JOHNSON. In a reply to NICAP, July 6, 1960, Senator JOHNSON stated that he had ordered the staff of the Senate Preparedness Investigating Subcommittee to keep close watch on UFO developments and to report on any recent significant sightings and the Air Force investigations of such sightings.

Although I have not had time for a detailed study, I believe the conclusions of these experienced NICAP officials should be given careful consideration. Certainly their sober evaluations should be completely disassociated from the obvious frauds and delusions about UFO's which unfortunately have been publicized. The NICAP report is stated to be the result of a 3-year investigation—its conclusions based only on verified visual, radar, and photographic evidence by trained, reputable observers.

On August 20, 1960, NICAP sent me the following statement to be added to the original report:

There is a growing danger that UFO's may be mistaken for Soviet missiles or jet aircraft, accidentally causing war. Several Air Defense scrambles and alerts already have occurred when defense radarmen mistook UFO formations for possible enemy machines. NICAP agrees with this sober warning by Gen. L. M. Chassin, NATO coordinator of Allied Air Services:

"It is of first importance to confirm these objects * * * the business of governments to take a hand, if only to avoid the danger of global tragedy. If we persist in refusing to recognize the existence of these UFO's we will end up, one fine day, by mistaking them for the guided missiles of an enemy—and the worst will be upon us."

Today, this danger may surpass the one cited in NICAP's report: That the U.S.S.R. might spread false rumors that the UFO's are secret Red devices which have mapped all the U.S. and allied targets and could be used as surprise-attack weapons. (Some Americans already suspect hidden fear of UFO's as the reason for secrecy.)

We are sure you will agree it is imperative to end the risk of accidental war from defense forces' confusion over UFO's. All defense personnel, not merely top-level groups, should be told that the UFO's are real and should be trained to distinguish them—by their characteristic speeds and maneuvers—from conventional planes and missiles. This is not in effect today.

Second, the American people must be convinced, by documented facts, that the UFO's could not be Soviet machines.

Certainly every Member of Congress will agree that any such danger of accidental war—even if slight—must be averted in every possible way. It is also important to prevent any unfounded fear that the UFO's are secret enemy devices.

After discussing the subject with colleagues, I am certain that there is real concern by many Members of Congress. Without necessarily accepting all the conclusions of the NICAP Board of Governors and technical advisers, we are convinced that a thorough study of the UFO problem should be made. Pending such action, I believe that publication of the NICAP report will help to reduce the dangers cited by Vice Admiral Hillenkoetter and the other NICAP officials.

For those Members desiring to do so the previously mentioned confidential report can be obtained upon request at the National Investigation Committee on Aerial Phenomena, 1536 Connecticut Avenue NW., Washington, D.C.

Statement Concerning the Activities of the Committee on Merchant Marine and Fisheries, House of Representatives, 86th Congress

EXTENSION OF REMARKS

OF

HON. HERBERT C. BONNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. BONNER. Mr. Speaker, it is with much pleasure and pride that I make this report on the activities of the Committee on Merchant Marine and Fisheries during the 86th Congress.

The past 2 years have brought many challenges to this committee, and I, as chairman, am delighted to point to a solid record of real accomplishment. I sincerely feel the work done by this important committee has been most constructive.

During the 1st session of the 86th Congress the committee and its subcommittees held a combined total of 122 meetings. Twenty-two pieces of legislation considered by the committee were enacted into law.

In the second session 221 meetings were held by the committee and its subcommittees. Twenty-seven measures reported out of the committee became law.

During this Congress the committee carried on its traditional role of striving to strengthen the American merchant marine better to enable it to serve the national interests in its dual capacity as a vital link in our transportation system and as a military and naval auxiliary in readiness for emergencies. Reported legislation included measures designed to facilitate and make more flexible the private financing of essential new ship construction through Government guaranteed loans or mortgages; to strengthen and modernize the important domestic and nearby foreign trades through authorization of the exchange of certain war-built vessels for more efficient vessels now in the reserve fleets; to ease the burden of the ship replacement program by extending the statutory life of subsidized vessels from 20 to 25 years; to extend for another year interim legislation to permit the continued use of the dual rate tariff system by steamship conferences, pending completion of current congressional studies; to increase the ceiling on construction-differential subsidy in order to help keep American operators on a parity with their foreign competitors in the face of rising shipbuilding costs in the United States; and other proposals contributing in various ways to the health of our merchant marine.

One of the most important and complex matters to be handled by the committee was a bill to establish pilotage requirements for oceangoing vessels using the newly opened St. Lawrence Seaway.

On an even stronger record than in the previous Congress the committee considered our vital role in the polar regions and reported an amended icebreaker bill to authorize the construction of three modern icebreaking Coast Guard cutters. The reported bill was a successor to the legislation which overwhelmingly passed both Houses in the 85th Congress for an atomic-powered icebreaker. Through shortsightedness in the executive branch the atomic icebreaker bill was vetoed by the President.

Other legislation extended the concept of vessel construction subsidy to our vital fishing fleet under certain conditions. One major bill recognized the economic importance of sport fishing and authorized specialized research into marine game fish matters.

The Committee on Merchant Marine and Fisheries of the 86th Congress began with a number of hearings to obtain information regarding the functions of the administrative agencies that fall under its jurisdiction. We have found in the past that this was a most satisfactory and efficient manner in which to organize the committee and initially orient the new members to their responsibilities.

Soon after Congress convened the committee also initiated extensive hearings relative to specific operations within its purview. Hearings were held in

Washington on: the progress of the atomic shipbuilding program; special problems relative to the present status and the future of the Panama Canal; oceanography; and the Merchant Marine Academy, our splendid institution for the training of competent young men to serve our merchant fleet in peace and war.

These hearings aided the Members in their understanding of the important work and legislation with which they would be concerned in the 86th Congress. These hearings consisted of reviewing past and existing legislation. The valuable information concerning the various agencies involved assisted the Members in background material.

The establishment of four standing subcommittees and four special subcommittees during the 86th Congress points to the significant and diverse fields of inquiry with which the Committee on Merchant Marine and Fisheries is concerned in the course of its work.

The four standing subcommittees that were established are: Subcommittee on Merchant Marine, HERBERT C. BONNER, of North Carolina, chairman; Subcommittee on Fisheries and Wildlife Conservation, FRANK W. BOYKIN, of Alabama, chairman; Subcommittee on Coast Guard, Coast and Geodetic Survey, and Navigation, EDWARD A. GARMATZ, of Maryland, chairman; and Subcommittee on Panama Canal, LEONOR K. (Mrs. JOHN B.) SULLIVAN, of Missouri, chairman.

These four subcommittees mainly handled business relative to the subject indicated by their designated names. However, at times the full committee heard subjects which were of the broadest general interest, irrespective of subcommittee scope of jurisdiction.

The four special subcommittees that were established are: Special Subcommittee on Steamship Conferences, HERBERT C. BONNER, of North Carolina, chairman; Special Subcommittee on Oceanography, GEORGE P. MILLER, of California, chairman; Special Subcommittee on Ocean Freight Forwarders, T. A. THOMPSON, of Louisiana, chairman; and Special Subcommittee To Study Merchant Marine Academy, HERBERT ZELENKO, of New York, chairman.

In the following overview of the work done by the committee during the 86th Congress, principal legislation and investigations are presented in terms of the several categories of the committee's jurisdiction. The work of the individual standing and special subcommittees will be set forth under the categorical heading indigenous to each.

MERCHANT MARINE

No phase of the committee's activity is less important than any other. But, as always, the greatest volume of legislation related to merchant marine matters.

In the committee's view, it is essential that the needs of the maritime industry be kept under constant review in order that we might keep the national policy up to date with regard to the merchant marine.

We had laid emphasis on the importance of adapting nuclear energy to merchant shipping in earlier years. So one of the first steps in this Congress was to hold hearings on the progress of the atomic shipbuilding program commenced several years ago. The world's first nuclear-powered merchant ship, the NS *Savannah*, was authorized several years ago. She is now nearing completion in a leading shipyard in New Jersey. We wondered, "Where do we go from here? How is the *Savannah* project going? What is next?"

Hearings showed that the initial project was going well, with only the normal impediments found with any prototype project. Maritime officials urged authorization of further atomic-powered vessels—preferably tankers—in order to advance the program. Other Government witnesses proposed the go-slow signal until the *Savannah* project had proved itself. While no action was taken in the field, I believe the burden of opinion in the committee was to do everything possible to take another step and proceed with authorization of another vessel, without waiting for final appraisal of the *Savannah*. It was recognized that, first, atomic power has proved its usefulness in seaborne craft and, second, lessons already learned would mean a signal advance for a modern American merchant marine.

During the second session, the Subcommittee on Merchant Marine held extensive hearings on the Defense personnel transportation policy.

It was called to the attention of the committee that rather drastic action had been taken by the Department of Defense in connection with military and dependent travel. Under current policy, action is being taken which will virtually remove all support of commercial sealift capability in the transportation of military personnel and their dependents, with corresponding increase of airlift through the maximum use of the Military Air Transportation Service.

The hearings were to develop the facts on this situation through testimony from officials of the Department of Defense and the Department of Commerce, so the committee could receive an understanding of these policy developments for guidance in future study of the needs of the merchant marine. The present policy by the Department of Defense will undoubtedly affect the shipping policies of the U.S. merchant marine. The committee feels that the implications manifest in this action should bear close scrutiny in the future and, if necessary, further exploration be made.

Extensive legislation concerning the U.S. merchant marine was handled by the committee during the 86th Congress.

Three major amendments to the Merchant Marine Act of 1936 were important pieces of legislation.

First, an amendment that extends the life of certain vessels from 20 to 25 years was passed into Public Law 86–518. This amendment has a dual effect of not only conforming the statutory life of postwar-built vessels to their actual life, but it also eases the annual burden of required reserve deposits of eligible merchant ship operators by spreading the depreciation charges and amortization payments over 25 years, rather than 20 years.

A second bill authorizes American operators to exchange certain war-built vessels they presently own for more modern and efficient war-built vessels owned by the U.S. Government.

Still another bill amends the Merchant Marine Act of 1936 with respect to insurance of ship mortgages giving more flexibility to merchant ship financing. The bill enacted into law authorizes the Secretary of Commerce to insure ship mortgages up to 75 percent—and in some special cases up to 87½ percent—of the actual cost of construction, reconstruction, or reconditioning of the vessel mortgaged. Under past law in order to qualify for insurance the mortgage had to be placed on the vessel before it was delivered by the shipbuilder.

In recent years it has become increasingly evident that the gap between American and foreign shipbuilding costs is widening. Under existing law the United States may assume as a construction differential subsidy no more than 50 percent of the bid price of an American shipyard. In some recent biddings in the important maritime replacement program the existing ceiling on construction differential subsidy would work a serious hardship on the American operator. The basic concept of our subsidy system is that the American operator be placed on parity with his foreign competition in both construction and operating costs. While the committee was reluctant to remove the ceiling on construction subsidy altogether, it seemed only fair and reasonable that the ceiling should be lifted so as to maintain the advantage of reasonably equal competitive status through parity. Accordingly, favorable action was taken upon a bill to increase the construction differential subsidy to 55 percent, to be retroactive to June 30, 1959, and to expire 2 years after enactment.

Through this legislation those operators who otherwise would have been hurt by the recent increase in the construction differential would be protected, and at the same time the Congress would be compelled to review the matter again within a reasonable period.

Since the enactment of Public Law 781, 83d Congress, to amend title XI of the Merchant Marine Act of 1936 to make Government insured private financing of ship construction available, the Congress has found it necessary from time to time to consider perfecting amendments. Two major measures were acted upon by the committee and enacted into law in this Congress to strengthen this important feature of the 1936 act. One of these bills is designed to facilitate federally insured private financing of ship construction by authorizing public bond issues. The other bill, approved by the committee and enacted into law, would provide greater flexibility in private financing of ship construction by authorizing a delay in placing a mortgage on a newly constructed vessel, if the loan secured by the mortgage is to

be used to make the downpayment on other vessels to be constructed, without depriving the owner of the privilege of obtaining Government insurance of the mortgage. Thus, it would be possible for an operator who plans to replace a fleet of vessels to pay in full for the first vessel in his replacement program and to mortgage that vessel subsequently to obtain the downpayment on other vessels. In this manner a shipowner would have the opportunity to make the most economical use of his own funds and to select, within the limits of his own resources, the most favorable time for private borrowing.

Several bills affecting the wages, insurance benefits, and general welfare of the merchant seamen were reported, passed, and signed during the 86th Congress. Specifically they include a bill that transfers from the Department of Commerce to the Department of Labor certain functions in respect to insurance benefits and disability payments to seamen for World War II service-connected injuries, death, or disability; clarification of prohibition against arrestment of seamen's wages; and an amendment to the Revised Statutes relative to the disposition of money and effects of deceased seamen.

Public recognition of the gallant action of the SS *Meredith Victory* was authorized by a public law citing extraordinary achievements of this ship during the Korean conflict. On December 21, 1950, the SS *Meredith Victory*, a dry-cargo vessel, successfully undertook an emergency evacuation of refugees from Hungnam, Korea. This evacuation will rank forever, the committee feels, among the great accomplishments of the U.S. merchant marine. It is with great pride that we recognize the achievements of the SS *Meredith Victory*.

The Merchant Marine Act of 1936 contains a provision to the effect that in the event the bid of a west coast shipbuilder is no more than 6 percent higher than the lowest responsible bid of an Atlantic coast shipyard, then the Pacific coast shipbuilder will be automatically awarded a construction contract for a subsidized vessel, provided the ship operator has its principal place of business on the Pacific coast and will operate in and out of that area. In recent years there has been a growing belief that this differential provision is both obsolete and discriminatory.

Legislation has been considered which would eliminate the differential. The committee held extensive hearings on such proposals and ordered one of the bills favorably reported to the House. However, due to the adjournment of Congress, no final action was taken.

In view of the strong regional feelings on this legislation it appears that it will probably be again introduced in the next Congress. In anticipation of further action and in the interests of attempting to resolve the conflicting testimony of Government and regional shipbuilding interests, I have requested that the General Accounting Office, in conjunction with the Maritime Administration, review the record and endeavor to establish the facts concerning relative shipbuilding costs in various parts of the country.

The committee considered and acted upon a number of other bills affecting the merchant marine in varying ways.

FISHERIES AND WILDLIFE CONSERVATION

An extremely important area within the scope of the committee's jurisdiction concerns the marine and fresh water fisheries of the United States, both sport and commercial. The somewhat related field of wildlife conservation also receives much attention from the committee.

In the recent past, due to increased public interest and attention to the importance of the Nation's fish and wildlife resources, new problems and demands have been created for the committee.

One of the most important matters referred to the committee relative to the fisheries and wildlife conservation was a bill to authorize and direct the Secretary of the Interior to undertake comprehensive studies of the migratory marine fish that are of specific interest to recreational fishermen of the United States. This bill received wide support, and after favorable committee action became Public Law 86–359.

The scope of the authorized studies would include species of fish inhabiting the offshore waters of the United States and species of migratory fish which spend a part of their lives in the inshore waters of the United States. Research is to be on a broad scale, including but not limited to growth rates, research on migrations, identity of stocks, variations in survival, environmental influences, and other aspects for the development of wise conservation policies and constructive management activities.

In the realm of research and study the committee was also concerned with the effects of insecticides and other pesticides upon fish and wildlife. Section 2 of the act of August 1, 1958, enacted into law by the 85th Congress, did provide for studies of this type. Public Law 86–279, under the 86th Congress, now states that the studies to the purpose of preventing losses of our invaluable natural resources due to insecticides and other pesticides be extended. A sum of $2,565,000 per annum is authorized to carry out the objectives of this study.

One of the major legislative matters in the fisheries field was a bill to provide assistance to segments of the fishing industry that have suffered undue hardship by reason of the operation of the reciprocal trade policy of the United States. The need for the legislation developed from the depressed economic conditions in the New England fisheries, due to losses resulting from imports of frozen fish fillets at prices below the American cost of production. These depressed conditions have left the New England fishermen with obsolescent vessels and poor prospect of replacement with newer and more modern vessels, particularly since under U.S. law American fishing vessels must be constructed in U.S. shipyards. Not only is the American fisherman at a disadvantage with regard to capital cost of ship construction, but testimony revealed that there had been instances where relief recommended by the Tariff Commission under the Trade Agreements Assistance Act of 1951 had been denied through failure of executive approval. This bill would authorize construction differential subsidies for new fishing vessels to be operated in a fishery suffering injury from which escape clause relief had been recommended by the Tariff Commission and—after House-Senate conference agreement—other vessels to be operated in a fishery found by the Secretary of the Interior to be injured or threatened with injury by reason of increased imports not the subject of a trade agreement tariff concession. The subsidy provisions are similar to those prevailing with regard to subsidized merchant vessels, although limited to 33⅓ percent, exclusive of national defense features. The bill, as it passed the Congress, authorized an annual appropriation of not more than $2½ million to carry out its purposes. It is believed that enactment of this legislation may point the way to the salvation of certain of our major fisheries suffering from extreme foreign competition.

Other bills dealt with the establishment of new fish hatcheries and the clarification and improvement of administration of existing laws.

COAST GUARD

In past years there have been numerous proposals to the Committee on Merchant Marine and Fisheries to improve and regulate safety measures on seaborne craft. The committee has recognized the importance of such measures and has endeavored to improve safety in the operation of large and small vessels both at sea and in the inland and coastal waters.

The U.S. Coast Guard maintains a great responsibility in marine safety. In order to increase Coast Guard efficiency in this area the 86th Congress authorized the Secretary of the Department in which the Coast Guard is operating to prescribe further regulations governing existing lifesaving equipment, firefighting equipment, and other safety techniques and systems. This act, Public Law 86–244, also includes special duties to be performed by crew members in the event of an emergency. It is important to note that the bill provides for these regulations to apply to all foreign vessels carrying passengers from ports of the United States, unless otherwise prescribed by specific treaties of international agreement.

The efficiency and effectiveness of the U.S. Coast Guard was increased by Public Law 86–474 by improvement in certain basic statutes relating to the Coast Guard organization, composition, and personnel administration. This bill brings the organization of the Coast Guard into line with newly developed responsibilities and places it more closely into appropriate relationship with the other military services.

One of the most important matters to be acted upon by the committee in this Congress was a bill to establish pilotage requirements for oceangoing vessels in their navigation of U.S. waters of the Great Lakes and St. Lawrence River, and to provide a basis for a regulated pilotage system to meet those requirements.

Until the enactment of this bill there were no statutory requirements for the pilotage of ocean vessels navigating the Great Lakes. However, the great increase in the volume of ocean shipping entering the Great Lakes as a result of the opening of the St. Lawrence Seaway made establishment of such requirements urgent and essential in the interest of maritime safety.

Distinctive conditions and diversified factors, including international problems, encountered in the Great Lakes-St. Lawrence River area created a complex situation which complicated the final development of a bill that would provide a workable solution of the knotty problems involved. The committee considered legislation introduced prior to the opening of the seaway, and held many hearings before reaching a satisfactory solution which seems to reconcile all of the major conflicts in this many-sided situation.

Though refinements may have to be made in the newly enacted legislation, I am confident that it will provide a sound framework for effective regulation and greater maritime safety in the waters of our "fourth seacoast."

Additional emphasis was placed on safety with the passing of Public Law 86–159 which authorizes the Coast Guard to sell fuel and supplies to vessels or crafts unable to procure these items from other sources. This is a measure designed to protect the health and safety of ships and personnel.

Modern icebreakers are needed to carry out the Coast Guard's responsibilities as required in the national interest. To this end the committee again reviewed the action taken in the 85th Congress to authorize an atomic-powered icebreaker. Without minimizing the importance of such a vessel, the committee modified its earlier position and reported a bill calling for the construction of three modern icebreaking Coast Guard cutters without specifying propulsion systems. These vessels are to be capable of operating in the arctic and antarctic regions. The bill further authorized a feasibility study of the use of atomic propulsion in such vessels. The bill passed the House but did not receive final congressional action.

Other bills concerning the Coast Guard and its activities that were passed by the 86th Congress and signed by the President were an authorization for the U.S. Coast Guard to sell certain and specific utilities in the vicinity of a Coast Guard activity not available to local and indigenous sources; and two bills that increase the limitation on basic pay of civilian lighthouse keepers and increase the retirement pay of certain members of the former Lighthouse Service.

PANAMA CANAL

Pursuant to the authority granted by the House of Representatives, the Committee on Merchant Marine and Fisheries, appointed a Board of Consultants on Isthmian Canal Studies to investigate short- and long-range plans for the operation, improvements, and other matters relating to the adequacy of the Panama Canal. The report on these investigations was made public during the 2d session of the 86th Congress.

These investigations were brought about by increasing attention to the rapid growth of sea traffic through the Panama Canal. The increase has narrowed the gap between capacity and traffic demand to the point where concern was aroused as to the future capacity of the canal. The investigation was mainly threefold whereby consideration was given to the ultimate potential of the present canal; the feasibility of lock-canal crossings at other sites across the isthmus; and the suitability of a sea-level canal in the Canal Zone and elsewhere.

The conclusions and recommendations on these considerations disclose that the principal justification for large additional capital expenditures for the Panama Canal is to increase its potential capacity for handling all ships requiring transit between the Atlantic and Pacific Oceans but that before approving any plans for increasing this capacity it is necessary to compare estimated future traffic and potential capacity under different plans; that it is doubtful if any reasonable plan to construct a sea-level canal in the Canal Zone could be carried through without serious danger of a long interruption to traffic at the time of cutover from the present lock canal; and that the feasibility of a canal at some other site across the isthmus should be studied further.

A bill enacted into law by the present Congress reduces the interest burden on the Panama Canal Company. By amending provisions of the Canal Zone Code relative to the handling of the excess funds of the Panama Canal Company the bill reduces the total amount of funds on deposit with the Treasury upon which interest must be paid.

Another act increases annuities paid to noncitizen retirees formerly engaged in the construction and operation of the Panama Canal.

SPECIAL SUBCOMMITTEES

Summarized briefly, the work of the four special subcommittees during this Congress was as follows:

(a) Special Subcommittee on Ocean Freight Forwarders: This subcommittee continued its investigation of the important ocean freight forwarding industry which was commenced in early 1956. In this Congress the subcommittee developed and reported to the full committee proposed legislation based upon its comprehensive studies. Legislation was reported to the House but failed of final passage in the closing days of the second session due to unresolved disagreement in a House-Senate conference.

(b) Special Subcommittee on Steamship Conferences: Following extensive staff studies in the 2d session of the 85th Congress a special subcommittee was established to make a thorough review of the steamship conference system and the adequacy of the regulatory provisions of the Shipping Act of 1916. This special subcommittee held comprehensive hearings in all port areas of the country and took testimony from ocean carriers, importers and exporters, Government officials, and many others.

In view of the voluminous and complex record and the fact that the House Judiciary Committee was concurrently conducting a parallel study of related aspects of the conference system and existing regulatory statutes, it was impossible in this Congress to devise and act upon appropriate corrective legislation. In order to avoid the possibility of serious disruption in ocean shipping, interim legislation was reported out and acted upon to continue the status quo in regard to the legality of the dual rate system for another year, until June 30, 1961.

(c) Special Subcommittee on Oceanography: Immediately upon the publication of the first portion of a report of a Committee of the National Academy of Sciences recommending a coordinated national program in the field of oceanography, a special subcommittee was appointed to study such report, review the scope of oceanographic activity in the United States and ascertain the problem areas which would require legislation. The subcommittee has been most active throughout this Congress, having held numerous and thorough hearings and attended various oceanographic meetings as well as visited institutions and other installations involved in this field.

Several legislative measures were considered but in all the circumstances no final legislative action was taken on most of these because further study appeared to be required. However, favorable action was taken upon two bills to give greater flexibility and efficiency to the Coast and Geodetic Survey and the Weather Bureau in their oceanographic activities.

(d) Special Subcommittee To Study the Merchant Marine Academy: In recent years there has been growing impetus to strengthen the status of the U.S. Merchant Marine Academy at Kings Point, N.Y. Several legislative proposals to this end have been before the Congress. In connection with this subject, the committee learned that serious questions had been raised concerning the administration of the Academy, the condition of its facilities, its curriculum, and student and staff morale. These matters were the subject of a series of hearings by a special subcommittee in the latter part of 1959. Further inquiry into certain aspects of these matters are currently under review.

As a result of the subcommittee's investigation, it appeared that a number

of improvements were in order to increase the efficiency of the institution and the officials of the Department of Commerce and the Maritime Administration were so advised.

The committee acted upon an Administration proposal to clarify the status of personnel at the Academy. The bill passed the House but did not receive final action in the Senate.

CONCLUSION

I feel that from the standpoint of the work of the Committee on Merchant Marine and Fisheries the two sessions of this Congress have been most productive. As is always the case, we could not handle all the meritorious legislation pending before us. In addition, our studies into the various fields under the committee's jurisdiction disclose a number of matters which should be gone into in the near future.

Finally, I wish to take this means to express again my sincerest thanks to all of the members of the committee on both sides who gave so generously of their time to carry forth the committee's program.

SENATE

THURSDAY, SEPTEMBER 1, 1960

(Legislative day of Wednesday, August 31, 1960)

The Senate met at 12 o'clock meridian, on the expiration of the recess, and was called to order by the President pro tempore.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Our Father, God, who putteth down the mighty from their seat, and exalteth the humble and the meek, as this hallowed Chamber so shortly will be left empty and silent as the tumult and shouting dies, and the captains and the kings depart, may those who have here spoken and acted according to their convictions for the welfare of the Nation and of the world, even as they turn their faces homeward, breathe in their hearts the prayer—

Still stands Thy ancient sacrifice,
A humble and a contrite heart,
Lord, God of hosts, be with us yet—
Lest we forget, lest we forget.

We come solemnly conscious that before the gavel falls for another session, and once again prayer is heard in this place, the stewardship which has been exercised here by the consent of the people will be judged by those who hold the sovereign scepter of the ballot.

Across the weeks ahead, the reverent gaze of the Nation will be, not on stately legislative halls, but upon unadorned, yet sacred, voting booths set up from sea to sea, in which, free from spying eyes, every citizen dowered with the precious franchise can be alone with his own conscience, none daring to molest or make afraid.

We thank Thee that that is our America, and that amid all the contentions and convulsions of these volcanic days, whatever be the verdict of the people, still we can say with utter confidence—God lives and the Government at Washington still stands, and with Thy help will continue to stand as the beacon light of truth for all the earth.

Will Thou bless and strengthen all that here has been worthily done as Thy servants in the ministry of public affairs have followed flickering lights amid the encircling gloom.

And now may the Lord bless you and keep you; may the Lord make His face to shine upon you and be gracious unto you; may the Lord lift up the light of His countenance upon you and give you peace—peace in your own hearts, peace in this dear land of ours, and a just peace throughout all the earth, now and evermore.

We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, August 31, 1960, was dispensed with.

EXPRESSION OF APPRECIATION TO THE SENATE STAFF

Mr. JOHNSON of Texas. Mr. President, I shall make a brief remark about the attachés and staff of the Senate. I never cease to marvel at their patriotism, their loyalty, their diligence, and their understanding of the Members of this body. I do not know what would happen to this institution if we did not have the most dedicated and loyal staff I have ever observed in any institution. I wish to express my deep appreciation to each and every individual, from the newest page boy to the most senior employee. I should like to call all of their names, but that would take longer than they would wish.

But I do want them to know that I believe every Member of the Senate is understanding and appreciative of their diligence, their patriotism, their loyalty to their jobs, and their devotion to their country.

Mr. DIRKSEN. Mr. President——

Mr. JOHNSON of Texas. I yield.

Mr. DIRKSEN. First, Mr. President, I concur in the observations of the majority leader with respect to the staff. But I go a little further; I think we ought to thank them for their forbearance. They become so familiar, I think, with our weaknesses, our failures, and our foibles; and yet with Christian charity they forbear with us and they carry on.

Frankly, as an institution I do not know what the Senate would do without them.

I have often thought of myself as sort of out in front, by the grace of God and the sufferance of the voters. But what would we do if we did not have people at our right hand and at our left hand, to hold them up.

Long ago, according to the Sacred Parchment, a great patriarch was watching the battle—not knowing, of course, how it would fare. When he held up his arms in supplication to the Lord, the tide of battle went with him. But when, through fatigue and weariness, his arms dropped to his sides, the tide of battle turned against his people. Two of his kinsmen saw that; one was his brother-in-law. So they hastened up the hill, and one stood on one side and one stood on the other, while Joshua, the great captain, carried on; and the Book says they supported him and they held up his hands until the sundown; and the victory was won.

Mr. President, the staff have held up our hands, always, in every session, until the sundown, when the victory was won. So, out of grateful hearts, we thank them; and I know I bespeak the gratitude and appreciation on the part of all our Members on this side and all Members in this body.

ORDER FOR CALL OF THE CALENDAR

Mr. JOHNSON of Texas. Mr. President, I ask that it be in order to call the calendar today, for the passage of the bills and other measures on the calendar to which there is no objection.

The PRESIDING OFFICER (Mr. MCGEE in the chair). Without objection, it is so ordered.

RESOLUTION OF SUPREME COUNCIL, KNIGHTS OF COLUMBUS, ATLANTA, GA.

Mr. DODD. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted at the 78th annual meeting of the Supreme Council of the Knights of Columbus at Atlanta, Ga., opposing the repeal of the Connally reservation.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

KNIGHTS OF COLUMBUS,
New Haven, Conn., August 26, 1960.

To the Members of the U.S. Senate:

At the 78th annual meeting of the Supreme Council of the Knights of Columbus at Atlanta, Ga., August 18, 1960, the following resolution in opposition to the repeal of the Connally resolution was adopted unanimously:

"Whereas a World Court was established by the United Nations in 1945, said Court to be composed of fifteen judges, not more than one from each participating nation, which World Court is designed to be superior to the domestic courts of each nation that participates in the Court; and

"Whereas the resolution of Congress, committing and binding the United States to

participate in the World Court and to accept its jurisdiction, was amended by a resolution sponsored by Senator Tom Connally of Texas to provide that such Court shall have no jurisdiction over disputes with regard to matters which are essentially within the domestic jurisdiction of the United States "as determined by the United States"; and

"Whereas there has been introduced in Congress, Senate Resolution 94, which has for its purpose the repeal of the Connally amendment, and

"Whereas we must never surrender the right and sovereignty of the United States of America to decide and determine its domestic and internal affairs and issues: Therefore be it

"Resolved, That the Supreme Council of the Knights of Columbus, in annual meeting assembled opposes the giving of the World Court any right, power, or jurisdiction to decide what are the domestic and what are the international issues and disputes of the United States of America, and favors the retention of the Connally amendment."

Sincerely yours,

LUKE E. HART,
Supreme Knight.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BENNETT:

S. 3925. A bill to grant certain oil and gas lessees a preference lease right upon revocation of Public Land Order No. 2199, dated August 29, 1960; to the Committee on Interior and Insular Affairs.

By Mr. MORSE:

S. 3926. A bill to prohibit discrimination on account of sex in the payment of wages by employers engaged in commerce or in operations affecting commerce, and to provide procedure for the collection of wages lost by employees by reason of any such discrimination; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

EQUAL PAY FOR EQUAL WORK

Mr. MORSE. Mr. President, for many years now I have at each session introduced a bill providing for equal pay for equal work for women. This year I have not introduced the bill. However, for the record I wish to introduce it today, although I am aware of the fact that nothing can be accomplished on it in the closing hours of this session. However, I want the record to be clear, and I therefore introduce the bill so that notice will be served that come next January it will be introduced immediately, and I shall press for action on it before the Committee on Labor and Public Welfare during the course of the session.

I wrote the opinion of the War Labor Board which sustained the majority decision of the War Labor Board during the war providing for equal pay for women so far as cases falling under the jurisdiction of the War Labor Board were concerned. The principle was sound then and, in my judgment, it has remained sound ever since. I am glad to have the record show that the Democratic Party in its platform has recognized the soundness of the principle and that it is one of the pledges the party has made to the Nation.

I ask unanimous consent that my bill may be received, appropriately referred, and printed at this point in the RECORD as a part of my remarks.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3926) to prohibit discrimination on account of sex in the payment of wages by employers engaged in commerce or in operations affecting commerce, and to provide procedure for the collection of wages lost by employees by reason of any such discrimination, introduced by Mr. MORSE, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Women's Equal Pay for Equal Work Act of 1960".

DECLARATION OF PURPOSE

SEC. 2. The Congress hereby finds that the existence in industries engaged in commerce or in operations affecting commerce of wage differentials based on sex—

(1) depresses wages and living standards of employees necessary for their health and efficiency;

(2) prevents the maximum utilization of the available labor resources;

(3) tends to cause labor disputes, thereby burdening, affecting, and obstructing commerce;

(4) burdens commerce and the free flow of goods in commerce; and

(5) constitutes an unfair method of competition.

DEFINITIONS

SEC. 3. When used in this Act—

(a) "Person" means an individual, partnership, association, corporation, business trust, legal representatives, or any organized group of persons.

(b) "Commerce" means trade, commerce, transportation, transmission, or communication among the several States or between any State and any place outside thereof.

(c) "Affecting commerce" means in commerce, or burdening or obstructing commerce or the free flow of commerce, or having led to or tending to lead to a labor dispute burdening or obstructing commerce or the free flow of commerce.

(d) "Employer" includes any person acting directly or indirectly in the interest of an employer in relation to an employee but shall not include the United States or any State or political subdivision of a State, or any labor organization (other than when acting as an employer), or anyone acting in the capacity of officer or agent of such labor organization.

(e) "Employee" includes any individual employed by an employer.

(f) "Wages" means all remuneration for services performed by an employee for an employer, including (1) board, lodging, or other facilities customarily furnished by an employer to his employees, and (2) any other benefit customarily provided by an employer to, for, or on behalf of his employees as an incident of their employment.

PROHIBITION OF WAGE RATE DIFFERENTIAL BASED ON SEX

SEC. 4. No employer engaged in commerce or in operations affecting commerce shall discriminate between employees on the basis of sex by paying to any employee wages lower than those which he pays to employees of the opposite sex for work of comparable character on jobs the performance of which requires comparable skills, except where such payment is made pursuant to a seniority or merit increase system which does not discriminate on the basis of sex.

ADMINISTRATION

SEC. 5. (a) The Secretary of Labor—

(1) shall prescribe such regulations as he deems necessary and appropriate for the administration of this Act, including regulations to provide standards for determining work of a comparable character on jobs the performance of which require comparable skills;

(2) may investigate and gather data regarding the wages, hours, and other conditions and practices of employment in any industry subject to this Act, and may enter and inspect such places and such records (and make such transcriptions thereof), question such employees, and investigate such facts, conditions, practices, and matters as he may deem necessary or appropriate to determine whether any person has violated any provision of this Act, or which may aid in the enforcement of the provisions of this Act;

(3) may enter and serve upon any employer found by the Secretary, after notice and hearing in conformity with sections 5, 6, 7, and 8 of the Administrative Procedure Act, to be engaged in or to have engaged in any violation of section 4 of this Act an order requiring such employer (A) to cease and desist from such violation, and (B) to pay to each employee who has been adversely affected a sum equal to the aggregate amount or value of the wages which such employee has been deprived by reason of such violation plus an additional equal amount as liquidated damages; and

(4) may enter and serve upon any employer found by the Secretary, after such notice and hearing, to have discharged or otherwise discriminated against any employee on account of any action taken by such employee to invoke, enforce, or assist in any manner in the enforcement of the provisions of section 4 of this Act, an order requiring such employer to reinstate such employee, or to remove such discrimination, and to pay to such employee a sum equal to the aggregate amount of value of the wages of which such employee has been deprived by reason of such discharge or other discrimination plus an additional equal amount as liquidated damages.

(b) For the purposes of any investigation conducted under paragraph (2) of section 5(a) of this Act, the provisions of sections 9 and 10 of the Federal Trade Commission Act (relating to the attendance of witnesses and the production of books, papers, and documents) (15 U.S.C. 49, 50), shall be applicable to the jurisdiction, powers, and duties of the Secretary of Labor.

(c) Any order entered by the Secretary of Labor pursuant to paragraph (3) or paragraph (4) of section 5(a) of this Act shall be subject to judicial review, and shall be enforced judicially, in the same manner and with the same effect as provided by section 5 of the Federal Trade Commission Act (15 U.S.C. 45) with respect to orders issued thereunder by the Federal Trade Commission, except that in any proceeding before any court for the review of any order issued under paragraph (3) or paragraph (4) of section 5(a) of this Act the findings of the

Secretary as to the facts shall be conclusive if supported by substantial evidence.

WAGE RESTITUTION

SEC. 6. (a) The Secretary of Labor is authorized to supervise the payment of any amounts for which any employer has been finally determined to be liable under any order for payment under clause (A) of paragraph (3) or paragraph (4) of section 5(a) of this Act. Any sum so recovered by the Secretary on behalf of any employee under this subsection shall be held in a special deposit account and shall be paid, on order of the Secretary, directly to the employee. Any such sum not paid to an employee because of inability to do so within a period of three years shall be covered into the Treasury as miscellaneous receipts.

(b) No wage restitution shall be made with respect to any violation of this Act for any period which preceded by more than four years the date of commencement by the Secretary of Labor of the proceeding in which such restitution is ordered.

INJUNCTIONS

SEC. 7. The district courts, together with the District Court for the Territory of Alaska, the United States District Court for the District of the Canal Zone, and the District Court of the Virgin Islands, shall have jurisdiction upon application made by the Secretary of Labor, for cause shown, to restrain any violation of section 4 of this Act. No court shall have jurisdiction, in any action brought by the Secretary of Labor to restrain any such violation, to order the payment to any employee of any wages of which such employee may be deprived by reason of such violation.

GOVERNMENT CONTRACTS

SEC. 8. (a) In any contract made and entered into by any executive department, independent establishment, or other agency or instrumentality of the United States, or by the District of Columbia, or by any corporation all of the stock of which is beneficially owned by the United States (all of which are referred to hereinafter as agencies of the United States), for the manufacture or furnishing of any materials, supplies, articles, or equipment, or the rendition of any service, there shall be included stipulations under which the contractor (1) is required to compensate all persons employed by him in the manufacture or furnishing of such materials, supplies, articles, or equipment, or in the rendition of such service, in conformity with the requirements of section 4 of this Act and (2) shall be subject to all other provisions of this Act with respect to the compensation of such persons.

(b) Unless the Secretary of Labor shall by order otherwise determine and permit, no contract shall be awarded by the United States or any agency thereof to any person finally determined to have violated any of the provisions of this Act or of any stipulation entered into in compliance with subsection (a) of this section, or to any firm, corporation, partnership, or association in which such person has a controlling interest, until three years have elapsed after the date of final determination that such violation has occurred. The Comptroller General is authorized and directed to distribute to all agencies of the United States a list containing the names of such persons.

POSTING

SEC. 9. Every employer subject to this Act shall keep a copy of this Act posted in a conspicuous place in or about the premises where any employee is employed. Employers shall be furnished copies of this Act by the United States Department of Labor on request without charge.

APPROPRIATION

SEC. 10. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

EFFECTIVE DATE

SEC. 11. This Act shall take effect one hundred and twenty days after the date of its enactment.

PROVISION OF A GOVERNMENT FOR AMERICAN SAMOA—AMENDMENT

Mr. LONG of Hawaii submitted an amendment, intended to be proposed by him, to the joint resolution (S.J. Res. 222) providing a government for American Samoa, which was referred to the Committee on Interior and Insular Affairs.

ORDER OF BUSINESS

Mr. JOHNSON of Texas. I shall now suggest the absence of a quorum.

Mr. MORSE. Mr. President, will the Senator from Texas withhold that suggestion until some insertions can be made in the RECORD? I believe that will save time.

Mr. JOHNSON of Texas. Yes.

Mr. President, I am so indebted to the Senator from Oregon for the great contribution he made last evening in connection with the Sugar Act and the expediting of the work of the Senate, that I want to express to him my appreciation. I think he and the minority leader [Mr. DIRKSEN] performed a great service for this country, which should long be remembered.

Mr. MORSE. I appreciate the kind words of the senior Senator from Texas; but I wish him to know that the obligation is quite the other way around. The senior Senator from Oregon will always be indebted to the senior Senator from Texas for his very great assistance on so many, many occasions and for his great inspiration here as the majority leader of the Senate.

Mr. President, I had prepared a series of speeches on a number of subjects, which I thought it might be necessary for me to deliver. However, I doubt that it will be necessary—although in case it should be, I can always recall them from the Public Printer.

However, to save time, I shall request the making of sundry insertions in the RECORD.

SENATOR CLARK'S PROPOSED AMENDMENTS OF THE SENATE RULES

Mr. MORSE. Mr. President, first, I ask unanimous consent to have printed at this point in the body of the RECORD an editorial entitled "Senator CLARK Versus the Majestic Ooze." The editorial was published on August 30 in the New York Herald Tribune. Despite the title of the editorial, Mr. President, its content for the most part is in commendation of the Senator from Pennsylvania for his proposals for modifications in the rules of the Senate.

Mr. President, proposals for those modifications have my complete endorsement and support. I have assured the Senator from Pennsylvania that I will stand shoulder to shoulder with him, next January, as he seeks to reform the rules of the Senate.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the N.Y. Herald Tribune of Aug. 30, 1960]

SENATOR CLARK VERSUS THE MAJESTIC OOZE

The U.S. Senate has its own venerable ways, sticky with tradition, of oozing majestically down its chosen legislative paths. Its procedural rules are hoary, the privileges of its Members jealously guarded, its progress as a result often maddeningly slow.

Senator CLARK, of Pennsylvania, has lately been offering a series of rules changes aimed at expediting its work. He hopes for action on them when the new Congress meets in January.

Carefully worded and wrapped with safeguards, they are not, on their face, radical changes. But they could have a radical effect on the course of Senate debates, and thus on the handling of the Nation's business.

One would allow a majority of the Senate to take action on any given matter, after 15 hours or more of debate, by voting to "move the previous question." In effect, this would be a flank attack on cloture eliminating the need for the cumbersome procedures of rule XXII. "It is my opinion," argues Senator CLARK, "that the Senate can no longer afford the luxury of unlimited debate, if we are to attend to the legislative business of the country."

Another far-reaching change would allow a Senator to raise a question of germaneness. At present, Senate debate wanders all over the woodlot and back. As an example, Senator CLARK computed that during 2 successive days of debate on the minimum wage bill 15 percent and 40 percent, respectively, of the total spoken time was devoted to the business officially at hand. The proposed change would not be a blanket requirement of germaneness, but it would allow a majority to keep the debate from being sidetracked by a garrulous minority.

A further change would make it no longer possible, as it is at present, for one Senator to block the meeting of all 16 standing committees and all 86 subcommittees of the Senate while the Senate is in session. Another would take away the power of one obstruction-minded Senator to insist on the wholly unnecessary and time-wasting reading of the preceding day's journal. A fifth, which we greet with less enthusiasm, would allow unmade speeches to be printed in the CONGRESSIONAL RECORD just as if they had been delivered to an empty chamber.

As Senator CLARK has pointed out, the only way the Senate has been able to work effectively under its present rules is by unanimous-consent agreements. And this is altogether too precarious a dependency for a body on whose action—or inaction—the fate of the Nation may turn.

Reserving the right to object, as a Senator, for parliamentary reasons, often says, we think Senator CLARK is on the right track.

PROBLEMS OF HUNGRY CHILDREN IN THE DISTRICT OF COLUMBIA

Mr. MORSE. Mr. President, I happen to be chairman of the Subcommittee on Public Health, Education, Welfare, and Safety, of the Committee on the District

of Columbia. As the Senate knows, since 1957 my subcommittee has been very much concerned with and interested in, and has conducted investigations upon the general subject of the problems of hungry children in the District of Columbia. These studies have led us, of course, into a consideration of some of the very serious slum conditions which exist in the District of Columbia, particularly among the Negro population.

As chairman of the Public Health, Education, Welfare, and Safety Subcommittee of the Senate Committee on the District of Columbia, I am particularly pleased to bring to the attention of Senators a report prepared by Miss Imogen Thompson, supervisor of the free elementary school lunch program. Miss Thompson, a professional social worker employed by the Department of Public Welfare, has presented a challenging analysis of the family structure and background of those children who are participating in the free school lunch program. As one who has been very concerned about the effect upon children of the disgraceful conditions bred by poverty in far too many homes in Washington, I am glad to learn from the report that, as of May 31, 1960, 2,843 children from 1,193 families were receiving in the elementary schools at least one square meal a day. I am also pleased to learn that the screening process as to eligibility resulted in only 97 children being taken from the program. That there was room for honest differences of opinion in these 97 cases is demonstrated, in my judgment, by the fact that 82 of the children discontinued from the program were from families receiving public assistance. Only 15 children from 8 nonpublic assistance families were disqualified.

These statistics indicate clearly to me that the doubts voiced by many, when the appropriations for this worthy free lunch program were before the Congress, to the effect that it would lead to abuse are baseless and unwarranted by the facts.

When only 15 children cut of almost 3,000 are screened from a program of this type, one-half of 1 percent, I do not believe that feared abuse has been demonstrated.

As a matter of fact, my present concern is that children who should be participating, may not be. When school opens next month, I hope that the teachers and principals will be alert to the signs and symptoms of the need for participation on the part of their pupils.

I shall look forward to receiving continuing reports upon the progress being made in this important area, because of my deep conviction that we fail in our responsibility if we fail to provide for children under our care and supervision.

The report also shows, in the analysis of the family structure, the existence of allied problems. There are detailed the difficulties faced in securing housing by large families and problems of poor health associated with economic deprivation. Much needs to be done in these areas. It is a reproach to each of us that we permit the continued existence of these remediable conditions.

Mr. President, I ask unanimous consent that the report to which I have alluded, be printed at this point in my remarks.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

REPORT OF THE DEPARTMENT OF PUBLIC WELFARE ON FREE ELEMENTARY SCHOOL LUNCH PROGRAM SEPTEMBER 29, 1959, THROUGH MAY 31, 1960

On September 22, 1959, the Board of Commissioners of the District of Columbia established the free elementary school lunch program under the joint direction of the Superintendent of Schools and the Director of Welfare. The responsibility of the schools was to determine initially which children would receive the free lunch and to provide the lunches. That of the Department of Welfare was to determine the continuing eligibility of the children to receive the free lunch and to provide services to the family to enable it to provide lunches through normal processes. The report which follows accounts for some of the activities and experiences of the Department of Public Welfare in carrying out its responsibility.

From the beginning of the program late in September, 1959, through May 31, 1960, the Department of Public Welfare completed investigations on 1,193 families involving 3,154 children for whom application for free elementary school lunch was made. Of these families, 324 were active with the Public Assistance Division, 27 with the Child Welfare Division, and 842 were not currently active with either agency.

The findings of these investigations resulted in the recommendation for continuance of free lunches for 2,843 children in 1,079 families and discontinuance of lunches for 97 in 47 families (82 children in 39 public assistance cases, and 15 children in 8 nonpublic assistance cases). The primary reason for discontinuance was a change in the family situation. For example, a parent who had been incapacitated was now able to be back at work; a parent who had been unemployed had found work; or a mother who had been ill was now sufficiently recovered to do some housework and prepare three meals a day for her family. A few families who had no change in the home situation, were helped to see how they could provide good lunches for their children.

Additionally, for children in 67 families, no recommendation was made because children had moved to another area, where the school lunch program was not available.

In their investigations, the social workers discovered that many of these families have extremely poor housing, low standards of housekeeping and personal care, poor health, undesirable leisure-time activities and many marital problems, as well as behavior problems in children which seem to result from the family situation.

Most of these families were not receiving help from social agencies, with the exception of services given by the welfare department's social workers of the free elementary school lunch program, although there is need of this, if such services were available. Many seem cut off and isolated from community life other than that of their immediate neighborhoods. Some live a hand-to-mouth existence, literally not knowing when the next meal will be or where they will be living next year or month.

Many of these people have no connection of any kind with churches and for some, if they go at all, children are "sent" to Sunday school rather than accompanied by parents. This lack of religious affiliation means that one of the primary sources of moral teaching is closed off from some who need it most. Families have volunteered various reasons for not being able to attend church services. Often the families feel they do not have the proper clothing for presentable appearance in church. If carfare is necessary to reach church, this money is used instead for food.

There is a noticeable lack of family unity. Seldom do members of a family join together in participating in any activities. There are comparatively few homes where the family joins in a meal together at a table. It has been obvious in many instances that this could not take place since there was only one small table and a limit of two or three chairs.

There is very little long-range planning of meals. Usually, food is purchased from day to day as needed. In a few instances, breakfast was treated as an important meal while in other families the children simply "grab" anything they can find, perhaps food left over from the night before. One mother who was in the last uncomfortable stages of pregnancy sent her 4-year-old out to the neighborhood store for food. The older children had gone to school without breakfast and at 9:30 a.m., this pregnant mother and her three preschool age children were going to have peanut butter sandwiches for breakfast. Diets are generally starchy. Meat is not found regularly in menus and, if used, the cheapest possible cuts are purchased. Fruits are generally found too expensive and are only purchased where there is an overabundance on the market and the price is low. Vegetables are usually greens of one kind or another. Desserts are a rarity.

The economic problems of these families are tremendous. For the most part, rents are excessively high, except in National Capital Housing Authority units, for extremely poor housing, and household equipment is equally poor. In fact, housing is one of the major problems, especially for the large families where overcrowding is the rule, not the exception. As is the usual case, families with many children suffer most since the cost of adequate housing is prohibitive. In many instances, the wage earner is making as much as he or she can, with respect to work-experience, age, natural ability, and education. Many large families have parents in the 27–34 year age range, which adds to the problems the possibility of even more children and increased financial burden.

A considerable number of older employable children and unwed mothers are depending on one or both parents to provide for them. Most of these parents have small incomes and are usually not able to meet their own needs adequately, even without the burden of their older children.

Some of the families, especially the larger ones, seem surprisingly stable. This does not mean that things are, or have been good, but rather that the families have been able to hold together through very bad times. However, even in these families there were signs that indicated possible trouble in the future, particularly with young children. There is need for service to them now which might forestall future family and personal disintegration.

The brightest spot in the entire picture has been the acceptance by these families of the social worker and the genuine appreciation the mothers have expressed at the opportunity to discuss their situations, regardless of whether or not any tangible help might be forthcoming. Some mothers observed that since their children have been receiving school lunches, they have seemed

much more alert and energetic. Other mothers said that the adequate lunches served have sharpened their children's appetites for the evening meal. Still others have noticed that their children are learning about sitting at a table throughout an entire meal rather than wandering about at the slightest provocation. With the families interviewed thus far, the lunches are meeting a real need and in some instances, they are the only well-balanced meal the children receive in a day.

Staff social workers continue to work with a few of these families, when they have time, and refer them to appropriate social work and other agencies when indicated. If the staff were able to visit a larger proportion of the families more than once, it is probable they would find more situations which need agency service.

The following two cases may help to illustrate the type of service needed by many of these families.

Case A: When visiting the N family in connection with the application for free elementary school lunch for Billy, age 7, our worker observed his twin brother, Tommy, who can neither walk nor talk. Although the family has lived here several years, Mrs. N had never taken the children to clinics. Even the school did not know that Billy had a retarded twin brother. The department of public welfare social worker arranged a diagnostic examination at the Gale School Clinic for Retarded Children. Mrs. N was most cooperative, and took responsibility in taking the retarded child to various clinics for various tests, as directed, and was meticulous in keeping appointments. She takes excellent care of Tommy and is anxious to keep him with her. The clinic plans to give continuing service to this family, and approves of the mother's plan to keep Tommy at home. At least, for the time being, with supportive help from the clinic, Tommy will be better off at home than in an institution, and the cost of care, obviously, will be considerably less.

Case B: Mr. and Mrs. B ages 33 and 28 are the parents of 10 children. Five of these are of school age and receive free school lunches. Both parents have had little formal education. They have shown a genuine love for their children and are trying very hard within their limitations to give their children a good home. Mr. B has been employed by a nearby county refuse department for 12 years. He feels very secure in this job. While he might earn more as a construction worker, he feels the problem of bad weather limiting his income would be a risk too great to undertake.

The B's exemplify many of our family situations which will continue to require school lunches for many years. The added supplementation of lunches works in a positive direction. The children are in need of this added food in order to maintain good health and the parents in turn need this help in order to met other necessities. Obviously, there are other services in the community which are also necessary in helping, i.e., nursing service, clinics, clothing depots, and settlement houses. In receiving these services and the support of the community, the B's are able to keep their family together giving them the love and emotional security which will in turn help the children to become productive and useful citizens.

Families, at times, recognize problems but do not know where to turn for help. A case in point is that of a childless couple which has cared for an orphaned 9-year-old girl most of her life. The couple realized the importance and emotional value of adoption for this child and for themselves, but with limited income did not believe they could pay an attorney to handle the case. The social worker arranged for them to go to the Legal Aid Bureau to receive the needed help.

Many young children are left unattended in their homes, while the parents go out to work. In one family, where the mother had deserted, the father had two school age children take turns staying home from school to care for the preschool age children.

Some mothers have told of their discouraging court experiences. Fathers will refuse to accept family responsibility, or will often mistreat a wife to the point of requiring a court hearing. In some instances enough of an impression is made so that the home situation is somewhat better for a few weeks. Other fathers are only made more angry and do less for the family. It might be helpful if some followup arrangement could be made in order to help these fathers understand the importance of their family responsibilities.

We must not lose sight of the importance of keeping families together, and giving them whatever supportive help is necessary in order that they may be able to rear their children in a healthy environment to be useful citizens in the years to come. Many parents, whose lives and homes seem quite desolate in many respects, still are able to give their children the feeling of being wanted and loved, at least part of the time. This must be encouraged in every possible way. The whole community—churches, civic groups, in fact everyone—has a responsibility in this.

Because work with most of these families has to be of an aggressive nature in which the social worker visits the home rather than waiting for the client to keep an appointment, it is important that a social worker be as accessible to them as possible, hopefully with an office base somewhere in the neighborhood in which the family lives, such as in a school, settlement house, housing development, etc., where the families could reach her. Many mothers are not able to leave their small children to go across town to keep an appointment with a social worker, although they could go a block or so down the street if a social worker was there.

FAMILIES OF CHILDREN RECEIVING FREE SCHOOL LUNCHES—A STATISTICAL SUMMARY

Children in 1,079 families were recommended for continued participation in the free school lunch program during the past school year. Below is presented a statistical summary of some social and economic characteristics of these families.

On the whole, these were large families. The average number per family was 7.2 persons for families not receiving public assistance, and 6.3 for families receiving public assistance. These figures are substantially larger than the average number of persons in an ADC family, which was 4.6 in April 1960.

The total number of children for whom continuance of free lunches was recommended was 2,843, an average of 2.6 per family. This average was substantially the same for families receiving assistance and for those who were not.

Employment was regular for 50 percent of the families; intermittent for 11 percent, and seasonal for 2 percent. In 37 percent, there was no employment at the time the families were interviewed. This includes public assistance family in which no wage earner was in the home.

Both parents were working in 5 percent of the cases. The father was the wage earner in 37 percent of the families, the mother in 16 percent, and some person other than the parent in 6 percent.

The median monthly income of all families was $225, for families not receiving public assistance $233, and for families receiving public assistance $191.

Some significant differences between the families receiving assistance and those not receiving it were:

1. Both parents were in the home in 61 percent of families not receiving public assistance but in only 19 percent of families receiving assistance.

2. Overcrowding was evident for families receiving assistance as well as for those who were not. However a substantially larger percentage, 59 percent, of families not receiving public assistance were living under such overcrowded conditions in comparison with 43 percent of families receiving public assistance.

3. Poor management of family income was recorded as a major problem in 40 percent of families receiving public assistance but in only 14 percent of families not receiving public assistance.

4. Poor health of child or children was considered to be a major problem in 21 percent of families not receiving assistance but in only 13 percent of families receiving public assistance. Poor health of adult members was recorded in about the same percentage for both groups—35 and 33 percent, respectively.

5. The problems of alcoholism and lack of parental interest were recorded for a slightly higher percentage of families not receiving public assistance than for those who were.

FREE ELEMENTARY SCHOOL LUNCH PROGRAM

TABLE 1.—*Families interviewed for free school lunch: Action recommended, public assistance status and color*

THE REPUBLICAN PLATFORM AND FOREST CONSERVATION

Mr. MORSE. Mr. President, if the Republican platform plank on forestry is an example of the material used to construct the rest of the platform, the whole structure is doomed to topple because it is made of rotten wood.

The Republican forestry plank was sawn from a cull log by a mill noted for its mismanufacture of its products.

I ask unanimous consent that the pertinent portions of the platform be printed.

There being no objection, the extracts were ordered to be printed in the RECORD, as follows:

A strong and growing economy requires vigorous and persistent attention to wise conservation and sound development of all our resources. Teamwork between Federal, State, and private entities is essential and should be continued. It has resulted in sustained conservation and resource development programs on a scale unmatched in our history.

It is clear, also, in the results of continuing administration-encouraged forest management practices which have brought, for the first time, a favorable balance between the growth and cutting of America's trees.

We pledge continued forestry conservation with appropriate sustained yield harvesting, thus increasing jobs for people and increasing revenue.

Mr. MORSE. Mr. President, first I would like to deal with the Republican claim that their practices have brought, for the first time, a favorable balance between the growth and cutting of America's trees.

I shall demonstrate, first, that a balance occurred prior to the year 1953, and secondly that it does not mean a thing.

After over 6 years of extended work, in 1958, the U.S. Forest Service published a 700-page compendium entitled "Timber Resources for America's Future"—Forest Resource Report No. 14, January 1958.

On page 56 of the forest resource report, table 32, is headed "Growth and cut by softwood and hardwood, and by section, 1952."

I call attention to the year. It is not 1953. It is 1952, so we know that this table is going to tell us what the condition was in 1952. I also point out that anyone with even a slight knowledge of forestry knows that trees take years to grow and a favorable or unfavorable balance between growth and cut cannot be obtained by action taken in 1 year. So if there was a favorable balance in 1952 in a significant amount, it probably existed in 1951 and possibly even in 1950.

The table on page 56 shows our wood growth and cut by growing stock which is all timber over 5 inches in diameter and is computed in cubic feet. It also shows growth and cut for live sawtimber which is all timber over 9 inches in diameter for eastern softwoods, 11 inches for hardwoods, and 10 inches for western softwoods and is computed in board feet.

For growing stock overall there was a growth of 14.24 billion cubic feet in 1952 and a cut of 10.76 billion cubic feet. Overall growth in 1952 was 1.32 times cut and thus in balance. I also point out for hardwoods the growth was 2.21 times the cut, while for softwoods—of which we consume twice as much—the reverse was true; growth of softwoods was but 93 percent of cut.

The overall sawtimber growth-cut ratio was 98 to 100—with hardwood sawtimber growth 1.58 times the cut but softwood sawtimber growth only 77 percent of cut. On one thin, meaningless statistic hangs the absurd Republican claim that there is a favorable balance between the growth and cutting of America's trees.

The Democratic Party has not claimed that due to its policies, for the first time the growth and cutting of America's trees is in favorable balance. Why has it not?

The answer is plain. The technical experts on forestry say that "overall growth-cut comparisons have little significance."

I ask unanimous consent that the pertinent portions setting forth this position in "Timber for America's Future," pages 55–56, and table 36 be printed at this point in my remarks.

There being no objection, the extracts were ordered to be printed in the RECORD, as follows:

OVERALL GROWTH-CUT COMPARISONS HAVE LITTLE SIGNIFICANCE

One of the most natural comparisons to make in attempting to appraise in simplified terms the complex timber situation is to determine whether growth exceeds, or is less than, cut. Total growth has been compared frequently with total cut in the past by interested groups including the Forest Service, but this is gross oversimplification and unless carefully qualified and explained may well mislead the reader or conceal important relations.

There are four main reasons why an overall growth-cut relationship has relatively little significance:

1. The mature old-growth forests of the West are still being cut. These forests show little net growth, but heavy volumes. Until these old-growth areas are harvested and replaced by new second-growth forests, it can be expected that cut will continue to exceed growth in the West. To incorporate this unusual growth-cut relationship into overall national figures would be inappropriate.

2. Growth-cut relationships between hardwoods and softwoods are significantly different and softwood and hardwood species are not generally interchangeable in their merchantability and utility. In overall comparisons adverse softwood relationships may be overbalanced by favorable hardwood relationships, thus concealing softwood deficits.

3. Equally important or perhaps more important than whether growth exceeds, or is less than, cut is the level at which such relationship occurs. In other words, a balance between growth and cut at 1952 levels is of little significance if future requirements will bring a demand for cut (and growth to meet it) at much higher levels.

To carry the illustration to an extreme, there would be a balance between growth and cut if there were no growth and no cut. A balance is not significant unless it is at a sufficiently high level to meet the country's needs. As is shown later, growth needs to increase greatly over present levels in order to meet projected demand.

4. Growth-cut relationships are frequently different depending on whether they are expressed in terms of sawtimber or growing stock. Usually growing-stock growth-cut ratios are more favorable than those for sawtimber. In other words, growth-cut ratios are better when merchantable trees of all sizes are considered than when consideration is given only to the larger and generally higher quality trees. So long as most of the cut comes from sawtimber (84 percent), whereas growth is more equally distributed among the large and the small trees, the tendency is for timber to decline in average size. In this situation, an excess of growing-stock growth over cut will appear when sawtimber growth and cut are no more than in balance. If sawtimber ratios are favorable, growing-stock ratios are likely to be even more so; but a favorable growing-stock ratio may be misleading if the sawtimber relations are not also considered. That is why growth-cut information for sawtimber is more significant than that for growing stock.

In view of the above qualifications, the more significant growth-cut comparisons—although all are deficient with respect to the question of whether they are at adequate levels—are those pertaining to eastern softwood and eastern hardwood sawtimber, and by these groups for the North and the South. Growth-cut ratios for western species have little meaning.

TABLE 36.—*Growth and cut by softwood and hardwood, and by section, 1952*

Species group and section	Growing stock			Live sawtimber		
	Growth	Cut	Ratio of growth to cut [1]	Growth	Cut	Ratio of growth to cut [1]
	Billion cu. ft.	*Billion cu. ft.*		*Billion bd. ft.*	*Billion bd. ft.*	
Softwood:						
North	0.82	0.70	1.17	2.47	2.37	1.04
South	3.56	3.05	1.17	14.50	11.72	1.24
West and coastal Alaska	2.63	3.74	.70	11.04	22.46	.49
Total	7.01	7.49	.93	28.01	36.55	.77
Hardwood:						
North	3.84	1.24	3.10	9.60	4.33	2.21
South	3.24	2.01	1.62	9.52	7.88	1.21
West and coastal Alaska	.15	.02	6.48	.27	.08	3.31
Total	7.23	3.27	2.21	19.39	12.29	1.58

[1] Ratios computed before rounding.

Mr. MORSE. Mr. President, while the claim that overall growth and cut are in balance could have been made for 1952, the fact remains that it is meaningless. I know of no other reports which have been published by the United States Forest Service which lend any credence to the Republican contention that a favorable overall balance between timber occurred for the first time during the Eisenhower administration's tenure. I also point out again that in 1958 the Forest Service said any such comparison has little significance.

What is our real timber situation? The Forest Service published 22 highlights of our timber situation on pages 102–109 of their report. I shall list the headings because they show the facts in a striking manner:

First. "Continued Expansion of the Nation's Economy Is Expected."

Second. "Potential Demand for Timber Products Is Strikingly Upward."

Third. "The United States Must Continue to Rely Chiefly on Domestic Timber Resources."

Fourth. "The Nation Has no Surplus of Commercial Forest Land."

Fifth. "One-fourth of the Forest Land Is Poorly Stocked or Nonstocked."

Sixth. "Three-fourths of the Forest Land Is in the East, but Two-thirds of the Sawtimber Volume Is in the West."

Seventh. "Total Timber Volumes are About the Same as in 1945."

Eighth. "Heavy Reliance is Placed on a Small Group of Species."

Ninth. "Timber Quality Is Declining."

Twentieth. "Growth Needed To Sustain Future Timber Demands Is Much Greater Than 1952 Growth."

Twenty-first. "Projected Growth Is Far Short of Needs."

Twenty-second. "The Overall Outlook."

For point 22, I ask unanimous consent that the entire section be printed at this point.

There being no objection, the section was ordered to be printed in the RECORD, as follows:

22. THE OVERALL OUTLOOK

1. The Nation's need for timber to supply demands of a growing population will be strikingly greater than today or at any time in the past. If per capita use of timber products increases only 4 percent by 2000 as indicated by medium projections of demand, total wood consumption will be 83 percent greater than in 1952, primarily because of an estimated 75-percent increase in population. There is the potential to meet that need if forestry knowledge and skills are applied promptly and with utmost vigor and determination.

2. There is sufficient standing timber, plus what will be grown, to supply either medium or lower timber demands each year until 2000. This cannot be done, however, without serious adverse impacts on timber inventories and growth unless there are much more rapid advancements in forestry than indicated by recent trends.

3. There is no timber famine in the offing, but some shortages can be expected, especially of softwood sawtimber of the preferred species and grades, and especially after 1975. There is no danger of timber becoming a surplus crop.

4. Prompt and very substantial expansion and intensification of forestry in the United States is necessary if timber shortages are to be avoided by 2000. This is due to increases in future timber demands over present consumption—largely because of expected expansion of the population rather than increases in per capita demand. The necessary intensification in forestry will have to be in addition to what could be expected by extending the trends in forestry improvements of recent years. This acceleration in forestry will have to come soon, and very largely within the next two decades, because otherwise it will be too late for the effects to be felt by 2000. The degree of forestry intensification needed is much larger and far greater than the general public or most experts are believed to have visualized.

5. If there is a 15-percent reduction in sawtimber consumption per capita and if there could be a drastic switch in the consumption pattern from softwoods to hardwoods, timber removal and growth could be kept in balance after 1975 even if there is no intensification of forestry beyond recent trends.

6. The American people may find themselves getting along with somewhat less timber than would be needed to meet medium projected timber demand, and there may be a rise in the price of timber products in relation to competing materials.

7. The effects, if they occur, of not meeting timber demands, of growth deficiencies, of shortages in some softwood species, sizes, and grades, and rises in relative price probably will not be felt very much until after 1975.

8. Much progress has been made in forestry in recent years. The undesirable effects of not meeting timber demand and of rising prices need not occur if the American people achieve within the next few years a degree of forestry on all commercial forest land roughly equivalent to that which is practiced today on the better managed lands.

Forestry is not a short-time proposition. Where this Nation stands in timber supply in the year 2000 will depend largely on actions taken during the next two decades. Recent encouraging forestry trends must continue. But this is not enough. Acceleration of these trends is vital, and to a degree that will startle many of us. There

are no grounds for complacency. If the timber resources of the Nation are to be reasonably abundant at the end of the century and if our children and their children are to enjoy the same timber abundance that we ourselves know, standards and sights must be raised. The potential of the land is adequate. The opportunity is there.

Mr. MORSE. Mr. President, I think the record speaks for itself. What has the Republican administration done to hinder private forestry? It has attempted to eliminate from the budget funds provided by the Clarke-McNary Act for Federal-State cooperative tree planting and forest management. This was in the fiscal year 1955 budget. For fiscal 1961, it has cut back cooperative tree planting funds to two-thirds of the amount available in 1952.

The administration attempted to cut back the funds for cooperative firefighting assistance to the States in fiscal 1955 and 1956.

Here is an interesting item appearing in the Republican policy statement:

Teamwork between Federal, State, and private entities is essential and should be continued.

It was a Democratic Congress in 1943 which revised the Internal Revenue Tax Code to provide legislation designed to aid timber companies in the practice of forestry. Some tax experts say the aid was not justified. The timber companies say it is. I do not seek at this time to pass judgment, but to my knowledge it is the only Federal tax relief for forestry purposes afforded timber companies. It occurred under a Democratic administration with a Democratic Congress. I do not know of one Republican-initiated measure to aid private forestry that has become law in the last 8 years. These 8 years have been used by the Republican administration to try to destroy the forest policies developed by the great Republican Senator Charles L. McNary.

Turning to public forestry on our national forests, the situation is the same.

Secretary Benson's vaunted "Program for the National Forests," submitted in 1959, is a classic example of the Republican substitution of talk for action. Secretary Benson said he was going to start this program in fiscal year 1961 with a $41.3 million increase in fund requests. The Congress thought so well of the program that it acted ahead of the Benson schedule, and over his protest, to provide in excess of $10 million in fiscal year 1960 to advance the program 1 year with 25 percent of the needed increase.

The fiscal year 1961 Eisenhower-Nixon-Benson budget was $18.5 million short of the needed money outlined by Mr. Benson just 1 year ago. Congress added an additional $4.5 million to this budget request.

The Senator from Wyoming [Mr. McGEE] published tables in the RECORD on June 8 which show that in the period fiscal years 1955–61 the Republican budget requests for the national forests have totaled over $150 million below Forest Service estimates of needs. Congress has added $37.5 million to these inadequate requests. The Republican budget for the national forests for fiscal year 1961 proposed only sufficient money for 42.7 percent of the maximum funds needed for the "Program for the National Forests."

On forest development roads, four times this administration has opposed increases in the authorization. Four times Congress has made increases from $24 million in the 83d Congress to $40 million in the 86th Congress. Four times the Republican administration has opposed an increased authorization for forest highways. Congress had raised the authorization from $22.5 million in the 83d Congress to $33 million in the 86th Congress.

By excessive reliance on timber purchasers for forest development road construction on national forest timber sales, this administration has reduced national forest revenues by close to $260 million in the period of fiscal 1953–61. This has had the effect of denying the 682 national forest land counties $65 million in payments in lieu of taxes prescribed by law for public schools and public roads. This is but one of many examples of how this administration has disregarded its responsibilities. In 1953, its first year in power, the counties lost $2.5 million. This is double the average annual losses in the 1940–52 era. By fiscal year 1961 the annual county school and road losses had climbed to almost $12 million.

With its misguided policies for the national forests this administration even manages to damage local government.

During its 8 years in power this administration has done less about reducing the backlog of national forest lands needing reforestation than any national administration since Coolidge's.

Franklin D. Roosevelt reduced the backlog of national forest lands needing reforestation by 223,000 acres in 1 year. This is almost as much as this Republican administration has done in 8 years.

The acid test is not whether one administration did more than its predecessor. The test of history is, Did this administration fulfill its obligation to America's future?

By any measure you wish to apply, the Eisenhower-Nixon-Benson administration has failed to meet its obligations to future generations.

By using the misleading and insignificant fact that timber cut and growth is technically in balance, the Republican Party trys to create the illusion that all is well in our forests.

It is the future that counts, not the past—the Republican Party was conceived in the past. It lives in the past. The Republican Party does not know how to honor an obligation to the future of America.

In 1950, Lyle Watts, then Chief of the Forest Service, said:

Our generation has an obligation to the next, to use its resources wisely and not hand our children a depleted, wornout country.

In 1958, Dr. Richard McArdle, the present Chief of the Forest Service, said:

Within the next 10 years 48 billion trees need to be planted, mainly on small ownerships, if the wood requirements of a larger population are to be met by the year 2000.

In 1960, in testimony before the Senate Appropriations Committee, Chief McArdle, speaking of the national forests, said:

I am very unhappy with the progress we are making in reforesting the more than 4 million acres in the national forest system which should be planted. They are not producing timber they should produce. They are not serving watersheds. They are not serving recreational purposes. They are not serving the public in any way that they should. This is not the kind of statement I would like to make to you, Senator, or to this committee; but you asked me my opinion, and I am telling it to you frankly.

Mr. President, if a homebuilder put a plank in an FHA-insured house of as low a quality as this Republican platform plank, even under this administration, it would fail the FHA inspection.

The Republican forestry plank fails the American people.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. MANSFIELD:

Address entitled "Some Aspects of American Foreign Policy," delivered by Senator FULBRIGHT before American Bar Association, Washington, D.C., on September 1, 1960.

By Mr. FONG:

Letter written by him, addressed to the Honorable FRANCIS E. WALTER, chairman, Immigration and Nationality Subcommittee, House of Representatives, relating to discrimination against the peoples of Asia in immigration matters.

FUNDS FOR FIRE PREVENTION

Mr. MORSE. Mr. President, I have received a telegram dated August 30 from Mr. Howard Miller, president of Harney County Stockgrowers, Burns, Oreg., in which he alludes to the importance of undertaking the reseeding of burned-over rangelands.

For 8 long years this administration has opposed adequate funds for fire prevention. It has opposed adequate funds for natural resource development. It has opposed adequate funds for range rehabilitation.

The people are becoming aware of these facts as this year's critical fire season exposes the inadequacy of our defenses against forest fires.

I am sure that administration apologists will be able to conjur up some figures to show that these have been the best 8 years for conservation. They can recite ritual to the effect that anyone who criticizes the Republican record on conservation does not serve the national interest.

The facts speak for themselves. Year after year Congress has had to restore national resource program cuts or try to increase inadequate budget requests. For 8 years the Democrats have had their hands full just trying to keep the conservation ship from floundering on the shoals of indifference. It is time for

the Nation to select a new captain who understands conservation and wise use of our national resources.

The record of the Democratic Congress clearly shows that our party has such leadership.

I ask unanimous consent that the telegram to which I have referred be printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

BURNS, OREG.,
August 30, 1960.

Senator WAYNE MORSE,
U.S. Senate, Washington, D.C.:

Range fires burned 40,000 acres Harney County of which 30,000 acres Federal lands. Imperative emergency funds be made available to 7,000 acres BLM lands. Conservation of soil necessary. Seeding should start early September. Your assistance needed. Thanks,

HOWARD MILLER,
President, Harney County Stockgrowers.

CONVEYANCE OF CERTAIN PROPERTY TO THE STATE OF HAWAII

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the RECORD my reasons for opposing the transfer, without compensation, of certain land in Hawaii. I imagine that the bill for that purpose will be introduced again in the next session of Congress. I hope that in the interval the two Senators from Hawaii will talk to their constituents about it, because this bill violates the Morse formula.

There are many Senators who have had similar land transfers who have accommodated themselves to the Morse formula. Just the other day the Senator from Kentucky [Mr. COOPER] accepted the Morse formula in regard to a somewhat similar transfer in Kentucky. I hope that when the Senators from Hawaii come back next January it will not be necessary for me to object to the bill again, but that the Morse formula will have been written into it when it is introduced at that time.

The PRESIDING OFFICER. Is there objection to the request?

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MORSE

S. 3269 would authorize the Secretary of the Navy to convey, without consideration, a roadway consisting of approximately 33 acres to the State of Hawaii. Report No. 1859 on this bill indicates that the Government acquired the property in question in 1945 by condemnation at a cost of approximately $13,000 for the purpose of servicing various naval storage facilities.

The Department of the Navy is now studying the legal question of whether the roadway could be conveyed to Hawaii pursuant to section 5(e) of the Hawaii Statehood Act (Public Law 86-3). Such a determination has not yet been made.

In view of the fact that this roadway would be conveyed to the State for public purposes, a payment of 50 percent of fair market value should be made. An amendment to achieve that purpose is attached.

"On the first page, lines 5 and 6, strike out 'convey by quitclaim deed, without consideration,' and insert in lieu thereof 'and in return for the payment of an amount equal to 50 per centum of the market value of property conveyed as determined by the Secretary after appraisal, convey by quitclaim deed'.

THE PENNSYLVANIA RAILROAD STRIKE

Mr. WILLIAMS of Delaware. Mr. President, last night I made a statement concerning the seriousness of the threatened strike on the Pennsylvania Railroad. I am confident that all the Members of the Congress, both in the House and the Senate, recognize the seriousness of this situation. There is a question as to whether or not there are adequate laws whereby the Government can stop this strike if it is not agreeably settled between labor and management. I feel that the majority and minority leaders should confer with the executive branch to see whether or not there are adequate laws with which the administration can handle this situation, which is unquestionably a national emergency. If there are not adequate tools to deal with this problem, then Congress should stay in session and enact legislation with which to deal with it.

I am not taking any position with reference to the merits of the dispute as between management or labor. I do not think it is a question only of whether management or labor is right. The public interest goes beyond that of either labor or management. The interest of the general public is paramount. I do not think that, in the interest of the welfare of the American public, we can sit idly by and have the largest railroad system in this country shut down, with the resultant chaotic conditions.

The time to take action is now and not after the damage has been done.

Down in my area, the Delmarva Peninsula is supplied by this one railroad. There are several hundred carloads a day of feed that are needed to feed our poultry and animals, because it is an area that is deficient in the production of feed grains. It is impossible to move those feed grains from the Midwest by truck. We all know what will happen if the strike is not settled and the railroad is shut down. In New York, Philadelphia and other eastern Pennsylvania cities, the delivery of food supplies will be disrupted. This is a situation which should be dealt with before Congress adjourns and it is my understanding there is a serious question as to whether or not we have adequate laws to cope with the situation.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. JAVITS. I, too, wish to make some remarks on this subject this morning. When collective bargaining breaks down, as the Senator from Delaware has so properly noted, the public interest steps in. In the steel strike the President appointed a group to make findings of fact, and the prestige of the President was therefore thrown into the fray to settle the strike. Public opinion is the one thing which speaks out, but public opinion has to be expressed in order to make itself heard. Therefore, as the Senator from Delaware has suggested, additional law is needed, we should not go home until we enact it.

Secondly, I hope the President of the United States will now give his attention to the very grave emergency, in order to set into motion some factfinding machinery that will bring about a settlement of the strike. We know it is a time for statesmanship by labor and management, but we also know it is public opinion which is necessary in order to bring the matter to a point where it can be settled. I have suggested one way, and the Senator from Delaware has suggested another.

Mr. WILLIAMS of Delaware. I thank the Senator from New York. I hope labor and management will get together and agree to keep the railroad running pending a final settlement. While it is not a public utility, the Pennsylvania Railroad has a monopoly on transportation in our area, and both labor and management have a responsibility to the general public.

Mr. FREAR. Mr. President, the crisis in the Congo and in other areas of the world should make the country awake to its responsibilities to conditions here and to the strike on the Pennsylvania Railroad. It is incumbent on us to seek a settlement which is fair to labor and management. We should not condone, but correct.

TRIBUTES TO LEADERSHIP, SENATORS, AND STAFF MEMBERS

Mr. FREAR. Mr. President, this could conceivably be my last day in the Senate as a Member of this body. I certainly hope it is not. Should that misfortune come to me, I wish to express before I leave my great admiration for the leader of our side of the aisle, Senator LYNDON JOHNSON, and for the leader on the other side of the aisle, Senator EVERETT DIRKSEN, plus the two men who have very ably assisted them, Senator MIKE MANSFIELD and Senator TOM KUCHEL. I think there has been no time I have gone to any of them and been denied a reasonable request. They have been cooperative not only with me but, in my observation, with all the other Members of the Senate. They deserve praise, not criticism.

Mr. President, I also wish to state that the staff members who have been working on this floor have been most cordial, most cooperative, and always at one's service. To them I express my sincere thanks and appreciation.

I observe the chairmen of the two major committees on which I serve are on the floor today, Senator BYRD of Virginia, and Senator ROBERTSON, of Virginia. There have been times, Mr. President, during my tenure in the Senate, when agreement was not always had between the chairman of a committee and the junior Senator from Delaware, but nevertheless these Senators have always given me my day in court. They have given me the permission to talk, sometimes at more length than I deserved. They have at no time denied a reasonable request.

Senator BIBLE, of Nevada, the chairman of the District of Columbia Committee, is not on the floor now, but he also has been a very good friend of mine and has worked hard for the people of the District of Columbia although they are not his constituents.

Mr. President, we have had a long session. We have probably set a record on yea-and-nay votes. This has been a session which has challenged every Member of the Senate. It has been one which has been interesting not only for us but also for the people.

I agree with the leadership that it is time we go back to our States. This is probably the day we shall go.

In conclusion, I express again my sincere thanks to all of those with whom I have had contact during these 12 years of delightful service as a Member of the U.S. Senate.

CIVIL RIGHTS AND RULE XXII

Mr. JAVITS. Mr. President, this will probably be the final day of this session of Congress. I simply wish to say a word in explanation about what may have seemed to some Members of the Senate to be a rather undue insistence on my part, in constantly bringing before the Senate the civil rights issue.

I point out that there is now on the calendar, under the heading of "Resolutions and Motions Over Under the Rule," Senate Resolution 386, which I submitted, a resolution discharging the Committee on the Judiciary from further consideration of S. 958, relative to school desegregation programs.

Mr. President, my aim was to pictorialize and to place before the leadership in the Senate an opportunity for dealing with and bringing up civil rights legislation. That aim has been realized in these last days of the session, which I thought was perfectly appropriate, by the resolution which is on the calendar.

My purposes in so doing have been twofold. First, I wished to emphasize the fact that this issue deserves to rank with equal priority with any other issue on which we have acted in this brief session or on which we have failed to act, be it minimum wage legislation, health care for the aged, or ratification of the Antarctic Treaty. Second, I wished to emphasize to the Senate a point which will come up early next year, which I should like to make my closing subject upon this issue to the Senate.

We are bound to have, in the atmosphere we face today, grave difficulties and serious disorders in parts of the South today. When one fails to give tongue, when one fails to give an opportunity for expression, to the deeply held frustrations and the deeply held beliefs of difficulties people feel they experience, Mr. President, one is bound to have what results from any suppression, which is some kind of an outbreak in an extra legal way.

Mr. President, the whole purpose of people like myself in asking for debate and consideration and a fair appraisal of important legislation in this field is to give tongue to what man's aspirations require.

Mr. President, I have been pressing for action with respect to the school desegregation issue. Is it not much better that whatever is done in that field shall be done under governmental auspices, with an outlet for what the law requires in an orderly and considered way—indeed, in a moderate way—than that people should feel somehow or other they must take the law in their own hands, since they cannot get anywhere any other way? This has been the experience of government for centuries.

I thought it might be well to put the matter in focus as this short session comes to a close, in which session we have done nothing about the problem, notwithstanding the state of tension which exists in such an important and valued part of our country.

Finally, Mr. President, I should like to state that when we return to session in January there is no question about the fact that a group of us, I believe on both sides of the aisle, will open the effort to deal with rule XXII. .

Mr. President, the imbedded opportunities for extended debate or filibuster, as it is called, allowed by that rule represents the primary reason, at every stage, why we cannot proceed effectively in the field of civil rights legislation and why we cannot proceed in other fields which are very desirable, in my view, for the national interest. So the struggle will open, Mr. President. Let no one be confused as to that. The struggle will begin at the opening of the Congress in January 1961, to amend rule XXII, I hope in accordance with the Douglas plan. This will unquestionably be followed, before the session is very much older, by affirmative civil rights legislation, certainly, as a minimum of the kind which the President has asked for, and I hope more extensive than that, to implement the agreed upon positions taken by both political parties in their platforms.

ADDRESS BY ARTHUR J. GOLDBERG

Mr. MORSE. Mr. President, the other day I read with a great deal of interest a copy of the address of Mr. Arthur J. Goldberg, special counsel, AFL–CIO, and general counsel, United Steelworkers of America, given on the occasion of an award with which he was honored by Roosevelt University, Chicago, Ill. Mr. Goldberg gave an outstanding address and I believe it merits careful consideration by my colleagues. I invite to their attention particularly Mr. Goldberg's comments suggesting the establishment of a permanent National Council of Labor-Management Advisers, tripartite in nature, to advise the President and to make recommendations to him in the area of broad policy matters relating to labor-management relations. In this connection, Mr. Goldberg states:

> The purpose of the Council should be to try to restore that sense of common purpose which we had during the war and which we need so desperately now.
>
> The Council, out of their experience, should seek to recommend bold and imaginative programs to encourage the Nation's economic growth and health, and to advance both our business enterprise and our labor movement. It should seek to develop programs for reconciling the great benefits to be derived from automation and the great burdens in human terms which develop from the impact of automation. It should seek to define the role of Government and of management and of labor in implementing our national goal of achieving full production and full employment.
>
> In addition to this role of advising and recommending programs to the President for submission to the Congress, the Council should formulate programs for management and labor to follow in advancing industrial peace and minimizing industrial conflict.

Mr. President, I wish to commend Mr. Goldberg for this speech, which I consider to be industrial statesmanship on his part.

Mr. President, I ask unanimous consent that the full text of Mr. Goldberg's address of August 17 be printed in the RECORD at this point.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY ARTHUR J. GOLDBERG, SPECIAL COUNSEL, AFL–CIO GENERAL COUNSEL, UNITED STEELWORKERS OF AMERICA, ROOSEVELT UNIVERSITY, CHICAGO, ILL., AUGUST 17, 1960

I am honored by this award of Roosevelt University and grateful to my friends and colleagues who have joined in tendering me this dinner.

This affair, happily, has a larger purpose than the presentation to me. It celebrates the 15th anniversary of the establishment of Roosevelt University which, in this short period, has truly met Disraeli's test of a university: "a place of light, of liberty, and of learning."

President Sparling, the founder and distinguished head of Roosevelt, has, on this and many other occasions, generously acknowledged the support of the American labor movement to the university, symbolized by grants from the William Green Memorial Fund, the Philip Murray Memorial Foundation, the Sidney Hillman Foundation, and many international and local unions of the AFL–CIO. In supporting the university, the labor movement has, in a practical way, implemented its objective, expressed in the AFL–CIO constitution: "to promote * * * the education of the labor movement and to protect and strengthen our democratic institutions and enjoyment of the rights and liberties to which we are justly entitled and to preserve and perpetuate the cherished traditions of our democracy."

Roosevelt University is doing pioneering and outstanding work in the field of labor education under the fine leadership of Frank McCallister. And Roosevelt's very existence arises from the determination of President Sparling, and the other founders of the institution, to forward the democratic ideal of civil rights for all our citizens.

During the last 15 years the labor movement and Roosevelt have joined in many common undertakings to advance our democratic ideals by joint programs of combating discrimination and advancing workers' education.

From its very beginnings, labor leaders have participated in the governing body of this great educational institution. Three of Roosevelt's trustees are representatives of labor—certainly to be favorably compared to a grand total of about 15 labor board members in all institutions of higher education in our country. Thousands of national and local union officers and members have benefited from participation in Roosevelt's courses and training programs.

Roosevelt University is not indebted to the labor movement—the labor movement is indebted to Roosevelt University for its gen-

erous recognition of the role and interest of labor in higher education.

I hope that this celebration of the 15th anniversary of the establishment of Roosevelt University will stimulate more substantial participation and support by labor to Roosevelt and to other institutions of higher learning throughout the United States.

From its very beginnings, the labor movement in this country has been a stanch champion of our country's public educational system. Today, in every State legislature, in every local community, and in our National Congress, the AFL–CIO, its affiliated unions, and its central bodies, are in the forefront of the fight to obtain much-needed aid to education. The meeting of the executive council of the AFL–CIO, just concluded here in Chicago, urgently has called for the overdue enactment by the Congress of an aid-to-education bill.

President Meany, on behalf of the labor movement, has on many occasions stated the willingness of the members of the AFL–CIO to bear their fair share of the tax burden involved in providing an educational system adequate to meet the needs of our growing and expanding population and the burdens which the space age imposes upon present and future school generations.

I venture the hope that the labor movement will intensify its support to that necessary and essential part of our higher educational system represented by our private colleges and universities, so well exemplified by Roosevelt University.

These private institutions, properly called liberal colleges, are not supported by tax dollars. They must carry on with private contributions and endowments. Yet our country, as well as the labor movement, cannot get along without them. They play an indispensable role in our overall system of higher education. They provide for the educational needs of hundreds of thousands of our young men and women, most of whom are the sons and daughters of working people. Even more importantly, our private colleges and universities are the symbols and examples of free and independent scholarship, necessary for a truly liberal education.

The AFL–CIO itself, its international unions and their local bodies, and foundations sponsored by the labor movement, are contributing generously to private colleges and universities through grants and scholarships. There are, of course, many demands upon a worker's pay envelope. Yet, let us reflect upon the fact that if the members of the AFL–CIO were to contribute as little as 10 cents per member each week for higher education, the AFL–CIO could establish its own educational foundation and make grants totalling $70 million a year toward higher education in America.

It is to the credit of American corporations, with a slight assist from the tax laws, that they have recognized the stake of business in higher education. I trust that the labor movement will increasingly recognize its own obligations in this important aspect of American life.

When Roosevelt University was established 15 years ago, World War II had just ended. Overnight, a peace-loving America demobilized its 15 million citizens army. We cut back our enormous wartime budget. We curtailed the manufacture of ships and arms and we scaled down our weapons research and development programs. We did this in our understandable anxiety to return to our traditional, peaceful way of life.

As part of this demobilization, we also dismantled the wartime agencies established in the management-labor area to further the war effort. We disestablished the War Labor Board—that great tripartite agency which so effectively implemented the voluntary no-strike, no-lockout pledge on the part of labor and management. We terminated the War Manpower Commission and the War Production Board, which, largely through voluntary means, and by cooperation between labor and management, mobilized our manpower and our industrial plant and made this Nation a great arsenal of democracy.

Freedom-loving Americans have learned the hard way that we too precipitately and naively demobilized our Army and armament, in light of the threat continuing to this day to the free world by the totalitarians in the Kremlin.

By referring to the demobilization of our wartime agencies, I do not want to express or imply that we wrongly terminated these labor-management agencies. On the contrary, it was again a testimonial to our devotion to peace and freedom that we ended all wartime controls over business and labor as quickly as we did.

I do mean to express my regret that, in terminating these wartime labor agencies, we too hastily abandoned that sense of common interest and mutual purpose of labor and management which provided such substantial support for our war effort.

During the war, both labor and management were truly conscious of President Franklin D. Roosevelt's admonition that "heedless self-interest is not only bad morals, but also bad economics"—an admonition which still holds true today.

In expressing concern that labor and management, along with the rest of our people have lost some of the single-minded dedication of World War II war years, I do not denigrate the great achievements of both free industry and free labor in the last 15 years, operating without the inspirational uplift which motivates all people in a great common crisis.

Our industrial plant has been tremendously improved during the last decade and a half, under our free enterprise system and the leadership of business.

Our collective bargaining process, during the same period has played a tremendously productive role in bringing about a better life for the people of our country. In these collective bargaining advances, I am proud that our free trade unions have led the way.

In the last 15 years a drastic departure has been made from the traditional put it in the pay packet attitude of collective bargaining. The major achievements of collective bargaining, since 1949 particularly, have been in the fringe area. The word "fringe" is an unprepossessing word, but it serves as an umbrella which covers gains and accomplishments of tremendous social importance.

Before the great report of the Daugherty-Cole-Rosenman steel board of 1949, collectively bargained pension plans were negligible. Today, millions of American workers, organized and unorganized, have company-paid pension plans. I can tell you from my own experience in steel, that these plans, supplementing inadequate social security benefits, represent the vast difference between a worker retiring in dignity and one retiring in want. Not only do these plans provide valuable additions to social security, but also they have stimulated the improvement of social security itself so that the unorganized, as well as the organized, segments of the work force have benefited from the successful advances negotiated by the labor unions.

In the area of social insurance encompassing hospitalization, sick benefits, medical care and the like, results have been even more spectacular, due to the lack of any substantial Government programs. In 1949, there were very few insurance programs in existence in American industry providing for these needs, and what did exist were almost totally paid for by the employees themselves. Now, under the plans prevalent in many industries and negotiated by collective bargaining, workers enjoy comprehensive hospitalization and surgical protection, life insurance, sickness and accident benefits—all of them fully paid for by the employers. Here too, the existence of these plans, like the existence of private, collectively bargained pension plans, has stimulated prospects of improving social security so that a worker, upon retiring, will be protected in his health needs. These developments, and others which could be mentioned, like supplementary unemployment benefits, have had extraordinarily beneficial impacts upon the security and well-being of the American worker and his family.

In a world at peace and progressing at a normal pace, we could continue to rely upon our normal and traditional processes in both labor and management. But we have not won the peace and the world is not moving at a normal pace. We are confronted with both the cold war and the accelerated pace of automation.

We live in an age of revolutionary technological change and in an age of extraordinary international tension.

Traditional practices, which have served us so well, and which would continue to do so if we were really at peace, must be adapted to a period where our whole way of life is being challenged. Traditional practices, which served us so well, must be adapted to an age when our industrial society is being transformed by technological advance.

Both the Democratic and Republican platforms, recently adopted, recognize these facts.

The Soviet Union pursues twin objectives of perpetuating the cold war and, at the same time, transforming its industrial and economic life. To meet this challenge, America must make sure that both our military establishment and our industrial way of life remain superior in all respects to the Russians. In doing so, we must be conscious at all times that our objective is not the same as the Russians—even as stated in their own propaganda terms. On the contrary, as the Democratic platform so well says: "Our objective, however, is not the right to coexist in armed camps on the same planet with totalitarian ideologies; it is the creation of an enduring peace in which the universal values of human dignity, truth, and justice in law are finally secured for all men everywhere on earth."

With respect to safeguarding and strengthening our military security, labor and management can play their part as citizens by supporting our public programs designed to this end. I am proud of the record of the labor movement in this regard.

To meet the challenge of an automation age, labor and management can make a unique and indispensable contribution. American business and American labor must jointly recognize two important facts. One is that automation is necessary and indispensable if we are to remain the greatest industrial producing country of the world. Labor must recognize this and business too.

It is not generally appreciated that a significant part of our industrial plant in America is antiquated. Responsible economists have estimated that more than $75 billion of our $300 billion worth of plant and equipment is obsolete or rapidly becoming so. Business must accelerate the rate of plant and equipment improvement and replacement.

The labor movement on its part should be prepared to support proper programs to stimulate the rapid replacement of this obsolete plant and equipment and should take a fresh look at programs designed to stimulate this necessary business activity.

On the other hand, business must face up to the fact that in these modern times and with a modern labor movement, human values must be preserved in an automation age. We cannot tolerate the abuses which took place during the first industrial revolution. Business must recognize that we must

develop the necessary programs to insure that the blessings of automation do not become the burdens of widespread unemployment. The business community must recognize that neither business alone, nor labor alone, nor both of them in collective bargaining, can meet all of the problems arising from automation, and that public programs are necessary to protect against the hardship and suffering which can result from automation.

Our country cannot maintain its leadership of the free world with recurring recessions, with permanent unemployment and underemployment, and with waste of our unused plant capacity and manpower. Our economic health and that of the world depends upon an America fully utilizing its great technological and human resources. We need this at home and we need this abroad. We must always remember that the first basis of a sound foreign policy is a sound and healthy way of life at home—a way of life possible only with a high rate of economic growth and development.

In recognition of the fact that these extraordinary times require the restoration of the same sense of common purpose which labor and management achieved in World War II, President Meany, on behalf of the labor movement, made a formal proposal to President Eisenhower for a labor-management conference to discuss important issues in the labor-management field on a broader basis than is possible in collective bargaining. Meetings looking to this end are now under way and I am sure are being hopefully looked to by all thinking citizens.

I should like this evening to make a proposal for the consideration of the labor-management meetings which are taking place. I am sure that everyone here will understand that this proposal is a personal one which reflects no one's thinking but my own—not George Meany's, nor Walter Reuther's, nor George Harrison's, who are conducting the discussions for labor—and perhaps I should add, in light of my own personal, political activities, not those of the Democratic candidate for the Presidency.

I propose that the labor-management meetings give consideration to recommending to the new administration, which will take office next January, the establishment of a permanent National Council of Labor-Management Advisers. This Council, in my view, should be tripartite in character, consisting of an equal number of representatives of labor, management, and the public.

Tripartitism proved its value in World War II. I do not have to tell this audience of the great contributions made by such men as Dr. George Taylor, Dr. Frank Graham, Bill Davis, Wayne Morse, and others too numerous to mention.

I would suggest that the Secretary of Labor, the Secretary of Commerce and the Chairman of the Council of Economic Advisers be ex officio members of this Council.

To insure the participation of top representatives of labor and management, the members of the Council should not be required to serve full time, but, rather, expected to devote as much time as the important functions of the Council require. Surely, we can rely on the patriotism and sense of duty of the members of the Council to guarantee this. The Council, however, in my view, should have a permanent and adequate full-time staff, recruited, like the members of the Council, on a tripartite basis from the best men and women available in these segments of our society.

As its proposed name indicates, the Council should advise the President; its value would be that it is a Presidential Council. Any downgrading of its function would make its work useless and ineffective.

The Council should advise and recommend. It should not be a third legislative body. I am not proposing, nor would I support, any form of corporate state. The Council would not and should not have any political or legislative functions.

The Council should not interfere with our established and tried methods of collective bargaining. It should not take over or infringe on the functions of either labor or management.

I am suggesting an agency to assist in helping our free institutions work in these troubled times, not to displace them.

The Council should not displace or supersede the normal activities of the Department of Labor, the Department of Commerce or the Council of Economic Advisers. The Council should complement and supplement the activities of these established Departments and Agencies of our Government. The essential purpose of the Council, rather, should be to bring the experience and wisdom of labor and management and public experts in the field to the great problems posed to labor, management and the country by the cold war and automation. The purpose of the Council should be to try to restore that sense of common purpose which we had during the war and which we need so desperately now.

The Council, out of their experience, should seek to recommend bold and imaginative programs to encourage the Nation's economic growth and health, and to advance both our business enterprise and our labor movement. It should seek to develop programs for reconciling the great benefits to be derived from automation and the great burdens in human terms which develop from the impact of automation. It should seek to define the role of Government and of management and of labor in implementing our national goal of achieving full production and full employment.

In addition to this role of advising and recommending programs to the President for submission to the Congress, the Council should formulate programs for management and labor to follow in advancing industrial peace and minimizing industrial conflict. One of the means for doing this might be by providing a continuing and expanded basis for the labor-management meetings now under way. The Council might provide the staff for these meetings and the studies necessary for constructive recommendations from the meetings. It might extend these conferences so they will take place both on an industrial and on a local level, thus insuring the participation of top leaders of labor and management in the various industries and localities.

Such a council may very well consider the advisability of convening periodic and enlarged White House conferences of labor and management which will bring to Washington thousands of the men and women at all levels who work day by day in this area. White House conferences have made significant contributions in the fields of education and social security. Similar White House conferences on labor-management problems could, in my opinion, contribute greatly to a better climate between labor and management.

Again, I wish to emphasize that, in all of this, I do not propose to exclude the indispensable role of the Executive and the Congress in formulating and enacting programs, but, rather, I propose to help the President and Congress by bringing the experience and wisdom of both management and labor to bear upon the issues.

There is one operational role which the Council might very well be given. The Council could properly be entrusted with the responsibility of dealing with disputes of the character which we have come to term "national emergency disputes." One dividend of the recent prolonged conflict in steel has been the growing recognition that the Taft-Hartley injunction method is onesided, does not help to settle the underlying dispute and is a wholly unsatisfactory method of dealing with disputes of this character. The President, Secretary Mitchell, Dr. George Taylor of the board of inquiry in the steel dispute, other public officials, labor relations experts, and large sections of the press, have demonstrated their lack of faith in the national emergency injunction provisions. It is clear that we must seek a better way of asserting the public interest in disputes of this character.

One of our most prominent public officials has gone so far as to propose compulsory arbitration as the solution. I must respectfully and emphatically disagree with this proposal. Compulsory arbitration is incompatible with both our free economy and our free labor movement. Compulsory arbitration would have serious and deleterious effects on the functioning of both labor and industry.

My proposal, rather, is that we should return to the concept, symbolized by the War Labor Board, of enlisting eminent men, selected on a tripartite basis and respected for manifest fairness, experience, and patriotism, to help settle great disputes by mediation, factfinding, and recommendations which, though not binding, will help the conflicting parties find satisfactory common solutions to their problems.

In suggesting that the proposed Council handle emergency disputes, in lieu of the present unsatisfactory Taft-Hartley procedures, I want to emphasize that this, in my opinion, should be an incidental, rather than the main purpose of the Council, which should be to advise the President in the development of constructive policies and programs.

I frankly do not know whether or not this proposal of mine has any merit. But whether or not it does, it is highly important that, confronted by powerful challenges, all of us, educators, labor leaders, businessmen, public officials, and citizens, reflect upon the fact that these are extraordinary times and that new and imaginative programs are required for the solution of labor-management problems, as well as the many other problems affecting the country at large.

Out of this reflection undoubtedly will come other and more constructive proposals for developing new programs and constructive solutions from which every American will benefit. There certainly will be differences in our respective approaches, but surely we will all be motivated by a common purpose—a purpose so well stated in the AFL–CIO constitution: "to strengthen and extend our way of life and the fundamental freedoms which are the basis of our democratic society."

NATIONAL ARMED FORCES MUSEUM ADVISORY BOARD

Mr. SALTONSTALL. Mr. President, on August 31, 1960, the Senate kindly granted me unanimous consent for the purpose of inserting in the RECORD a report to President Eisenhower from his Committee on the American Armed Forces Museum.

I had hoped that this material could be inserted in the RECORD at the end of the text of the bill (S. 3846) on page 18588 of the RECORD for that day, but the text was not available immediately, and for that reason I am inserting it at this time:

The PRESIDENT,
The White House,
Washington, D.C.

MY DEAR MR. PRESIDENT: The Committee which you appointed to consider proposals for the establishment of an American Armed Forces Museum respectfully submits this report.

1. The Committee feels that the magnitude of American military achievement, the greatness of America's contributions in the cause of freedom, and the supreme importance of deterring war in the present age clearly point to the need for an effective and comprehensive museum-type exhibition in Washington, D.C., of the contributions that the Armed Forces of the Nation have made and are making toward creating, developing, and maintaining a free, peaceful, and independent society and culture in the United States. Such an enterprise requires the collection, preservation, and exhibition of military objects of historical significance together with the provision of appropriate means and materials for studying the meaning of war, its effect on civilization, and the role of our Armed Forces in maintaining a just and lasting peace.

2. The Committee believes that such a dynamic museum should give full and comprehensive coverage to American military history beginning with the first colonization. The past, present, and anticipated contributions of all military forces—land, sea, and air—should be included. Within this context the origin and development of particular weapons, military institutions, tactics, and the panoply of warfare peculiar to our Nation should be covered.

As an exhibition dedicated to objective history, it should portray war as realistically as possible. The demands placed upon the full energies of our people, the hardships endured, and the sacrifices called for in order to achieve and maintain our independence and our constant search for world peace should all be clearly demonstrated.

The marshaling of the Nation's total resources in time of war, the broad activities of the homefront and all the related institutions of national security should be depicted. The exhibits should describe the extensive peacetime contributions the Armed Forces have made to the advance of human knowledge in science, nuclear energy, polar and space exploration, electronics, engineering, aeronautics, and medicine. Although the deeds of the Nation's military heroes should be chronicled, great emphasis must also be placed on the contributions and life of the average man and woman of the Armed Forces, and particularly on the contributions of the nonprofessional citizen soldier.

The Committee believes that such an exhibition should have a vital role in interpreting, through dramatic display, significant current and future problems affecting our national security. Exhibits might be featured which deal with the structure and significance to world peace, of NATO and other international security organizations to which the United States is a party, the scientific-political-military significance of earth satellites and outer space exploration, the great advance in weapons technology and their consequences for world peace and national security, and the technical and political problems encountered in devising adequate controls in the use of modern weapons. Through a dynamic educational program which could be extended throughout the Nation by means of radio and television, the exhibition could serve as a great center of public information.

Opportunity for research and scholarly investigation in history should also be provided through a study center containing technical writings in the field of military science and related subjects, documents, and other source materials of use to military analysts and historians. These research materials should in general be related to the objects in the public exhibitions and study collections of the museum. Students should also have access to reference and study collections of artifacts not on public exhibit.

3. Since its earliest days, the Smithsonian Institution has been concerned with the collection, preservation, study, documentation, and exhibition of articles related to military and naval history. For some years the specialized work of the Smithsonian Institution in this field has been organized as a department of Armed Forces History, now in the Museum of History and Technology. In addition, significant military exhibits in the fields of aeronautics and space have been included in the program of the National Air Museum since its establishment by the Congress in 1946.

Since the military collections of the Smithsonian Institution are divided between the Museum of History and Technology and the National Air Museum, their essential responsibilities, plans and interrelationships require brief comment: The National Air Museum is specialized in its work. It was authorized by the Congress to "memorialize the national development of aviation," without distinction between military and civilian. The National Aeronautical Collections include both military and civilian developments and equipment and the Air Museum concerns itself with the entire development of aviation, not exclusively with militarily important applications of aviation. In light of this the Air Museum features the "famous firsts," military or civilian, and supplements the exhibits of the Museum of History and Technology with typical and progressive examples of applied aeronautical developments adapted for military use. Plans are now being prepared by the Air Museum for a permanent building on the Mall between Fourth and Seventh Streets on Jefferson Drive. This site has been assigned to the Air Museum by the Congress.

The exhibits of the Museum of History and Technology are comprehensive. It was authorized by the Congress to memorialize the growth of all aspects of American life. It has long been an accepted doctrine at the Smithsonian that the full history of the United States can be most meaningfully displayed if the social, legal, political, cultural, scientific, industrial, economic, military, moral, and other aspects of this growth are presented not only as important in themselves, but also as closely correlated phenomena. Thus, American military and naval history is presented as an integral part of American technological and cultural history and its interrelation with American technological and scientific advances is clearly portrayed.

In the new building of the Museum of History and Technology now being constructed on the Mall between 12th and 14th Streets, 33,000 square feet have been allocated to display collections related to the history of the development of the military, naval, and air forces of the United States. An additional 18,000 square feet have been assigned to military and naval study collections which will be open to the public on appointment. Many general facilities of the new building, such as a library, auditorium, and cafeteria will be available for the use of those who come principally to see the military exhibits or for special lectures and programs. The general technical services in the fields of preparation and preservation of museum objects existing for the entire museum, will likewise be available to the staff of the Department of Armed Forces History.

The staffs of the National Air Museum and the Museum of History and Technology devote much of their efforts to scholarly research. The Smithsonian Institution functions in part as one of the Nation's major study centers and issues a series of publications on military history and related subjects which is anticipated and well received throughout the world.

4. The present and planned facilities and programs of both the Museum of History and Technology and the National Air Museum only partially meet the need for an effective and comprehensive exhibition of the contributions of the Nation's Armed Forces as described above. The traditional memorabilia of warfare (small arms, rifles, edge weapons, uniforms, insignia, and heraldry) can readily be displayed in the halls of military history and exhibits programed for the new museum buildings. However, no building on the Mall could properly be large enough to house and display such huge objects as self-propelled field artillery, heavy ordnance, tanks weighing many thousands of pounds, naval vessels and equipment, and future rockets and missiles. Space limitations make it impossible to portray effectively how earlier wars were fought through the reconstruction of trenches, fortifications, or cantonments.

The Committee has considered possible ways in which the broad sweep of military history could be more effectively presented and the role of the armed forces in creating a peaceful world could be emphasized. It believes additional facilities are needed beyond those presently existing or planned at the Smithsonian Institution. However, such facilities should be under the direction of the Smithsonian Institution and serve as a supplement to the exhibitions and study collections maintained in any building on the Mall. A sufficiently large area in or near Washington, D.C., should be acquired which will permit construction of buildings suitable for the display of large and heavy objects adjacent to an open-air display of the evolution through the years of military tactics, both offensive and defensive, as seen in trenches, fortifications, and other full-scale constructions. The possibility of locating this area on tide water should also be considered so as to provide anchorage for historic naval vessels.

The Committee believes these additional facilities would not only permit the Smithsonian Institution to maintain its present integrated graphic presentation of military history but would provide it with the opportunity to expand greatly its exhibition potential, to provide added study space, to demonstrate more comprehensively the impact of the Armed Forces on American culture, medicine, engineering and science, and to interpret significant problems affecting national security. Within this context, we believe an institution will emerge which can develop the two themes emphasized in your letter to the Committee as of highest significance: "an exposition of the contributions which military forces have made to American society and culture; and an analysis of the meaning of war in today's civilization."

5. The Committee believes this broadened concept should be subjected to continuing study with the objective of developing detailed procedures for its realization. Hence, it recommends that a permanent Advisory Board to be known as the National Armed Forces Museum Advisory Board be created by statute to provide advice and assistance to the Regents and the staff of the Smithsonian Institution for this purpose and to guarantee sustained interest in the project. In particular, this Board should also make recommendations as to the following: (a) Location, size, architectural style, and cost of the new facility; (b) choice of an appropriate name. The Committee recommends that "The National Armed Forces Museum" be considered as a suitable title.

6. Although some funds for the project could undoubtedly be raised by public subscription, the Committee feels the magnitude of the undertaking and the national and honorary character of the institution require that it be fully financed by appropriation of the Congress. However, the Committee recognizes that gifts and bequests will be received and should be encouraged.

7. Some who have considered the feasibility of an American Armed Forces museum have visualized a large monumental building centrally located in the Nation's Capital. At one time several members of your Committee supported this viewpoint, but after full consideration of the merits of such a proposal, the Committee has now agreed upon the conclusion outlined above. The Committee's study of European military museums has clearly shown that Armed Forces museums of very high quality can be organized in a variety of ways to fit different and special national needs. The American solution to the problem of creating a suitable Armed Forces museum must also be typical of our Nation and of our unique military history. In this connection, therefore, it is important to remember that the Smithsonian Institution in its present buildings and in its new museum now being constructed on the Mall has already evolved and institutionalized a number of the fundamental principles and requirements for an American military museum. By continuing to draw upon the experience and guidance furnished by the Smithsonian Institution within the concept of the plan described in this report, the Committee believes a positive step forward will have been taken toward developing an Armed Forces museum which will be specifically fitted to our special national situation.

8. The Committee does not believe the proposals contained in this report, if realized, would encroach upon the activities of any other Government-operated military collection, nor need it preclude the creation of specialized collections devoted to technological subjects or those which are primarily of organizational interest.

The Committee believes in seeking authorization for this proposal that no modifications should be made to Public Law 722, 79th Congress, approved August 12, 1946, which established the National Air Museum, nor any other authority of the Smithsonian Institution be rescinded to bring this project to completion.

9. Accordingly, there is attached hereto for your consideration a draft of proposed legislation providing for the establishment of a National Armed Forces Museum Advisory Board, expansion of the Smithsonian Institution's facilities for portraying the contributions of the Armed Forces of the Nation, and for other purposes.

Respectfully yours,

EARL WARREN,
Chairman, President's Committee on the American Armed Forces Museum.

(Members of the Committee: Clinton P. Anderson; Leverett Saltonstall; Clarence Cannon; Overton Brooks; Thomas S. Gates, Jr.; John Nicholas Brown; Nelson A. Rockefeller; H. Alexander Smith; Leonard Carmichael, Executive Director.)

THE PUBLIC CAMPAIGN AGAINST OBSCENE LITERATURE—RESOLUTION

Mr. WILEY. Mr. President, earlier in this session of Congress, I introduced a bill, S. 2123, to provide stiffer penalties for dealers in obscene materials. The fast growing racket of obscene and pornographic publications and films has invaded the American home and has become a menace to grownups and children alike. In asking for new laws I called attention to the fact that the obscene literature trade has become a half-billion-dollar a year business. The Post Office Department estimates that up to 1 million children will receive unsolicited pornographic literature this year.

Our laws have been ineffective thus far in combating this menace. The penalities under the present laws, which provide for fines up to $5,000, are inadequate. These illicit dealers, making thousands of dollars a year, regard fines as a mere cost of doing business. The bill that I introduced requires mandatory prison sentences for second and succeeding violators. I certainly hope that this legislation will be enacted in the near future.

I have stressed, however, at the time I introduced this bill, that strengthening the Federal laws must be only one part of the broader program. The major portion of the battle against obscene material must be carried out by State and local authorities, who must stamp out the base of operations of these dealers in filth. Furthermore, there is the need to draw the attention of parents and the public at large to this danger. Community support must be mobilized in order to make law enforcement effective.

The call for community support has produced much response during the last year. Citizen committees have been organized in many parts of the country in order to aid in the struggle against obscene literature. Various church groups have been most active in this public awakening.

Recently, I have had the pleasure of placing in the CONGRESSIONAL RECORD a resolution by the St. Catherine's Society of Milwaukee, calling attention to the need for alerting the public to the increasing menace of obscene literature, and commending the Post Office Department for its excellent national leadership in this endeavor. Today, I should like to place in the RECORD a recent resolution by the Lutheran Laymen's League dealing with the same subject.

I should like to preface this resolution with a few words from the letter written to me by Mr. Paul Friedrich, executive director of the Lutheran Laymen's League and which says:

We want to make it clear that we do not ask for any form of censorship that will interfere with any person's constitutionally guaranteed right of free speech. Fundamentally, we feel that this is a moral and spiritual problem that can best be solved by proper moral and spiritual education and enlightenment. It is our hope that our States and also our National Government will convene conferences of all interested persons and groups, so that through the free exchange of thought the best approaches and solutions may be arrived at.

I should like to have the resolution by the Lutheran Laymen's League printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION 60-04—IMMORALITY, VIOLENCE AND BAD TASTE IN PICTURES, PROGRAMS AND PUBLICATIONS

Whereas decent citizens of the United States and Canada are becoming increasingly disturbed by the prevalence of immorality, violence, and bad taste in publications, motion pictures, television and radio programs, and in the mass communications media generally; and

Whereas the fundamental values of respect for God, for human life, for marriage, home and family, for property, for virtue, for good name and reputation are being degraded and eroded by these unwholesome influences and materials; and

Whereas these evils can be combated and rooted out only by the united and persistent efforts of all decent citizens; and

Whereas we Lutheran laymen, as followers of the Lord Jesus Christ, must be in the forefront of the battle for decency and morality: Therefore be it

Resolved, That the Lutheran Laymen's League, assembled in convention in Minneapolis, Minn., from July 9 to July 13, 1960, hereby—

(a) Commends and supports the producers of all acceptable publications, motion pictures and television and radio programs for recognizing and discharging their moral responsibilities in this respect;

(b) Commend the Postmaster General of the United States for his diligent efforts to "clean up the mails";

(c) Encourage current efforts in the two Houses of the U.S. Congress to convene a conference of Federal, State and local officials, together with representatives of other interested groups, to study this matter and make recommendations for ways and means to deal with the problem effectively;

(d) Take the necessary steps to have a delegate from the Lutheran Laymen's League and also a delegate from the Lutheran Church-Missouri Synod participate in such a conference;

(e) Make a determined effort, as individuals and as a group, to see to it that none of these offensive influences come into our own homes by way of publications and television and radio programs, and that we and the members of our families pledge ourselves to choose our entertainment outside the home carefully and in accordance with God's word;

(f) Pray fervently and frequently that Almighty God will strengthen each one of us, our families, our communities and our nations, so that we may overcome the dissemination of these unwholesome influences and lift our society to new and higher levels of morality, virtue and decency; and be it further

Resolved, That copies of this resolution be released to the public press for publication and that copies be sent to the appropriate officials of the motion picture industry, the radio and television industries, the publishing industry, to Members of the Congress and to other public officials and civic and religious leaders who are or should be interested in this matter.

REGULATION OF MASS TRANSIT IN THE WASHINGTON, D.C., METROPOLITAN AREA

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business, House Joint Resolution 402, which will be stated by title.

The LEGISLATIVE CLERK. A joint resolution (H.J. Res. 402) granting the consent of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes.

THE FREEDOM COMMISSION

Mr. MUNDT. Mr. President, when the history is written of the achievements of this extra postconvention session of the Senate, I am one of those who believe that the salutary action taken so promptly and emphatically by the Senate yesterday in the approval of S. 1689, the bill to create the Freedom Commis-

sion for the development of the science of counteraction to the world Communist conspiracy for the training and development of leaders in a total political war, is going to rank high on the list of achievements of this session.

I have been gratified by the interest displayed by the radio-TV networks and the news media, and the way this important achievement has been covered and reported by most of the metropolitan papers of the country. There have been a few instances in which the reporters of the papers and, for some reason or other, the city desks have missed the story growing out of the Senate's most important action yesterday, but by and large this historic action has received the kind of widespread publicity which it deserves. It is certain to receive much more.

I think that in the arguments made yesterday before the Senate enacted this proposed legislation it was not emphasized sufficiently that the Russians for a long time have operated their concept of an academy of this type. Years ago when I served on what was then known as the Dies committee of the House of Representatives, and which is now known as the House Committee on Un-American Activities, we explored and studied what was then known as the Lenin Institute in Russia where, back in the 1930's, Russia trained personnel to do its propaganda and espionage jobs.

It should have been said yesterday, and I now say it for the RECORD, that in the United States the Communists themselves have also maintained training institutions and academies to train their operatives here in America. There was a time when some of the representatives of the Dies committee attended as undercover students one of these Communist institutes on 13th Street in New York City, and there have been at times as many as four or five of these Communist training institutes flourishing in America. So it was well that the Senate in its wisdom, proving once again that it can meet an emergency by acting rapidly when a need arises, passed this proposed legislation yesterday to provide a Freedom Academy in America.

I still hope that before the House adjourns, it will suspend the rules to approve S. 1689, which in the House is sponsored by Representative A. SYDNEY HERLONG, of Florida, and Representative WALTER JUDD, of Minnesota. Whether the measure can be disentangled from the rule situation over there or not, I believe a great forward step was made by the Senate yesterday.

I ask that there be printed in the RECORD at this point in my remarks a copy of S. 1689, which was introduced by myself and Mr. DOUGLAS and Mr. CASE of New Jersey in the form that it passed the Senate, in order that those who are interested may study the measure more carefully.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Freedom Commission Act."

CONGRESSIONAL FINDINGS AND STATEMENT OF POLICY

SEC. 2. (a) The Congress of the United States makes the following findings:

(1) The Soviet Union and Communist China are waging a total political war against the United States and against the peoples and governments of all other nations of the Free World.

(2) Unlike the Free World, the Soviet Union has systematically prepared for this total political war over several decades. Drawing on the experience of previous conquerors and upon their own elaborate studies and extensive pragmatic tests, Soviet leaders have developed their conspiratorial version of political warfare into a highly effective operational science. Recognizing that political warfare is a difficult science making unusual demands on its practitioners, the Soviet Union and Communist China have established an elaborate network of training schools, within and without the Free World, in which have been trained large numbers of highly skilled activists. These activists continue to receive intensive training throughout their party careers.

(3) In this total political war the Soviets permit no neutrals. Every citizen, every economic, cultural, religious, or ethnic group is a target and is under some form of direct or indirect Communist attack. The battleground is everywhere, and every citizen, knowingly or unknowingly, through action or inaction, is involved in this continuous struggle.

(4) Since the end of World War II, the Soviets, taking full advantage of their better preparation and often superior organizational and operational know-how, have inflicted a series of political warfare defeats on the Free World. The total sum of these defeats is nothing less than a disaster for the United States and the Free World and the continuation of this political war by the Soviets confronts the United States with a grave, present, and continuing danger to its national survival.

(5) In order to defeat the Soviet political warfare offensive and to preserve the integrity and independence of the nations of the Free World, it is imperative—

(A) that the knowledge and understanding of all the peoples of the Free World concerning the true nature of the international Communist conspiracy and of the dimensions and nature of the global struggle between freedom and Communism be increased as rapidly as is practicable;

(B) that private citizens not only understand the dimensions and nature of the threat, but that they also know how they can participate, and do participate, in this continuous struggle in an effective, sustained, and systematic manner;

(C) that Government personnel engaged in the cold war increase their knowledge of the international Communist conspiracy and of the dimensions and nature of the global struggle between freedom and Communism, develop a high esprit de corps and sense of mission and a high degree of operational know-how in counteracting the international Communist conspiracy.

(b) It is the intent and purpose of the Congress that the authority and powers granted in this Act be fully utilized by the hereinafter created Commission to achieve the objectives set forth in the preceding subsection (a) (5) of this section. It is the further intent and purpose of the Congress that the authority, powers, and functions of the Commission and the Academy as hereinafter set forth are to be broadly construed.

DEFINITIONS

SEC. 3. When used in this chapter—

(1) The term "Commission" means the Freedom Commission;

(2) The term "Academy" means the Freedom Academy.

ESTABLISHMENT OF THE FREEDOM COMMISSION; COMPOSITION; CHAIRMAN AND ACTING CHAIRMAN; QUORUM; OFFICIAL SPOKESMAN; SEAL

SEC. 4. There is established in the executive branch of the Government an independent agency to be known as the Freedom Commission which shall be composed of six members and a Chairman, each of whom shall be a citizen of the United States, one of whom shall be selected from the higher echelon of the State Department. The Chairman may from time to time designate any other member of the Commission as Acting Chairman to act in the place and stead of the Chairman during his absence. The Chairman (or the Acting Chairman in the absence of the Chairman) shall preside at all meetings of the Commission and a quorum for the transaction of business shall consist of at least four members present. Each member of the Commission, including the Chairman, shall have equal responsibility and authority in all decisions and actions of the Commission, shall have full access to all information relating to the performance of his duties or responsibilities, and shall have one vote. Action of the Commission shall be determined by a majority vote of the members present. The Chairman (or Acting Chairman in the absence of the Chairman) shall be the official spokesman of the Commission in its relations with the Congress, Government agencies, persons, or the public, and, on behalf of the Commission, shall see to the faithful execution of the policies and decisions of the Commission, and shall report thereon to the Commission from time to time or as the Commission may direct. The Commission shall have an official seal which shall be judicially noticed.

MEMBERS; APPOINTMENTS; TERMS; COMPENSATION; EXTRANEOUS BUSINESS

SEC. 5. (a) Members of the Commission and the Chairman shall be appointed by the President, by and with the advice and consent of the Senate. Not more than four members, including the Chairman, may be members of any one political party. In submitting any nomination to the Senate, the President shall set forth the experience and qualifications of the nominee. The term of each member of the Commission, other than the Chairman, shall be six years, except that (1) the terms of office of the members first taking office shall expire as designated by the President at the time of the appointment, two at the end of two years, two at the end of four years, and two at the end of six years; and (2) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term. The Chairman shall serve during the pleasure of the President. Any member of the Commission may be removed by the President for inefficiency, neglect of duty, or malfeasance in office. Each member, except the Chairman, shall receive compensation at the rate of $20,000 per annum; and the Chairman shall receive compensation at the rate of $20,500 per annum.

(b) No member of the Commission shall engage in any business, vocation, or employment other than that of serving as a member of the Commission.

AUTHORIZATION TO ESTABLISH THE FREEDOM ACADEMY; FUNCTIONS OF COMMISSION AND ACADEMY

SEC. 6. The Commission shall establish under its supervision and control an advanced training and development center to be known as the Freedom Academy. The Academy shall be located at such place or places within the United States as the Commission shall determine. The principal functions of the Commission and Academy shall be—

(1) to carry on a research program designed to develop an integrated operational

science that befits and bespeaks the methods and values of free men and through which the Free World will be able to meet and defeat the carefully patterned total aggression—political, ideological, psychological, economic, paramilitary, and organizational—of the Soviet Bloc, and through which we, as a Nation, may work toward our national objectives in a systematic manner. To achieve this purpose the full range of methods and means is to be thoroughly explored and studied including the methods and means that may best be employed by private citizens and nongovernmental organizations and the methods and means available to the Government other than the methods and means already being used. This research program shall include the study of our national objectives and purpose and the development of proposals for interweshing and integrating the full spectrum of methods and means into a coordinated, short and long range strategy for victory, seeking the utilization of our full potential in the public and private sectors.

(2) to educate and train Governmental personnel, private citizens, and foreign students concerning all aspects of the international Communist conspiracy, the nature of the global struggle between freedom and Communism, and the science of counteraction to the Communist conspiracy.

ACADEMY STUDENTS; SELECTION; GRANTS AND EXPENSES; ADMISSION AS NONIMMIGRANT VISITORS; DEPORTATION

SEC. 7. (a) Academy students, other than Government personnel, shall be selected, insofar as is practicable and in the public interest, from the diverse groups within and without the United States where trained leadership and informed public opinion are most needed. Persons in Government service coming within the provisions of the Government Employees Training Act may be trained at the Academy pursuant to the provisions of said Act. All agencies and departments of Government are authorized to assign officers and employees to the Academy for designated training.

(b) The Commission is authorized to make grants to students and to pay expenses incident to training and study under this chapter. This authorization shall include authority to pay travel expenses to and from the Academy or other authorized place of training under the chapter, and authority to give financial assistance to the dependents of students during the time they are undergoing training authorized under this Act.

(c) Foreign students selected for training under this Act shall be admitted as nonimmigrants under section 1101(a)(15) of title 8, United States Code, for such time and under such conditions as may be prescribed by regulations promulgated by the Commission, the Secretary of State, and the Attorney General. A person admitted under this section who fails to maintain the status under which he was admitted, or who fails to depart from the United States at the expiration of the time for which he was admitted, or who engages in activities of a political nature detrimental to the interest of the United States, or in activities in conflict with the security of the United States, shall, upon the warrant of the Attorney General, be taken into custody and promptly deported pursuant to sections 1251–1253 of title 8, United States Code. Deportation proceedings under this section shall be summary and findings of the Attorney General as to matters of fact shall be conclusive. Such persons shall not be eligible for suspension of deportation under section 1254 of such title 8.

AUTHORIZATION TO ESTABLISH AN INFORMATION CENTER

SEC. 8. The Commission is authorized to establish an information center at such place or places within the United States as the Commission may determine. The principal function of the information center shall be to disseminate, with or without charge, information and materials which will assist people and organizations to increase their understanding of the true nature of the international Communist conspiracy and of the dimensions and nature of the global struggle between freedom and Communism, and of ways they can participate effectively toward winning that struggle. In carrying out this function, the Commission is authorized to prepare, make, and publish textbooks and other materials, including training films, suitable for high school, college, and community level instruction, and also to publish such research materials as may be in the public interest. The Commission is authorized to disseminate such information and materials to such persons and organizations as may be in the public interest on such terms and conditions as the Commission shall determine.

RESTRICTIONS ON DISCLOSURE OF INFORMATION

SEC. 9. Nothing in this chapter shall authorize the disclosure of any information or knowledge in any case in which such disclosure (1) is prohibited by any other law of the United States, or (2) is inconsistent with the security of the United States.

SECURITY CHECK OF PERSONNEL

SEC. 10. (a) Except as authorized by the Commission upon a determination by the Commission that such action is clearly consistent with the national interest, no individual shall be employed by the Commission until such individual has been investigated by the Civil Service Commission to determine whether the said individual is a good security risk and a report thereof has been made to the Freedom Commission.

(b) In addition to the foregoing provisions, the Commission may request that any individual employed by the Commission, or under consideration for employment by the Commission be investigated by the Federal Bureau of Investigation to determine whether the said individual is a good security risk.

GENERAL AUTHORITY OF THE COMMISSION

SEC. 11. In addition to the authority already granted, the Commission is authorized and empowered—

(1) to establish such temporary or permanent boards and committees as the Commission may from time to time deem necessary for the purposes of this Act;

(2) to appoint and fix the compensation of such personnel as may be necessary to carry out the functions of the Commission. Such personnel shall be appointed in accordance with the civil service laws and their compensation fixed in accordance with the Classification Act of 1949, as amended, except that, to the extent the Commission deems such action necessary to the discharge of its responsibilities, personnel may be employed and their compensation fixed without regard to such laws: *Provided, however,* That no personnel (except such personnel whose compensation is fixed by law, and specially qualified professional personnel up to a limit of $19,000) whose position would be subject to the Classification Act of 1949, as amended, if such Act were applicable to such position, shall be paid a salary at a rate in excess of the rate payable under such Act for positions of equivalent difficulty or responsibility. The Commission shall make adequate provision for administrative review of any determination to dismiss any employee;

(3) to conduct such research, studies and surveys as necessary to carry out the purposes of this Act;

(4) to make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this Act;

(5) to make such expenditures as may be necessary for administering and carrying out the provisions of this Act;

(6) to utilize, with the approval of the President, the services, facilities, and personnel of other Government agencies. Whenever the Commission shall use the services, facilities, or personnel of any Government agency for activities under the authority of this Act, the Commission shall pay for such performance out of funds available to the Commission under this Act, either in advance, by reimbursement, or by direct transfer;

(7) to utilize or employ on a full- or part-time basis, with the consent of the organization or governmental body concerned, the services of personnel of any State or local government or private organization to perform such functions on its behalf as may appear desirable to carry out the purposes of this Act, without said personnel severing their connection with the furnishing organization or governmental body; and further to utilize personnel of a foreign government in the same manner and under the same circumstances with the approval of the Secretary of State;

(8) to acquire by purchase, lease, loan, or gift, and to hold and dispose of by sale, lease, or loan, real and personal property of all kinds necessary for, or resulting from, the exercise of authority granted by this Act;

(9) to receive and use funds donated by others, if such funds are donated without restrictions other than that they be used in furtherance of one or more of the purposes of this Act;

(10) to accept and utilize the services of voluntary and uncompensated personnel and to provide transportation and subsistence as authorized by section 73b–2 of title 5, United States Code, for persons serving without compensation;

(11) to utilize the services of persons on a temporary basis and to pay their actual and necessary travel expenses and subsistence and in addition compensation at a rate not to exceed $50 per day for each day spent in the work of the Commission.

GENERAL MANAGER; APPOINTMENT; COMPENSATION

SEC. 12. The Commission is authorized to establish within the Commission a General Manager, who shall discharge such of the administrative and executive functions of the Commission as the Commission may direct. The General Manager shall be appointed by the Commission, shall serve at the pleasure of the Commission, shall be removable by the Commission, and shall receive compensation at a rate determined by the Commission, but not in excess of $18,000 per annum.

APPROPRIATIONS

SEC. 13. There is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, so much as may be necessary to carry out the provisions of this Act.

FREEDOM ACADEMY

Mr. MUNDT. Mr. President, I call to the attention of the Senate a most challenging, inspiring, and thought-provoking editorial in support of the Freedom Academy, which appeared in the great Cincinnati (Ohio) Inquirer on August 25.

I ask unanimous consent that it be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

IF WE ARE TO SURVIVE

Some of us are dazed by the rocket triumphs of the Soviet Union, awed by the

mountainous military manpower of Red China. Do they constitute the greatest threat to the survival of the United States and the free world?

No. We can build missiles and rockets. We can contrive—in fact we already have—an awesome deterrent force to deal with outright military aggression.

The Reds are fighting the war—and winning—in another dimension, where we have no present ability even to join the battle.

Here is a paragraph from a report of the Senate Committee on the Judiciary which could well be described as some of the most important words you may ever read:

"The Communists have conquered nearly a billion people during a period when their sphere was markedly inferior in industry, technology, science, and military capabilities—in fact, inferior in almost everything except power-seeking know-how. The Soviets have been able to expand their empire during this period of inferiority, because they have developed a science of protracted conflict in which they are able to gradually increase their relative power position, using a well-integrated combination of political, economic, and military methods while avoiding a sufficient provocation to invite massive retaliation. Central to their science of protracted conflict is their skill in political and economic warfare."

The report spells it out: The Communists are highly trained cold war specialists. They are professionals at the art of a new form of conflict and conquest. Their capabilities in political and economic warfare are not inborn—they are the result of a massive development and training period extending over several decades.

They have not only a vast fund of knowledge of the methods and means of subversion and propaganda; they have competent managers to orchestrate their efforts and they have highly skilled operators in every sphere of cold war activity.

They are the professionals in this field.

We are the amateurs—and the unorganized amateurs at that.

For the most part we are standing around reassuring ourselves in the knowledge that ours is the better way of life, while the agents of Communist imperialism pervert the youth of the world, the students, professors, scientists, politicians, labor leaders, businessmen, industrialists, to a heinous misconception of where their best interests lie.

Do you find it inconceivable that anyone in a free or even neutral country could be "sold" the concept of slavery inherent in communism? It is being done. While you are reading this editorial, hundreds will have been entrapped by the worldwide Communist conspiracy.

We, the West, started mankind on the road to freedom and independence. Who is capitalizing upon and taking credit for the apparent advances of this movement today? Communists. In the Far East, the Middle East, Africa—even deep within our own hemisphere.

They have turned our flanks, in military parlance. And as Winston Churchill phrased it during World War II, we find them attacking now our soft underbelly.

Isn't it time we did something about it? Yes; it is time—if there is time.

The Senate Judiciary Committee report from which we quoted was one giving approval to a bill—actually there are companion Senate and House bills—to develop a science of counteraction to the Communist cold war techniques.

The legislative proposal would create a Freedom Commission—and a Freedom Academy, to train and develop leaders from throughout the free world in effective leadership in the cold war.

No such agency now exists, and although a number of agencies touch upon the field, none does what the Communist world is doing, on anything like the scale the Communists are doing it. Our Foreign Service Institute trains our career foreign officers, but it is not equipped to train cold war leaders from this and other free countries. The National War College and its subordinates, the Army War College, Naval War College, and Air University, must treat political warfare only as a footnote subject. The role of the Central Intelligence Agency is not adequate—as experience has proved.

A cold war development and training center—a Freedom Academy—may sound impractical or visionary. But is it?

Unless we wish to see freedom everywhere nibbled to death, at an ever-increasing pace, we had better create some such facility for defending ourselves, and counterattacking, in the cold war. Let your Representative and Senators know that you're strongly in favor of the proposed West Point for political war.

The Communists have its equivalent, and have been turning out graduates of distinction for years.

Today they're taking the world away from you.

Mr. MUNDT. Should it occur that the House does not act in these concluding hours of the session—and I suspect that this is the final day of this extra session of the Congress—let it be said that this effort will go on, and that this bill will be introduced in the next Congress. I am convinced that something as important as this measure to the success of freedom and to the defeat of world communism and to the preservation of world peace will be quickly adopted in the new Congress, if it is not in fact approved by the House of Representatives before we adjourn today.

THE DEFENSE RECORD

Mr. SYMINGTON. Mr. President, yesterday morning, after the minority leader refused to agree to the Senate's voting on a resolution it be the sense of the Senate that expenditure ceilings on high priority defense items be removed, he asked unanimous consent that, in connection with his refusal, he be allowed to insert a statement in the RECORD.

I was surprised to note this morning that the statement he thereupon inserted had little to do with this resolution. Rather it was a criticism of a talk I made on the floor last Friday.

Inasmuch as the minority leader said in his statement that he had studied my talk in some detail last Saturday, I am sorry he did not give me a chance to see his reply until today. I am sure he did not handle it this way with the premise that we would adjourn last night, because that is not the manner in which the minority leader operates.

In his analysis of my talk he said that I had done a grave injustice to the Secretary of Defense. That is not correct. During the debate on Friday I stated:

> The present Secretary of Defense has my respect, and I do not criticize him in any way from the standpoint of his being a great American patriot. I do, however, criticize his judgment.

That was the way I felt then, and that is the way I feel now.

I have heard on good authority that the Secretary of Defense is not happy about the consistent fiscal limitations applied to his operations, presumably by the Bureau of the Budget.

I did and do believe that the letter from the Secretary of Defense was misleading, because of the following three points on which it was far from clear in presenting the facts.

First, the administration asked for less, not more, money than was in the President's message.

Second, the administration did not request the increases made by the Congress, although it did accept part of them, and the Secretary's letter would certainly suggest that the administration recommended all of them.

Third, the administration then froze funds in an amount comparable to the total increase made by the Congress.

Mr. President, in due course I will answer in detail the assertions contained in the memorandum put in the RECORD last night by the minority leader, and make it available for the permanent RECORD.

Let me repeat again today, however, that despite all the belated protestations that have been made about increasing our defenses in accordance with purported recommendations by this administration, the record is clear that the initiative lay with the Congress.

Moreover, high priority programs have been held up by arbitrary expenditure ceilings and similar devices.

As we now go to the country on the record, the minority leader would appear to be attempting to change that record so it will look as if the administration had done what the facts show the administration has not done.

That was the reason why I submitted my resolution, after I found out that such vital programs were being held up as the B–58 procurement; construction of missile bases and maintenance of training bases; the number of military personnel; the ICBM procurement program—that is the long-range, intercontinental missiles—B–70 development; Navy ship construction; and Army modernization.

Mr. President, I mentioned that I was going to file a complete report for the permanent RECORD, and I certainly do not intend to take the Senate's time today to deal with all of these inaccuracies.

But, let me give just one example of what the minority leader has referred to as statements in my speech which were "left incomplete in a most damaging way." He quotes my talk of last Friday as follows:

> The House Appropriations Committee recommended, and the House approved, an increase of $115 million for "Airborne alert capability." * * * After reconsideration of this problem, we again recommend the program as proposed in January.

It is clear from that statement that the Deputy Secretary of Defense testified the administration did not want the increased money approved by the House for airborne alert capability, but rather preferred to have that money not made available, as they wished to maintain the airborne alert program as proposed in January.

In other words, they did not want additional funds for airborne alert.

There is nothing incomplete about that. The minority leader, however, criticizes me for not having gone on to cite the Deputy Secretary of Defense's testimony in which he makes reference to a section in last year's appropriations act and in this year's appropriations act giving the Department of Defense authority to increase its airborne alert program if it decided to do so. That section of the act has been referred to time and again. In fact, just last June, when the appropriations bill was before the Senate, I not only referred to that provision, but I quoted it in full before the Senate.

I then went on to point out at that time that this language in no respect reflects the sense of the Congress that we should make preparations for airborne alert at this time. In fact, I said: "Regardless of any language, nobody will be able to snap his fingers and obtain it."

Moreover, I pointed out that as some of the equipment and trained personnel needed for an airborne alert would take 18 months to obtain, it was necessary to make the funds available and use them at this time if we were ever to have the capability when it was decided it was needed.

Consequently, Mr. President, I deny categorically the accusation of the minority leader that failure to cite again this section in the act in any way changes or leaves incomplete the clear-cut assertion that the administration's position at that time was this: They did not even want to take the initial steps to prepare for a sufficient airborne alert capability.

Mr. President, let me cite just one more of the illustrations which the minority leader has labeled "incomplete in a most damaging way."

He quotes the following testimony from the Deputy Secretary of Defense, which I had included in my August 26 talk, in regard to antisubmarine warfare.

> With regard to the $100 million of additional funds voted by the House for ASW research and development * * * we recommend that the remaining $58.1 million be eliminated.

When the Secretary of Defense wrote the majority leader and stated that the administration had recommended an increase in funds for antisubmarine warfare research and development, I cited this record to show that what had really taken place was that the House had added money, and that the administration had expressed its disapproval of most of what the House had added.

This is a far cry from having the administration recommend an increase.

The facts are that the House recommended the increase and the administration said they did not need most of it.

I would not want Congress to adjourn and have us go back to our communities without presenting a few additional facts for the record with respect to just who was and is responsible for the present lag in our defense posture.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. SYMINGTON. I am glad to yield to the Senator from Oregon.

Mr. MORSE. While the Senator is discussing the topic of who is responsible for the defense lag, I should like to make this comment about the service the Senator from Missouri has rendered to the country in the past several years, as he has persistently, insistently, and courageously sought to focus attention of the American people on our security posture.

I know it has not always been easy for the Senator from Missouri to do so, because he has been under terrific fire from time to time in the form of very unfair criticism and personal abuse. However, he is about to discuss who was responsible for the fact that there has been a lag in our defenses. In that connection I wish to focus attention for just a second or two on the fact that the Senator from Missouri is responsible for a great shift in Republican policy in the field of defense. They are talking a different language now than they did last year. I am satisfied that they recognize in their inner councils that there is no answer to the Senator from Missouri. Thus we find them, in Chicago at their convention, and in their press interviews of recent day, and the President himself, shifting ground in order to accommodate themselves to the facts which the Senator from Missouri has brought out for several years.

A great deal of credit is due to the Senator from Missouri for the fact that now the administration has at long last—and it is long overdue—started to do something about filling up the gaps in our defenses.

Mr. SYMINGTON. I am very grateful to the senior Senator from Oregon for his comments. I first had the pleasure of knowing him when he was a member of the Senate Committee on Armed Services. He was one of the most constructive and intelligent members who ever served on that committee. He gives me undue credit. I am grateful for it, of course, but cannot agree with it. I believe that Governor Rockefeller has had a good deal to do with the changed position of this administration on defense. There is one great difference between the work of the Governor of New York in this field and the work of many other people in his party. He has studied the matter. After studying it, as has been the case with many other worthy citizens, he has come to three conclusions. The first is that we are not doing enough. The second is that we can afford to do more. The third is that if we do not do more, in a short time we will be in the kind of trouble that the Senator from Oregon and I have been worried about for a long time.

Now that world tensions have come to the point where the Governor of New York and members of his commission, the Gaither Committee, the Johns Hopkins Study Commission, the members of the CED Commission, et cetera, are shown to have been right, based on present world tensions, instead of representatives of and advocates of this administration facing frankly the fact that they were wrong, they are attempting to saddle the previous administration with the fact this country has not done what should have been done in this field. They have not been willing to give the facts to the American people.

I might add, in response to the Senator from Oregon, that representatives of this administration do not try to saddle on anybody else the present great gap to our disadvantage in ground forces, the present great gap to our disadvantage in submarines, and the present obvious gap in the space field. Because it is a new field, where there have been rapid changes, they attempt to prove that another administration was responsible for the missile gap.

Now here are a few facts which should be part of the RECORD, so the people of the country may decide who is responsible for what with respect to the subject we are discussing this morning.

First. From 1946 through fiscal year 1953—the last year under a Truman budget—$3,450 million were spent on military missile programs.

Second. When the Eisenhower administration took office in 1953, it inherited a fiscal year 1954 budget which had been prepared by the Truman administration. The defense part of the Truman budget was cut $5¼ billion by the Eisenhower administration. Most of this cut was taken from the Air Force, and resulted in a substantial reduction in research and development moneys and other funds for missiles.

Third. In fiscal year 1954, the funds for missiles were cut about $100 million below those in the last year of the Truman administration—that is from $1,166 million to $1,067 million.

Mr. President, on the basis of this figure alone, what a farce it is for people to talk about a previous administration being responsible for any missile gap.

Fourth. During 1946–53, the rocket engines now used in the Atlas intercontinental ballistic missile—in production—and the Thor intermediate range ballistic missile—which is also in production—were developed for the Navajo project. Prior to 1953, the United States had already developed or had under development the Terrier, the Sparrow, the Nike, the Matador, the Snark, the Hermes, the Navaho, the Rascal, the Lark, and the Atlas missiles.

Fifth. Prior to 1953, the United States had developed the atom bomb and had tested the first hydrogen device, the latter having been ordered into development by President Truman in 1950.

Sixth. By the time the Eisenhower administration came in, the research and development for the Atlas ICBM program had developed to the point where it was characterized by General Schriever—the officer in charge of the project—as follows:

> By 1953, impending solution of most of the problems [for developing the Atlas ICBM] allowed design and initial construction of Atlas vehicles.

Seventh. Yet, for years the Atlas was not given a national priority and has never been put on a full production basis.

Eighth. No one was producing ICBM's in the 1940's or, to the best of our knowledge, the early 1950's. The state of the art had not progressed to that point either here or in the Soviet Union. However, when both countries were ready

to begin production, the Soviet Union went ahead, while the United States gave a higher priority to fiscal objectives than to the ICBM program. Even the administration finally admitted that this policy resulted in a situation in which the Soviets would have at least a 3 to 1 advantage over us in this field.

That ratio was announced by Secretary of Defense McElroy in January 1958.

Ninth. In the last year under the budget of the previous administration, the fiscal year 1953—and to me this is very significant—12.1 percent of our gross national product was spent on our military defense, while this year the administration's program calls for spending 7.8 percent of our gross national product. So we see that despite the fact everybody now agrees that the Communist menace is more serious today than it was, say, 7 or 8 years ago, we are spending much less of our national income for defense than we spent at that time.

Tenth. Throughout the last 6 years, Democrats in and out of the Congress have been warning of the dangers, urging that more funds and efforts be devoted to defense, and bringing the facts out to the American people. These efforts have been met by soothing statements which tended to create a sense of complacency among the American people.

Despite efforts on the part of Democrats to increase our military strength, build up our strategic forces, improve the mobility and modernity of our Army, step up our Polaris missile program, and so forth, the administration has refused to change or accelerate its programs.

Eleventh. Failure to spend funds made available by the Congress during the past 3 years has resulted in less operational capability in the long-range missile field, less modernity and mobility for our ground forces, less modernity and capability in our naval forces.

For example, last year the Congress added $382.6 million for Army modernization, of which only $43.6 million was allowed by the administration to be spent for this purpose. An even more recent example is that this year the Congress added $394 million over and above the President's budget request for the Polaris, while the Department of Defense first objected to any increase and then announced that it would use only $312.3 million of this increase.

So later I shall answer in detail the statement placed in the RECORD by the minority leader yesterday. I told him today I planned to take the floor to reply to his statement as soon as I could get the floor. It is of the utmost importance that the American people be given all facts which will not help a possible enemy. Based upon this record just presented to the Senate, the idea that anyone would have the temerity to say that the relative decline in the defense strength of the United States as against that of the Soviets rests on something that was done say 10 years ago is, to me, one of the most fantastic efforts to misrepresent I have listened to in a long, long time.

Mr. YARBOROUGH. Mr. President, will the Senator from Missouri yield?

Mr. SYMINGTON. I yield.

Mr. YARBOROUGH. I desire, on behalf of the people of my State, to commend the distinguished Senator from Missouri for his forthright, frankly spoken, honest appraisal of our defense situation.

The Senator from Missouri knows that the people of my State hold him in high esteem. I have transmitted to him during the past year numerous invitations from my State for him to appear at public functions. They have not been of a partisan nature. I do not believe a single invitation was to a partisan political meeting. They have come from different groups which were interested in the defense of the country. Knowing of the deep knowledge of the distinguished Senator from Missouri on this subject, they wanted him to speak at statewide meetings when his duties here permitted, so that they could learn from him at first hand more about the situation in which we find ourselves today.

I commend the distinguished Senator from Missouri for his courage, his candor, his sound knowledge, and his true approach, free from all partisan bias. I commend him for the very convincing manner in which he is, day after day, telling the American people of our dangers and of the necessity for girding ourselves to meet those dangers.

The Senator from Missouri has rendered distinguished service, over and above party, to all Americans. I commend him for continuing his very deep studies of the defense situation for the benefit of all the people of the Nation, and, indeed, of all the people of the free world.

Mr. SYMINGTON. Mr. President, I am very grateful to the able junior Senator from Texas for his kind comments. Especially inasmuch as his State has much of the Air Force and much of the Army and Navy, he has been interested in this subject for many years. He has great patriotic interest in the future security of the United States. I may add that whenever he would like to have me come to Texas, it will be a great pleasure.

Mr. President, I should like to point out how unfortunate some of the discussion on defense is getting to be, from the standpoint—regardless of politics—of the people's right to know. I found out that a good many of the highest priority items in the defense program were being held up; and that this was due to fiscal limitations. Therefore I submitted a resolution stating it was the sense of the Senate that we eliminate any fiscal ceilings on high priority items, where that was occurring at this time. Much to my surprise, I could not obtain consent from the minority leader to bring that resolution before the Senate for a vote.

This morning, after the late session last night, I picked up the RECORD, and found that instead of the statement by the minority leader having something to do with my resolution request—it was a long and, in my opinion, misleading and inaccurate analysis of a talk I made on the floor of the Senate last Friday.

I noticed in the RECORD—what the minority leader said about the junior Senator from Missouri. He said that he "felt that the remarks of the Senator from Missouri on the floor of the Senate yesterday constituted a serious disservice to a better public understanding of the defense program."

Mr. President, the facts and the figures have been placed in the RECORD today; and now let the Senate and the American people decide who has created a serious disservice from the standpoint of proper presentation of the truth.

Mr. KEATING. Mr. President, will the Senator from Missouri yield?

The PRESIDING OFFICER (Mr. LAUSCHE in the chair). Does the Senator from Missouri yield to the Senator from New York?

Mr. SYMINGTON. I yield to my friend, the Senator from New York.

Mr. KEATING. Mr. President, I ask unanimous consent to have printed at this point, again—as I have several times before—a table showing, in millions of dollars, the expenditures for long-range ballistic missiles during previous administrations and the present administration.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[In millions of dollars]

Fiscal year	IR ICBM programs	All missile programs
1946	1.9	70
1947	0	58
1948	.3	81
1949	.1	98
1950	0	134
1951	.5	784
1952	.8	1,058
1953	3.0	1,116
1954	14.0	1,067
1955	159.0	1,470
1956	526.0	2,270
1957	1,401.0	4,470
1958	2,150.0	5,107
1959	2,945.0	6,913
1960	3,303.0	6,634

Mr. SYMINGTON. Mr. President, I have said before that the Senator from New York is a great expert in the military field and also in many other fields; in fact, as I listen to him discuss the various problems that face the American people, I think we are most fortunate to have him in the Senate, to explain major problems in every field.

But in regard to the figures he has placed in the RECORD, those figures show that in the first year of the Eisenhower administration, nearly $100 million—$99 million, to be exact—less was spent for missiles than in the last year of the previous administration. I can well remember when in the spring of 1953 the Secretary of Defense said he was going to take $5 billion out of the Air Force and give the American people a better Air Force. The senior Senator from Georgia [Mr. RUSSELL] asked, "Why do you not take $10 billion out, and give them a much better Air Force?"

As a result of the serious reductions in missile effort forced by this action all missile programs were retarded. As a result of the continuing lag in the missiles program, the Assistant Secretary of Defense for Research and Development, of this administration, resigned

in protest, because, he said, and this was as late as 1956—that proper priority was not being given to missile development in the United States.

The way this argument has to some extent been euchred into an argument solely about missiles is rather clever. But everyone knows that our Army is but a small fraction of the size of the Russian Army; and that our Army is not as modern as the possible aggressor. I am glad that no one has attempted to saddle that gap on the previous administration.

Everyone knows that the Soviets have in operation many times more submarines than the United States has. I am glad no one has attempted to saddle that gap on the previous administration.

Everyone who has studied the subject knows that we have an airlift gap. I am glad no one has attempted to saddle that gap on the previous administration.

Everyone knows that we accomplished a remarkable technical feat a few days ago when we put up and recovered an 84-pound satellite. I say that with complete sincerity, but a few days ago the Russians put up and recovered a capsule that weighed over 10,000 pounds. Experts in the field of space assert we are well behind in the thrust which is so important to our space defense efforts, actually also to all space effort.

One of the great military analysts of this country said this week we are behind in space developments because the Russians started their program in 1954, but we did not start ours until 1958.

I am glad no one has attempted to say that another administration should be criticized for that gap.

I am one who agrees that the United States of today could defeat the United States of 1952; but I think what is important is to compare our strength today as against that of the possible enemy and not as compared to what it was in 1952.

I have here some testimony submitted before the Preparedness Investigating Subcommittee of the Committee on Armed Services. This testimony was given only this year. The counsel for the committee stated, in questioning the Secretary of Defense:

Mr. Secretary, the Assistant Secretary of Defense (Comptroller) has provided a summary which shows that the Department of Defense has underestimated the funds required for IRBM's and ICBM programs each and every year since 1955. I read from his official summary:

For fiscal year 1955, the budget request for IRBM and ICBM programs was $40.9 million. The amount finally programed was $158.9 million.

For fiscal year 1956, the budget request was $159.3 million. The amount finally programed was $526.3 million.

Mr. President, I honestly never realized myself until I looked over these figures, how far ahead this Congress has been of the administration in this field.

I read further from that same testimony:

For fiscal year 1957, the budget request was $858.9 million. The amount finally programed was $1,400.9 million.

For fiscal year 1958, the budget request of the Department of Defense was $1,937.3 million. The amount finally programed was $2,149.8 million.

For fiscal year 1959, the budget request was $2,391 million. The amount finally programed was $2,945.6 million.

For fiscal year 1960, the budget request was $2,522.8 million. The amount finally programed was $3,303.3 million.

Now, here we have clear and convincing evidence that the Department of Defense underestimated by millions and millions of dollars during each of the last 5 years the amount of funds actually needed for the development and production of missiles. The total of such errors was over $2½ billion. But at the same time we are presented with charts which come from the Defense Department and are used in an effort to show that the missile lag created by the fiscal policies and disinterest of this administration is, in some strange way, really the fault of another administration.

At one point in this connection, the eminent counsel for the committee, Mr. Weisl, asked the Secretary of Defense:

Can you explain to this committee why the Defense Department has been so consistently wrong in underestimating the amounts required for ballistic missiles programs?

The Secretary of Defense, Mr. Gates, replied:

Secretary GATES. I can only explain it, Mr. Weisl, to the effect that this is a new program, a new art in terms of years. It is changing extremely rapidly, and is under continuous review. It relies on tests, and there are continuous changes in it. It is not unusual for the Department of Defense to reprogram in all of its procurement programs.

Mr. President, this Nation has never utilized its full production potential in either the development or the production of long-range missiles.

The facts are that the Congress has consistently furnished the funds requested and often more than the amounts requested for these high priority programs. This makes it clear where the responsibility for the defense lags rests.

This, Mr. President, is the record, let it speak for itself.

SUGAR LEGISLATION

Mr. WILLIAMS of Delaware. Mr. President, I should like to read from a UPI ticker tape:

The Democratic-controlled committee turned thumbs down on a Senate-passed bill granting President Eisenhower unrestricted power to prevent "bonus" shipments of sugar from the Dominican Republic.

It first rejected, 19 to 11, a Republican proposal that the House accept a Senate amendment to a House-passed bill granting the power with strings attached.

Then the committee voted, 18 to 11, to direct its chairman, Representative HAROLD D. COOLEY, Democrat, of North Carolina, to block any House move to accept the Senate amendments and to refuse to permit compromise negotiations unless the Senate specifically requests it.

I repeat the last line:

Then the committee voted, 18 to 11, to direct its chairman, Representative HAROLD D. COOLEY, Democrat, of North Carolina, to block any House move to accept the Senate amendments and to refuse to permit compromise negotiations unless the Senate specifically requests it.

If I understand the rules of the Senate, or of Congress, that, in effect, means they are going to block any chance of any consideration of that legislation in this session of Congress.

It is my understanding, in view of the fact that we have passed the bill in the Senate and the bill is now before the House of Representatives, that the Senate does not have the power, even if we wish to, to appoint conferees.

To confirm this, I am addressing my question in the form of a parliamentary inquiry. Under the rules, in the present situation, could the Senate request a conference at this moment if it wished?

The PRESIDING OFFICER. In the absence of the papers being before the Senate, there would be no power in the Senate to request a conference. For the Senate to have the power to act, the papers would have to be before the Senate.

Mr. WILLIAMS of Delaware. I thank the Chair. That was my understanding.

Mr. President, this is not a question of who asks for a conference first. I think it goes beyond that. I would like the RECORD to be clear that this is an arbitrary effort to block further consideration of the legislation. As the rules have been interpreted unless those papers are returned, the Senate is powerless at this particular time to act.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. JOHNSTON of South Carolina. I ask the Senator from Delaware if he has not been in the Senate long enough to realize that, having amended the bill as the Senate did last night, the House probably will not agree to it.

Mr. WILLIAMS of Delaware. No. The Congress is a joint body. I think the Senate or the House, on any measure, always has the right to express the opinion of its membership on any legislation. It is always customary, when there is a difference of opinion between the two bodies, at least that the matter be negotiated by a conference committee and that an effort be made to reach an agreement. At least an effort should be made.

Today I have been asked the question several times whether or not the Senate would ask for a conference or wait for the House. I want the RECORD to be clear that it is not within the power of the Senate under the rules of the Senate, to request a conference, unless the papers are returned from the House.

Mr. JOHNSTON of South Carolina. That is true. There is so much difference between the bill as passed in the House and the Senate that I am surprised the Senator did not anticipate that there would be no sugar bill. Also, the Senator knows the sugar legislation runs out next month. Then the United States will be left in a predicament. Then the people of the United States are going to be the ones to suffer because we have no program for buying sugar. Do not be surprised if the people will have to buy sugar at an increased cost of 25 percent. Because the Senate

passed a bill so out of line with what the House passed, as I see it, there is no chance at all for the two Houses to get together.

Mr. WILLIAMS of Delaware. I call attention to the fact that the Senate approved the measure which left here yesterday, not by a close vote, but by a vote of 62 to 17. Certainly, a vote such as that is entitled to consideration and recognition by the other body. If it means there will be no sugar legislation because of that action then we should refuse to adjourn. We should postpone adjournment for other reasons, as I pointed out earlier wherein we are faced with a complete shutdown of the largest railroad in the country. Congress before adjourning, should be sure we have laws on the statute books to deal with this emergency. Notwithstanding the fact that I and all the other Members would like to go home today, we should stay here and finish the people's business and here are two fields that need our attention.

If that means we must stay here tomorrow, or next week, let us stay. Let us make sure we provide this Government adequate machinery with which to deal with these emergencies.

Mr. BENNETT. Mr. President, will the Senator yield to me?

Mr. WILLIAMS of Delaware. I yield to the Senator from Utah.

Mr. BENNETT. I should like to remind the Senate again that twice the House has sent us a bill without giving the machinery of the Senate time to operate. The House both times has sent the bill to the Senate on the day when the Senate expected to adjourn. The Finance Committee has been given no opportunity to hold hearings, no opportunity to consider the bill more than simply to rush it to the Senate so that the Senate could act.

I was in the conference on the bill we passed on July 2. We had Mr. COOLEY'S promise that he would send the bill to us the first day of the session, so that the Senate Committee on Finance could consider it. He sent the bill to us on the last day of the session. I think this was a calculated program.

When the Senate is scolded because it will not agree with the House, under pressure, I resent it. I think the House has completely refused to cooperate. It has deprived us of our constitutional right to participate in the legislative process.

Regardless of the merits of the bill, it seems to me this is an affront to the Senate. I think the House is at fault, not the Senate.

There are often disagreements with respect to bills. There should be an opportunity for men of good will to work out disagreements. This procedure gives the Senate no opportunity to work out anything.

I agree with the Senator from Delaware that the burden is not on the Senate, but the burden is actually on a majority of the members of the Committee on Agriculture of the House, on the 18 men who presume to tell the Senate and the country that if we do not take exactly what they wish to give us we shall have no rights. I do not like that kind of an approach.

Mr. WILLIAMS of Delaware. Mr. President, I agree with the Senator from Utah. I think this is not only an affront to the Members of the Senate, but also an affront to the American people. I think the House should be reminded of the fact that they cannot have a sine die adjournment until the Senate concurs. The House Members should be told that we are going to stay in session until we do complete the business for which we are being paid.

Mr. HRUSKA. Mr. President, will the Senator yield to me, so that I may propound a question of the Senator from Utah?

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that I may do so without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Delaware? The Chair hears none, and it is so ordered.

Mr. HRUSKA. The Senator from Nebraska would like to make an inquiry of the Senator from Utah [Mr. BENNETT]. There was a meeting of the Committee on Finance yesterday, was there not?

Mr. BENNETT. That is correct.

Mr. HRUSKA. Was the committee furnished with copies of the hearings of the House Committee on Agriculture on the sugar bill?

Mr. BENNETT. The committee was not furnished with anything except a copy of the bill as it came from the House.

Mr. HRUSKA. Did the members of the Committee on Finance have the benefit of any discussion or debate which occurred in the House in regard to the bill, as recorded in the CONGRESSIONAL RECORD?

Mr. BENNETT. The Senate had no benefit from that. Actually, all of the debate which took place on the House bill is contained in approximately one column of the CONGRESSIONAL RECORD. There was no real debate on the House floor. There was no opportunity for us to consider the bill carefully. We were not only not furnished with the record of hearings in the House committee, but also we were denied the opportunity to have hearings of our own.

I do not think that we in the Committee on Finance are obligated to make decisions on the basis of hearings in another committee. I think we should have the opportunity to exercise our full legislative rights and responsibilities. We should have time to consider a bill of this kind.

This is twice now, in 2 months, this situation has occurred. The House committee has sent us a bill, put a gun at our heads, and said, "Take it, or there will be no bill," under circumstances which make it impossible even for us to examine the purposes behind the House bill.

Mr. JOHNSTON of South Carolina. Mr. President——

Mr. WILLIAMS of Delaware. Mr. President, as the Senator from Utah has pointed out—and I am also a member of the committee—twice this bill has been sent to us on the closing days of the session, without allowing adequate time even for the committee to properly consider the bill.

We did have before our committee yesterday, as the Senator from Utah has pointed out, representatives of the Department of Agriculture and of the State Department. To that extent in that limited time, we did have the benefit of their opinions. However, I do not think that is a constructive way to pass legislation. The bill should have been sent to the Senate, as promised in the last session, early this session. In that way we could have had adequate time for consideration. This bill should not have been sent to us at the last moment.

To again yield to the House on the basis of "Take what we give you or you will get nothing" is not proper. I think it is time for us to notify the House that we are willing to stay in session for a period of time until perhaps the House will reflect more soberly on the actions it has taken.

Mr. JOHNSTON of South Carolina. Mr. President——

Mr. HRUSKA. Mr. President, will the Senator yield to me for a brief comment?

Mr. WILLIAMS of Delaware. I yield to the Senator from Nebraska.

Mr. HRUSKA. The Senator from Nebraska made inquiry for a copy of the hearings of the House Committee on Agriculture, and was told there were none. The Senator from Nebraska made a request for a report on the bill. There was no report.

I looked in vain through the CONGRESSIONAL RECORD for some clue to the bill, for some explanation given of the sugar bill passed in the House, and I was unable to find more than a column and a half in the CONGRESSIONAL RECORD, most of which was taken up by a reprinting of the text of the bill and the committee amendments thereto, and the formal waiver of objections to taking the bill up at once. There was a voice vote, without any debate or discussion whatsoever.

The statement of the Senator from Utah is borne out by the fact that my search was negative. I am glad to know it was an accurate search.

Mr. JOHNSTON of South Carolina. Mr. President——

Mr. WILLIAMS of Delaware. I yield to the Senator from South Carolina.

Mr. JOHNSTON of South Carolina. To keep the record straight, we all know the House passed the bill unanimously. We know the bill came to the Senate. We know that the committee met and the committee made some minor revisions in the bill.

I think each Senator will have to agree that if the bill had been passed in the Senate as reported by the committee we would not find ourselves in the trouble we are in today. That being so, that is the situation we face.

What has happened? The House committee has already met. The House committee has voted again unanimously, I understand.

Mr. WILLIAMS of Delaware. The vote was 18 to 11.

Mr. BENNETT. I beg the Senator's pardon. The vote was not unanimous.

Mr. JOHNSTON of South Carolina. They have turned down the proposal by a large majority.

Mr. BENNETT. It was a majority. It was a party-line vote except for one Member on the other side of the aisle voting with the Republicans.

Mr. WILLIAMS of Delaware. Mr. President, do I still have the floor?

The PRESIDING OFFICER. The Senator from Delaware has the floor.

Mr. WILLIAMS of Delaware. I shall be glad to yield to the Senator from South Carolina, but I wish to have it understood that I still have a right to the floor.

Mr. JOHNSTON of South Carolina. Nothing has been done. We find ourselves in this position because we in the Senate undertook, without committee hearings and without all the information Senators desire, to pass a bill on the floor of the Senate. We have to acknowledge that.

Mr. WILLIAMS of Delaware. Mr. President——

Mr. JOHNSTON of South Carolina. When we passed the bill, we found ourselves in the position we are in at the present time.

Mr. WILLIAMS of Delaware. Mr. President——

Mr. JOHNSTON of South Carolina. I feel that the people of this Nation are going to suffer on account of it.

Mr. WILLIAMS of Delaware. Mr. President, I say that the Senate had access to what information we could get in 1 day. But that is the wrong way to expect the U.S. Senate or any committee of the Congress to act. We did the best we could. We reported a bill to which was offered an amendment on the floor of the Senate. This amendment was approved by a vote of 62 to 17.

Certainly we are not going to say that 62 Members of the Senate did not know what they were doing. I think by all lines of reasoning the House has a responsibility to recognize this and not to say, "We will not accept any conference unless the Senate requests it." The House knows, as explained before, that under the rules of the Senate we could not request a conference if we wished to do so. Our hands are tied. The only thing we can do, so far as we are concerned in the Senate, is to refuse to adjourn sine die until the House changes its mind.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield to the Senator from Colorado.

Mr. ALLOTT. I wish to confirm and to support what the Senator from Delaware and the Senator from Utah have said.

There is some history which has been forgotten, apparently. The history is that the bill came to the Congress a year ago early this last spring, sometime in February. The sugar people of this country—both the cane sugar people and the beet sugar people—were begging for a bill a year and a half ago. When we got into the situation at the very end of the last session, we were "shotgunned" into a marriage with a kind of sugar bill. No one liked it. My vote, I think, will indicate how I felt about the situation, because I even failed to vote, as the Senator from Utah will remember, for the conference report.

This practice of taking a local issue, such as the sugar issue, which is primarily local, and making it an international tool and holding a gun to our heads, must sometime be stopped. We Senators must show that we are willing to stop it.

For example, last night when he had the measure before us for consideration, I was one of the first to ask for a copy of the bill. It took me a half hour to get it and, as far as I know, I had one of the very few copies of the bill in the Chamber.

That practice is not legislating, and we know it. It is not the fault of the Senate that we did not have copies of the bill. It is not the fault of the Senate that we did not have a report on the bill. It is not the fault of the Senate that there were not more adequate hearings on it. However, I will say that I do not think we need hearings. We understand what it is about, and it is about time the Senate stood up and said to the House, "We also are a legislative body in this Government and we are going to stand up and claim our rights once in a while."

I wish to thank the Senator very much for yielding to me.

Mr. WILLIAMS of Delaware. Mr. President, I thank the Senator from Colorado for his remarks. I agree with him that the situation is not the fault of the Senate. I am not saying that the bill that passed the Senate, was perfect even though I voted for it. We respect the position of the House and are willing to sit down with their conferees as men of good will and try to work out a solution of problems. Certainly neither side should sit back and say, "We are right. Take it or leave it."

But the Senate should not vote for a sine die adjournment unless we had settled the pending question before we returned home.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. AIKEN. I take it that the Senator from Delaware is arguing for a sugar bill. What this Congress has gone through since last year in regard to sugar legislation should prove to all of us that we ought to do away with this sugar program at the very first opportunity, and that opportunity is now. I do not think Americans realize what the program is costing the consumers of the United States. It does not protect the producers and it does not protect the consumers. It does not protect many foreign countries. It does protect some. By reason of the act consumers must pay at least 1 cent more per pound for sugar than they would otherwise pay.

The sugar program is designed to protect and stabilize the profits of big sugar companies and refiners at a very high level, and the consumers pay for that. Producers do not get the benefit.

We can take care of our domestic producers in the same manner in which we operate the wool program now.

I think perhaps we should produce more in this country than we have been doing. If we do away with this program, the world price of sugar will rise, I presume, as much as 1 cent a pound. I have no way of knowing exactly how much. It will rise some. The price the United States will pay for offshore sugar will go down below what we now pay.

We must remember, however, that these offshore operations are largely American-owned operations. Some plantations are 100,000 to 150,000 or more acres in size in different parts of the world, and they make large profits by reason of the Sugar Act. The additional cost of sugar is added to the food bill of the American consumer.

It is time that we did away with the program, time that we got through with it. I do not know how many agents the Dominican Republic may have in this country. We hear there are many of them. Some of them openly represent the Dominican Republic. Some are prominent people. I do not know how many representatives of the sugar industry are located in Washington, D.C., but we know there are some because we only have to look at the gallery to see them at most any time.

We know that such representatives in some ways can be helpful to Members of Congress. But I think now we have had demonstration enough of the subterranean actions that go on in the sugar industry, particularly in relation to foreign countries, and we ought to make up our minds that we shall be done with it. It is getting to be pretty borderline material that we have to put up with.

Mr. WILLIAMS of Delaware. Mr. President, I certainly agree with what the Senator from Vermont has said. I think the time is long overdue when we should reappraise the necessity of any sugar act at all. However, that is not the question here. I am sure the Senator from Vermont will agree with me that what we were voting on yesterday was not whether to get rid of the Sugar Act. The Sugar Act has a certain limited time to run under the existing law and we could not repeal it at this moment without violating contracts. What we were voting on yesterday was whether or not we should force the President to buy from the Dominican Republic, under Mr. Trujillo, an additional 320,000 tons of sugar at this higher price. The Senate last night said, in answer to that question, that we would give the President authority to stop buying that sugar if he felt such action would be in the best interest of our country.

Mr. AIKEN. We can buy the sugar from American producers.

Mr. WILLIAMS of Delaware. Or offshore at a lower price.

Mr. AIKEN. Or we can buy from other countries in the Western Hemisphere that will take their pay in American farm commodities that we have in surplus.

Mr. WILLIAMS of Delaware. I am in complete agreement with the Senator from Vermont, but I emphasize again that what we were doing last night was not deciding whether we need a sugar act or not. We were deciding whether

in the Sugar Act, which is already a law, we should give this additional bonus to the Dominican Republic.

I am sure that the Senator from Vermont will agree with me that we should not give them the additional 320,000-ton allotment at this time. What I suggest is that the House should cooperate and at least sit down and consider an endorsement of the President's request.

The House has refused even to consider any conference at all, and the Parliamentarian has advised us that the Senate, under the rules, cannot request a conference unless the House first requests it or returns the papers to the Senate. That is the point I make at this time. I do not think we should go home with a law on the statute books under which it is mandatory that we give to Trujillo this additional 320,000 tons of sugar.

I yield to the Senator from Vermont.

Mr. AIKEN. Mr. President, I wish to say one more thing. Even though we have no new law and the President is forced to buy 300,000 more tons of sugar from the Dominican Republic this year, and if, by so doing, we could get rid of this program, which I say has now become a questionable program, it would be money well spent to do so. Then let us look after our own farm people, and let us, to the extent necessary, do business with other countries that produce sugar and that are willing to do business with us.

Mr. WILLIAMS of Delaware. Mr. President, I will support the Senator from Vermont in reappraising the value of any program.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield to the Senator from Idaho.

Mr. DWORSHAK. I share the disappointment of my colleagues over the apparent unwillingness of the House to cooperate in enacting, at this session, a satisfactory bill for our sugar industry.

I recall what happened on the final day of the session in July when this body was forced to take precipitate action, and without mature consideration, because the sugar bill was sent over in the final hours of the session. The Senator from Vermont has indicated his displeasure with the sugar program because, he alleges, the consumer does not benefit from it.

I should like to interpose a few points concerning the sugar-beet producers of our country. My State is the third largest beet-sugar-producing State in the Nation. In Idaho there are many thousands of acres of land which could be utilized for the production of sugar beets instead of producing some of the commodities which are in surplus today.

Much is said about maintaining the family sized farm units in this country. Nothing would contribute more in my State—and I am sure this is true also of other western States—to the successful operation of the small irrigated unit than expanding the sugar quota for these farms.

It is difficult for war veterans who homesteaded on some of our irrigated Federal projects in Idaho to understand why they are denied the opportunity to expand their sugar production at a time when our Government is purchasing sugar at premium prices from other countries.

Something should be done. I do not know whether it would be better to discontinue the sugar-control program. Certainly it is not entirely successful as it is being managed at this time. I agree with my colleagues that the Congress has a joint responsibility in endeavoring to solve some of these problems which so vitally affect our farmers.

Mr. WILLIAMS of Delaware. I now yield to the Senator from New York.

Mr. KEATING. Mr. President, I share emphatically the views of the distinguished Senator from Delaware that we should not consider a sine die adjournment until the sugar issue is resolved. The distinguished Senator from South Carolina has pointed out that if sugar prices go up it will be the responsibility of the Senate. If sugar prices go up our consumers will be injured, and that too would be the responsibility of the majority in this body. The House, to this point, has stubbornly turned down any effort to resolve this issue. They just sit back and say, "Take it or leave it. We will not consider anything else."

I should like to ask my friend from Delaware if he does not believe that since the question involves our international relations and similarly is a matter of great domestic interest, about which the President of the United States has shown considerable concern, that there is a very real possibility that if we do not resolve the issue now we will be called back by the President to resolve this vital issue.

Mr. WILLIAMS of Delaware. There is a possibility of that because, as I pointed out to the Senator from Vermont, what we are doing if we do not act is not to let the Sugar Act die, and we are not in any way affecting the termination date of the act. I agree fully that consideration should be given to the possibility of extending it. Certainly it needs revision. Twice in succession we have had delivered to us from the House a sugar bill on the last day of the session, with the position taken by the House, "You take this bill, or you will get nothing." Yesterday by a vote of 62 to 17 the Senate, after considering the matter, voted for its own version of how the Sugar Act should be drafted. That was done by a vote of 62 to 17.

The very least the House can do is to extend us the courtesy of sitting down and listening to the viewpoint of the Senate, to see if we cannot resolve our differences and work them out.

I want to make the record very clear where the responsibility lies if such action is not taken. I believe we would make a serious mistake if we adjourned sine die without insisting upon the House giving consideration to the Senate views on this very important measure, and which is considered to be so important by the President.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. JOHNSTON of South Carolina. We find ourselves in this predicament because of the mismanagement by the State Department in this field, and all of us must acknowledge that fact.

Mr. WILLIAMS of Delaware. I have the floor. I will yield for a question. However, I should like to reply to the Senator's statement. The State Department had nothing to do with the fact that the sugar bill came to us from the House of Representatives on the last day that Congress is supposed to be in session. The State Department is not responsible for the fact that the House has taken its present adamant position. I am not interested in getting into an argument on the policy that the State Department has pursued, and whether that policy is right or wrong. I am merely pointing out here that when the Senate passes a bill by an overwhelming majority, we are entitled to consideration by the House on our position. I do not say the House must accept that position. But certainly we are entitled to consideration by the House. That is all I am interested in.

I know the Senator from Kansas has been on his feet for a long time, and I know that the Senator from South Carolina wishes to discuss the whole field of international relations, and I will yield the floor. I yield to the Senator from South Carolina for a question.

Mr. JOHNSTON of South Carolina. I should like to ask the Senator a question. Is it not true that we would not be in this situation today if it were not for what has happened in Cuba and in the Dominican Republic? We would be going ahead with our quotas. We would not be in this situation if it were not for what has happened in Cuba and in the Dominican Republic. We have been paying the Cubans 2 cents above the world price for sugar. We have been doing that to create good feelings toward us on their part. Instead of that, we know the situation we are in today. So far as the Dominican Republic is concerned, we kicked over the traces there and decided not to take the sugar from them that we had agreed to take, according to law. Now we find ourselves fighting in the House and in the Senate as to what we are going to do, because the State Department has got us into this mess. Is that not true?

Mr. WILLIAMS of Delaware. I will only say that if the foresight of the State Department were as good as the hindsight of the Senator from South Carolina, we would not find ourselves in many of our present difficulties.

THE PERIL POINT STUDIES OF THE U.S. TARIFF COMMISSION

Mr. WILLIAMS of Delaware. Mr. President, some time ago the State Department released the list of items upon which it intended to negotiate this fall at the conference of nations affiliated with the GATT—the General Agreement on Tariffs and Trade. The U.S. Tariff Commission is now engaged in peril point studies of these products and will recommend to the President that each individual item remain on the list for possible tariff cuts or be removed from the list because further tariff cuts would jeopardize the domestic industry.

When that list was first released, it became evident that this was to be a set of negotiations which would concentrate primarily on chemical items. There are 15 dutiable schedules in the Tariff Act, of which chemicals make up 1. There are 97 paragraphs covering chemicals in that schedule and out of that 97 only 16 have not been included and these cover such items as dynamite, phosphorus, opium, and similar items which have special treatment. About 400 chemical products are listed for possible duty reductions.

Congress knows very little about how these lists are made up and what motivates those who make up the lists. Perhaps there is some logical reason why chemicals were of particular significance in this round of negotiations; however, in the light of the present competitive situation I cannot understand why the State Department suddenly proposes to reduce duties on so many chemical products. It will be interesting to see what the Tariff Commission finds by way of peril points on these chemicals.

This is but one of our many industries that are today faced with serious competition from the low labor producing countries and I assume the Commission will take into account the potential plight of the United States in time of war if excessive imports have closed down or seriously injured segments of the chemicals industry. It is certainly one of the most important of our industries, especially in time of international danger and one cannot help being a bit curious as to why it is now called upon to bear the brunt of the pending tariff reductions.

THE EXPANSION OF COMMUNISM

Mr. SCHOEPPEL. Mr. President, recently many citizens of my State have written expressing their concern on the worldwide expansion of communism. Before this short session of Congress adjourns I want to state my personal opinion concerning this insidious philosophy and to review the programs which I have supported which have been designed to curb this atheistic movement.

In the first place, so that there can be no question in anybody's mind, let me say that I believe, in fact I know that communism is an international conspiracy, atheistic and materialistic, which denies human liberties in any form and which has as its ultimate objective the overthrow by force and violence of all free governments and the eventual domination of the entire world.

At no time have I ever been misled by the various overtures that the Communists have from time to time extended to the free world. Since the Communist philosophy is not based on a moral code, to a true Communist there is no such thing as falsehood. Consequently I have always known that the Communist nations will enter into any agreement if it suits their purpose since they have no intention of considering any of them when their own ends have been served.

This is the history of our relations with the Soviet Union. Without exception they have violated every international agreement which we signed in good faith.

Neither am I lulled into any apathy concerning the menace which our country faces from the Communist Party in the United States. On many occasions Mr. J. Edgar Hoover, the Director of the Federal Bureau of Investigation, has testified before committees of Congress that the Communist Party is today a serious threat to our internal security.

On occasions it is difficult for me to remain calm when some Americans who know better are taken in by Communist propaganda, or are hoodwinked into advocating programs which would weaken this Nation in its ability to resist Soviet aggression in this cold war.

So far as I am concerned, the biggest issue before the United States today is the question of our national survival. So long as I have anything to do with it, no governmental actions will be taken which would in any way allow the possibility that this great American political edifice dedicated to human liberties and the dignity of men should be conquered by these modern-day barbarians.

As a Republican, I am proud of what my party has done since it has been in office to contain Communist expansion and to eliminate Communist infiltration in our own society. What is past is over, and there is no point in castigating particular individuals for errors in judgment. Nevertheless, the American people must learn from the experiences in the past in order that we can protect the future.

The fact is that under the last Democrat administration the Communist espionage agents in the United States had a field day. The public is familiar with the Alger Hiss case, with Remington, with the atom spies and others. The public recalls that when Congress in 1950 passed the Internal Security Act—for which I voted—President Truman promptly vetoed the measure and it had to be passed again in both Houses by two-thirds majority. Constantly in the days before the inauguration of President Eisenhower, Congress and the Democrat President were engaged in bitter disputes. The House Committee on Un-American Activities and the Senate Internal Security Subcommittee were trying to root out the Communists in Government service, while the Executive called the whole process a "red herring."

In the field of foreign affairs there is no question who must calculate the aggressive intentions of the international Communist conspiracy. It was the Democrat administration which participated in the secret conferences at Yalta, Teheran, and Potsdam, as a result of which millions of square miles of territory and hundreds of millions of human lives were allowed to be brought under Communist domination.

There was a man in the U.S. Senate named Joe McCarthy, from the State of Wisconsin. There were many things which Senator McCarthy did with which I did not agree, but there is not a Member of the Senate today who will deny that Joe McCarthy did much to dramatize and pinpoint the menace of communism to human freedom both here and abroad.

Since the Republican Party took office, what has been accomplished? In the first place, in 1954 we enacted the Communist Control Act. Under this law, the Subversive Activities Control Board was empowered to outlaw the Communist Party and prohibit members of Communist organizations from serving in certain representative capacities. This Board acted quickly and declared that the purpose of the Communist Party was to overthrow the United States by force and violence. The Communist Party appealed to the Federal courts, and the case is now waiting disposition by the U.S. Supreme Court. Frankly it is fantastic to me that a decision reaffirming the findings of the Subversive Activities Control Board has not yet been rendered.

In the 84th Congress, the Senate, of which I was a Member, voted unanimously for a resolution which identified the Communist Party of the United States as a part of the international Communist conspiracy.

It is inconceivable to me how any fact so clear to every Senator, regardless of party, seems so difficult for the Supreme Court to discover.

Other provisions of the law for which I have voted make it possible to grant immunity to witnesses testifying before congressional committees in order to encourage witnesses to reveal the secrets of the Communist conspiracy. Heavier penalties are now imposed for concealing persons and harboring fugitives. Government pensions and retirement benefits are denied employees convicted of felonies. The citizenship of persons convicted of engaging in treason, joining a movement to overthrow the Government by force and violence, or plotting against the Government can now be revoked. Recognizing the true nature of the cold war, the law now provides that espionage is a capital offense if committed at a time when no formal state of war exists.

It was the Republican Party that created the Internal Security Division in the Justice Department to give exclusive attention to the vigorous prosecution of the antisubversive laws. It was the Republican Party that ordered the Communist Party and the Labor Youth League to register under the Internal Security Act. It is the Republican administration which has deported more subversive aliens and barred the entry of more potentially subversive aliens than at any time in the preceding 20 years.

It is not my intention at this time to analyze the entire foreign policy of the United States. There are some phases of the foreign policy with which I disagree. There are many with which I agree. The record will reflect to any objective person, however, that in the past 8 years the free world has been strengthened both militarily and economically and is better prepared to defend itself from aggression. As a Member of the Senate, I have constantly voted for every proposal which in my

opinion would be likely to stem the tide of Communist expansion. I have voted consistently against any measure which I felt was inimical to our national interests.

When all is said and done, the Communists depend upon force, both economic and military, as instruments for their conquests. The United States of America must therefore remain economically solvent and must possess the most powerful Military Establishment on the face of the earth.

There are certain specific measures which I believe we must pursue in the days ahead and which I personally shall support vigorously.

First, I have been opposed and shall remain opposed to the recognition of Red China by this Government. In my opinion, we made a tremendous mistake years ago in the recognition of the Soviet Union. This is one mistake which should not be repeated.

Second, I urged the passage of the Senate bill to permit the Secretary of State to deny passports to persons suspected of sympathizing with the Communist movement. We should do everything possible to hinder agents of the Soviet Government in the conduct of subversive and espionage activities in this country.

Third, I believe the Communist Party should be brought under the direct control of the Subversive Activities Control Board; if the Supreme Court of the United States does not render a decision recognizing the conspiratorial nature of this so-call "party," I shall immediately introduce proposed legislation to attempt to establish that fact by law.

In my opinion, the manner in which the American people deal with the menace of communism should not be a partisan political issue. It must be faced by Americans, because if we do not retain our freedom we shall obviously not be able to enjoy the luxury of disagreeing with one another in political forums. It seems clear to me that by now all three branches of our Government—legislative, executive, and judicial—should recognize that international communism is a deadly menace to human liberties throughout the world. It cannot be combated with half-hearted measures. Its agents must be eradicated from our society. Our citizens must be alerted to the peril we face. It may be that in the days ahead all of us will have to make sacrifices. Whatever the price may be, Americans are willing to pay it for the survival of our Nation and the maintenance of our way of life.

As a U.S. Senator from the State of Kansas, I hope this brief statement makes my position perfectly clear to all concerned.

TARIFF PROTECTION AND ASSISTANCE TO DEPRESSED AREAS

Mr. SCHOEPPEL. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a statement which I intended to make yesterday relating to assistance to depressed areas.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR SCHOEPPEL

The Democrat platform which was adopted at the convention in Los Angeles on July 12, 1960, expresses great concern with the plight of so-called depressed areas. It proposes to cure their problems by imposing additional obligations to be financed through added tax burdens on every American citizen.

I know that there are many communities in Kansas which are deserving of help, and I certainly will do my utmost to see that a workable law is enacted. However, the Los Angles platform has distorted the facts. It states that: "The Democratic Congress twice passed bills to provide this help. The Republican President twice vetoed them." This is only a half-truth since actually the Republican Party and President Eisenhower endorsed a program of aid which would have been workable. A Democrat-controlled Congress so overloaded this program that it would have imposed a crushing burden on other communities as well as adding still another factor to contribute toward inflation, thus raising our costs and impeding our sales in world markets. Accordingly, the responsibility for a complete lack of any constructive legislation in this important area rests with the Democrat Congress.

Unfortunately, many of our depressed areas once enjoyed thriving domestic industries which have lost their competitive position because of foreign imports. Our continued policy of lowering the protection afforded American industry inaugurated with the Trade Agreements Act of 1934 was endorsed in the majority's report of the Commission on Foreign Economic Policy, which was filed on January 23, 1954. This Commission included among its members David J. McDonald, the president of United Steelworkers of America.

It is perhaps not generally known that the entire concept to accept the destruction of American industry, including all of the hardships which this entails for the workers affected as well as the communities in which they live, was endorsed by Mr. McDonald. Surprisingly, we was quite willing to suggest additional obligations to the taxpayer in lieu of the wages which the workers affected would have earned.

In an individual statement included in the report of the Commission, Mr. McDonald expected that perhaps as many as 100,000 workers might be threatened directly or indirectly with loss of their jobs as shown in the following statements:

"It is proposed that a policy be adopted by the Congress to assist and promote necessary adjustments by companies, workers, and communities whenever injury results from increases in imports traceable to tariff changes.

"When the President finds it in the national interest to lower a tariff below the peril point, or to maintain a tariff concession despite a finding of injury or threat of injury by the Tariff Commission in an escape clause action, the affected companies, their employees, and the communities in which they are located should become eligible for assistance under an adjustment assistance program.

"Companies and communities affected should become eligible for a technical assistance program.

"Companies and communities found eligible should have access to financing assistance necessary to their adjustment programs.

"Companies found eligible should have the privilege of accelerated tax amortization on new plant and equipment for the purpose of introducing new products or expanding production in lines other than those affected by tariff changes.

"Companies and communities found eligible should receive special consideration in the letting of Government contracts.

"ADJUSTMENT ASSISTANCE FOR WORKERS

"Employees of companies found eligible for this program should also be eligible for adjustment assistance, in case they are not able to locate alternative employment promptly. This might take the form of a special unemployment compensation program administered through our present Federal-State machinery but financed by Federal funds.

"Provision should be made in case situations arise where neither companies nor communities succeed in diversifying to new lines of production and the workers face a major vocational adjustment problem. Present unemployment insurance benefits are inadequate to meet this need. Since this displacement would be the result of our national trade policy, Federal responsibility is clear. States where the impact happens to fall heaviest should not be penalized in a program designed to benefit the national interest.

"These unemployment benefits should extend for a longer period than is presently provided, but be limited in duration. Maximum benefits should exceed those now available. Benefits should cease once suitable work is found. If a worker takes a new job at substantially lower pay than his old job, he should be entitled to a supplemental benefit for a limited period to make up part of the difference.

"In addition to special unemployment insurance, a fully adequate adjustment program for workers would involve (a) an intensive counseling and placement program to help workers locate alternative jobs as nearly as possible equal to their previous employment; (b) special training allowances, similar to the current veterans' programs, to finance employers' costs in connection with inplant training programs or to cover approved courses of training in approved institutions; (c) special moving allowances, where a finding is made that a job is available elsewhere and payment of moving expenses up to a fixed amount in an individual case can aid in relocation; (d) for any older workers who prove unemployable, provision should be made for eligibility before 65 for retirement benefits under the old age and survivors insurance program, without prejudice to their rights at regular retirement age."

I cannot accept the thesis that the American people should assist our friends abroad by imposing greater burdens on themselves to aid particular communities where such a course would not be necessary if we maintained a realistic tariff policy. In fact, every time additional taxes are imposed they must be factored into the prices of all the goods and services which we sell. Hence, the implementation of this program would, in and of itself, make it more difficult for us to compete effectively in world markets where our products still enjoy a comparative advantage.

I certainly want to assist those areas that are experiencing difficulties because of changing defense requirements, the depletion of their natural resources, or a complete change in the character of the goods and services which our people demand, thereby obsoleting both skills and equipment. The program recommended to the Congress by the President would have accomplished these objectives without embodying a vast new spending spree. It was confined primarily to extending loans and technical assistance so that affected communities could adapt themselves to new conditions.

Since January 1954 when the report of the Commission on Foreign Economic Policy was

filed, we have twice extended the trade agreements program, and within a few months there will be a further effort to reduce our tariffs in connection with the GATT negotiations that are forthcoming.

At the time that GATT was created, it was contemplated that all member countries would truly operate on a reciprocal basis and that any tariff reductions that were granted to one country would be extended to all. In the meantime, we have seen the evolution of the European Common Market as well as the so-called Outer Seven. Undoubtedly, there will be new federations established in other areas of the world so as to enable their producers to secure the advantages of mass production and mass marketing.

I certainly endorse these endeavors as they will contribute to the peace of the world and strengthen our Western allies. However, it is sheer folly for us to ignore these steps by contemplating further reductions in our own already limited tariffs if such action has the effect of displacing American jobs and reducing the revenues of the State of Kansas.

If the local tax base is narrowed, the only recourse left to enable the States to maintain their schools, hospitals, and other facilities which have traditionally been under their guidance and control is to authorize some form of Federal assistance. However, every time this expedient is adopted by the Congress, we compound our problems and make it even more difficult for American industry to compete effectively in world markets.

I am not dealing in idle speculation. Our adverse trade balance is a matter of record, and it is most disturbing that we have been losing gold to other countries at a rate which cannot continue. In fact, at the present time if all of the contingent claims were presented, I doubt that there would be sufficient gold for us to maintain any form of monetary stability. Yet, in spite of this fact, we find in the Democrat platform an endorsement for "an end to tight money." This can only mean that the proponents of this conception are willing to see the Federal Reserve System lose its independence.

I have long favored aid in the form of lower interest rates for farmers, home owners, veterans, and others who have special needs. However, if the general level of interest rates in the United States is lowered below that prevailing throughout the world, those who have a claim on our foreign exchange will quickly convert their assets into gold and remove it from the country. I can imagine no worse calamity inasmuch as this would bring disastrous inflation with all of the havoc that has always accompanied such action throughout recorded history in every country of the world.

I am anxious to increase world trade as evidenced by my sponsorship of Public Law 480, 83d Congress. It has promoted the sale and exchange of our agricultural surpluses for strategic materials and foreign exchange that our Government and citizens may use to their advantage. I have also endorsed other measures to promote the expansion of world trade in a manner which would raise living standards for everyone. However, any unbiased review of the actions which have been taken since 1934 indicates that we have lowered our tariffs in many cases without securing compensating benefits to stimulate our exports, which was the intent of the Congress in authorizing the Trade Agreements Act.

As I have already indicated, it must now be obvious to all that we cannot increase taxes on those areas still able to compete in the world's markets. A subsidy for those in distress by the Federal Government will ultimately reduce the living standards of all of our people as well as jeopardize our ability to maintain our military and industrial strength in the New World of the 1960's.

For many years a theory prevailed that other countries were spending more dollars than we were making available to them by accepting their products. Many people believed that this so-called dollar gap had to be closed through a continuous reduction in our tariffs as well as a massive and growing foreign aid program. There may have been some validity to this theory immediately after the end of World War II when other industrial nations were reconstructing their plants and were largely dependent on America for food, fiber, and raw materials to rehabilitate themselves.

An examination of the gold and dollar holdings of the other countries in the free world today shows that these assumptions no longer apply. For 9 of the past 10 years there has been a deficit in our balance of payments. This results from many causes including foreign investment as well as our foreign aid programs. Furthermore, we have made very substantial contributions to international agencies so that they could provide dollar exchange for projects in underdeveloped countries which utilize the products of our fields, mines, and factories.

Our foreign aid program which was amply justified as a means of strengthening the unity of the free world must not be converted into a plan whereby Americans have a perpetual obligation through their generosity to finance other nations. No self-respecting country wants this kind of help. In fact, they would far rather secure long-term loans. Nevertheless, under past programs we have furnished our competitors with the most advanced production facilities as well as training in our advanced scientific, engineering, and management techniques. America's mass production economy was made possible because we had a large continental market with a population of 180 million people who could be served without crossing a customs border.

The advent of the European Economic Community, better known as the Common Market, as well as the formation of the Outer Seven, to which I have already referred, will provide these nations with all of the advantages we have enjoyed in lowering their production costs through mass production and merchandising. It should be expected that these lowered costs will not only assist them in exploiting their own markets, but assist their producers in making sales within the United States. Hence, there is still a further reason why great caution should be exercised in granting any additional tariff concessions.

In many industries our costs are higher than those prevailing abroad because wage levels are higher here, thus contributing to the American standard of living. Furthermore, every producer must charge a price for his product which will enable him to meet the added costs of social security, of which I heartily approved, as well as the high level of general Federal taxes which provide the principal defense for the free world.

Western Germany and Japan have forged ahead in world competition since our Government has assumed the burden of protecting them from Communist attack. Without in any way deprecating their abilities or the enlightened policies of Chancellor Adenauer and his economic minister, Ludwig Erhard, who is dedicated to free enterprise, it is important for us to realize that our assumption of the obligations of their defense has aided them in offering more competitive prices for comparable goods throughout the world.

There are a number of concrete steps which we can take even under today's difficult conditions to remedy these situations. The most important is to increase our economic productivity. The Republican platform provides guidance which the Congress and the next administration must clearly follow. It states that:

"We therefore accord high priority to vigorous economic growth and recognize that its mainspring lies in the private sector of the economy. We must continue to foster a healthy climate in that sector. We reject the concept of artificial growth forced by massive new Federal spending and loose money policies. The only effective way to accelerate economic growth is to increase the traditional strengths of our free economy—initiative and investment, productivity and efficiency. To that end we favor—

"Broadly-based tax reform to foster job-making and growth-making investment for modernization and expansion, including realistic incentive depreciation schedules."

Today other nations in many instances have more modern plants than our own, and present high taxes and unrealistic depreciation allowances make it difficult to modernize our industry to maintain our position in the forefront of productivity. I know that it is sometimes difficult for some Americans to acknowledge the fact that we are not always the most efficient and productive nation in the world in every line of commerce. However, Leslie Gould, the financial editor for the New York Journal-American, in an article which appeared on July 18, 1960 clearly shows that the United States in order to meet Red threats must revise its taxes.

Mr. Gould's editorial follows:

"UNITED STATES, TO MEET RED THREAT, MUST REVISE ITS TAXES

"(By Leslie Gould)

"The big threat to the United States in the immediate years is the economic war rather than a shooting, atomic war.

"The latter is always a threat and will continue so as long as communism enslaves such a large mass of the world's people.

"So far the Western World, particularly the United States, has failed in its dealings with the Communists. This is partly because too many in and out of Government still think you can do business with them. Also, this same mistaken judgment accepted the Russians as allies—which they never were—and the Red Chinese as simple agrarian reformers.

"REDS PUSH TRADE WAR

"The Communists have one goal—world domination. To succeed, they must destroy the United States as a world power. This they can never do so long as the United States keeps its powder dry—stays powerful militarily and, most important, economically.

"While the Communists rattle the sword—or rather wave their missiles—their major push today is in the economic field. This should be just what the doctor ordered, for the American system of private enterprise has in peace brought workers here the highest living standards ever attained anywhere. In war, this power has won two world wars, and in doing so not only saved the Western democracies but also Russian communism.

"UNITED STATES GAVE $11 BILLION

Ironically, the greatest help the Russians got in building up their industrial might was from the United States, which poured into Russia $11 billion of Lend Lease—much of it machines, tools, equipment. That debt has never been repaid.

"Since the war, the U.S. aid program amounting to $47 billion has succeeded far beyond any dreams. As a result, two of the former enemies—Germany and Japan—today are highly competitive allies.

"So, American industry faces the double challenge—that from Iron Curtain countries, with their slave labor and no consideration for profit, and from our Western World allies.

"UNITED STATES LOSES ADVANTAGE

"The United States in this transition has lost the advantage of the most modern, efficient mass producing industries. Our competitors—thanks to aid paid for by U.S. taxpayers, which includes American private business—have equally as efficient plant, and in some industries more modern.

"These competitors have the advantage of cheaper labor, although this is not as much an advantage as figures might indicate. Foreign wages are more often than not understated and labor is not always as efficient or skilled as American.

"As much, if not more of a factor, in America being priced out of the world markets are taxes. These are confiscatory, being 52 percent for corporations, and for individuals from 20 to 91 percent.

"TAXES SOCIALIZING UNITED STATES

"So, America under the heavy burden of taxation is half-socialized. The Govment is in the ideal position of only sharing in the profits and not in the losses. In Russia, where the Government owns everything, Moscow gets all the profits, but it also foots the bill for the losses.

"Foreign producers have another competitive advantage—taxes are often remitted on exported products.

"So, tax revision should be high up on the legislative programs of both parties seeking office this November."

Perhaps one of the best indications of the difficulties which confront American producers is shown by the automobile industry. Thirty years ago, before the enactment of the trade agreements program, U.S. exports of automobiles accounted for more than 10 percent of total production. Today they represent a very small portion of the total, and the influx of foreign cars has assumed an important dimension. American workers are paid higher wages, and I certainly hope that we will always have the highest wage scale prevailing anywhere in the world. In order to make this possible, we must have adequate and efficient production facilities which are completely modern to enable them to earn these wages.

A part of the difficulty in the automobile industry may be attributed to the fact that we do not use quotas and we have no restrictions on the conversion of dollars into foreign exchange to purchase goods anywhere and bring them into the United States. We have conducted our tariff negotiations solely with a view to lowering tariff barriers although other countries as they reduced their tariffs imposed quantitative controls on American producers which were far more restrictive than tariffs. These steps have virtually eliminated American markets in many areas of the world for those products in which we formerly had a strong comparative advantage.

Small business is directly affected when even our large major industries slacken the pace of their operations. When this happens they are confronted with a smaller demand for the goods and services which they furnish to the larger firms. In many cases, through their engineering, assembly, and marketing processes, they provide a means for their suppliers to sell their goods in world markets.

The Congress has been vigilant in protecting the American standard of living through the establishment of laws with respect to minimum wages and the maximum number of hours in the workweek when interstate commerce is involved. In order to achieve America's goal for more leisure, our producers must pay a premium for overtime work. Again, may I make it completely clear that I endorse these trends and look forward to their expansion in the years ahead. However, they make it more expensive for domestic manufacturers to use their production equipment to its maximum capacity.

In spite of these self-evident facts, we continue to permit foreign producers to ship goods into the United States which are manufactured under labor conditions which would be totally unacceptable if they were adopted by a domestic producer. Certainly we cannot meet the competition of foreign goods through a reduction in America's living standards, but instead we must develop even better skills and techniques and a more effective use of our raw materials.

The problems which have affected automobiles are similar to those in other industries such as barbed wire, aluminum, textiles, pottery, gloves, copper and brass imports, and countless other products which have assumed an increasing importance in our markets, thus displacing American labor. Unemployed workers anywhere in the United States represent a loss of potential consumers for other firms, including those in Kansas. Furthermore, as unemployment grows the demand for the products of our farms declines.

I shall make every effort to see that the funds accumulating in the Export-Import Bank through the disposal of our agricultural commodities are made available to American industry for their foreign activities. Under Public Law 480 which I sponsored, this will increase purchasing power in other countries and thereby provide an opportunity for their citizens to purchase some of the goods which are now being sent here rather than being consumed in the countries where they are produced. However, I am unalterably opposed to the use of these funds by American firms to manufacture goods which will be sold in the United States.

I am not an isolationist in any sense of the word as the unity of the free world is of paramount importance in meeting the threats of Communist expansion, but I will never support programs to create jobs in foreign countries at the expense of my fellow Kansans. With wisdom and perseverence we can expand world trade for the benefit of everyone without sacrificing any segment of our economy. This can be done by returning once again to good, old-fashioned Yankee bargaining.

With the new economic blocs that are now being formed and a complete change in our balance-of-payments position, there can be no justification for any other course. Certainly the answer to our problems does not lie in the provision of funds to assist depressed areas by those who are still independent and strong. The recommendations in the platform of the Democratic Party can only destroy the foundations of our free society. Their apparent easy solution will actually present far more problems than it can possibly solve.

My opposition to the adoption of the legislation they have advanced must never be attributed to any callousness on my part for the needs of my fellow citizens. I am determined to introduce legislation which will make it possible for them to better use their skills, abilities, and resources without lowering American living standards in order to compete in the markets of the world.

AMENDMENT OF TRADING WITH THE ENEMY ACT

Mr. KENNEDY. Mr. President, there is on the Calendar No. 1991, House bill 6462, to amend the Trading With the Enemy Act, as amended, so as to provide for certain payments for the relief and rehabilitation of needy victims of Nazi persecution, and for other purposes.

I urge that the Senate pass this bill. It is technically an amendment to the Trading With the Enemy Act. In substance, however, it is a measure which makes possible use of funds which were owned by persons who were persecuted by the Nazis, and who died without heirs, for the benefit of needy and surviving former persecutees who are now in the United States.

The policy of the United States has for years been that former persecutees should be able to recover the property which was sequestered during the war because they were—though the first victims of Hitler—technically "enemy nationals." Four years ago, the Congress provided that property of such persons who had died without heirs—mostly killed in Hitler's concentration camps—should be used for assistance in the United States to needy survivors. Thousands of claims to such property were filed by the duly designated successor organization, the Jewish Restitution Successor Organization, which had previously performed a similar task in the American Zone of Germany. H.R. 6462 merely provides a bulk settlement of these thousands of existing claims.

The Trading With the Enemy Act imposes a ceiling of $3 million on these claims. H.R. 6462 settles them for $500,000. The Office of Alien Property supports this amount, and it seems fair as a prompt settlement.

A bulk settlement is in the interest of both the U.S. Government—which would otherwise be faced with administrative costs of an enormous amount in proportion to the total of the claims—and the surviving persecutees, who are in desperate need.

SENATOR FROM NEW YORK

Mr. GOLDWATER. Mr. President, earlier today, during the course of a discussion by the distinguished Senator from Missouri [Mr. SYMINGTON] concerning the defense posture of the United States, and in reply to a request by the distinguished Senator from New York [Mr. KEATING] that he yield, the Senator from Missouri referred to the Senator from New York in a manner which I hope and pray I have misinterpreted. However, in view of the way the statement was made, I must remark on it. The Senator from Missouri referred, in my opinion, in a rather snide way to the fact that the Senator from New York was a military expert.

Mr. President, I think the Senator from Missouri was more correct than he knew in referring in that way to the Senator from New York, because Senator KEATING has a distinguished service record. He was a sergeant in World War I. He was a colonel in World War II and served for 3 years overseas. He is now a brigadier general in the Reserves.

He wears the Legion of Merit with oak leaf cluster, and American, European, and Asiatic Theater ribbons with three battle stars. He is a member of the Order of the British Empire.

Mr. President, I think those honors in themselves enable the Senator from New York to be adjudged a military expert. Certainly his record is inspiring.

He has considerably more of a record than some of our colleagues can brag about on the floor.

I hope I am wrong in my interpretation of the way in which the Senator from Missouri addressed the Senator from New York. If I am wrong, I certainly shall make proper comment on it.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. GOLDWATER. I am happy to yield to the Senator from New York.

Mr. KEATING. I express my gratitude for the reference made to me by the distinguished Senator from Arizona.

The present mood of the Senator from Missouri was precipitated by the fact that I had inserted in the RECORD a table which completely devastates his argument. That table has been placed in the RECORD four times before; and each time, following its appearance, the Senator from Missouri held forth as he did this morning.

He and I have been longtime friends. He lived in my city for a time. He is married to a delightful lady who is the daughter of one of my dear friends, former Representative Wadsworth.

I join in the hope expressed by the Senator from Arizona that we have misinterpreted the remarks of the Senator from Missouri. I do not pose as a military expert. I do not contend I have a special amount of knowledge of this subject. I have never contended that. However, I have a fair knowledge of arithmetic, and I am able to read a table, particularly, the one to which I just referred, and which precipitated the remarks of the distinguished Senator from Missouri. In any event, I am very grateful to the Senator from Arizona for the complimentary things he said about me. Despite my years of military service, I certainly disavow being an expert on military affairs.

Mr. MANSFIELD. Mr. President, will the Senator from Arizona yield?

Mr. GOLDWATER. I yield.

Mr. MANSFIELD. I think both the Senator from Arizona [Mr. GOLDWATER] and the Senator from New York [Mr. KEATING] may be laboring under a misapprehension. I was in the Chamber when the distinguished Senator from Missouri referred to the military experience of the Senator from New York, and I believe he was speaking from the heart, because, as the Senator from Arizona has pointed out—and the Senator from Missouri knows it—the Senator from New York served as an enlisted man in the First World War, kept up his interest in military affairs between the wars, and at the present time is at least a brigadier general, if not a major general, in the Reserves. So I think the statement was made in good faith—not in a sarcastic vein, but in full recognition of the military experience the Senator from New York has had.

Mr. KEATING. I thank the Senator for his remarks; and I hope the interpretation he has placed on the remarks referred to is correct.

Mr. GOLDWATER. Mr. President, as I said, I sincerely hope I was in error in the understanding I had; and if I was, I make the proper amends.

INVESTIGATION AND PROSECUTION OF CRIMES AND CIVIL ENFORCEMENT ACTIONS UNDER LABOR-MANAGEMENT REPORTING AND DISCLOSURE ACT OF 1959

Mr. GOLDWATER. Mr. President, early this year the Senate Committee on Labor and Public Welfare appointed two staff members for the purpose of legislative oversight on the Landrum-Griffin Act, which was passed last year. The purpose of this small staff is to observe the operations of the Department of Labor with respect to the Landrum-Griffin Act.

Mr. President, the minority member of that small staff has prepared a brief review of the activities of the Department of Labor under this act. I ask unanimous consent that the report be printed at this point in the body of the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

INVESTIGATION AND PROSECUTION OF CRIMES AND CIVIL ENFORCEMENT ACTIONS UNDER THE LABOR MANAGEMENT REPORTING AND DISCLOSURE ACT OF 1959

The Secretary of Labor and the Attorney General in February 1960 entered into a memorandum of understanding purporting to define the areas of responsibility and the procedures in the investigation and prosecution of crimes and civil enforcement actions under the act.

Under this agreement the Labor Department investigates all civil violations and five categories of criminal violations—those arising from the law's reporting provisions, both union and employer, union trusteeships, bonding of those handling union funds, and the payment of court imposed fines by a union for a union official. The Labor Department also will conduct investigations and present the issues involving grant of an exemption by the Federal Parole Board for individuals convicted of certain crimes which bar them from holding union office, or from serving as labor relation consultants, or in similar capacities.

The Department of Justice has been delegated the investigation of criminal charges dealing with embezzlement of union funds, payment of court-imposed fines by an employer for a union official or employee, prohibition of criminals or Communists in the matter of holding office, extortionate picketing, deprivation of rights of union members by force and violence, and the making and acceptance of payments or loans by employers to employees, unions, or officers of employees of unions.

This agreement recites that it was entered into pursuant to the provisions of section 607 of the act authorizing the Secretary to enter into interagency agreements and section 601 of the act which gives the Secretary the power to conduct investigations when he believes it necessary in order to determine whether any person has violated or is about to violate the act.

Apparently the Secretary and the Attorney General are proceeding on the assumption that section 601 is the basic provision of the act giving the Secretary overall and exclusive authority to conduct investigations of violations of the act both civil and criminal and that under this section he, and he alone, controls, regulates, and administers all the enforcement provisions of the act, except where he elects to delegate his authority. This is apparent not only from the language and terms of the agreement itself but also from the Labor Department's own press releases.

The memorandum states that "section 601 imposes upon the Secretary the responsibility for conducting investigations of persons who have violated or are about to violate any provisions" of the act. The memorandum further states that "it is desirable and essential that the areas of responsibility and the procedure in connection with the investigations, prosecutions of offenses and civil enforcement actions be the subject of formal agreement." It also states—"nothing in this memorandum shall be construed to affect the investigative jurisdiction of the Department of Justice under other statutes." In the Secretary's 6-month report on the act's enforcement there is found the following language: "the Secretary of Labor delegated to the Department of Justice authority to act as agent of the Department of Labor on a case by case basis in certain investigations involving alleged criminal acts."

The only conclusion to be drawn from this is that the Secretary regards himself as sole possessor of all investigating authority in this field under section 601.

But this was obviously not the intention of the Congress in enacting this provision. Section 601 was inserted in the act in order to insure that the Secretary have the broad investigatory power he has under other statutes he administers and which is possessed by a number of other Federal agencies in investigating violations of the statute which they administer. It was intended to confer upon the Secretary discretionary authority in the matter of investigations supplemental to that specifically given him in other sections of the act. The section was clearly not intended to provide basic authority to control all the enforcement provisions of the act.

If the Secretary is correct that section 601 gives him exclusive investigatory power covering all violations of the act, a curious situation has been created by Congress. For example, sections 304 and 402 require the Secretary to investigate violations of the provisions of titles III and IV. There is, however, no such specific mandatory direction to the Secretary to investigate violations of certain other provisions of the act. Section 502, for example, the bonding provision, provides only criminal penalties for violation of the section and does not require the Secretary to investigate. The same is true with reference to section 503, Loans to Officers. According to the Secretary's concept of his authority, he alone would have the power to investigate violations of those sections under section 601. However, section 601 provides discretionary authority only. Therefore if the Secretary, exercising this discretion, decided not to investigate, presumably there could be no investigation and the matter would be ended. Thus, Congress must be deemed to have intended that the criminal provisions in this act be investigated and enforced not by the Department of Justice in the usual manner, but rather as and to the extent that the Secretary of Labor sees fit. It is unlikely that Congress intended any such result which would give unlimited power to the Secretary.

Some questions arise, for example, it is conceivable that the Secretary might take the position that if he determines upon investigation of an individual's complaint that the allegations are not supported by sufficient evidence—does this mean that the matter is closed and that the Justice Department cannot investigate the same charges even where it might have come to a different conclusion as to the sufficiency of the evidence? If the Secretary, to take another example, exercising his discretion, elected not to even undertake an investigation, would this prevent the Justice Department from going ahead with its own investigation if it felt that a violation had occurred? If the Secretary decided that the Justice Department

was too vigorous in its investigation and prosecution of labor unions, could he, for example, revoke some or all of the delegation?

Another point to explore is whether the Secretary had any particular design or purpose in mind in the assignment of violations to be investigated. Was the intent to permit the Secretary to control the enforcement provisions insofar as labor unions are concerned? For example, it is difficult to understand why, under the agreement, violations of 503(b) relating to the payment of fines of a labor official by an employer are investigated by Justice while the same violations by a labor union come under the jurisdiction of the Secretary. Generally, it seems that the agreement delegates to Justice violations of the type traditionally associated with that Agency (those involving force, violence, etc.) while reserving to the exclusive jurisdiction of the Secretary the more complicated and subtle criminal provisions dealing with unions. In any event it would seem that it would not be amiss to inquire what considerations governed the assignment of investigative jurisdiction in the agreement.

INVESTIGATIVE JURISDICTION OF ENFORCEMENT PROVISIONS OF REPORTING AND DISCLOSURE ACT

1. CIVIL ENFORCEMENT

(By individuals)

Title I. Bill of Rights: Section 102 gives a union member a right to sue a union in a Federal court, including the right to injunctive relief for violating his rights.

Title V. Safeguards—Fiduciary: Section 501(b) provides in certain cases for suit in Federal court by a union member for the benefit of the union where a union official breaches his fiduciary duty and the union refuses to act.

2. CIVIL ENFORCEMENT

(By Secretary of Labor)

Title II. Reporting Requirements: Section 210 gives the Secretary of Labor power to institute a civil action in Federal court for appropriate relief, including injunctive relief for violations or possible future violations of these provisions. (Labor Department investigates.)

Title III. Trusteeships: Section 304 requires the Secretary upon a written complaint to investigate certain violations of this title and, where he finds probable cause to believe a violation exists, to sue in Federal court for relief, including injunctions. (Labor Department investigates.)

Title IV. Elections: Section 402 contains a provision permitting a union member who has exhausted his remedies to file a complaint with the Secretary. The Secretary must investigate and where he finds probable cause must sue for appropriate relief. (Labor Department investigates.)

Title VI. Miscellaneous Provisions: Section 601 gives the Secretary supplemental authority to investigate when he believes the act has been or will be violated.

3. CRIMINAL PROVISIONS

Title II. Reporting: Section 209 provides penalties for violations of the reporting provisions of Title. (Labor Department investigates.)

Title III. Trusteeships: Sections 301 and 303 contain the criminal provisions. (Labor Department investigates.)

Title V. Safeguards for Labor:

Section 501(c) [Embezzlement] (Justice Department investigates).

Section 502 [Bonding] (Labor Department investigates).

Section 503(a) [Loans by Labor Organizations] (Labor Department investigates).

Section 503(b) [Payment of fines by an employer] (Justice Department investigates).

[Payment of fines by Labor Organizations] (Labor Department investigates).

Section 504 [Prohibition against holding offices by certain persons] (Justice Department investigates).

Section 505 (Amendment to Sec. 302 of Labor Management Relations Act, 1947, as amended, relating to payments by employers to representative of employees, employer associations, consultants, etc.) (Justice Department investigates).

Title VI. Miscellaneous Provisions:

Section 602 [Extortionate Picketing] (Justice Department investigates).

Section 610 [Deprivation of rights by violence] (Justice Department investigates).

CORRECTION OF ERROR REGARDING SALARY OF CHAIRMAN OF SECURITIES AND EXCHANGE COMMISSION

Mr. JOHNSON of Texas. Mr. President, I have been asked to make the following request:

I ask unanimous consent that the Committee on Banking and Currency be discharged from further consideration of the bill, H.R. 13066, to amend section 4(a) of the Securities Exchange Act of 1934, as amended, and that the Senate proceed to the immediate consideration of the bill.

The purpose of this bill is to correct an error which was made in the enactment of Public Law 86–619, approved July 12, 1960. This act amended the Federal Power Act, the Communications Act of 1934, and the Securities Exchange Act of 1934. Its purpose was to make it clear that members of the Federal Power Commission, the Federal Communications Commission, and the Securities and Exchange Commission would serve after the expiration of their terms until their successors should be appointed and qualified, but not beyond the expiration of the next following session of Congress.

Inadvertently, the Federal Executive Pay Act of 1956, which set the salary of the Chairman of the SEC at $20,500 a year, was amended to provide that "Each Commissioner shall receive a salary at the rate of $20,000 a year * * *". No such change in the salary of the Chairman was intended by either the House or the Senate in enacting Public Law 86–619. H.R. 13066 would correct this error by specifically providing a salary of $20,500 a year for the Chairman of the SEC.

This request has been approved by the chairman of the Banking and Currency Committee, the Senator from Virginia [Mr. ROBERTSON]; and by the Senator from Utah [Mr. BENNETT], the ranking minority Member present. It has also been approved by the minority leader.

The PRESIDING OFFICER. Without objection, the Committee on Banking and Currency will be discharged from the further consideration of House bill 13066; and the bill will be read by title, for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 13066) to amend section 4(a) of the Securities and Exchange Act of 1934, as amended.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas for the immediate consideration of the bill?

There being no objection, the bill (H. R. 13066) was considered, ordered to a third reading, was read the third time, and passed.

PERMISSION FOR WATER USERS' ORGANIZATION TO DO PORTIONS OF CONSTRUCTION WORK ON MERCEDES RECLAMATION PROJECT

Mr. JOHNSON of Texas. Mr. President, I have a very unusual private bill. It is designed to permit water users to use their own organization, their own personnel, and their own equipment, in order to save money. The Bureau of Reclamation and the Director of the Bureau of the Budget are in approval; and the House has passed the bill unanimously. The bill, H.R. 10311, is at the desk; and I move that the Senate now proceed to its consideration.

The PRESIDING OFFICER. The Chair lays before the Senate a bill coming over from the House of Representatives.

The bill (H.R. 10311) providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724), shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas, was read twice by its title.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. JOHNSON of Texas. Mr. President, the enactment of the legislation is urgently needed at this time because construction of the project is already underway. If the water users are to be permitted to do any part of this construction work, the authority therefor must be made available immediately.

Enactment of H.R. 10311 will not result in any additional cost to the Federal Government. As a matter of fact there should be a saving in cost to the Federal Government and certainly there would result a saving in cost to the water users' organization.

The Mercedes division of the lower Rio Grande rehabilitation project in Texas was authorized by the act of April 7, 1958, and the Hidalgo and Cameron Counties Water Control and Improvement District No. 9 executed a repayment contract dated July 18, 1958, for the return of the cost of the project. The district has indicated a desire to do a portion of the construction and rehabilitation work with its own personnel and equipment but the authorizing act contains no authority for such a procedure. Enactment of H.R. 10311 would provide the needed authority.

Under the procedure which this bill authorizes, the district could contract with the United States to do certain portions of the work and be reimbursed for the work performed. Designs and specifications for the work to be undertaken by the district would be subject to prior approval of the Bureau of Reclamation

and the work performed would be subject to Bureau inspection and acceptance. The Department of the Interior believes that this authority would allow the district to perform portions of the work more effectively and efficiently than would ordinarily be possible under usual Bureau of Reclamation contract procedures.

Mr. President, the Secretary of the Interior endorses the project. The Bureau of the Budget has no objection to it. I have cleared this measure with the minority leader, and I have discussed it with the ranking members of the committee.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. LAUSCHE. Mr. President, last night I made inquiry about the bill. After the inquiry, I examined the report on the bill. I feel that the purposes sought to be achieved by the bill are worthy; and the objections which I raised last night were made on the basis of not knowing what was in the bill. Today, after having learned of it, I urge that the bill be passed.

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 10311) was ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas subsequently said:

Mr. President, earlier in the day the Senate passed H.R. 10311, providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724), shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas.

Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MANSFIELD. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

GREETINGS TO PRESIDENT EISENHOWER AND FORMER VICE PRESIDENT GARNER ON THEIR COMING BIRTHDAYS

Mr. JOHNSON of Texas. Mr. President, my colleague, Mr. YARBOROUGH, has Senate Resolution 383, which involves two distinguished Americans. The minority leader and the chairman of the minority policy committee have cleared the resolution. I believe it is noncontroversial. I certainly concur in the sentiments expressed in it. I should like to yield at this time to my colleague, to permit him either to read the resolution or to make a statement about it.

Mr. President, I now ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 383.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the resolution (S. Res. 383) extending greetings to President Eisenhower and former Vice President John N. Garner on the occasion of their coming birthdays.

Mr. YARBOROUGH. Mr. President, the adoption of the resolution is requested by the Texas Heritage Foundation. These two distinguished Americans were each born in the State of Texas; and of the people born in Texas since that State entered the Union in December 1845, these two gentlemen have attained the highest offices in our Federal Government. It is providential that both of them are still living. Former Vice President John Nance Garner is 91 years old. President Eisenhower is 69. President Eisenhower will celebrate his 70th birthday and former Vice President Garner will celebrate his 92d birthday after the adjournment of the 86th Congress and before the convening of the 87th Congress. The Texas Heritage Foundation supports this resolution for the joint commemoration which it plans in Texas. One of the birthdays will fall in October, and the other in November.

I ask that the resolution be adopted.

The PRESIDING OFFICER. Without objection, the Committee on the Judiciary, before which the bill has been pending, will be discharged from further consideration of the resolution; and, without objection, the resolution is agreed to.

The resolution (S. Res. 383) was agreed to, as follows:

Whereas the two Texas-born Americans who have reached the highest governmental offices since Texas entered the Union are both still living; the Honorable John Nance Garner, age ninety-one, and the Honorable Dwight D. Eisenhower, age sixty-nine; and

Whereas both will celebrate their birthdays after the adjourning of the second session of the Eighty-sixth Congress; and

Whereas Dwight David Eisenhower, the thirty-fourth President of the United States, born in Denison, Texas, will celebrate his seventieth birthday this year;

Whereas Mr. Eisenhower, having graduated from the United States Military Academy in 1911, followed his chosen career in the United States Army and soon after the entry of the United States in World War II was appointed Commanding General of the European Theater of Operations; and

Whereas in December 1943, Dwight D. Eisenhower was given the title of Supreme Commander, Allied Expeditionary Forces, and as such directed the successful invasion of Europe leading to the surrender of Germany in May 1945; and

Whereas, having been named Army Chief of Staff, Mr. Eisenhower's promotion to the rank of permanent General of the Army came in April 1946; and

Whereas, although retired from active duty in the Army to accept an appointment as president of Columbia University in 1948, Mr. Eisenhower took a leave of absence from Columbia from December 1950 to February 1951 when President Truman appointed him Commander of Allied Powers in Europe, with the task of organizing the armed forces of NATO; and

Whereas in 1952 this distinguished American was elected to the country's highest office, President of the United States; and

Whereas another distinguished American, also a native son of Texas, John Nance Garner, the thirty-second Vice President of the United States, born in Red River County, Texas, will celebrate his ninety-second birthday this year; and

Whereas John Nance Garner was a self-taught lawyer and held his first public office from 1893 to 1898 as county judge of Uvalde County, Texas; and

Whereas John Nance Garner was elected to the Texas House of Representatives in 1898, serving through 1902, and beginning in 1903, served thirty years in the United States House of Representatives from the Fifteenth Congressional District of Texas, and was Speaker of the House of the Seventy-second Congress; and

Whereas in 1932 the people of the United States, on the basis of his achievements in national affairs, elected Mr. Garner to the Office of Vice President, in which Office he ably served from 1933 to 1941; and

Whereas John Nance Garner is the only man in history to preside in uninterrupted succession over both Houses of the Congress, first as Speaker of the House of Representatives and then as Vice President of the United States; and

Whereas, in addition to his other public duties, John Nance Garner has made great contributions to the preservation of the Texas heritage, having assisted in founding the University of Texas Memorial Museum; and

Whereas the Nation owes these two distinguished men, so large a part of whose lives have been spent in public service, a grateful salute and best wishes on the approach of their respective birthdays: Now, therefore, be it

Resolved, That the Senate hereby extends its warm greetings and best wishes to these two distinguished Americans on their birthday anniversaries which, in the case of President Eisenhower, will occur on October 14, 1960, and, in the case of John Nance Garner, will occur on November 22, 1960.

SEC. 2. The Secretary of the Senate is directed to transmit properly certified copies of this resolution to President Eisenhower and to Mr. Garner.

AID TO EDUCATION

Mr. CLARK. Mr. President, as the session draws to a close, I should like to express my deep regret and keen disappointment that Congress has been unable to agree on a Federal aid to education bill.

Senators are aware that a bill was passed in this body earlier this year. In my judgment, that was an excellent bill, providing as it did Federal assistance for school construction and for teachers' salaries on a matching fund basis with the States. The bill gave the States the option of utilizing the Federal grants either for construction or for teachers' salaries, or for both, in such proportions as the States might decide. The bill also was very clear in its explicit prohibition of any possibility of Federal control over State and local education.

Senators will recall that the House passed a bill, in a smaller amount, dealing only with school construction, and containing, as it passed the House, the so-called Powell amendment.

It is a source of keen regret to me that, because of the situation in the Rules Committee in the House, it was impossible to get the two bills to conference and to work out a compromise bill which could receive the approval of both Houses of Congress and the signature of the President. Next year we must do better.

I am happy to note that both party platforms call for Federal aid to education, the Democratic platform being more specific and including grants for

teachers' salaries as well as for school construction.

Senators will recall the rather exciting events on the floor of this body when, after an initial rebuff, under the leadership of the Senator from Oklahoma [Mr. MONRONEY], by a very close vote, the so-called Monroney-Clark amendment was adopted, giving the States the option of using Federal money either for teachers' salaries or for school construction.

The substance of the Monroney-Clark amendment has been incorporated into the Democratic National Platform. I am confident that when our party succeeds at the polls next November, our new President and Vice President will stand firmly on that platform and recommend enactment of a Federal aid to education bill along the general lines of the one that passed the Senate this year.

I hope, God willing, to be here to assist in that effort; and I am confident that an overwhelming majority of the Democratic Senators will support the Democratic platform, so that, with leadership from the White House, we can look forward to enactment of the kind of bill called for by the platform.

I am equally confident that our Democratic colleagues in the other body will so reform their rules next January as to make it impossible for a small, benighted, conservative group who comprise half the Rules Committee, consisting of Members of both parties, to prevent legislation recommended by standing committees of the House from coming to a vote on the floor.

I make these comments in the closing hours of this session in order to assure those who read the CONGRESSIONAL RECORD and the press that, in my opinion, the Democratic Party will pass a good Federal aid to education bill early in the next session, a bill which will comply in all material respects with our party platform.

MONETARY POLICY

Mr. CLARK. Mr. President, I turn now to another matter.

Senators will recall the debates in this body during this session and the session which preceded it with respect to tight money and high interest, and the problems of financing the Government debt. It is perhaps not inappropriate for those of us who stood firmly in support of an easier credit, lower interest policy to point out that because of our objection, to the proposed increase in the debt ceiling, the Treasury was unable to go ahead with financing of Government indebtedness at interest rates which would have imposed an unconscionable burden on future generations of Americans.

I point out again the shocking increase in national debt charges which took place during the 7½ years of the Eisenhower administration because of the deliberate policy of both the Federal Reserve—despite its alleged independence—and the Treasury of the United States.

I think we can all take justifiable pride that we did not yield to the President in increasing the debt ceiling. Had we done so, I am confident that between them the Federal Reserve and the Treasury would have foisted on the American people billions and billions of dollars of high-interest, long-term Government bonds which would have been a permanent drag on our economy and a constant brake on our efforts, through a sound fiscal policy, to balance the budget and reduce the debt.

I note with considerable concern, Mr. President, that despite the fact that the Treasury is able to refinance a large part of our short-term debt in long-term bonds at very much lower interest rates than the statutory interest rate ceiling, the Treasury is still making no effort to refinance our short-term debt. During the years past we were told of the necessity for raising the interest-rate ceiling on the debt and the great need to get billions of dollars of short-term debt funded into long-term debt. This was considered a serious matter, yet the Treasury is making no move in that regard whatsoever now. Quite to the contrary, the Treasury intends to refinance relatively long-term Government bonds, bonds which have a maturity in some instances of almost 10 years beyond the present date, into higher interest Government bonds of a 20- or 25-year maturity.

Mr. President, the fallacy of this policy was pointed out strikingly in the debate in the other body about 10 days ago.

I should like for the Members of this body to know that many of us—including, I am sure, the Senator from Oklahoma [Mr. MONRONEY], the Senator from Tennessee [Mr. GORE], the Senator from Illinois [Mr. DOUGLAS]—look with grave skepticism at this policy of the Treasury. I am sure I speak for the other Senators when I say we hope that once the Congress adjourns the Treasury will turn its endeavors toward refinancing the short-term debt so as to get it into long-term securities.

I deplore again the apparent policy of the Treasury to refinance long-term debt at even higher rates of interest than present bonds provide.

Mr. President, I am confident that when we return in January with a Democratic administration we shall carry into effect, through a new and enlightened Secretary of the Treasury, and perhaps with new leadership in the Federal Reserve Board—although that is not necessarily required—the program laid down in the Democratic platform, which is a lower interest policy, an easier money policy, in times when the productive capacity of our Nation is not being fully utilized, in times when unemployment is increasing instead of decreasing, in times when the threat of inflation has pretty well gone out of the picture.

I am confident, as a result of those sound policies laid down in the Democratic platform, we shall see monetary and debt management policies next year which will be in the interests of all the people of the United States and which will contribute to a maximum growth of our economy, a maximum stabilization in the cost of living, and maximum employment. All these objectives are specified in the Employment Act of 1946, and all have largely been ignored by the Eisenhower administration.

Mr. President, I yield the floor.

THE HUMAN PROBLEMS OF THE PENNSYLVANIA RAILROAD STRIKE

Mr. KEATING. Mr. President, 14 years ago when I first came to the Congress, when travel by railroad was more common than it is now, I was in the Pennsylvania Station in Washington one day and noticed a lady with two little children in a corner of the station. She was weeping and obviously distraught. I was bold enough to inquire what was the trouble. She explained that she had come from North Carolina, had gotten as far as Washington, wished to go to Philadelphia to see some relatives, but did not have the money to go further. I may have been a "sucker"—we all often are—but I helped her to get to Philadelphia.

That incident had a rather strong impression on me, when I read this morning in the newspaper about the lady who got into the station last night. She arrived in Washington en route to Philadelphia with an ailing elderly aunt. It was heartbreaking for her to discover that the train service had stopped. Plaintively she said, "I do not know what to do. My aunt is very sick." She finally decided to take a bus.

Another unfortunate man with eight children, traveling to Albany from Salisburg, N.C., on railroad passes, discovered to his chagrin that the rest of the trip was going to cost money that he apparently did not have.

I cite these examples, Mr. President, because I know a railroad strike creates very serious human problems, that it creates anguish and distress to which none of us can be indifferent.

I have no knowledge about the merits of the controversy. I understand that efforts are being made to resolve this dispute. I have inquired at the National Mediation Board as to what is being done. I have expressed the hope that the strike can as quickly as possible be brought to a close.

It would be presumptuous on my part to suggest any solution.

Furthermore, I have no set position as to whether further legislation is necessary. I share with my colleagues from Delaware and many others the hope that this strike can be speedily settled.

As I have said, it involves very important human problems. I wish to say that I look upon the strike as very serious, and I hope with all my heart that something can be done quickly to resolve the issues between the parties.

ANNIVERSARY OF THE UKRAINIAN CONGRESS COMMITTEE OF AMERICA

Mr. KEATING. Mr. President, it is a signal honor and privilege to salute the Ukrainian Congress Committee of America on the occasion of the forthcoming celebration of the 20th anniversary of its founding. Established in

1940, this dedicated and patriotic committee has brought new vigor and fresh spirit to the historic concept of freedom in America and throughout the world.

The Ukrainian Congress Committee was created with the high and sacred objective of securing for their native Ukraine the same democracy and freedom its sons and daughters had found in America. It set as its goal, as well, the strengthening of the United States in its role as the bulwark of freedom in a world where freedom faces the constant and deadly peril of the Communist design for conquest.

This distinguished organization represents some 2½ million Americans of Ukrainian descent. By the noble purpose of their mission and the dynamic quality of their endeavor, these stalwart fighters for freedom have won the respect and admiration of their fellow Americans.

At this time of commemoration, it is well for us to recall that the valiant Ukrainian people are not Russian at all, but are enduring the captive fate of so many other brave nationalities that have been forced into bondage by the Soviet regime. It is for this reason that we join our hearts and hopes and prayers with our American friends of Ukrainian descent in the high cause of the liberation of their brethren, enslaved behind the Iron Curtain. The lights have gone out for these silent millions, save for the flickering spark of hope that only their spiritual courage keeps alive.

In the name of our common brotherhood under God, let us, as free men, pledge our unremitting zeal and energies to the end that the spark may one day flame again into the bright and cherished light of freedom so long denied to the courageous people of the Ukraine.

TRIBUTE TO AMBASSADOR URGUPLU

Mr. KEATING. Mr. President, it is unlikely that any representative of a foreign government who has served in Washington in recent memory was more popular or more highly respected than former Ambassador Ali Suad Hayri Urguplu of Turkey. During his stay in this country the Ambassador and his equally popular wife endeared themselves to a wide circle of friends, both official and nonofficial.

His able work in bringing additional understanding to the problems affecting Turkish-American relations served notably to help bring our two countries closer together. In particular, I recall how firmly he reflected Turkey's adamant stand against international communism and his dedication to preserving the free world alliance against this conspiracy.

The outstanding success with which Ambassador Urguplu and his wife represented their native land in the United States was eloquently testified to by the high words of praise accorded them when they returned to their homeland. The tributes paid the Ambassador reflected not only upon his personal popularity and that of his wife, but also attested to the official gratification that he had handled Turkish-American relations with such tact and skill.

Following his service in this country, Ambassador Urguplu was transferred to the post of Ambassador of Turkey in Spain, where I understand he served with his usual distinction. According to recent reports, he has now returned to his homeland, where he is temporarily attached to the foreign office in Ankara while awaiting a new assignment.

It goes without saying that the many Members of the Senate, as well as other Americans in official and nonofficial status who came to know him during his tenure in this country, wish him well in the days ahead. He exemplifies the finest in Turkey's heritage and traditions, as well as the firm bonds of friendship between Turkey and the United States which we all hope will grow even stronger in the future.

It is my hope that Ambassador Urguplu will have the continued opportunity to serve his country in the able manner he is so obviously capable of doing.

Mr. HOLLAND. Mr. President, will the Senator yield so that I may supplement his able remarks?

Mr. YARBOROUGH. I yield to my distinguished friend from Florida.

Mr. HOLLAND. I am glad to be here in the Chamber at the very moment that the distinguished Senator from New York is voicing these words of praise and appreciation of Ambassador Urguplu. It was my very great pleasure to become well acquainted with him in his work while he was here in Washington. I thought he was one of the most effective representatives of a free people that I have had the pleasure to know during my 14 years of service in Washington.

We had several subjects in which citizens of my State had interest, and sometimes pressing interest, to them in Turkey to take up with him. Always I found him showing not only interest, but he always had enough time personally to handle those matters, always to the great satisfaction of the people in my State who had those problems, and certainly to the great satisfaction of the representatives of the people of Florida here in Washington. I found him always a splendid representative and exemplar of the freedom-loving and fearless people of Turkey, who in spite of the fact that they look across many miles of narrow sea frontier and many miles of land frontier directly at the Soviet, they do so fearlessly and with every intention of standing up for the freedom which they cherish, and standing up along with ourselves and other advocates of freedom throughout the earth.

I think he was a splendid representative of the Turks, and I am glad to speak this word.

May I say that in addition to his splendid representation of his people in the field of handling business, I found him always one of the most popular of the foreign representatives in Washington, and he and his lovely wife, Madam Urguplu, were regarded by Mrs. Holland and myself as among the finest people whom we met here representing other countries, and we always found it a source of delight to be with them.

I gladly join my distinguished friend in speaking that appreciation of the Urguplus, and we regret the fact that we no longer have them here to represent their great and free people. I thank the Senator from New York.

Mr. KEATING. Mr. President, I am grateful to my friend from Florida for those remarks. I first became acquainted with Ambassador Urguplu when he and I were delegates to the Interparliamentary Union. He was then a member of the Turkish Parliament. He has had a political background. He has a great capacity for friendship. He has a winning manner.

He has certainly represented his country admirably in Washington, and I wish for him all the best in the future.

TRIBUTE TO TELEPHONE PAGES TO THE MINORITY

Mr. KEATING. Mr. President, I wish to pay tribute to two young men on our side of the aisle who work constantly and efficiently to keep things in order in the Republican cloakroom. At times, that is quite an assignment. This is, in a sense, "ringing" praise for two young men who are very much used to ringing, for I would estimate that they expeditiously handle 300 or 400 telephone calls a day for the members of the minority side—which shows how busy we are on this side. I have no knowledge about how busy they are on the other side, but I presume just as busy or perhaps even more so. For myself I extend my gratitude to Russell J. Call and Harold W. Perkins. Russ and Harry have done a fine job. They amply deserve a note of recognition.

A FINE TELEVISION SERIES CONTRIBUTES TO RAISING TV STANDARDS AND TO AMERICA'S UNDERSTANDING OF ITS HERITAGE

Mr. KEATING. Mr. President, many Americans, including a great many Members of the House and Senate, have expressed concern in recent months over the content of television programs. Many have feared that this great medium of expression was being perverted to shows glorifying crime, sex, violence, sadism, and corruption.

It is a pleasure to cite a contrast to this trend and to praise a sponsor who is meeting the demand for quality television. I refer to "Our American Heritage," a series of historical dramatizations sponsored by the Equitable Life Assurance Society of the United States.

This award-winning series of last year will start its second season on Friday, October 21, on the NBC–TV network. The programs, produced by Mildred Freed Alberg, in collaboration with the editors of American Heritage magazine, will re-create dramatic and exciting "moments of decision" in the lives of such great Americans as Alexander Hamilton, Theodore Roosevelt, and Andrew Jackson. Veteran broadcaster and globetrotter Lowell Thomas will introduce the programs and narrate on the

significant contributions to our American heritage of the historic events and figures portrayed.

This series should rate high on the viewing list of all Americans who take pride in our great heritage and the men who made it great, and who are concerned about the lack of knowledge and understanding of our traditions among many Americans today.

SUPPORT FROM ORGANIZED LABOR FOR SENATOR KENNEDY

Mr. MORSE. Mr. President, one of the tests of the standing of a man in American public life is the support he receives in his own neighborhood and community and district and State. I have been looking over the proceedings of the AFL–CIO Third Constitutional Convention, held at San Francisco, Calif., last September. I am pleased to note the position taken by the delegates of the Massachusetts delegation at that convention in regard to Senator JACK KENNEDY. One of the leaders of organized labor in the Massachusetts AFL–CIO Council is Mr. Kenneth Kelley. Mr. Kelley, at the San Francisco convention, made very clear the stanch and loyal support of the Massachusetts AFL–CIO Council for JACK KENNEDY. For example, in the course of his remarks, he said:

> We in Massachusetts have consistently supported him in his campaigns both for the Congress and for the Senate and we are supporting him in his campaign for the U.S. Presidency.

As one who has served with Senator KENNEDY on the Committee on Labor and Public Welfare for some years, and as one who has differed with him with regard to some policies in the field of labor legislation, I wish to say that I am very much pleased by the unity of labor support which he enjoys in the State of Massachusetts. I am saying to the AFL–CIO council of my own State that in my judgment he is deserving of the support in the State of Oregon from organized labor, just as he has received it in the State of Massachusetts.

At the same San Francisco convention last year another very distinguished and able labor leader in this country, Mr. Joseph D. Keenan, of the International Brotherhood of Electrical Workers, made one of the finest statements in regard to the qualifications of Mr. KENNEDY that were made at the convention. I am pleased to learn that Joseph Keenan is doing all he can in behalf of taking the qualifications of Mr. KENNEDY to the councils of organized labor in the United States.

THE SUGAR BILL AND THE COLD WAR

Mr. EASTLAND. Mr. President, I will say a few words today on the sugar bill which went through an exhausted Senate at 10 minutes of 3 this morning, and the relationship of this bill to the cold war.

Tragically, it has become a truism to say that we are losing the cold war. What is the result of this succession of defeats?

I tried to sum it up in a statement which I made last April to the Veterans of Foreign Wars when I said:

> One-third of the human race is in prison.
>
> If you go to the Austrian side of the Hungarian border, you can see one of the outer walls of this prison. It is lined with barbed wire. Every few feet there is a sentry box manned by armed guards with orders to kill those who seek to escape.
>
> If you go to West Germany, you may meet people and hear stories of those who have been fleeing from the prison through the Berlin subway for the past 15 years.
>
> If you go to Hong Kong or Macao, you will meet people and hear stories of those who have fled from the prison that calls itself the Chinese Peoples Republic. You might even see some of these refugees actually in flight, with Red guards pursuing and shooting at them. Residents of Macao have seen such things more than once.
>
> If you go to the Indian side of the Tibetan border, you may see similar sights.
>
> Nothing as monstrous as this has ever happened in the whole history of mankind. The masters of this intercontinental slave empire have proclaimed their intention of expanding. Their octopus tentacles have reached to Cuba, which is only a few miles from the American border.

That is the picture of defeat, and it is an appalling one. How have these present-day Pharaohs advanced so far?

I submit, Mr. President, that their advance has been due in great measure to the fact that the effective leadership of the so-called free world does not yet understand what the cold war is and what must be done to win it.

The cold war began 112 years ago when Karl Marx and Friedrich Engels stated, in their Communist manifesto:

> The Communists disdain to conceal their views and aims. They openly declare that their ends can be attained only by the forcible overthrow of all existing social conditions.

The warriors of the cold war received their marching orders 40 years ago when V. I. Lenin said:

> We repudiate all morality that is taken outside of human, class concepts. We say that our morality is entirely subordinated to the interest of the class struggle.

The effective leadership of the free world has never really accepted the terrible reality behind the words I have just read.

Year after year, in country after country, and continent after continent, the effective leadership of the free world makes the same terrible blunders over and over again because of this continued flight from reality. I call them blunders out of charity. Other people use a harsher word.

"Betrayal."

Let me remind Senators of some of these "blunders."

We blundered in Yugoslavia when we chose Tito over Mihailovich.

We blundered at the end of World War II when we sent back to Stalin's slave camps thousands of Russians who had fled to us seeking asylum from his tyranny.

We blundered in China when we forced Chiang Kai-shek to accept field marshals of the Communist cold war into his own anti-Communist government.

At 10 minutes of 3 this morning we blundered again when we voted to strike at the economy of the Dominican Republic, which had been our ally in the cold war which has now advanced to the Caribbean. At 10 minutes of 3 this morning we passed a bill which ostensibly gives the President discretion in the allotment of sugar quotas assigned to the Dominican Republic and domestic producers. What we were actually doing, was saying once more to all the world that the United States of America does not stand by those who stand by her.

What right do we have to express surprise at the continuing success of the Communists in this cold war?

What right do we have to express surprise at the fact that today, as we stand here on this floor, one-third of the human race is in prison?

This country has suspended diplomatic relations with the Dominican Republic because, it is alleged, the Government of the Dominican Republic was guilty of aggression against another Latin American country. I do not say this is true, I say this is the charge, the alleged basis of our action.

But, Mr. President, we have not severed diplomatic relations with Cuba; yet Cuba has several times taken aggressive action against other Latin American countries. For instance, the Castro government mounted an actual invasion of the Dominican Republic, sent an armed force in government-owned aircraft to spearhead this invasion.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. EASTLAND. I yield.

Mr. JOHNSTON of South Carolina. That was when the State Department was working with Cuba, was it not?

Mr. EASTLAND. From the testimony which will be released, I think it will be shown that the State Department is responsible for the installation of Castro as a Communist dictator in the Caribbean. I think that has endangered the cities of the United States, if I correctly understand what has happened there.

Mr. JOHNSTON of South Carolina. Was not that the beginning of our sugar trouble?

Mr. EASTLAND. That is correct.

Mr JOHNSTON of South Carolina. We would not be talking about sugar today if it had not been for the misdeeds of the State Department.

Mr. EASTLAND. Certainly that is correct.

Mr. JOHNSTON of South Carolina. I noticed the Senator referred to barbed wire fences along the border of Hungary. I have been there and have seen them. I think it would be well for people to go there and see them. For about 5 miles before one reaches the border, along what is supposed to be a main public road, the houses and other buildings are in a state of decay. Is not that so?

Mr. EASTLAND. That is correct.

Mr. JOHNSTON of South Carolina. When one reaches the border, he sees not one barbed wire fence, but several barbed wire entanglements, about 6 or 8 feet high. In between the barbed wire entanglements is plowed ground. It is kept plowed so that if anyone attempts to cross the border, he can be tracked. Also, mines are laid between one barbed wire entanglement and another.

In addition, about every 500 yards there is a tower in which is stationed a rifleman whose duty it is to prevent anyone from crossing the border.

Mr. EASTLAND. That is correct. Is it not a fact that for the past 4 years we have not stood up to communism, but that our attitude has been one of retreat, retreat, retreat, as one country after another has come within the influence of communism?

Mr. JOHNSTON of South Carolina. Yes; and did we not start that immediately after the end of the war? It was "You take half and we will take half." That was the kind of compromise which was made.

Mr. EASTLAND. That is correct. But in 1952 I thought it had been brought into balance. Now we see the Communist sweep in Africa, in the Caribbean, in South America, and all over the world.

Mr. JOHNSTON of South Carolina. In Korea, we took a little part and gave the Communists the rest. We said, "You take this and we will take this little part down here." Then it was not very long until the Communists had stirred up trouble in our part of the territory.

Mr. EASTLAND. That is correct.

Mr. JOHNSTON of South Carolina. It was the same way in Vietnam. We said, "You take this half; we will take that half."

Mr. EASTLAND. That is correct. How could we compromise when we were always giving away something the Communists did not have?

The Communists said to the free world, "You take half and we will take half"; but it ended with the Communists getting both halves, because we have not had strong leadership in the United States since 1952.

I said Castro had mounted an armed invasion against the Dominican Republic. Testimony before the Internal Security Subcommittee, and photographs in the possession of the subcommittee, establish this beyond question. No more aggressive act by one Latin American nation against another can be imagined than the actual mounting of an armed invasion. But we have not even criticized the Castro government for this action.

What did we do? We apologized to them on the basis of lies told by the dictator of Cuba.

But we have moved against the Dominican Republic.

It is the executive branch of the Government which has taken this action against the Dominican Republic, just as it is the executive branch of the Government which helped to bring Castro into power, and which tolerates him today. In asking for authority to cut the Dominican sugar quota, the Executive proposed that the legislative branch of the Government also bring sanctions against the Dominican Republic. In approving a bill to grant that authority, the Senate assented. I hope we shall hear no more of this.

Mr. President, the legislative branch of the Government represents the people of the United States. And the people of the United States, Mr. President, are not enemies of the Dominican Republic, and do not regard the Castro dictatorship in Cuba as just another agrarian reform movement. The people of the United States, Mr. President, are considerably more realistic than the executive branch of this Government has been, on the question of who our friends are, and who our enemies are.

The people of the United States, Mr. President, are going to repudiate an administration that is patient with our enemies and rough on our friends, an administration which has not merely tolerated, but has actually let Government officials connive at, the revolutionary replacement of a friendly government in Cuba, which resulted in the establishment of a Communist beachhead 90 miles from our shores. If we here in the legislative branch should show ourselves equally unrealistic with regard to where the interests of this country lie, I think the people of the United States might very soon get around to the point of repudiating us.

Mr. President, there is danger to the Western Hemisphere. Specifically, there is danger to all Latin America. But, Mr. President, that danger does not come from the Dominican Republic, which for 30 years has been on the same side as the United States, which fought with us against the Nazi threat to take over the world, and which has been fighting with us against the Communist threat to take over the world.

No, Mr. President, the threat to the Western Hemisphere and to the nations of Latin America is from the world Communist conspiracy, and this threat is focused through the Communist dictatorship in Cuba.

Trujillo and Castro are both dictators. But Trujillo does not threaten the United States, does not insult us, does not steal the property of our Government and our people, does not threaten to bomb us. Castro has done all of these things. So what do we do? We slap Castro on the wrist, and kick Trujillo in the teeth.

News stories last week informed us that the administration had decided to prohibit the use of foreign aid funds for the purchase of sugar from the Dominican Republic. As these news stories pointed out, this decision of the administration was designed to prevent countries which receive foreign aid dollars from spending them to buy Dominican sugar.

This decision of the administration was in the same vein as the President's request for authority to end the purchase of Dominican sugar and to purchase this sugar elsewhere. This is the issue involved in the pending bill.

I have already expressed myself respecting the complete lack of justification for this move, and I shall not repeat what I have already said. But I want to call attention to the fact that up until the very day of this announcement of the move to ban the use of foreign aid funds for the purchase of Dominican sugar, and in the face of far greater provocation than the Dominican Republic ever gave us, the administration has continued to make foreign aid funds available for the purchase of Cuban sugar.

In Cuba, more than a billion dollars' worth of American-owned business and property has been "intervened," as the Cubans say—which means taken over by the Government without just compensation—or stolen. This has included at least 36 American-owned sugar mills, worth some $200 million.

On July 2, Congress passed a new sugar quota law giving President Eisenhower authority to reallocate sugar imports; and the following day, the President cut Cuba out of the import quota, and gave her share of the sugar quota to other areas, including Hawaii and the Philippine Islands.

In spite of this action, the International Cooperation Administration continued, after July 2, and in fact, until Thursday of last week, to let charters for Cuban sugar purchases. This was done, I am given to understand, on the theory that contracts for this foreign-aid sugar already had been signed. The fact remains that ICA continued to buy Cuban sugar for foreign-aid shipment, even after the President had implemented an act of Congress to cut off purchases of Cuban sugar.

It has been argued that there was justification for this policy, in spite of its apparent inconsistency with the action of Congress and the action of the President, because at least some of the mills from which ICA was buying sugar were still in the possession of American-owned companies. And it is said that the foreign country which gets an ICA grant for sugar negotiates for itself with a broker or supplier; and that when such a country buys from A, who buys from B, who buys from a Cuban sugar mill, there is nothing we can do about it.

Mr. President, I do not consider these arguments justification for what I consider to have been a weak-kneed policy on the part of ICA.

It is my view, Mr. President, that any authorization by the ICA for payment of U.S. funds for Cuban sugar constitutes a sort of backhanded recognition by the U.S. Government of Castro's seizure of the American-owned sugar properties in Cuba.

Perhaps it should be said that the ICA is in a tough spot when a beneficiary country of our foreign-aid program wants to buy Cuban sugar. But even if it is in a tough spot, Mr. President, I do not think the Government of the United States should confine its protection of American interests to easy spots. Most of the time, it is in tough spots that Americans and American business interests most need the protection and support of their Government. I think our

Government has leaned over backward far too much and far too long in tolerating Castro's aggression against U.S. citizens and U.S. property.

It is most important, Mr. President, in connection with the legislation before us, that we recognize that the ICA up until it was decided to cut off availability of ICA funds to buy Dominican sugar, went ahead with the purchase of Cubar sugar for foreign consumption after Cuban sugar purchases for U.S. consumption had been halted by act of Congress and order of the President.

We have here additional evidence of both the inconsistency and the lack of realism of the administration. This Government made a gesture of cutting off purchases of Cuban sugar; but the ICA at least continued, up to last Thursday, to permit such purchases for foreign consumption under the aid program, thus giving backhanded recognition to Castro's seizure of American property. On the other hand, in the case of the Dominican Republic, where no American property has been seized, the administration is going right down the line to cut off the purchase of Dominican sugar for both domestic consumption and foreign aid use.

Is it any wonder that the prestige of the United States in Latin America is at a very low ebb? Is it any wonder that Latin American nations have doubts about the wisdom of lining up with the United States against Communist aggression, when they see us taking only halfhearted measures against the Communist dictatorship which has been established in Cuba under Castro, while we crack down on the Dominican Republic, the most strongly anti-Communist nation in this hemisphere?

WHAT HAS HAPPENED TO H.R. 10?

Mr. BENNETT. Mr. President, it has been most disappointing to me to note that the Senate Democratic leadership has not taken any action to again call up for debate H.R. 10, the self-employed voluntary pension plan bill. This bill was intermittently debated on the floor over a period of about 2 weeks just before Congress recessed for the national conventions. Unfortunately, it was replaced as the pending matter of business on the last day before the Senate recessed, and since we reconvened it has not been called up for further debate. Evidently, the distinguished majority leader and the Senator from Massachusetts [Mr. KENNEDY] do not think this legislation is of sufficient importance to include it on their "must list."

This legislation is most important to the self-employed of our Nation because its enactment would provide some degree of security in permitting this segment of our population to set aside a small portion of their income for retirement purposes. This legislation has been before Congress over a period of the last 8 years and has received widespread support. All persons now subject to the self-employment tax, and, in addition, doctors, ministers, and Christian Science practitioners, would be eligible for the benefits of H.R. 10. Also covered would be owner-manager-employees of corporations, and the employees of self-employed persons. It provides pension benefits for the self-employed which are already enjoyed by most corporate employees.

The enactment of H.R. 10 would permit self-employed persons to set aside a portion of income each year for retirement purposes, and this income would not be taxed until withdrawn as retirement benefits. A self-employed individual could be covered under a plan only in those years in which he has income from personal services, and the deduction each year would be limited to $2,500, or 10 percent of earned income, whichever is smaller.

It should be emphasized that this is a self-help measure and will provide retirement security for the self-employed without any expenditure of Government funds. In effect, this is a tax postponement measure and does not remove the liability from paying tax on the income when it is finally received by the self-employed individual. A major portion of the tax loss to the Treasury in the early years would be recouped in the later years and would insure that these individuals would have adequate income for their old age without depending on Uncle Sam for a Federal "handout."

Along with other members of the Finance Committee, I have worked diligently wtih officials of the Treasury Department and with representatives of the various self-employed groups in trying to arrive at a bill which is acceptable to everyone. It has taken considerable time and hard work to get a bill which meets the need, and which has the Treasury's approval, thus avoiding any likelihood of a Presidential veto. It is regrettable that all this hard work and effort will go for naught, if Congress adjourns without taking action on this important bill. In my opinion, we should not adjourn until H.R. 10 and other important bills still pending have been enacted into law. I urge the distinguished majority leader to call up H.R. 10 for debate so that this bill can be passed and these needed benefits conferred upon the self-employed of our Nation.

SENATOR McGEE'S ADDRESS TO THE WESTERN RESOURCES CONFERENCE—EDITORIAL FROM THE CHEYENNE STATE TRIBUNE

Mr. BIBLE. Mr. President, recently the distinguished junior Senator from Wyoming [Mr. McGEE], the colleague of the beloved senior Senator from Wyoming [Mr. O'MAHONEY], addressed the Western Resources Conference in Boulder, Colo. I have before me an editorial, published in the Cheyenne, Wyo., State Tribune, which discusses that address and quotes significant passages of it. Both the address and the editorial show the real stature which the junior Senator from Wyoming [Mr. McGEE] is attaining in the Senate, Mr. President; and I ask unanimous consent that the editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Cheyenne State Tribune, Aug. 29, 1960]

LET THE PUBLIC IN ON IT

If you've ever tried to approach an understanding of water resource and supply problems, solution of which is absolutely vital to everyone, you will agree with a recent statement by U.S. Senator GALE McGEE, Democrat, of Wyoming.

In an address at Boulder, he said:

"For all too long water experts, resource engineers, and assorted technicians have spent a disproportionate amount of time talking to each other, usually in a professional jargon unintelligible to the rest of us. Along the way, there has been altogether too little effective communication with the man on the street. What use, one is entitled to ask, is there in calculating the coefficient of N in an unlined channel unless a channel gets built in the first place?"

The Senator then added, most pertinently, that water problems will not be solved unless the public does catch on to what it is all about. In his words:

"Without popular understanding of both the magnitude and urgency of the problem of water resources: without a public disposition to accept—or even demand—greater tax expenditures for water, there can be little hope for major strides forward. Without it, moreover, professional and scientific advances in the field remain largely academic exercises, or possibly suffer a worse fate—that of being drowned in a sea of public apathy."

If you can appreciate the great scope of the problem now, you may be appalled by what's ahead (also in Senator McGEE's words):

"The Department of Commerce has come up with an estimate that between now and 1980 we are going to have to invest through all government levels, from Federal to local, and through private instrumentalities, well in excess of $200 billion in the development of our water resources. This figure is based upon a most conservative estimate, which may in fact be on the low side, that our gross national product will increase only 2.7 percent per year. A more rapid growth rate—say of 4 or 5 percent—would inescapably mean proportionate increases in water demands.

"To put it differently, the per capita consumption of water is expected to double—or according to some projections—even to quadruple in the next quarter century. At present rates our population will nearly double by the year 2000. Simple arithmetic calculation suggests the magnitude of the new demands for water which lie immediately ahead of us.

"From the Public Helath Service we have learned that between now and 1965—scarcely 5 years hence—we shall need to spend over a billion dollars a year on a local, State and Federal basis just to catch up with the sewage and waste treatment needs which will exist by that date."

Mr. BIBLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER [Mr. Moss in the chair]. The Clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REGULATION OF MASS TRANSIT IN THE WASHINGTON, D.C., METROPOLITAN AREA

The Senate resumed the consideration of the joint resolution (H.J. Res. 402) granting the consent of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the Morse amendments.

Mr. MORSE. Mr. President, I am very glad we are back, at long last, on the compact. It was my desire to dispose of it as expeditiously as I could, from the very beginning. I sought only to make the argument in support of my amendment that I was committed to make. I had no intention at any time to engage in any prolonged debate on this matter. I am perfectly willing to let the record speak for itself, so far as the length of my discussion is concerned.

I shall summarize very quickly my position on the amendment which is pending at the desk, and which has already been stated and is the pending business of the Senate. As a member of the District of Columbia Committee, I have been a stanch supporter and defender of private ownership of the mass transportation system in the District of Columbia.

It will be recalled that back in 1956 it was more than a possibility—for a time it seemed to be a probability—that there was going to be such a complete breakdown in the transportation system of the District of Columbia that the Government itself might very well have to take it over. There were public hearings on the matter at that time, in which the senior Senator from Oregon made it clear over and over again that he believed the mass transportation system of the District of Columbia should be turned over to private ownership and that private ownership should get some assistance from the Government, if necessary, because of certain peculiar conditions which exist in the District of Columbia in the mass transportation system.

I urged then that the system be given certain tax relief. I urged then that certain consideration be given to the transit company in regard to maintenance. To make a long story short, as a result of those hearings, the present D.C. Transit System came into being. We have enjoyed private ownership of that system ever since. I am not saying, Mr. President, it is a perfect operation; but I am saying that the private mass transportation company in the District of Columbia is doing a remarkably fine job, comparatively speaking.

As a member of the Committee on the District of Columbia, I am frequently apprised of some of the mass transportation problems of other cities in this country. I think we are indeed fortunate that we have a mass transportation system which is as well operated, under private ownership, as is the one in Washington, D.C.

Mr. President, I have made these comments because they lead to my expression of concern about the compact which is before the Senate. It is well known, by both the proponents and opponents of the compact, that Mr. Chalk, who is president of the private transportation company in the District of Columbia, is vehemently opposed to the compact in its present form. He testified at great length in opposition to it. I filed for the RECORD last night a very lengthy legal brief that his counsel presented in opposition to the compact.

Mr. President, I know enough about how these things develop into trouble zones to justify my prediction here this afternoon that I think the Senate is buying a lot of litigation.

Now that Congress is going to force this down the economic throat, so to speak, of a private company in the District of Columbia, I think, instead of its being a successful operation, as I think it could be, the Senate will be passing a measure this afternoon that is going to create a great many problems in the mass transportation system in the Metropolitan Washington area.

I was very much opposed to the position Mr. Chalk took when he sought to have the Commission comprised of three members from the District of Columbia, one from Virginia, and one from Maryland. I thought it exceedingly unfair on his part, and said so; and I spoke as one of the original sponsors of the compact resolution. I stand by that sponsorship. I think there should be a compact. I think there should be a metropolitan commission created. I am all for the objectives of it, Mr. President; and when I offer the amendment I am offering, I am not opposing the commission concept for a mass transportation commission for the Metropolitan Washington area.

What I am trying to do as a member of the Committee on the District of Columbia and as one of the original sponsors of the compact resolution itself is to prevent trouble. I think this is the time to prevent trouble. I think this is the time to iron out some of the difficulties which have arisen with the private management of the District system.

I wish to repeat, before I close, two or three vital statistics. The fact is that 80 percent of the riders in the metropolitan area are District of Columbia riders. Although the mass transportation system serves outside the District, to some extent in Virginia and Maryland, the overwhelming majority of the riders come from the District. Most people from Virginia and Maryland travel in private cars. A relatively small percentage of them, in comparison with those from the District of Columbia, ride on the mass transportation vehicles. That is one of the things which is causing all of the opposition on the part of Mr. Chalk, the president of the District of Columbia Transit System.

Mr. President, it is said that the District of Columbia Commissioner on the Commission, will retain a veto over the so-called intrastate problems. That sounds good, but the problems are not black or white. The questions of interstate or intrastate problems are mixed in connection with the operation of a metropolitan area mass transportation system.

When one gets to the border between the District of Columbia and Virginia or to the border between the District of Columbia and Maryland it is very difficult, in the operative facts of individual disputes, to determine whether one is dealing with an intrastate problem or interstate problem.

If there is a Commission dealing with the problem as to what shall be the policy of the company at the border of the District of Columbia in regard to a border terminal, for example to mention one possible hypothetical case, would it be an intrastate or interstate problem?

If one is dealing with the question of connecting bus lines between Kensington, Md., and the District of Columbia, is one dealing with an interstate or intrastate problem?

If there are two Commissioners on the Commission who can line up against the District of Columbia Commissioner, then we feed the fear that Mr. Chalk seems to have, about which he is so disturbed.

I happen to think that if there were two Commissioners from the District of Columbia, one from Virginia, and one from Maryland we would remove most of the basis for Mr. Chalk's fear. This is one reason why I supported the amendment I was asked to offer. I offered it by request in the first instance, in order to have it receive full consideration. I am satisfied, at least upon the basis of everything I have heard yet in the debate, that the weight of the argument is in favor of the position Mr. Chalk has taken.

Mr. President, I pointed out last night in our discussion that article 4 of the compact provides:

> The expenses of the Commission shall be borne by the signatories in the proportion that the population of each signatory within the metropolitan district bears to the total population in the metropolitan district. The signatories agree to appropriate for the expenses of the Commission their proportion of the budget and to pay such appropriation to the Commission.

Mr. Chalk takes the position that this is unfair to him, because the personnel of the Commission are not appointed on a proportionate basis as far as the transit user population is concerned. Although the Commission expenses will be charged on a proportionate population basis, nevertheless the controlling votes will not be on a proportionate riding public basis.

Again, the Commissioners from Virginia and Maryland could hypothetically gang up against the Commissioner from the District of Columbia, could run up the expenses of the transit system, could approve high expenses, and since the larger user population is on the District side, it would mean in effect the District of Columbia riders could have to pay a larger proportion of the expenses resulting from their decision.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the

Senator from Oregon may yield to me with the understanding that he will not lose his right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

VISIT TO THE SENATE BY FORMER PRESIDENT TRUMAN

Mr. JOHNSON of Texas. Mr. President, a distinguished American, a former Member of the Senate, a former President of the United States, is visiting the Capitol today.

Mr. President, I ask unanimous consent that the Senate stand in recess subject to the call of the Chair, in order that we may receive former President Truman.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

There being no objection, the Senate (at 3 o'clock and 25 minutes p.m.) took a recess, subject to the call of the Chair.

Former President Truman entered the Chamber accompanied by Senator JOHNSON of Texas and Senator DIRKSEN.

Mr. JOHNSON of Texas. My colleagues in the Senate, it is my proud privilege to present to you today one of our most distinguished former Senators, one of America's great statesmen, Harry Truman from Independence.

[Applause, Senators rising.]

Mr. TRUMAN. Mr. President, Mr. Leader of the majority, Mr. Leader of the minority, and fellow Members of the U.S. Senate. I have told you time and again that the happiest service I have ever spent in politics was spent right back there in the back row in this U.S. Senate.

If I had not been quite so energetic or had let someone else attend to more business at the time, perhaps I might still be here. I do not know whether Missouri would have stood me that long or not, but I would have been perfectly willing to try.

I appreciate the privilege of being asked to come in to say "howdy," and to let you know what I have told you time and again, that I think service in the Senate of the United States is the happiest work for a politician. If SAM RAYBURN were here, he would probably try to have me take that back. He has tried it time and again, but has never succeeded in converting me from that opinion.

[Applause, Senators rising.]

Mr. JOHNSON of Texas. I know that the President would be pleased to see each of you, and we will remain in recess for another 5 minutes. I hope you can all come by and say "howdy."

At 3 o'clock and 49 minutes p.m., the Senate reassembled, on being called to order by the Presiding Officer (Mr. CANNON in the chair).

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the amendments of the Senate to the bill (H.R. 7990) to convey certain land of the United States in trust to the Citizen Band of Potawatomi Indians of Oklahoma.

The message also announced that the House had agreed to the following resolution:

H. Res. 643. *Resolved*, That a committee of two members be appointed by the House to join a similar committee appointed by the Senate, to wait upon the President of the United States and inform him that the two Houses have completed their business of the session and are ready to adjourn, unless the President has some other communication to make to them.

The message further announced that the House had disagreed to the amendments of the Senate to the joint resolution (H.J. Res. 721) for the relief of certain aliens.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 745) relating to the sine die adjournment of the Congress, in which it requested the concurrence of the Senate.

The message further announced that the House had agreed to a concurrent resolution (H. Con. Res. 746) relating to the signing of enrolled bills and joint resolutions, notwithstanding the sine die adjournment of the two Houses, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

H.R. 2074. An act for the relief of Eric and Ida Mae Hjerpe;

H.R. 4306. An act to provide education and training for the children of veterans dying of a disability incurred after January 31, 1955, and before the end of compulsory military service and directly caused by military, naval, or air service, and for other purposes;

H.R. 4428. An act for the relief of the legal guardian of John David Almeida; a minor;

H.R. 5396. An act to amend title 28 of the United States Code to provide for transfer of cases between the district courts and the Court of Claims and for other purposes;

H.R. 7618. An act for the relief of H. P. Lambert Co., Inc., and Southeastern Drilling Corp.;

H.R. 7877. An act for the relief of Vladislav Fotich;

H.R. 11561. An act to authorize and direct the Secretary of the Army to convey part of lock and dam numbered 10, Kentucky River, Madison County, Ky., to the Pioneer National Monument Association for use as part of a historic site;

H.R. 11573. An act to provide for the free entry of an electron microscope for the use of William Marsh Rice, University of Houston, Tex., an electron microscope for the use of the University of Colorado Medical Center, Denver, Colo., and for other purposes; and

H.R. 12993. An act to amend the District of Columbia Teachers' Salary Act of 1955, as amended.

REGULATION OF MASS TRANSIT IN THE WASHINGTON, D.C., METROPOLITAN AREA

The Senate resumed the consideration of the joint resolution (H.J. Res. 402) granting the consent of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes.

Mr. MORSE. I was pointing out that I do not believe the compact in its present language removes the fears of Mr. Chalk in regard to the proportionate powers of the Commissioners in respect to the circumstances of the operation of the Commission.

This is another case where I think we ought to give very great heed to the position of a private entrepreneur, who is trying to maintain a transit system in the District. He ought to be encouraged, not discouraged. I believe that we should accede to any reasonable position he takes in regard to the compact.

My next and last point is that there is serious question as to where the administration stands on the compact. I shall refer in a moment to the testimony of Commissioner Kertz, given at the hearings on the compact, which shows no enthusiasm for it.

The fact is that the Bureau of the Budget, so far as I know, has refused to support the compact because, apparently, it preferred the enactment of the National Capital Transportation Act of 1960, S. 3193, which passed in July. S. 3193, in the opinion of many of its opponents, has become obsolete, or at least partially unnecessary, and House Joint Resolution 402, which authorizes the compact, was originally planned to precede S. 3193, not to follow it.

It is true that Commissioner McLaughlin supports the compact; but I have received no information, up until this moment at least, that he speaks for the White House, for the Bureau of the Budget, or for the Public Utilities Commission, on this issue.

I turn now to the testimony of Commissioner Kertz, given at the time the hearing on the compact was held before the House Committee on the Judiciary. I shall read only a few excerpts from the testimony in the interest of saving time, because I am as desirous as any one could be to reach an early vote.

Mr. President, I ask unanimous consent that the entirety of Mr. Kertz's testimony and his cross examination be printed at this point in my remarks.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

STATEMENT OF HAROLD A. KERTZ, MEMBER, PUBLIC UTILITIES COMMISSION OF THE DISTRICT OF COLUMBIA

Mr. KERTZ. Mr. Chairman and members of the committee, my name is Harold A. Kertz. I am a member of the Public Utilities Commission of the District of Columbia.

I would like initially to emphasize a point which Commissioner Hayes made with respect to what we refer to as section 9 of the District of Columbia Franchise Act.

He posed the problem which would arise by the new compact commission whereby it would determine rates, whereas, under the present thinking, the question of determining whether or not D.C. Transit was or was not exempt from motor-vehicle gasoline taxes would still be determined by our District of Columbia Public Utilities Commission.

That is my interpretation, in any event, of the resolution as I read it.

I would like to make this point: That by leaving with the Public Utilities Commission the determination of whether or not there is or is not an exemption of motor-vehicle fuel tax, the work burden on our Commission will be as great as it presently is.

In other words, we would have to go through the entire procedure which we would normally go through with respect to a *rate proceeding*—we go through it every year, at the end of August of each year—in order to determine whether or not there is a tax payable or not payable.

So this particular 402 would not relieve our Commission of the burden which it is now carrying with respect to D.C. Transit.

Mr. LIBONATI. Would not your work be somewhat duplicated?

Mr. KERTZ. Absolutely.

Mr. LIBONATI. It would be duplicated?

Mr. KERTZ. It would be a duplication of work.

Mr. LIBONATI. Well, that is not good, is it? That is not good?

Mr. KERTZ. I would say not. Certainly it is not economical.

Now, in the District, and, of course, in the surrounding counties, we have a transit problem. There is no question but that transit in the area would and could be improved if first we could integrate the present transit companies on a regional basis and, second, if we were able to overcome the barriers now imposed by jurisdictional limitations.

Thus far, I am in favor of this resolution, because I recognize that there exists a need to simplify and to integrate the regulatory power so that coordinated policies for the area as a whole could be formulated and executed.

However, I have certain reservations as to whether 402 will accomplish the degree of integration and coordination which we have heard spoken of today in such glowing terms. In my mind, the mere simplification in the regulatory process cannot produce any assurance that it will solve the transit problem or even attain some of the desired ends for which the sponsors have spoken so glowingly this morning.

If we had but one company, one transit company operating in the District and the surrounding area, I believe that this resolution would be the perfect solution. But my experience with regulating transit companies—and I may say owning them and operating them—leads me to a conclusion that where we have a situation where there is one large major company and three or four smaller companies who service the fringe areas it becomes almost a practical impossibility to reach the degree of coordination and that degree of integration which this bill seeks to accomplish.

For example, the organic utility laws of the District, of Maryland, and of Virginia, are basically identical. There is very little difference between our respective utility laws. And yet, the fact is that the rates allowed by each jurisdiction differ in large degree.

The query is: Would the present legislation permit of a uniform rate of return with resultant uniform fares? I doubt it very much. It just cannot work for this reason: The facts with respect to each company are so varied—their operational costs vary, their labor costs, their overhead, their equipment and maintenance, their garage facilities, all vary—we could never attain anything near a uniform rate of return or a uniform fare system.

If we do not have a uniform rate of return, and if we do not have a uniform fare, just what would this bill accomplish?

If this bill as presently drawn could accomplish those objectives, then again I am for it.

The question of routing under the proposed legislation also poses a very difficult regulatory problem. The new Commission would be empowered to examine the adequacy of existing patterns of routes, to prescribe route changes or an entirely new plan of routing, if necessary, to provide adequate transportation service.

That sounds simple. But if you try to translate that principle into practice, then you encounter great difficulty. It is one of the few things that are almost impossible to accomplish under any set of circumstances, facts, or laws.

We have heard earlier the question of what would happen if, for example, the new Commission sought to institute a through service from a point in Maryland, say, to a point in Virginia.

The question there arises, what company is better able to provide that service? It must be remembered that D.C. Transit has an exclusive franchise in the District of Columbia, and this bill, as presently drawn, says that none of the rights, obligations, and duties and responsibilities of D.C. Transit shall be changed or affected in any way.

I am looking at it purely as if I were regulating as a member of this new Commission, how would I go about putting in a new service from Wheaton, Md., to Alexandria, Va.?

On the question the Congressman raised a moment ago with respect to political pressures, there would be plenty of them, and we would find soon that this would be regulation by man and not regulation by law.

If it was not, the best thing we would have would be a trading off of one advantage, one gain against another gain. And I cannot see but that nothing but confusion would result. We would end up with a transit situation, in my opinion, which would be worse than it is today.

A great deal has been said about the D.C. Transit System franchise. For example, under the D.C. Transit franchise at the present time, rates are based upon a system rate base. Yet, the new law says nothing about a system rate base. It does say that—it does use somewhere in these pages the phrase, "gross operating revenue basis."

That would mean that as far as the Virginia companies are concerned, their rates would be determined on a gross operating revenue basis. But what about D.C. Transit? At the present time we have a system rate base.

In the future, the company hopes there will be a switchover to a gross operating revenue basis, but we do not know when that will take place; if it will take place.

I think the problem deserves more study. I came here today without any prepared statement. In fact, these notes I made on the plane last night coming down from the north.

There are so many problems which can be foreseen which this bill will not provide the remedy for. I agree with Chairman Hayes and General Welling, my colleagues on the commission, that it is desirable that we move forward, that we recognize the existence of a need.

But whether this is the answer remains to be seen.

I intended to say more, but I will be glad to respond to any questions the committee may have on anything I have said so far.

Mr. TUCK. We thank you very much.

Do you have any questions?

Mr. LIBONATI. I want to thank him for his frankness and his honesty in his position. He faces the issue with an understanding of the whole problem, and he has the courage to determine for himself what his experience dictates to his conscience.

I think that is a wonderful thing, and we appreciate having a witness like you before us.

Mr. KERTZ. Thank you.

Mr. MORSE. Mr. President, I shall read a few paragraphs of what Commissioner Kertz said. His testimony appears on page 168 of part I of the hearings on House Joint Resolution 402 before the House Committee on the Judiciary on August 26, 1959.

So this particular 402 would not relieve our Commission of the burden which it is now carrying with respect to D.C. Transit.

Mr. LIBONATI. Would not your work be somewhat duplicated?

Mr. KERTZ. Absolutely.

Mr. LIBONATI. It would be duplicated?

Mr. KERTZ. It would be a duplication of work.

Mr. LIBONATI. Well, that is not good, is it? That is not good?

Mr. KERTZ. I would say not. Certainly it is not economical.

Now, in the District, and of course in the surrounding counties, we have a transit problem. There is no question but that transit in the area would and could be improved if first we could integrate the present transit companies on a regional basis and, second, if we were able to overcome the barriers now imposed by jurisdictional limitations.

Thus far, I am in favor of this resolution, because I recognize that there exists a need to simplify and to integrate the regulatory power so that coordinated policies for the area as a whole could be formulated and executed.

However, I have certain reservations as to whether 402 will accomplish the degree of integration and coordination which we have heard spoken of today in such glowing terms. In my mind, the mere simplification in the regulatory process cannot produce any assurance that it will solve the transit problem or even attain some of the desired ends for which the sponsors have spoken so glowingly this morning.

If we had but one company—one transit company * * *.

I digress to say that Commissioner Kertz is a past transit company executive, a past transit company owner. He is a man having professional knowledge and expertness in the field of mass transportation. Listen to the reservations he sets forth in his testimony about the compact which is being offered to the Senate this afternoon, without any attempt to meet the strenuous and vigorous objections of the head of the D.C. Transit System, which Congress is proposing to put under the Commission, which Mr. Kertz says would be organized on such a discriminatory and unfair basis.

If anyone believes that that will produce harmony in the area transit problem; if anyone believes that that will augur well in the future for a solution of the area transit problems; then he has not had the experience I have had for many years as a member of the Committee on the District of Columbia in respect to the very difficult and complex transit problems of the Metropolitan Washington area.

I continue to read from the testimony of Commissioner Kertz:

If we had but one company, one transit company operating in the District and the surrounding area, I believe that this resolution would be the perfect solution. But my experience with regulating transit companies—and I may say owning them and operating them—leads me to a conclusion that where we have a situation where there is one large, major company and three or

four smaller companies who service the fringe areas, it becomes almost a practical impossibility to reach that degree of coordination and that degree of integration which this bill seeks to accomplish.

For example, the organic utility laws of the District, of Maryland, and of Virginia, are basically identical. There is very little difference between our respective utility laws. And yet, the fact is that the rates allowed by each jurisdiction differ in large degree.

The query is: Would the present legislation permit of a uniform rate of return with resultant uniform fares? I doubt it very much. It just cannot work for this reason: The facts with respect to each company are so varied—their operational costs vary, their labor costs, their overhead, their equipment and maintenance, their garage facilities, all vary—we could never attain anything near a uniform rate of return or a uniform fare system.

Commissioner Kertz, in the rest of his testimony, sets forth very specific hypothetical problems, and throws great doubt on the workability of the compact in its present form. I offer his testimony as having some bearing, at least, on the position I have taken that we ought, at least, to try to get those who will be affected by the operations of the Commission to come in at the beginning with an acceptance of the program. If by making some slight changes in the compact, such as the amendment at the desk will do, we will accomplish that degree of harmony among those who will be affected, I think the amendment should be adopted.

Mr. President, I had two main purposes for making this legislative history. One was to set forth the arguments of the president of the D.C. Transit System, who is vigorously opposed to the compact, who has served clear notice by his position that he does not like any part of it, and who, after all, is operating under a franchise and a charter which Congress granted.

When we granted that charter to Mr. Chalk, we assumed some obligations of our own as a Congress, too. In a sense, Mr. Chalk is our employee. In a sense, he is our official, he is our agent, because of the residual power of Congress over District of Columbia affairs.

I raise the question: Is it fair to impose upon Mr. Chalk, our agent, to whom we have given the franchise and the charter to operate the D.C. Transit System, a compact creating a Commission which he tells us he considers to be discriminatory and unfair to him? I think it calls for a long look before we take that step.

So I have sought to make the legislative history. I have sought to make it perfectly clear that Mr. Chalk had his opportunity, in the legislative history, to make official his warning as to what he believes the pitfalls of the compact are.

The second point is that I believe certain ounces of modification in the compact would be worth a pound of prevention of difficulties. In its present form, the compact will not cure those misunderstandings which have already developed; in fact, I fear the misunderstandings will be entrenched.

I understand that the compact provides that the Commissioner in each of the jurisdictions will have veto power over so-called intrastate matters. I have already pointed out that what is interstate and what is intrastate in a metropolitan mass transportation system often is very difficult to determine.

Even that jurisdictional question is going to be the cause of a good many disputes. I am also aware that the compact provides that any one of the parties to it can get out of it with a year's notice. I think that is one safeguard for the District Commissioners, but it is not necessarily a safeguard for the company. It does not necessarily follow that Mr. Chalk will be in a position in which he can force a withdrawal of the District simply because he finds the situation has become very unsatisfactory.

However, I think that is one of the safeguards to which Mr. Chalk has not given the degree of emphasis that I would he had given to it. I believe that provision of the compact gives us at least an opportunity to put this on a 1 year trial. If it does not work out, the Congress will have to come to grips again with this problem should any dispute arise as a result of a lack of harmony which may develop in the Commission.

Mr. President, I offer my amendment, and I am ready to vote on it. I hope that if my amendment is not agreed to, the Bureau of the Budget will prevail and the President will see fit to veto the joint resolution, because I think there is much to my point of view that the compact no longer is really necessary, in view of the passage of the National Capital Transportation Act.

Mr. JAVITS. Mr. President, if the Senator from Oregon will yield——

The PRESIDING OFFICER (Mr. CANNON in the chair). Does the Senator from Oregon yield to the Senator from New York?

Mr. MORSE. I yield.

Mr. JAVITS. I think the Senator from Oregon may be interested in a letter I received this morning from the President of the Board of Commissioners of the District of Columbia. I believe it will be helpful to read the letter into the RECORD, in order to help make the kind of legislative record the Senator from Oregon is interested in making, and which he has been making in his typically helpful and thorough fashion. Therefore, Mr. President, if the Senator from Oregon will permit me to do so, I wish to read the letter into the RECORD at this time. It reads as follows:

THE DISTRICT OF COLUMBIA,
Washington, September 1, 1960.

Hon. JACOB K. JAVITS,
U.S. Senate, Washington, D.C.

DEAR SENATOR JAVITS: It has come to my attention that the point is being made in the debate on House Joint Resolution 402 that the members of regulatory Commission created by the compact, consisting of one member each from Maryland, Virginia, and the District of Columbia, does not afford adequate protection for the interests of the District of Columbia.

I want to assure you that the compact is a matter of great importance to the District of Columbia and that the interests of the District of Columbia are properly protected and safeguarded by the provisions of the compact. I actively participated in the negotiations of the compact with representatives of Maryland and Virginia; and I can assure you that serious and conscientious consideration was given by all of the negotiators for the protection of our local interests while, at the same time, achieving a metropolitan-wide approach to the regulation of transit.

The local interests are safeguarded by article VI of the compact, which gives each of the three Commissioners a veto power over any order proposed by a majority of the Commission relating to matters solely intrastate or solely within the District of Columbia. In order to understand the full effectiveness of the provision, it must be understood that most of the routes and service in the metropolitan area are located and is performed solely within the District of Columbia. There is no doubt in my mind that this provision is sufficiently comprehensive to protect the interests of the District of Columbia public and the companies serving our city.

Further protection for the District of Columbia is afforded by section 2 of article IX, which would permit the District of Columbia to withdraw from the compact if the administration of the compact by the Commission was inimicable to the best interests of the District of Columbia. A withdrawal by any party terminates the compact and reestablishes the preexisting condition of separate regulations.

I trust you will find these remarks and assurances helpful in your consideration of this measure, which is perhaps the most important measure affecting the District of Columbia during my tenure in office.

Respectfully yours,

ROBERT E. MCLAUGHLIN,
President, Board of Commissioners, District of Columbia.

Again, as part of the legislative record, and if I may have the concurrence of the distinguished Senator from Oregon to continue at this point, I wish to point out that one of the events which could bring into action the right of withdrawal would be the allocation of these expenses, to which the Senator from Oregon has so eloquently referred. That matter is dealt with in article 6, section 1, of the compact, which gives an absolute requirement that the Commissioners of the District of Columbia must approve the allocation, which is based on a budget made in the preceding year. So I believe we would have an absolute right to expect that this would have a strong bearing on the question of whether they stayed with the compact or not.

Mr. MORSE. I think it is a very important check on the expense matter. However, I do not think it removes the possibility and the great danger of arguing and hassling over the matter, particularly if the Maryland commissioner and the Virginia commissioner believe that certain items should be approved.

Mr. JAVITS. I think the Senator from Oregon knows the spirit in which I am attempting to complete the record in cooperation with the Senator from Oregon, because he has made a very splendid legislative history which I think will be very helpful, regardless of what happens to the compact.

Again, with the approval of the Senator from Oregon, I should like to state that I am advised that the right to withdraw, under section 2 of article 9, is an unqualified and absolute right, and that it stands alone in the compact, and also is an unqualified legal right. I think

that point should be made clear in connection with our understanding of the situation under which the question of approval of the compact is being considered here, in order to nail down the proposition that there are no strings of any kind or character, legal or otherwise, tied to the absolute right of withdrawal.

Mr. MORSE. I completely agree with the observation of the Senator from New York, and I join him in nailing down that interpretation for the legislative history.

Mr. JAVITS. I thank the Senator from Oregon.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon.

The amendment was rejected.

The PRESIDING OFFICER. The joint resolution is open to amendment.

If there be no amendment to be proposed, the question is on the third reading of the joint resolution.

The joint resolution (H.J. Res. 402) was ordered to a third reading, read the third time, and passed.

Mr. ROBERTSON. Mr. President, I move that the vote by which the joint resolution was passed be reconsidered.

Mr. MANSFIELD. Mr. President, I move to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

DISSEMINATION OF POLITICAL OPINIONS

Mr. MANSFIELD. Mr. President, I ask for the immediate consideration of Calendar 1999, Senate Resolution 374, amending Senate Resolution 305, authorizing the Committee on Interstate and Foreign Commerce to undertake a study of the uses of Government-licensed media for the dissemination of political opinions, news, and so forth.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

Mr. THURMOND. I object.

Mr. MANSFIELD. I now move that the Senate proceed to consider Senate Resolution 374.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

Mr. MORSE. Mr. President, let me ask the number of this measure.

Mr. MANSFIELD. It is Calendar 1999, Senate Resolution 374.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana that the Senate proceed to consider the resolution.

The motion was agreed to; and the Senate proceeded to consider the resolution.

COMMISSION ON PRESIDENTIAL OFFICE SPACE

Mr. CASE of South Dakota. Mr. President, will the Senator from Montana yield to me?

Mr. MANSFIELD. I yield.

Mr. CASE of South Dakota. I ask unanimous consent that the pending business be temporarily laid aside, and that the Senate proceed to the consideration of Calendar 1911, Senate bill 3524.

The PRESIDING OFFICER. The bill will be read by title, for the information of the Senate.

The CHIEF CLERK. A bill (S. 3524) to provide for a Commission on Presidential Office Space.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Dakota?

There being no objection, the Senate proceeded to consider the bill (S. 3524) to provide for a Commission on Presidential Office Space, which had been reported from the Committee on Public Works, with an amendment on page 3, after line 4, to strike out:

(a) approve all design, construction, interior decorating and landscaping plans;

(b) determine the methods for selecting and approve the selection of the architect, the general contractor, and the subcontractors who will perform the construction work subject to such conditions and limitations as may be contained in appropriations made for such work;

(c) generally supervise the progress of such design and construction work;

And, in lieu thereof, to insert:

(a) after consultation with the President, approve all design, construction, interior decorating and landscaping plans;

(b) determine the methods for selecting and approve the selection of the architect;

(c) to the greatest extent practicable, utilize the services of the Chief of Engineers, Department of the Army, in awarding contracts for the performance of the construction work subject to such conditions and limitations as may be contained in appropriations made for such work; and in supervising the progress of such design and construction work;

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby established a commission to be known as the Commission on Presidential Office Space (hereinafter referred to as the "Commission"). It shall be the duty of the Commission to initiate and carry out a program of construction and remodeling in accordance with proposals (a) and (c) of plan one of the report of the President's Advisory Commission on Presidential Office Space, dated May 31, 1957, including remodeling of the east wing of the White House and construction of the necessary access tunnels.

SEC. 2. (a) The Commission shall be composed of seven members as follows:

(1) Two Senators appointed by the President of the Senate;

(2) Two Representatives appointed by the Speaker of the House of Representatives;

(3) Three persons appointed by the President of the United States from the executive branch or from private life.

(b) A vacancy in the Commission shall not affect its powers but shall be filled in the same manner as the original appointment was made.

(c) The Commission shall elect a Chairman and a Vice Chairman from among its members.

(d) Commission members appointed from the Congress and the executive branch shall serve without additional compensation. Commission members appointed from private life shall receive $50 per diem when engaged in the performance of Commission duties. All Commission members shall receive reimbursement for necessary traveling and subsistence expenses incurred by them in the performance of Commission duties.

(e) Within the limits of its appropriations, the Commission is authorized to appoint such personnel, without regard to the civil-service laws and the Classification Act of 1949, as amended, and to make such expenditures as, in its discretion, it deems necessary.

SEC. 3. In the performance of its duties the Commission shall—

(a) after consultation with the President, approve all design, construction, interior decorating and landscaping plans;

(b) determine the methods for selecting and approve the selection of the architect;

(c) to the greatest extent practicable, utilize the services of the Chief of Engineers, Department of the Army, in awarding contracts for the performance of the construction work subject to such conditions and limitations as may be contained in appropriations made for such work; and in supervising the progress of such design and construction work;

(d) take measures to assure that all lumber, fixtures, and other materials removed from the Executive Mansion or other buildings are carefully examined by appropriate Federal or other authorities for the purpose of segregating and safeguarding any of such materials which are of such historical importance that they should be permanently preserved;

(e) provide for (1) the preservation of any such material which is of permanent historical importance and (2) the sale, donation, destruction, or other disposition of the remainder of such material in the manner most consistent with its symbolical value and without commercial exploitation;

(f) from time to time, but at least once annually submit to the Congress and the President a report on the progress of the work under its supervision. Upon the conclusion of its work the Commission shall promptly submit a final report;

(g) the Commission shall cease to exist thirty days after the submission of its final report.

SEC. 4. There are hereby authorized to be appropriated such sums as may be necessary for the expenses of the Commission, including funds for such construction, remodeling, renovation, and equipment as the Commission may determine to be necessary to carry out the provisions of this Act.

The amendment was agreed to.

Mr. CASE of South Dakota. Mr. President, I call up my amendment, which has been printed.

The PRESIDING OFFICER. The amendment of the Senator from South Dakota will be stated.

The LEGISLATIVE CLERK. On page 1, in line 11, after the word "tunnels," it is proposed to insert a colon and the following:

Provided, That proposal (a) of said report shall be modified to provide for renovation and remodeling of the old State, War, and Navy Building to provide Presidential office space.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

Mr. HOLLAND. Mr. President, does the bill provide for the making of a study as to how the old State, War, and Navy Building can be renovated, so as to provide the needed additional office space to the President?

Mr. CASE of South Dakota. It does. It would express the sense of the Senate that a commission be created for that purpose.

Mr. HOLLAND. But it does not provide any authorization; it does not provide any funds for construction?

Mr. CASE of South Dakota. It does not provide any funds for construction. I may say I am not optimistic that it will be considered on the other side of the Congress at this time. The reason why it was brought out of the Public Works Committee is so the next President, whoever he may be, would not be subject to the charge, if he sought additional office space, that he was seeking self-aggrandizement. Both the Senate and the House have created new office space for themselves. The Presidential office quarters are cramped. We thought it should be the expression of the Senate that a commission on Presidential office space should be created so that adequate space could be provided.

Mr. HOLLAND. I think it is a laudable purpose, and I approve of it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 3524) was ordered to be engrossed for a third reading, was read the third time, and passed.

TRIBUTES TO SENATORS MURRAY OF MONTANA; O'MAHONEY OF WYOMING; AND GREEN OF RHODE ISLAND

Mr. HARTKE. Mr. President, when the 87th Congress meets next January, it will be the first time since January of 1937 that the Senate will begin deliberations without Senators MURRAY, O'MAHONEY, and GREEN. There are no brighter jewels in the crown that is the U.S. Senate.

When I came to Washington 2 years ago, I had already known of the reputations of these great Americans. In the brief period I have been here, I have come to know, to respect, and to love these Senators as the full and true living symbols of service and statesmanship that they are.

Together they represent nearly 255 years of life as Americans, more than 83 years of public service, and some 75 years in the Senate. It is America's loss and a loss to the free world that these great men have chosen to retire.

Senator MURRAY's service in the Senate dates from 1934. His public service began in 1906, when he was elected a county attorney. In all, he has given 29 of his 86 years in service in public office.

Senator O'MAHONEY's service in the Senate also dates from 1934. He has been a congressional secretary and an Assistant Postmaster General, giving, in all, 26 of his nearly 76 years to service in public office.

Senator GREEN, whose vigorous appearance and keen outlook belie his nearly 93 years, has been a Senator since 1937. Before this he was Governor of his State. He has given 28 of his years in public office, including unusually important service as chairman of our Committee on Foreign Relations.

TRIBUTES TO ASSISTANT LEADERS AND SENATE STAFF

Mr. MORSE. Mr. President, there have been many deserved and fine tributes paid in recent hours to the majority and the minority leaders.

I know I speak for the Senate in its entirety when I express my appreciation for the wonderful assistance we have had throughout the session from the Senator from Montana [Mr. MANSFIELD] our Democratic whip, and his counterpart on the Republican side, the Senator from California [Mr. KUCHEL].

My closest association has been with Senator MANSFIELD. I do not know how we on the Democratic side could have had a more courteous, a more kindly, or a more cooperative whip than the Senator from Montana has been. Speaking for myself, I thank the Senator from Montana for the many wonderful courtesies he has extended me throughout the session.

Mr. President, every employee of the Senate is deserving of commendation in these closing hours, and every man who sits at the desk, the Parliamentarian, the Assistant Parliamentarian, the Secretary of the Journal, the Journal clerk.

We have also a group of employees in the Senate to whom I do not think we can too frequently express our appreciation. I refer to the official reporters. I do not know how they take it. I do not know how they begin to serve the length of hours they toil in the Senate, but they are a group of such dedicated public servants I am glad to raise my voice in appreciation of their service. It goes without saying that this tribute extends unqualifiedly to Placidino Zagami, known affectionately to us as Dino.

Mr. President, I used to sit on the other side of the aisle, and when I sat over there, I received then, as I have ever since I removed myself to this side of the aisle, courteous cooperation from a man who received a high tribute in the Senate the other day in a whole series of speeches. I refer to Mark Trice.

I want Mr. Trice to know, as we come to the end of this session, that I wish him best wishes for everything good in life, and I hope he will remain in the service of the Senate for many, many years to come.

Mr. President, as always, when one mentions some and omits others, he runs the risk that some will think he is not appreciative of what they have done. So I conclude by saying that I am very appreciative of the work the page boys have done for us. I hope that they are getting the education that we trust this job will give to them, an opportunity that will lead them into training for future public service.

Last of all, Mr. President, I wish to express my appreciation to some of our able floor aids. I refer to Jim Wilson, Bobby Baker, Jay McDonnell, and Harry MacPherson. I do not know what we Senators would do if we did not have them at our beck and call to keep us informed as to what is going on when we arrive on the floor of the Senate after an absence therefrom, and their assistance in helping us with the calendar and their assistance in a multitude of other services they render for us.

I think it reflects again creditably upon LYNDON JOHNSON and MIKE MANSFIELD on our side, and Mr. DIRKSEN and Mr. KUCHEL on the other side, that, under their leadership, there has been such a fine selection for the Senate staff, and I think we are all fortunate that their judgment has proven to be so sound.

Mr. JOHNSON of Texas. Mr. President, I want to associate myself with the statements my colleague from Oregon has made about this good and great man, MIKE MANSFIELD. He is a gentle man. He is a wonderful friend. He is one of the most patriotic public servants I have ever known. And I just do not know how the Senate could function without him. He does not know what it is to be selfish. He gives freely of his time and talent. He is one of the most modest men I know. Yet he can be one of the toughest.

TRIBUTE TO SENATE LEADERSHIP

Mr. CASE of South Dakota. Mr. President, I should also like to express my own appreciation for the courtesy of the leadership on both sides of the aisle and for the help that has been given me and other Senators by the employees on the minority side.

First of all, let me say I think it was very fine that the Senator from Oregon should have called attention to the service performed by the assistant leaders as well as by the respective majority and minority leaders. The Senator from Montana [Mr. MANSFIELD] is the soul of honor, the soul of courtesy and fairness, and the same could be said of our assistant minority leader, TOMMY KUCHEL, of California. I think there is no man on the floor who would say he regarded either assistant leader as other than the soul of honor and fairness in his attempt to serve the membership on both sides of the aisle.

I also wish to pay my personal respects and appreciation to Mr. Trice, the secretary for the minority; to his assistant, Bill Brownrigg; to Mr. Dompierre; to Mr. Russ Call; and to others. They are a tower of strength to all of us when we need them, and we need them every day.

Mr. JOHNSON of Texas. Mr. President, I wish to associate myself with the statement of the Senator from South Dakota concerning the minority employees, and the statement of the Senator from Oregon concerning the majority employees.

JURY TRIALS IN CONDEMNATION CASES

Mr. JOHNSTON of South Carolina. Mr. President, I cannot let this session of Congress close without making a brief statement for the RECORD that as a member of the Judiciary Committee I am mindful of the bad situation regarding the right of trial by jury in condemnation of land cases, which was brought to light by the Appropriations Committee in

the hearings on H.R. 11666. We passed the Department of Justice appropriation bill, but only after the House receded from its position to cut off all funds to pay commissioners, who take the place of juries in far too many of these cases.

Mr. President, whenever either party demands a jury trial in these important cases, often involving a man's own home, he should get such a jury trial. Nine years ago the Senate passed two bills expressing this right, but the House would not act and a rule of court went into effect denying this right.

Federal judges have the power to overrule a jury trial demand and it appears that they may be using this power too freely.

I should like to see this matter studied. A recent case in the Supreme Court—United States against Hon. Pierson Hall—shows a rather acute situation developing around denial of jury trial rights. The record of the hearings on H.R. 11666 bears this out.

We should consider whether the time has come to enact a law definitely protecting the right to trial by jury in these cases.

AMENDMENT OF LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside in order that the Senate may proceed to the consideration of House bill 12574, from the House Committee on Education and Labor. I understand it is noncontroversial. I have cleared it with the Senator from Massachusetts [Mr. KENNEDY] and the distinguished minority leader [Mr. DIRKSEN]. I should like to have it considered. There will be no extended debate on it.

The PRESIDING OFFICER laid before the Senate the bill (H.R. 12574) to amend the Longshoremen's and Harbor Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician, and for other purposes, which was read twice by its title.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

There being no objection, the Senate proceeded to consider the bill (H.R. 12574) to amend the Longshoremen's and Harbor Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician, and for other purposes.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 12574) was ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MANSFIELD. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORT BY AMERICAN BAR ASSOCIATION COMMITTEE ON COMMUNIST TACTICS, STRATEGY, AND OBJECTIVES

Mr. DODD. Mr. President, the Committee on Communist Tactics, Strategy, and Objectives of the American Bar Association has just filed with the association a report which is one of the finest expositions of Communist aims and purposes which I have ever seen.

Incidentally, it is interesting that this report, compiled by a committee of distinguished lawyers who have made a deep study of communism, recommends that the American Bar Association and local bar associations should establish committees to conduct a program of education on the nature, objectives, and tactics of communism, and its dangers to our rights and freedoms, and to contrast affirmatively the basic fundamentals of communism with the liberties under the Constitution of the United States.

I am convinced that this report is deserving of the widest possible circulation, and I know it will be of interest to every Member of this body.

I, therefore, ask unanimous consent that this report, together with the footnotes, be printed at this point in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

REPORT BY THE AMERICAN BAR ASSOCIATION COMMITTEE ON COMMUNIST TACTICS, STRATEGY, AND OBJECTIVES

RECOMMENDATIONS

The committee recommends the adoption of the following three resolutions:

"Whereas, the need for understanding the true meaning of Communism and its methods, as contrasted by liberty under law as provided by the Constitution of the United States, has never been more real and urgent than now; and

"Whereas, it is of particularly vital importance that our youth should have an objective explanation of the true nature, sinister meaning, and ulterior purpose of communism in contrast with our system of constitutional government, so that they may be alerted and be better able to deal with the world wide totalitarian system of communism and thus preserve the freedoms of our American heritage: Now, therefore, be it

"Resolved, That the American Bar Association recommend to State and local bar associations that they establish committees to conduct a program to provide addresses and literature to school assemblies and civic organizations to explain the nature, objectives and tactics of Communism, and its dangers to our rights and freedoms, and to contrast affirmatively the basic fundamentals of communism with the liberties under the Constitution of the United States; and be it further

"Resolved, That the President of the American Bar Association shall appoint a special committee consisting of eminently qualified members of this association, whose objective shall be to implement this resolution, which special committee shall report to the house of delegates at the next succeeding midyear and at each succeeding annual meeting concerning its progress in this educational program."

"Resolved, That printed copies of this report of the special committee on Communist Tactics, Strategy, and Objectives submitted to the house of delegates be distributed to the members of the American Bar Association, to State and local bar associations, libraries and civic organizations. The extent of the distribution and the cost thereof to be subject to the approval of the board of governors."

"Resolved, That the special committee on Communist tactics, strategy, and objectives be continued."

REPORT

Foreword—The peril we face

The heightened world tensions under which we live today are attributed directly to the impact of aggressive international communism. Forces of evil are at work to destroy our basic freedoms which alone make the American heritage a meaningful reality. We have accepted those freedoms as part of our democratic life with much the same complacency as we breathe the air around us. Too often we think of democracy as something automatic: a blessing which is ours by right of inheritance—once fought for and cherished—but for which we, in our day, no longer need be called upon to sacrifice "our lives, our fortunes, and our sacred honor."

What has happened on the world stage since the last meeting of this Association compels recognition, particularly by lawyers, of the urgent necessity for a comprehensive objective analysis of the meaning of communism, its threats to constitutional liberties, its tactics, strategy and objectives, to the end that we may protect ourselves and our institutions against an enemy whose declared intention is to destroy the freedoms hard won at Valley Forge.

Today, as never before, it is the obligation of the American Bar to protect our freedoms and make liberty under law a rewarding reality. This can be achieved only by blocking the advance of the Communist program which seeks to weaken the fibre of American life.

America is threatened today as never before. The military might of the Fatherland of world communism, Red China and Red satellites now controls over one-third of the earth's surface and one-fourth of the world's inhabitants. Likewise, our Nation is threatened from within by the American Communist Party, and its followers. They already have established beachheads of subversion around the world and in organization after organization here and abroad. Within ninety miles of our mainland another is being built by the Communists in the once peaceful island of Cuba which this Nation liberated from tyranny at the turn of the century. The Red beachhead in Cuba is being developed as a base from which military as well as propaganda attacks can be mounted against the United States and Latin America.

Following the proposed Khrushchev visit to Cuba, it can be reasonably anticipated that efforts will be made to install bases for missiles and a submarine base. Soviet and

Red Chinese technicians are already on the scene and others are coming in increasing numbers. Red radar tracking will be an important arm of Soviet intelligence in keeping our missile base at Cape Canaveral under surveillance. Red provocateurs will increasingly encourage Panamanians to seize the Panama Canal in the pattern of Nasser's seizure of the Suez Canal. The danger in this situation was highlighted by the testimony of George V. Allen, Director of the U.S. Information Agency before the House Foreign Relations Committee, that communists are spending $100 million in a "hate America" campaign spearheaded in Cuba where the Reds seek to establish bases close to the United States.

Senator KENNETH B. KEATING said the Senate Internal Security Subcommittee has evidence that 1,000 Chinese communists have entered Cuba to enlist the support of their 30,000 countrymen there, and that there has been a steady movement of Soviet engineers and technicians through East Berlin to the Caribbean.[1]

Gus Hall, general secretary of CPUSA in the January 1960 issue of Political Affairs has this to say about Cuba:

"The revolutionary development in Cuba * * * is an inspiration to the peoples' forces throughout this hemisphere."

When called before the Senate Internal Security Subcommittee on February 2 and 3, 1960, Hall showed his contempt for constituted authority by taking refuge behind the fifth amendment even in those matters he had proclaimed to the world through the Communist press.

The vast expanse of the Atlantic and Pacific Oceans no longer gives us the necessary protection. Already our Armed Forces have dispatched missiles with surprising accuracy more than 9,000 miles in less than an hour. We must assume the Soviets have similar missiles.

Advances of Soviet science make possible instantaneous assaults which could be devastating beyond description. Fifth columns already organized to rise up as instantaneous armies of occupation make it necessary to insure that our security agencies are equipped to meet them with legal authority. Time is running out if we are to protect ourselves from within. There needs to be a more realistic appraisal of the menace which confronts our way of life and prompt and decisive action on the part of all Americans and particularly our lawmakers and courts to find a way to "* * * provide for the common defense, promote the general welfare and secure the blessings of liberty to ourselves and our posterity."

The recommendations for legislation, which were overwhelmingly adopted by the house of delegates of the American Bar Association upon the recommendations of this committee in February 1959, have not been acted upon by the Congress. Legislation is urgently needed to protect the national security in areas in which Government agencies are now handicapped, either under existing law, or lack of law. The Congress and the executive departments of our Government should give more serious consideration to the studies and recommendations of the Commission on Government Security headed by former President Loyd Wright, of this association. In the meantime, absent of such curative legislation, Soviet agents carry on their treacherous acts under the protective shield of our Bill of Rights.

The Supreme Court has stated in *Barenblatt* v. *United States*, that to suggest that the Communist Party "were just an ordinary political party from the standpoint of National Security, is to ask this Court to bind itself to world affairs which have determined the whole course of our national policy since the close of World War II—and to the vast burdens which these conditions have entailed for the entire Nation."[2]

It is heartening to note the Court's conclusion (in Barenblatt) :

"We conclude that the balance between the individual and the governmental interests here at stake must be struck in favor of the latter."[3]

As a result of its past and continued study of Communist tactics, strategy, and objectives your committee looks to the future with unfeigned fear—for, as the apathy toward the Communist peril continues, the danger increases in direct proportion.

One peril has been conspicuous by its absence in the news of the day. Nikita Khrushchev, who has finally emerged as the unquestioned dictator of the Soviet Union and the acknowledged spokesman for world communism, in addressing the Supreme Soviet on January 14, 1960, blueprinted the Soviet view of modern war with these words:

"In the old days battles started along frontiers. Now war will begin in the rear of countries. All industrial and strategic centers will be attacked within the first hour. The war will start differently and develop differently."[4]

In the report to the Supreme Soviet, Khrushchev intimated that Soviet science had new achievements and referred to an "even more formidable and perfect * * * a fantastic weapon." No doubt this statement was made for propaganda purposes; but it is entirely possible that when the head of the Soviet Union thus spoke of new weapons, he had some basis for such statements.

Is it possible that the Soviets now have the neutron bomb?

The neutron bomb is beyond the stage of scientific theory; it is just a question as to when it will become a reality and who gets it first. No major power has officially admitted that it is working on the neutron bomb, but it must be presumed that all major powers have placed it high on their priority of crash programs. The neutron bomb will destroy life but not property and, therefore, will be far more practical than the atom or hydrogen bombs. Its devastating power stems from its lethal dosages of radiation of sufficient strength to penetrate buildings and bomb shelters. From scientific data, it appears that the neutron bomb would be a lightweight weapon which could be delivered in quantity from submarines or smuggled in by saboteurs who could use delayed detonating devices.

The explosion of a neutron bomb would develop very little fallout, and areas would not long remain contaminated. A Fifth Column could take over promptly after saboteurs performed their treacherous deeds. It would be too late for the security agencies, the armed forces, the Congress or the courts to take corrective action. Responsibility, however, always finds a final resting place.

The propaganda of communism must be met with truth, and the lies of communism must be exposed.

To illustrate, the United Press International, on June 13, 1960, carried two conflicting dispatches. A dispatch from Moscow reported a Pravda story on June 13 that Khrushchev had recaptured the Kremlin majority who supported his policy—"that the world should disarm and that countries with opposing political systems can live together peacefully." The other dispatch came from Tokyo and quoted an editorial from the official Communist press, the Peiping Peoples Daily, as follows:

"The primary task of Eisenhower's tour is to interfere in the internal affairs * * * hold down the just patriotic struggle of the people of these countries, shield the jackals of the United States."

The UPI dispatch further reported that "Communist China's propaganda outlets called upon Asian people to teach him (the President) a 'good lesson'."

Out of one side of the mouth Soviet communists continue their false propaganda of peace, while out of the other side of the mouth, the Chinese communists continue their campaign of vilification. Thus it is apparent that a fundamental ideological but not political quarrel is taking place throughout the communist world over orthodox Leninism. On one side is Khrushchev who takes the position that communism can be achieved universally by peaceful means because it is the "scientific" inevitable next step in civilization; on the other is Mao Tze-Tung who insists that the war against "imperialism" is essential to the success of communism. Mao does not believe in a cold war but wants an immediate atomic war. This quarrel is having far-reaching effects throughout the world now.

Under these grave circumstances, as individuals devoted to the preservation of free and democratic government under law, lawyers must alert the American people to the nature of the communist menace and what can be done to meet it. Beyond that, every American needs to know how he can aid our security agencies, such as the Federal Bureau of Investigation, in discharging its duty of protecting our internal security.

The purpose of this report, therefore, is to put into the hands of American lawyers a brief résumé of the fundamentals of communism, its current tactics, strategy and objectives with suggestions for meeting this menace, of gravest import to America, and to the dwindling part of the world as yet free or "uncommitted."

The fundamentals of communism

To understand communism, it is necessary to start with the basic premise that communism is a way of life. Just as the world's great religions—Judaism, Christianity, Mohammedanism, Buddhism and others—are a way of life—so also is communism. Beyond that it is a worldwide conspiracy to which its adherents bring the discipline of soldiers and an unswerving fanatic dedication.

Communism started over 100 years ago with the Communist Manifesto written by Karl Marx and Friedrich Engels. Its menace to the free world began with the Bolshevik Revolution in 1917. Since then its great actionists, Lenin, Stalin, and now Khrushchev, have never deviated from certain basic principles. Although, Khrushchev denounced Stalinism as the Cult of the Personality in 1956, at the 20th Congress of the Communist Party in the Soviet Union in 1957, he said:

"But we do not criticize Stalin as a bad Communist as far as the interests of the working classes are concerned. God grant that every Communist should fight for the interest of the working classes as Stalin did."[5]

After Khrushchev succeeded in destroying the "Saviour Complex," built up around Stalin, a reoccurrence of the Cult of the Personality is now being built up around Khrushchev.

A favorite Communist tactic is to ask the question: "What is wrong with communism?" Intelligent and well informed people may not have a ready answer, although they may condemn communism for its aggression, tyranny and state ownership.

What, then, do Communists believe, and why is the Communist way of life so diametrically opposed to Western civilization?

[3] Ibid.

[4] New York Times, January 15, 1959.

[5] J. Edgar Hoover, "Masters of Deceit," 1958, p. 51.

There are four basic concepts which are the cornerstones of communism and upon which the Marxist-Leninist way of life rests. The following fundamental concepts give the Communist the reason and excuse for his revolutionary violence and amoral conduct:

All that exists is the result of the interaction of material things struggling against each other and adapting their forms to the nature of the struggle. Thus, the creation and everything in existence came about as the result of the forces of nature; hence, there is no design in the universe.

Man is a product of his environment and has developed through natural selection to his present form. He has cultivated certain muscles, as, for instance, the brain, which thus makes him intellectually but not physically superior to other animals.

The moral code of any era is determined by the necessities of the time and place. Lenin said: "We do not believe in eternal morality, and we expose all fables about morality." [6] Lenin further stated: "Morality is that which serves to destroy the old exploiting society. Communist morality is the morality which serves this struggle." [7] Thus, it is not wrong to kill, lie, cheat, nor steal if done for the cause. In other words, to the Communist the end justifies the means.

The supernatural is a device invented by the ruling class to control other classes. It is impossible to believe in a God and in dialectical materialism at the same time. Atheism is a requirement for membership in the Communist Party.

Hence, Marx stated "Religion is the opium of the people." Lenin said:

"Religion is a kind of spiritual gin (Vodka) in which the slaves of capital drown their human shape and their claims to any decent life." [8]

As a substitute for religion communists developed a militant crusade for atheism since,

"Atheism is a natural and inseparable part of Marxism. Consequently, a class conscious Marxist party must carry on propaganda in favor of atheism." [9]

Although frequently invoking the name of the Diety, Khrushchev said: "I think there is no God. I freed myself long ago from such a concept. I am a partisan of a scientific point of view, and science and faith in supernatural forces are irreconcilable opinions." [10]

Earlier Khrushchev said: "We Communists, the Soviet politicians, are atheists." [11]

Fundamental Communist principles

The phenomenal growth of the communist conspiracy gives confidence to communists for the future. In June, 1957, Soviet Premier Nikita S. Khrushchev, during the course of an interview before a nationwide American television audience, proclaimed:

"I can prophesy that your grandchildren in America will live under socialism." [12]

In a similar vein, William Z. Foster, Chairman Emeritus of the Communist Party, USA (CPUSA), dedicated his book, "The Twilight of World Capitalism": "To My Great-Grandson Joseph Manley Kolko Who Will Live in a Communist United States." [13]

Implicit in all communist propaganda is the premise that communism is invincible and that its triumph is inevitable. Communism is portrayed as the irresistible "wave of the future," against which all opposition is futile. This theme was spelled out in detail recently by the authoritative Soviet theoretical publication, "Kommunist," in an article stating that "Communism is the highest stage of social progress. All the peoples of the globe are moving toward it inexorably and will inevitably come to it." [14]

Communist Internationalism

To assert its leadership of the World Communist Movement after the successful Bolshevik Revolution of 1917, the Soviet Union created an international organization called The Communist International, commonly known as The Comintern. In 1920, the Comintern adopted 21 conditions for membership, a veritable constitution for international communism. Several of the conditions demanded blind subservience, unquestioned loyalty and duty to defend the U.S.S.R. against all its enemies.[15]

In 1921, the Communist Party (CP) in the United States submitted to the 21 conditions of membership and became a section of the Comintern. The CPUSA retained its Comintern membership until November, 1940, when it withdrew as a tactical maneuver to evade the provisions of the Voorhis Act. This Act required registration with the Attorney General by any organization subject to foreign control which engaged in political activity. Although the Comintern itself was dissolved in 1943 in a tactical move to express "friendship" between the U.S.S.R. and its allies, the CPUSA's allegiance to the Soviet Union has neither ceased nor decreased. [16]

The 12-Party Declaration issued by Communist bloc nations in November, 1957, reiterated the obligation of the international Communist movement to defend the Soviet Union at all costs.[17] Under the international discipline of the Communist movement, Communist parties throughout the world carry out Moscow's orders without question. All Communist parties are united by the common ideology of Marxism-Leninism, and maintain close "fraternal" relations with each other.

Relations are sustained in various ways. Important meetings—congresses and conventions, for example—provide opportunities for visits by Party leaders to other nations. Thus, two representatives of the CPUSA, along with representatives from practically all other Communist parties, attended the 21st Congress of the CP of the Soviet Union in Moscow in 1959. The two American Communists naturally traveled under the safety of passports issued by the U.S. Government. The international cohesion of the Communist movement is aided by Communist publications applying the principles of Marxism-Leninism. These publications provide a clearing house for policy guidance on theoretical and practical questions, and lay down the Party lines. Thus when the Soviet Communists decided on the program of the Cold War, Duclos, the French Communist leader, spoke to American Communists through the pages of the French party magazine. Duclos said Browder should be deposed—he was. The Parties' major theoretical publication in the United States is called "Political Affairs," and lays down the Party line.

The U.S.S.R. exercises complete control over this international conspiracy. It commands the support of communist parties in the free world to the extent of engaging in activities which are essentially traitorous.

In a similar manner communist parties in other countries have the support of the party in the Soviet Union and in other lands. At the 17th National Convention of the CPUSA held in New York City on December 10, 1959, American communists received greetings from 50 communist parties in foreign countries including the Soviet Union and Red China.[18]

Communist Principle of Class Struggle

A key principle in the communist movement is the communist concept of the class struggle. This concept pervades all communist theory and practice. According to Marx, history has been a series of class struggles which will end in a new period or stage of society. The current class struggle, communists hold, is being waged between the bourgeoisie and the proletariat, the capitalists and the workers, the exploiters and the exploited, the rulers and the ruled.

To communists, the class war has never deviated down through the years though it has assumed various forms in different eras. In early times, the class struggle was between the slave owners and the slaves. In a later age, it was between the feudal lords and the serfs. Finally, the present day class struggle is centered between the Free World and the Soviet World. Strangely, this does not exist between the peasants in the Soviet Union and their well fed masters and the luxury living rulers of the CPSU. The result of this struggle, communists believe, will be the collapse of capitalism and the emergence of the Reign of Communism.

Communists' preoccupation with the class struggle arises from their dedication to the "class war," whether it be a small local dispute or a huge clash between the Soviet Union and the capitalist nations. For communists, every day is an engagement in the never-ending class war.

According to communists, the class struggle does not exist solely in the field of practical action. It exists also in the arena of ideas, in the realm of the mind. Hence, in the communist view, there is continual clash of ideas, of theories, and of ideologies.

Many well-informed people have been led by communist propaganda to believe that the Soviets in fact recognize Western civilization and the necessity of changing its traditional Marxist-Leninist concepts. Let Khrushchev himself supply the answer. Here are his words:

"Some people in the West are saying that the Soviet Union has supposedly changed its policy and therefore it has become easier to talk with us. This, of course, is incorrect. We were born communists, we live as communists and we will not die but will continue to make progress as communists." [19]

The Soviet Communists have made a studied effort to put Khrushchev on a level with Lenin himself. Certainly Khrushchev has never departed from the fundamentals of "class struggle." In 1958, Khrushchev asserted:

"We do not renounce class warfare. Class warfare will last as long as capitalism exists." [20]

Communist Principle of Deceit

The principle of deceit governs all communist tactics and practices. Lenin made this abundantly clear when he said:

"It is necessary to be able to agree to any and every sacrifice, and even—if need be—to resort to all sorts of stratagems, maneu-

vers, and illegal methods, to evasion and subterfuge." [21]

"The strictest loyalty to the ideas of Communism must be combined with the ability to make all necessary practical compromises, to 'tack' to make agreement, zigzags, retreats and so on." [22]

Stalin was equally blunt:

"Words are one thing—deeds something entirely different. Fine words are a mask to cover shady deeds." [23]

While Lenin was referring specifically to the trade-union movement, his words are equally applicable to communist attempts to infiltrate and subvert non-communist organizations. Since the CP claims to be the "political party of the working class," communists concentrate their infiltration efforts principally on the labor movement, although no influential non-communist group is immune to communist efforts to subvert it. Communists, however, are not interested in improving wages or working conditions. They are concerned only in manipulating trade-unions to accomplish communist aims.

Soviet trade unions are completely unlike those in America and exist essentially to further the communist cause. They are also used in the Soviet Union to keep down wages and increase production. This was made abundantly clear by Khrushchev when he said: "We must make trade unions a genuine Leninist school of administration and management, a school of communism for the millions of workers and employees. It is quite obvious that for this the Party must give the unions more practical assistance in their work." [24]

During Khrushchev's visit to the United States he met with a group of labor leaders in San Francisco on September 20, 1959. The Americans advanced our traditional views on the trade union movement which were denounced by Khrushchev during a violent exchange of words with Walter Reuther. The Soviet account of this meeting [25] was most inconsistent with the report of the American labor leaders.[26] The incident is a valid illustration of Soviet disregard for truth and the facility with which the communist propaganda machine can distort the truth for propaganda purposes.

Communist Use of Aesopian Language (or Double Talk)

A manifestation of the communist principle of deceit is the use throughout the international communist movement, of a jargon or phraseology peculiar to the communist. Aptly known as Aesopian language, it grew originally out of the writings of Karl Marx, Friedrich Engels, Lenin and Stalin. It was developed for protective purposes in getting over the "revolutionary message" of the communist conspiracy under the guise of legality and thus thought the deceitful use of words to more easily infiltrate various stratas of life. This cryptic and involved phraseology, obscure to the uninitiated, permeates all communist publications.

There are two reasons why this complicated language is utilized. First, in every important pronouncement which provides communists with a guide to thought and action, there must be a strong reminder of their goal—the dictatorship of the proletariat through force and violence. This is constantly embodied in such Aesopian phrases as "strengthen Marxist-Leninist ideology and Bolshevik discipline."

Second, and equally important, communists must be instructed in the penetration of noncommunist mass organizations through which the masses can be directed and guided along the communist line in any particular period. This responsibility is conveyed through the communist directives, repeated over and over, "to broaden contact with the masses."

Thus, Aesopian language or double talk is a prominent communist deceptive device to fool noncommunists. Communist Aesopian language always has two sides—the deceptive line for public consumption and the real Party line to advance communism. Hence, the terms uttered by communists are vastly different in actual meaning. For instance, when communists demand "restoration of the Bill of Rights," they are seeking to eliminate legal opposition to communism, stop prosecution of communists, and grant amnesty to those presently in jail.

To further illustrate: Communists refer to their cause as a "Historic Mission." This Aesopian term, to communists, means the seizure of power, the establishment of the dictatorship of the proletariat, the abolition of capitalism, and the formation of the new, communist society. As the vanguard of the proletariat the communist party has as its "Historic Mission" the direction of the proletariat struggle toward a communist society.[27]

Communist Theory of Revolution

The inherently specious nature of communism is clearly illustrated by the current claim of its propaganda that communism can be attained without the use of force and violence. Realizing full well that a violent revolution will be necessary to overthrow capitalism, Marx, Engels, and Lenin made no effort to conceal the fact. Marx and Engels, in the concluding paragraph of The Communist Manifesto proclaimed:

"The Communists disdain to conceal their views and aims. They openly declare that their ends can be attained only by the forcible overthrow of all existing social conditions. Let the ruling classes tremble at a Communistic revolution." [28]

Lenin was equally forceful when he declared:

". . . As long as capitalism and socialism exist, we cannot live in peace; in the end, one or the other will triumph—a funeral dirge will be sung over the Soviet Republic or over world capitalism." [29]

However, because of the handicap that this basic element of communist theory has imposed on communist parties throughout the free world, contemporary communist leaders attempt to convey the impression that, in certain cases, it may be possible for communists to gain power by peaceful means. Khrushchev elaborated on his theory in his address to the 20th Congress of the CP of the Soviet Union in 1956. He said then that "the working class in a number of capitalist countries . . . is in a position . . . to capture a stable majority in parliament, and transform the latter from an organ of bourgeois democracy into a genuine instrument of the people's will." [30]

The utter deceit of this tactical maneuver is that Khrushchev is equally insistent that "The Marxist-Leninist doctrine is the banner of the international workers' movement and every communist party, if it is a genuinely communist party, is sacredly guided by this doctrine. Therefore, it is only natural that when meeting representatives of communist parties they express their fidelity to the revolutionary ideology of Marxism-Leninism.[31]

Since the initiation of Smith Act prosecutions and the findings of the U.S. Supreme Court that the CPUSA advocated force and violence, the Communists have carried on a vigorous campaign to conceal their true aims.[32] Even the Soviets in their false peace propaganda have sought to lull the Western World into a feeling of false security that they seek only peaceful means to accomplish their purpose.

Again their deeds prove false their propaganda. The December 1959 issue of the World Marxist Review summarizes a Communist textbook entitled, "Foundations of Marxism and Leninism," designed to replace the 1924 book by Stalin on "Problems of Leninism." Here it is made crystal clear that force and violence is part and parcel of the Communist revolution in the following words:

". . . The Marxist-Leninists, while noting the possibility of a peaceful revolution, nevertheless also see the inevitability, in a number of cases, of a sharp aggravation of class struggle. In countries where the military-police machine of the reactionary bourgeoisie is strong, the working class will encounter fierce resistance. There can be no doubt that in a number of capitalist countries the overthrow of the bourgeoise dictatorship by armed class struggle will be inevitable." [33]

Despite current communist propaganda to the effect that communism can be achieved through peaceful means, Gus Hall, now general secretary of the CPUSA, swore under oath in 1934 that he would use force and violence to overthrow the United States Government.[34] There is no reason to doubt that Hall still holds this conviction.

Communist Meaning of World Peace

Equally deceptive is the so-called peaceful coexistence campaign which has been featured so prominently in communist propaganda of recent years. Peaceful coexistence was the predominant theme of all Khrushchev's remarks during his visit to the United States in September, 1959. He defined, interpreted, and explained it, crediting Lenin with having bequeathed this principle to international communism.

Actually, Lenin's writings prove convincingly what a hollow mockery the term peaceful coexistence is for communists. They are engaged in a continuous war aimed at achieving the ultimate world-wide victory of communism. Lenin insisted that the contention that lasting peace is possible under capitalism is "a most reactionary method of consoling the masses." He called it a means for "distracting their attention from the sharp antagonisms and acute problems"

with illusions of an "'ultra-imperialism' of the future." [35]

Not only do communists regard a lasting peace as being impossible under capitalism, but they insist that it can be achieved only under communism. According to Lenin, "outside of Socialism there is no deliverance of humanity from wars." [36] Eugene Dennis, national chairman of the CPUSA, echoed this thought in February, 1960, when he said:

"Unlike capitalism—a socialist society, by its nature precludes oppression and wars of conquest and aggression. In the socialist lands * * * there is no material basis or other incentive for aggrandizement, territorial plunder, or war profiteering." [37]

While allegedly striving for a lasting peace, Communists regard violence as an inevitable concomitant of the collapse of capitalism and the birth of the socialist society. Paradoxically, revolution is the only guarantee of lasting peace. Until then, peace, for Communists, is only a respite which allows time to prepare for the next war. It is only a temporary, tactical peace designed to enable the U.S.S.R. to build its strength for the final, inevitable, all-decisive combat which will result in the total destruction of capitalism.

Communist propaganda on peaceful coexistence deliberately glosses over the vital distinction which communist theory makes between a temporary and a lasting peace. In so doing, it attempts to create the impression that Communists are working toward the achievement of a lasting peace; whereas they are actually interested only in a temporary peace until the time is ripe for the successful final assault on capitalism.

Since Khrushchev has credited Lenin with formulating the principle of peaceful coexistence, it is well to recall what Lenin said regarding campaigns for peace. Lenin declared that "every 'peace programme' is a deception of the people and a piece of hypocrisy unless its principal object is to explain to the masses the need for a revolution, and to support, aid and develop the revolutionary struggle of the masses that is starting everywhere." [38]

During his visit to the United States Khrushchev used as a major theme in addresses and statements the subject of "peaceful coexistence" 26 times." [39]

In plain English, when Khrushchev urges peaceful coexistence, he is telling communists that there must be time to remove the obstacles to final communist victory and security. Likewise, through his use of the "Big Lie" technique, he hopes to lull the Western world into a further state of complacency of unpreparedness and disarmament while not departing from the traditional communist concept of world revolution. When Khrushchev speaks of "peaceful coexistence" it must be remembered that Lenin wrote, "great historical questions can be solved only by violence." [40]

"The adversaries of socialism are apprehensive about our progress, which furnishes graphic evidence of the superiority of the socialist system over the capitalist system. A competition is unfolding between these two systems. We stand for the peaceful coexistence of states with different social systems and for competition between them in the economic sphere."

Continuing, Khrushchev used communist "double talk" to make his point and adhere to Marxist-Leninist doctrine when he said:

"When it comes to relations between the socialist and bourgeois ideologies there can be no coexistence, and we do not hide the fact. What is progressive has always won out over what is obsolescent and moribund." [41]

The Red Chinese Marxist leader, Mao Tse-Tung, who is now in an ideological conflict with Khrushchev over Leninist orthodoxy, used more expressive language when he said:

"Every Communist must grasp the truth that political power grows out of the barrel of a gun, in fact, we can say that the whole world can be remolded only with the gun." [42]

Communist Concepts of Imperialism and Colonialism

As the peaceful coexistence campaign illustrates, even words are used by communists as weapons in the class struggle. Thus, the phrase "people's democracy" is used to disguise the ruthless dictatorships which communists have inflicted on the European satellite nations. When this country found it necessary to send troops to Lebanon in 1958, Communist propaganda castigated us as "imperialists." Yet, when Soviet troops had brutally suppressed the Hungarian uprising in 1956, they were "liberating" Hungary from the threat of "fascist counter-revolutionaries."

Communist propaganda charges that the United States is attempting to impose its economic and political domination over Canada and Latin America merely to increase the profits of American business. This charge, however, completely ignores the fact that we granted independence to the Philippine Islands and commonwealth status to Puerto Rico in accordance with the desires of the majority of the populations of those two countries, and statehood to Alaska and Hawaii.

Our action in the case of the Philippines and Puerto Rico contrasts sharply with the manner in which the predatory Communist empire has expanded. The Baltic Republics of Latvia, Lithuania, and Estonia were forcibly incorporated into the USSR. Communist governments were imposed on the European satellite nations by the ruthless suppression of non-Communist political parties. Communists gained power in China, North Korea, and North Vietnam through armed aggression. The uprisings in East Germany, Hungary and Tibet, and the millions of refugees from Communist tyranny attest to the need for force to maintain communism in control.

Yet, Communists are still not satisfied. Khrushchev summed up the imperialistic nature of communism—an inherent characteristic because of communism's dedication to world conquest—when he boasted:

"We Bolshevika are a ravenous people. What we have achieved in the past is very little. We want more and more." [43]

Communist Concepts of Democracy and Freedom

In spite of the fact that communism retains control through fear and its counterpart force, Communists, from Lenin to Khrushchev, insist that communism is the highest form of democracy. In 1917, Lenin claimed that "in capitalist society we have a democracy that is curtailed, wretched, false; a democracy only for the rich, for the minority." [44] Khrushchev reaffirmed this view in 1958 when he asserted that "bourgeois democracy is the democracy of the rich." [45]

As opposed to the "veiled dictatorship of wealth" which passes for democracy in non-Communist nations, Communists offer "proletarian democracy" which, they hold, is a democracy of the toiling masses directed against exploiters. As the Program of the Communist International, adopted in 1928, explained:

"The Soviet form of State, being the highest form of democracy, namely proletarian democracy, is the very opposite of bourgeois democracy, which is bourgeois dictatorship in a masked form." [46]

Yet, the freedoms which we take for granted—freedom of speech, the press, assembly, and religion—are unheard of in practice in any Communist country. The late Andrei Y. Vyshinsky, former Soviet representative to the United Nations, spelled this out unequivocally when he said:

"In our state, naturally, there is and can be no place for freedom of speech, press, and so on for the foes of socialism. Every sort of attempt on their part to utilize these freedoms must be classified as a counterrevolutionary crime." [47]

Soviet law makes a mockery of the claim that communism insures full freedom. Clauses in the Soviet constitution guaranteeing such elementary rights as freedom of speech, the press, assembly, and religion, are nullified in practice by insisting that they must be exercised "in conformity with the interests of the working class, and in order to strengthen the social system." These "rights" cannot be used to criticize the Soviet state. Under communism, freedom is, in effect, the duty to support the official Party position and not the right to criticize.

The record of communism is one of mass enslavement and death, of the complete deprivation of individual freedom, and of a total disregard for the inherent dignity of man. The appalling loss of human life during the forced collectivization of Soviet agriculture, the terror of the infamous purge trials, the extensive use of slave labor, the forcible expansion of the Communist empire during and after World War II, and the brutal suppression of the uprisings in East Germany, Hungary, and Tibet belie communism's assurances of democracy, liberty and freedom.

Communists Talk Peace but Defend War

Communist peace claims are shorn of their hypocrisy when the basic Marxist-Leninist principles are examined. War is a means of revolutionary change so long as it serves the interests of communism and so long as conditions are proper for a Soviet "just war."

Lenin laid down the principle from which there has been no deviation, as follows:

"If war is waged by the proletariat after it has conquered the bourgeoisie in its own country, and is waged with the object of strengthening and extending socialism, such a war is legitimate and 'holy'." [48]

Khrushchev in effect reiterated Lenin on September 30, 1959, in an address to Chinese Communist leaders when he said:

"Marxists have always recognized only * * * just wars and they have always condemned imperialistic aggressive wars. This is one of the characteristics of Marxist-Leninist theory." [49]

To the Communist there are just and unjust wars. Just wars are those fought for "liberation" from "capitalistic slavery" and in defense against foreign attack. Unjust wars are those fought against the Soviet or would-be satellite states or by capitalist states among themselves (unless the Soviets

would benefit).[50] Thus, to communists it was a just war to march on Poland after the 1939 union between Moscow and Berlin but, of course, when Germany invaded Russia, it became an unjust war.

The Marxist-Leninist doctrine bans all unjust war but this doctrine obviously is a part of Communist double talk designed to disarm genuine peace-loving peoples.

The true Soviet view has best been expressed by Marshal Boris M. Shaposdnikov who was Stalin's military adviser, in these words:

"We are interested in the question whether preventive war can be justified * * * such a war, provided it is of a progressive and revolutionary type * * * will be a just war. There will be a moment when revolutionary masses * * * must resort to arms. The fact that, in such a struggle, it may be valid to enter into a preventive war needs no further explanation. The initiation of war does not deprive such a war of its inherently defensive character." [51]

The peril to America rests on the fact that Marxist-Leninist doctrines and morals would justify Communists to make an unannounced, unprovoked, sneak attack upon the United States as a just war designed to bring the United States under the dictatorship of the proletariat.

Lenin's sanctions are implicit in his teaching:

"Only after the proletariat has disarmed the bourgeoisie will it be able, without betraying its world historical mission, to throw all armaments on the scrap heap." [52]

COMMUNIST TACTICS AND STRATEGY

Communist Meaning of Tactics and Strategy

Tactics have been defined by Stalin as "the ways and means, the forms and methods of fighting that are most appropriate to the concrete situation at the given moment and are most certain to prepare the way for strategic success." "Tactics," he said, "are a part of strategy, subordinated to and serving it." [53] By tactics, Communists means the immediate decisions, measures, and action which must be taken to achieve Communist objectives. Tactics vary rapidly in keeping with rapidly changing conditions, but the broad essential outlines of strategy remain unchanged.

Stalin has described the function of strategy to be "to determine the main direction which ought to be taken by the working-class movement, and along which the proletariat can most advantageously deliver the main blow at its enemy." [54] Strategy represents a detailed analysis of all possible forces available in the struggle for a world Communist society. It is the grand, overall blueprint of the conflict.

In Communist strategy, the assumption is that a clash with the non-Communist world is inevitable; therefore, all Communist sources of strength—economic, political, military, propaganda, etc.—are to be used where they are strongest and most productive of desirable results. By the same token, non-Communist sources of strength are to be hit and destroyed where they are the weakest and least productive.

Since all Communist parties are modeled after the CP of the Soviet Union and are, for the most part, minority groups striving for power, they use common tactics. Nevertheless, while these tactics are basically identical, they are applied with skillful diversity and flexibility depending on local social, economic, and political conditions. The current Communist economic-political offensive has not resulted in the abandonment of such traditional Communist tactics as propaganda, the united front, and the infiltration and subversion of non-Communist groups. These are now being implemented by extensive programs of economic and technical assistance, exchange of visitors, and diplomatic maneuvering.

In applying tactics, Communists are not bound by any legal, moral, or ethical scruples. Any action—legal or illegal, moral or immoral, peaceful or violent, open or covert—becomes automatically justified if it advances the cause of communism. Since their morality is relative, depending solely on the immediate needs of the class struggle, Communists have never hesitated to use such tactics as armed aggression and guerrilla warfare, individual and mass terrorism, abrogation of treaties, espionage, and sabotage to promote Communist objectives.

Existence of Underground Apparatus

The concept of an illegal, secret, or underground apparatus paralleling the legal, open or aboveground CP is a basic Communist tactic. In the words of Lenin, Communists "must everywhere create a duplicate illegal apparatus, which, at the decisive moment, could help the Party to perform its duty to the revolution." [55]

Thus, in every country where Communists are unable to carry on their work lawfully, they invariably resort to a combination of lawful and unlawful work. The CP of the Soviet Union originally came into existence as an underground group. The CPUSA is essentially the same type of clandestine body as that which was established and developed by the Bolsheviks in Russia and is likewise the product of decades of Communist underground activity.

The purpose of an underground organization is to provide the CP with a hard-core leadership protected by maximum security measures designed to survive government action and to preserve the continuity of the CP organization and its program under the most adverse conditions. The underground apparatus of the CPUSA has existed since the Party was founded in 1919. Under conditions favorable to the Party, it has contracted, while during periods unfavorable to the Party it has expanded, but at all times, the apparatus has remained in existence.

Mr. Khrushchev's visit to the United States was the signal to American communists that the time was ripe to shift from covert to open activity. With the 17th convention of the CPUSA last December, the CPUSA overnight transformed itself into a militant, aggressive organization dedicated to inject Marxist-Leninist concepts into the mainstream of American life.

Archie Brown, a longtime Communist leader, was a candidate for the San Francisco Board of Education last November. He polled 33,000 votes, or 13 per cent of the votes cast. He attributed his success to Khrushchev's visit and speeches on peace.[56]

The extent of the organization and control of the underground over the open phase of the Party's activities appears to vary in direct ratio to the pressure, applied against it by the government. This pressure, in the United States, for instance, can take the form of anti-Communist legislation, such as the Smith Act of 1940, the Internal Security Act of 1950, and the Communist Control Act of 1954, or it can be brought about by the various congressional or state committees investigating communism.

Aggression as Means to End

Primarily by means of the tactics of open or concealed aggression, communism has grown from a handful of Lenin's followers in 1917 to an international movement now comprising a billion people. To Communists, since the end justifies the means and since the proletariat and the bourgeoisie are engaged in a permanent state of war, there is no question of aggression or nonaggression, but only one of offensive and defensive movements in a ceaseless battle between sworn enemies.

Communist aggression as we know it today, started with the establishment of the Soviet Union. The following examples of such aggression are most vivid:

Soviet Georgia, whose independence was recognized in May, 1920, was invaded by Stalin in February, 1921.

The Ukraine was forcibly annexed by the USSR in December, 1922.

Poland, with whom the Soviets negotiated a nonaggression Treaty in 1932, was invaded by the Soviets from the east in September, 1939, while the Nazis invaded from the west.

Finland was invaded by the USSR in November, 1939.

Estonia, Latvia, and Lithuania were all forcibly annexed by the Soviet Union in August, 1940.

China (1945–1949), Malaya (1945–1954), the Philippines (1945–1948), Indochina (1945–1954), and Greece (1946–1949) were all wracked by Communist civil wars.

Rumania, Bulgaria, and Hungary, with whom peace treaties were signed by the USSR in September, 1947, were invaded by Soviet troops in April, 1948, August, 1948, and February, 1949, respectively.

Korea was the scene of a bloody war between Communist aggressors and United Nations forces from 1950 to 1953.

Tibet was invaded by Chinese Communist forces in 1950.

Hungary was crushed by Soviet troops which moved in to put down the October, 1956, revolt against the local communist government.[57]

That Communists have not changed their views on aggression was made plain by Khrushchev in his speech before the 20th Congress of the CP of the Soviet Union in 1956. He said then that "there is no doubt that in a number of capitalist countries the violent overthrow of the dictatorship of the bourgeoisie and the sharp aggravation of class struggle connected with this are inevitable." [58]

Propaganda as Weapon

Propaganda has become the most powerful single weapon in the Communist arsenal as the means of arousing the masses, luring them toward communism, and preparing and organizing them for revolutionary activity. Propaganda is viewed by Communists as a tactic to be used constantly and in close coordination with other tactics. It is utilized both to supplement military, conspiratorial, diplomatic, or economic measures and to substitute for them when these measures are impossible, impractical, unproductive, or uneconomical.

The beginning of modern communism was dramatized by "The Communist Manifesto," published in 1848 by Marx and Engels. This Communist "classic" in itself is little more than propaganda. For the next half century, the ideas of Marx and Engels were kept alive, with virtually no organization, backing, or support, by the propaganda of their adherents. Marx and Engels did not

concern themselves seriously with problems of organization, tactics, and strategy. They dealt with ideas and events, which are the weapons of propaganda.[59]

In the years since Marx and Engels, leaders of the international Communist movement, have valued and utilized propaganda above all other types of activity. As far back as 1902, Lenin stressed the necessity for "propaganda and agitation among all strata of people."[60] In 1939, Stalin noted that "if our Party propaganda for some reason or other goes lame then our entire state and Party work must inevitably languish."[61] Eugene Dennis, now national chairman of the CPUSA, has urged the CPUSA to "improve every aspect of our mass agitation so as to reach and convince millions of workers and progressives and set them in motion."[62]

Communist propaganda aimed at non-Communist Americans is intended to "educate" the masses along Marxist-Leninist lines and to gain their support in order that the masses may be maneuvered and mobilized into eventual revolutionary action for the overthrow of the Government. No segment of the population and no sphere of activity in this country has been overlooked or neglected by Communists as targets for their propaganda—particularly youth.

Of the torrent of propaganda which has flooded the world through the years, Communist propaganda has been the most expertly conceived and executed. In falsehood, imagination, audacity, intensity, volume, and effectiveness, Communist propaganda on a world-wide scale dwarfs all other propaganda efforts in history.

Exploitation of Cultural Exchanges

The tactical use to which Communists have put cultural exchanges has gone far beyond the original purpose of promoting mutual understanding through expanding people-to-people relationships.

On the surface, there is seemingly a favorable balance between the number of delegations which the United States and the USSR have exchanged. In the past two years, both countries have exchanged approximately 1,500 people each, involving more than 100 projects of each country. But, in addition to using some of these groups for intelligence activities, the Soviets further violate the purpose of such exchanges by deliberately restricting the free flow of ideas through the controls they establish on their groups. Each Soviet group has its "spokesman" who not only speaks for the group, but also insures that members of the group do not become ideologically disoriented through contacts and discussions with Americans.

Perhaps the greatest disparity in the approach of the two countries to expanded people-to-people contacts involves tourists. Originally, the major theme of Soviet propaganda was that the United States maintained an "iron curtain" against tourists because of a law which required fingerprinting aliens. When that objection was removed by the waiver of fingerprinting requirements, Soviet propaganda switched to the theme that excessive cost prevented extensive tourist travel from the Soviet Union to the United States.

The so-called tourists the Soviet Government has permitted to travel here differ markedly from their American counterparts. In the first place, Soviet "tourists" come here in groups and not individually or as members of small parties as is customary with Americans. In the second place, Soviet groups show an amazing similarity of interests and occupations. One group, for instance, will be composed entirely of scientists; another group wholly of economists; and so on. Moreover, these "tourists" groups are not interested in sightseeing, but rather in obtaining specialized technical and scientific data. In short, Soviet tourism is used as another form of espionage, just another method of collecting valuable information in the ceaseless intelligent efforts which the Soviets direct at this country.

Weapon of world trade

Next to the propaganda weapon, trade has become the most important tactic employed by the U.S.S.R. in the past several years. Trade is now being utilized as an economic and political instrument in the struggle for the victory of communism.

Behind the Soviet decision to use economic transactions as political weapons is the belief of Soviet leaders that the decay of capitalism predicted by Marx and Lenin can be accelerated. The emphasis on a substantial expansion of trade relations both with the Communist nations and with non-Communist countries serves as a phychological weapon. Apart from the inherent benefits of economic relations between nations, plans for intensified trade and financial aid lend themselves to propaganda exploitation. The Russians have developed as masters in publicizing successfully whatever promises they have made to other countries, often out of all proportion to their actual performances.

The long-term objectives of the Soviet bloc in its economic relations with the free world are (1) to supply their economy, especially the industrial-military base, with imports that help the bloc become more powerful and less dependent on the non-Communist world; (2) to drive wedges among non-Communist nations at every opportunity; (3) to increase the reliance of non-Communist countries on the Soviet bloc for markets and supplies, thereby making the free world more vulnerable to Communist pressure; and (4) to prevent, by trade and credit manipulation, any defections of neutral or uncommitted nations to the side of the West.

The economic tactic has been employed by the USSR in its frequent purchases of large quantities of various commodities to propagandize their so-called position as a "friend" of underdeveloped or "colonial" nations. In early 1960, for instance, the Soviets signed a deal with Cuba for the exchange of a million tons of Cuban sugar annually at the world price in exchange for Soviet machinery. The Soviets loudly proclaimed the agreement to be an act of friendship with Cuba, a nation long subjected to "American economic domination."

What the Soviets did not admit was their purchase in September, 1959, of 330,000 tons of Cuban sugar below the world price.[63] Neither did the Soviets publicize the fact that the United States had an agreement with Cuba whereby we paid that country about three cents per pound above the world sugar price.[64]

Building Communism with Non-Communist Hands

As a minority group such non-Communist countries as the United States, the CP is dependent on the support of non-Communists for the achievement of its goals. To gain this support and to extend its influence beyond the orbit of its own membership, the CP ceaselessly endeavors to maintain and expand its contact with people in all walks of life.

The importance which Communists attach to non-Communist support is indicated by their incessant repetition of the phrase "contact with the masses." The CP considers the masses as subject to continuous exploitation under the capitalist system. It has arrogated to itself, as the "political party of the working class," the "duty" of leading them to their eventual "emancipator" under a Communist form of government.

Leaders of the Communist movement are well aware that the proletariat must be "educated" if the ultimate overthrow of the capitalist system is to be accomplished. For this reason, the "political education" of the masses along Marxist-Leninist lines has always been regarded by Communists as of primary importance. Thus, the tactics of propaganda and agitation are directed at the masses with the objective of maneuvering and mobilizing them for action and conscious participation in the building of the new socialist order under the Communist banner.

The desires and the will of the party are also transmitted to large masses by means of non-Communist, nonpolitical organizations. People belong to various organizations for special purposes and needs. But as far as Communists are concerned, these organizations are to be exploited as mere "transmission belts" to enable a small party of revolutionists to enlist the support of the unsuspecting masses.

Gus Hall, general secretary of CPUSA, on behalf of the party's national secretariat, issued a directive on May 19, 1960, which said under the heading "Reaching Out to the Masses":

"It is necessary here that primary attention be given to the relationship of our Party leading forces with other left-progressive leaders who are active in the field of peace activities. Even where differences exist or may continue to exist, mutual agreement can be established for a common effort."[65]

The above document further stated: "The task continues to be that of supporting and helping to build and influence mass peace movements among them, church and other organizations."

Tactic of Infiltration

Infiltration is one of the oldest and most widely used of Communist tactics, long advocated by Lenin and other Communist leaders and theorists. Infiltration gives the CP a foothold among non-Communists, helping Communists to disseminate their propaganda and to extend their influence in areas of society which would normally be closed to open Communist activity.

Lenin instructed that "in all organizations without exception—unions and associations, primarily proletarian, and also organizations of the nonproletarian, toiling and exploited masses (political, industrial, military, toiling, cooperative, educational, sports, etc., etc.), groups or nuclei of Communists should be formed."[66] The tactic of "boring from within" the labor movement was also enunciated by Lenin.[67]

Communist use of the Trojan-horse tactic, first announced in 1935 by Georgi Dimitroff, then general secretary of the Comintern,[68] has been faithfully and extensively used ever since. Gus Hall, general secretary of the CPUSA, reiterated the need for infiltration at the 17th national conven-

tion of the CPUSA in December, 1959. He declared: "We want to participate in, organize, and lead the broadest of the united front movements—on every level—in a thousand ways, in 10,000 places, on 100,000 issues—if possible, with 180 million people." [69]

On February 8, 1960, J. Edgar Hoover, Director, Federal Bureau of Investigation, testified before the House Subcommittee on Appropriations: "We now have 160 known or suspected Communist front and Communist infiltrated organizations under investigation. These various fronts exploit every susceptible segment of American society."

Most cynical and sinister are Communist attempts to penetrate Negro organizations. Communists are always claiming to champion the rights of the Negro, but their primary interest is in causing racial tension and creating embarrassing or dangerous situations which will aid and abet the Communist cause at the expense of the Negro.

Fronts as a Screen

The front organization is a screen or cover behind which many of the political, agitation and propaganda activities of the CP are carried on. Communists in the United States—as elsewhere throughout the world—have long made extensive use of fronts as a tactic to camouflage the real source and direction of their subversive operations.

The utility of fronts was recognized years ago by both Lenin [70] and Stalin.[71] They held that mass organizations, or "transmission belts," under the influence and direction of the CP, are indispensable in mobilizing, organizing, and maneuvering the masses to bring about the transition from capitalism to communism.

In 1926, the then secretary of the Comintern, Otto Kuusinen, popularized the tactic of "transmission belts." He stressed the necessity of creating "a whole solar system of organizations" working under the domination and guidance of the CP.[72]

Communists exercise great pains to hide the Communist origin and character of their fronts. Fronts are given highly innocuous, idealistic, or patriotic names to conceal the true reason for their existence. To give an aura of legitimacy and respectability, Communists resort to the familiar practice of exploiting prominent persons. An impressive list of notable and distinguished persons is compiled to serve as window dressing for a front. Communists know that the names of scientists, educators, writers, clergymen, and other well-known individuals associated with a Communist front will have a favorable effect on the unsuspecting.

Before World War II, many Communist front organizations in this country were affiliated with various international Communist fronts. The enactment of the Internal Security Act of 1950, however, prompted American fronts to relinquish their formal ties abroad.

The current relationship between international fronts and their American counterparts is manifested in the World Youth Festival, which has been held every two years since 1947. These festivals, sponsored by two international Communist front organizations—World Federation of Democratic Youth and the International Union of Students—have been conducted solely for the propaganda benefit of Soviet Russia. A number of young Americans, many of them members of various Communist youth fronts in this country, have attended these festivals as delegates or visitors.

Espionage Activities

Espionage and sabotage are two more important Communist tactics. As the number one target of world communism, the United States naturally is the prime objective of Soviet espionage.

The U–2 incident seized by Khrushchev as the vehicle to sabotage the recent ill-fated Summit Conference further illustrates Communist deceit and hypocrisy. The Soviets stole the secrets of the atom bomb through espionage and numerous other scientific breakthrough. Even while Khrushchev was touring the United States on his peace mission in 1959, Soviet officials were violating their hospitality by carrying on espionage in that two Soviets were photographed by FBI agents when they were carrying on negotiations to secure the secrets of U. S. cryptographic machines.[73] The Soviet views espionage as it does "just" wars. If the espionage is to benefit the Soviet Union, it is just. If it harms the Soviet Union, it is unjust. While Communist spies denounce wire tapping, the Soviet Union installs microphones in United States Embassy Offices, as demonstrated when Ambassador Lodge at the United Nations produced the Great Seal of the United States from the office of our Ambassador to Russia containing a clandestine listening device.

Congressman Gallagher of New Jersey rendered a distinct service to the country when he inserted a long list of names of Soviet espionage agents who had been exposed in the CONGRESSIONAL RECORD of May 19, 1960. Much additional evidence of Soviet espionage has been publicly disclosed.

Since the United Nations presentation by Ambassador Lodge, the Senate Internal Security Subcommittee in June 1960, issued as a public document a 63-page Summary of Soviet Espionage sent to the Attorney General by J. Edgar Hoover. This document reflects great credit on the FBI in ferreting out espionage and it is obvious that the FBI knew and reported the existence of Soviet espionage.

On the other hand, the West German Defense Minister, Franz Joseph Strauss, was quick to charge publicly that there were 40,000 Soviet espionage agents working in West Germany and that more than 2,000 Red spies had been caught.

In recent years, an overall expansion of Soviet bloc intelligence activities against the United States has taken place. There has been a widespread use of "legal" agents operating under the guise of diplomatic status. Soviet defectors state that between 70 and 80 per cent of Russian officials in this country are members of Red Intelligence services. There are indications, further, of a general tightening-up of the organizational structure of the Soviet Intelligence apparatus.[74] [75] [76]

The importance that the USSR is currently attaching to the value of these intelligence agents is vividly borne out by the sharp increase in the number of Soviet diplomatic personnel assigned to this country in recent years. Intensified Communist espionage efforts in the United States expose the utter fallacy of the ear of so-called peaceful coexistence.[77]

[76] "Citizenship—A Call to Duty," Address by J. Edgar Hoover, Director, FBI, at the Biennial Convention of Junior Order United American Mechanics, Morris Harvey College, Charleston, West Virginia, June 16, 1959.

[77] Ibid.

Information sought by Communist espionage agents is extensive and varied, including the following subjects: Scientific research and development, with particular attention to atomic energy, missiles, radar defense, electronics, and aeronautics; the strength, deployment, training methods, strategy, and tactics of the Armed Forces, as well as ordnance, weapons, and military equipment; the intelligence and counterintelligence agencies of the United States, and possibilities for penetration; international relations of the United States; weaknesses of prominent Americans in their public and private lives that can be exploited for intelligence and propaganda purposes; and anti-Soviet political opposition groups, refugees from the USSR and satellite countries, and nationality groups in the United States.[78]

The techniques used in Communist espionage operations are typified by the case of Rudolph Ivanovich Abel, a Colonel in the Soviet Security Service, who was uncovered by the FBI in June, 1957, and is now serving a 30-year sentence for espionage.

Abel entered the United States by way of Canada on a passport which had been issued originally to a naturalized American citizen of Lithuanian extraction. Abel set up headquarters in New York City, ostensibly as a commercial photographer. In his properly equipped studio, he had three shortwave radios, a tape recorder, a miniature camera, a number of hallowed-out items—such as a wooden pencil, a shaving brush, cuff links, etc.—for concealing microfilm messages, along with other paraphernalia.

Twice a week, Abel tuned in to Russia on one of his radios, receiving carefully encoded instructions. Then, using a second code, he deciphered the messages for transmittal to his subordinates. When forwarding informa to the USSR, he placed his microfilmed data in one of the numerous "dead drops"—bottoms of park benches, under fences, and the like—designed by his Soviet superiors. These messages were eventually picked up and sent to the Soviet Union by other members of his espionage network.

It is significant that Abel can have visitors in the Atlanta Federal prison, although our Ambassador to the USSR as of June 12, 1960, has not been able to see Francis Powers, the pilot of the U2. Nor does the United States have knowledge as to how the confession was extracted from Powers although it is known that the Soviet spy Abel so far has remained silent and his rights are protected by our Courts.

Sabotage Potential

Although there is no conclusive evidence of Soviet-directed sabotage in the United States at the present time, in the event of a national emergency or a war with the United States, the USSR possesses capabilities to conduct sabotage and to otherwise disrupt the internal security and national defense efforts of our country.

Members of the CPUSA and its adherents are capable of organizing saboteur units or teams of varying sizes. Intensive sabotage could be expected to be timed or coordinated with a surprise Soviet military attack, coming just before, coincidentally with, or immediately after the initiation of open hostilities. The Soviet sabotage capability is enhanced by the vulnerability of American industry which makes possible strikes or slowdowns in many industrial plants.

In addition, Communists possess other disruptive or subversive capabilities, with their objectives of infiltration of the Government and the Armed Forces, the penetration of non-Communist organizations, and the use of front organizations. Communists could be in a position, and even now seek, to undermine the confidence of the American people in their Government, its policies, its institutions, and its leaders; to impede defense

[78] Masters of Deceit, op. cit., p. 302.

production, transportation, and communications through strikes or slowdowns; to reduce the efficiency of the armed services by adversely affecting morale and the will to fight; and to cause civil disturbances and panic.[79]

There are a number of obvious Communist sabotage targets in the United States.[80] Transportation sabotage targets include dock and other shipping facilities, important railroad junctions and yards, bridges, canal locks, and airports. Communications sabotage targets include transmission lines, power stations, and the more important controls and switchboards. Sabotage targets in basic industries, without which a modern war cannot be successfully waged, include supplies of coal, iron, steel, and related items. Vital defense installation targets include atomic energy, electronic, and chemical plants. Sources of food and water supply targets include warehouses, grainfields, cattle and sheep herds, reservoirs, and sewerage systems.[81]

World Conquest

The ultimate objective of communism, made abundantly clear by its principles and by its tactics and strategy, is world domination. Communist teachings, from the time of Marx, have consistently proclaimed that capitalism is moribund and is historically destined to be superseded by communism.

Khrushchev has been particularly voluble on this point. During his visit to the United States last year, he repeatedly stressed the theme that "capitalism is an outmoded system which is doomed to inexorable death" and that "the future belongs to communism."[82] In the same vein, William Z. Foster has predicted that the capitalist system is dying "regardless of its desperate struggle to survive."[83]

This optimistic view is explained by the Communist dogma that the triumph of communism is inevitable because it has already been determined by laws as valid as those which govern the physical sciences. It is for this reason that Communists regard themselves as "riding the wave of the future" toward their "rendezvous with destiny."

Communist propaganda does not stop with the claim that communism is invincible and that its triumph is inevitable. Its propaganda attempts to depict the Communist orbit as a world of peace, progress and prosperity in contrast with the non-Communist world, which is allegedly characterized by social unrest, economic exploitation, and political upheaval. Through this technique, the ultimate victory of communism is represented, not only as a historical inevitability, but as the conquest of right over wrong and of good over evil.

Communists realize, however, that, in order to attain their ultimate goal, they must accomplish a number of short-range, more immediate objectives designed to leave the non-Communist opposition hopelessly weakened, divided, and confused in the face of the Communist challenge. These transitional goals will, naturally, vary to some degree in different non-Communist nations, depending on local conditions. For this reason, the discussion of these short-range aims has been limited to those which are generally valid throughout the non-Communist world.

Cripple National Defense

Communists respect only power, and hence they are well aware that strong non-Communist military forces are the strongest deterrent to their program of world conquest. Conversely, the weaker a nation's defense, the easier it becomes for Communists to seize power either from within or from without.

Communists therefore try in all possible ways to demoralize and weaken the armed forces of non-Communist nations. They follow Lenin's dictum that Communists cannot "attain power or consolidate it except by absolutely disintegrating the old army."[84] The Comintern in 1920 outlined the steps to subvert armed forces by indicating that a "persistent and systematic propaganda and agitation is necessary in the army, where Communist groups should be formed in every military organization."[85]

In the United States, propaganda and agitation aimed at the armed forces have always been designed to lower morale, undermine discipline, discredit officers, exploit petty grievances, promote pacifism, and even incite rebellion. Immediately after World War II, Communist propaganda capitalized on the natural desire of American soldiers to return home from overseas. Protest demonstrations by American servicemen took place in the United States, in Europe and in the Far East. As a consequence, our military strength was drastically reduced over the vigorous objection of our military leaders.

Today, Communist propaganda paints an enticing picture of the great number of schools, hospitals, and roads which could be constructed in the United States if the money being expended for our defense and for military assistance to our allies could be diverted to "peaceful" purposes. But American Communists soft pedal the tactics of Khrushchev's saber rattling; the Soviet armament race which places an economic burden through higher taxes upon every American family.

Throughout the postwar years, Communist propaganda has unqualifiedly condemned every action we have taken to strengthen ourselves and our allies against the threat of further Communist aggression. The obvious Communist objective is to weaken the national defense not only of our Nation but of the entire free world in preparation for further Communist aggression.

During the past several years, Communists have engaged extensively in espionage activity in order to procure the military secrets of non-Communist nations. While ostensibly our allies during World War II, the Soviets were successful in obtaining information regarding our most closely guarded secret, the atom bomb.

Communist espionage has not been limited to the United States, however. In August, 1954, for instance, a former intelligence officer in the Japanese Army confessed to spying for the Soviet Union. In March, 1956, the Government of Iran expelled the Assistant Military Attaché of the Soviet Embassy for spying. In December, 1956, a Finnish citizen was convicted of furnishing the USSR secret information on Finland's military forces. In January and February, 1957, two Soviet diplomats were expelled from Denmark for espionage activity. In January, 1957, two Swedish engineers, employed by the firm which was constructing Sweden's underground air and naval bases, were arrested as Soviet espionage agents. In November, 1958, a Swiss Army officer confessed that he had furnished classified military data to Czech espionage agents.[86]

Yet, in the face of the demonstrated military might of the Communist bloc and the use to which it has been put in North Korea, North Vietnam, East Germany, Hungary, and Tibet, Communist propaganda advances the lie that Communist military forces are maintained only for "defensive" purposes.

Weaken Internal Security

As the nation which is the principal barrier to further Communist expansion, the United States is being tested daily by persistent attacks on the domestic front from the CP, its fronts, and sympathizers. These onslaughts are aimed at weakening our internal security programs so that Communists will be unmolested in their subversive activities. The primary targets of these attacks are our courts, the Congressional committees which have been so successful in keeping abreast of Communist activities in this country, the laws and regulations which comprise our security programs, police departments, the armed services, and the FBI.

In Communist propaganda, American courts are branded as "class instruments" dedicated to the preservation of the capitalist system and its exploitation of the masses. Congressional investigating committees are picketed and condemned for conducting "red-baiting" investigations. The laws and regulations designed to keep our Government free from Communist infiltration are under continuous Communist fire as "repressive" and "reactionary." Communist smear campaigns are specially bitter in their assaults on the FBI. Their deliberate aim is to discredit the FBI in its responsibilities for protecting the Nation's internal security in the hope of causing its withdrawal from this vital field.

All of these attacks, of course, are in line with the basic Communist objective of destroying those elements in any free society which are actively resisting the further propagation of communism.

Undermine National Economy

A strong, vigorous economy is one of the soundest bulwarks against the Communist penetration of any non-Communist country. For this reason, another short-range Communist objective is to weaken and disrupt all non-Communist economies as "proof" that capitalism is incapable of ministering to the best interests and welfare of the working class.

Communists incite strikes and slowdowns to disrupt industrial production and create economic unrest. During 1959, for example, Soviet and satellite diplomats were expelled from both Mexico and Argentina, when they were detected directing street riots and industrial strife in conjunction with local Communists.[87]

The extensive program of Communist economic aid to under-developed nations is now being accompanied with propaganda warnings of the alleged harmful effects of aid from non-Communist nations. Communist economic aid which is given, however, is intended to enhance the popularity of Communist nations, as well as to encourage the development of the economies of non-Communist countries along the Communist pattern.

In a gross oversimplification, Communist propaganda claims that Western—particularly American—economic aid is planned to keep underdeveloped nations in a permanent

[87] The New Leader, April 4, 1960, p. 8.

colonial status because it is concentrated on agricultural or light industry rather than heavy industrial development. Communist propaganda contends that only Communist nations are genuinely interested in advancing the heavy industrial development of underdeveloped countries. In short, Communism seeks to identify itself with nationalism and to align the West as opposed to self-determination.

Yet, if underdeveloped nations accept long-term Communist aid for investment in heavy industry, the almost inevitable effect is that native labor, transportation, power, and raw materials will be devoted, to a large extent, to such enterprises which hold no immediate promise of an improvement of the general standard of living.

This, of course, was the decision of the Soviet leaders when they decided to transform the USSR into an industrial nation at the expense of the living standards of the people and is the policy which is being pursued today in Red China.[88]

International trade is also used by the Communist bloc as both an economic and a political weapon. For them, foreign trade is a form of economic-political warfare intended to promote international communism. Since Communist foreign-trade agencies are controlled by the State, Communist nations can buy, barter, or dump any commodity at the appropriate time to exploit any economic vulnerability of the Free World nations.

In payment for Czech military aid in 1955, Egypt sold its cotton to the Soviet bloc below the world price. Later, when the market price rose, the Czechs sold the Egyptian cotton to West European countries lower than the world price, at a profit despite their agreement not to sell to Egypt's regular customers.[89] Another case involved tin, of which the Soviet Union has been a traditional importer. Yet, during 1957 and 1958, the Soviet Union sold sizable quantities of tin on the world market at well below the market price. This maneuver substantially disrupted the export markets of such nations as Malaya, Indonesia, Thailand, and Bolivia, causing serious economic and social repercussions in these nations.[90]

Communist bloc nations, at the same time, are attempting to develop their own economies in an effort to prove that communism has the answer for those countries which are striving to transform themselves from an agricultural economy to a growing industrial economy in as short a period as possible.

Exploit Racial Strife

Communism resorts to a cynical exploitation of racial strife in its ceaseless efforts to advance Red totalitarianism. Racial violence, hatred, and bigotry throughout the world are grist for the Communist propaganda mill. Such incidents are used by Communists to show Communist "concern" for the victimized race, to turn that "concern" to political, economic, and propaganda advantage, and to inflame the victimized race against non-Communist governments.

In the United States, the Negroes, the largest minority group in the country, have been subjected to intensive and extensive communist agitation and propaganda. Communists have tried to make the Negroes more conscious of discrimination and to create in them an attitude of bitter resentment and hostility toward the rest of American society. They hope that this will encourage Negroes to look to the Communist Party for leadership.

An additional objective of Communist exploitation of racial strife in this country is to produce an anti-Americanism effect on the rest of the world, especially among the nations of Africa and Asia. Any hatred which can be generated against the United States is, of course, helpful to the cause of world communism.

Communist efforts to exploit the grievances of minority groups throughout the free world are particularly hypocritical in light of the repression of the national minorities in the Soviet Union and incontrovertible evidence of widespread anti-Semitism there and in the European satellite nations.

Create Domestic Disunity

A nation strongly unified in all the basic aspects of its national life is not susceptible to easy conquest either by a fifth column or by another nation of equal military strength. Communists recognize that the chances of seizing power militarily, by insurrection, or peaceful means are much greater if they have first divided and weakened the target nation as much as possible—socially, economically, and politically.

For this reason, communists make every effort to demolish national unity, to divide a country's citizens into bitter, warring factions so that they cannot unite in a common effort to defend their freedom from destruction. Lenin said that for communists to conquer a more powerful enemy they must take advantage of and exploit "even the smallest 'fissure' among the enemies."[91] In keeping with this objective, communists seek everywhere to divide nations into opposing factions: labor and management, Negro and white, young and old, native born and foreign born, "liberals" and conservatives, "people" and government, students and teachers, etc.

Much labor strife in this country in the past four decades can be attributed in part, at least, to communist success in disseminating the Marxist doctrine that there is a natural, fundamental, and irreconcilable antagonism between labor and management. This is not to imply that labor in general has been imbued with communist ideology or has been responsible for most labor-management difficulties. But it is an indisputable fact that a number of unions in the Congress of Industrial Organizations were, until their expulsion in 1949–1950, dominated and controlled by communists who used their positions to promote class hatred and labor antagonism toward management.

Discredit United States Foreign Activities

Communists throughout the world are continuously attempting to discredit the United States in the eyes of the world in order to lower our Nation's prestige and influence. To accomplish this, communists belittle or derogate United States activities abroad, claiming that this country is motivated by purely "selfish," "aggressive," imperialistic" interests and is desirous only of enslaving, economically and politically, the rest of the world. The world-wide communist propaganda machine strives assiduously to plant the seeds of anti-Americanism in the minds of people in every country.

Communist criticism of United States foreign affairs also has the secondary objective of reducing the free world's resistance to communist subversion and aggression. The Soviet Union has the assistance of the CPUSA and other Communist Parties around the world to heap vilifications upon our Foreign Service. Honest differences and disagreements between this country and other nations are magnified beyond all proportion and truth. The emotions of various peoples are aroused by communists to strain the traditional bonds of friendship the United States enjoys with so many other countries. The manifestation of anti-American sentiments gives communists an opening wedge in their efforts to shatter the unity of noncommunist nations in the defense against world communism.

On the occasion of President Eisenhower's visit to Latin America in February 1960, Radio Peking broadcast in Spanish that the President was trying to "deceive the peoples of Latin America" with promises of friendship. At the same time, the radio said, "The Latin-American people know well that the trips of the so-called peace messenger are synonymous with increasing war preparations" on the part of the United States.[92]

The storming of the American Embassy in Tokyo, Japan, was carried on by a communist-inspired and organized mob designed obviously to discredit our President on his trip, and their success was a slap in the face to world recognized leadership our President has given to furthering peace.

The communist campaign to discredit the United States throughout the world has also been accompanied by propaganda bent on emphasizing the "superiority" of life in the communist bloc. Moreover, the noncommunist world is reminded that only communists can offer true and lasting solutions to the world's pressing problems. The 21st Congress of the CP of the Soviet Union in 1959 spelled out that claim in a resolution to the effect that "the ideas of communism have become the leading force of our time."[93]

This propaganda has been implemented by practical efforts to crystallize such divergent elements as revolution, nationalistic patriotism, dissatisfaction, and idealism throughout the free world into at least a conscious anti-American or at best a strongly pro-communist pattern of activities. Trade exhibits, economic and technical assistance, exchange of visitors, and diplomatic maneuvers are all designed to portray communist nations as genuinely interested in "peaceful" coexistence and competition as opposed to the "warmongering" activities of the United States.

Neutralize World Organizations

Communists look upon noncommunist international organizations such as Red Cross, the Boy and the Girl Scouts, and numerous others as instruments of the capitalist world and therefore obstacles to the propagation of communism. These organizations, of course, are motivated by the loftiest of ideals and are dedicated to the betterment of all mankind. Communists reason that, since these organizations are not under communist control, they must be capitalist-dominated and hence anti-communist.

The Red Cross, despite its long record of good works and public service, has been maligned repeatedly by communists. In this country, communist propaganda has alleged that the Red Cross "discriminates against strikers, radicals, foreigners."[94] The Boy and Girl Scouts, who provide important moral and practical training in preparation for life in a democratic society, have been derided by communists as preparing "staunch defenders of and fighters for capitalism."[95]

[95] Daily Worker, March 25, 1927, p. 4.

The Soviet Union has sabotaged the work of the United Nations since its very inception. Its chief weapons have been the veto, cast nearly 90 times, and the boycott, whereby Soviet delegates have walked out of Security Council proceedings. In addition, the USSR has refused to participate in such United Nations agencies as the International Monetary Fund, and others.[96]

The irony of the communist bloc's refusal to collaborate fully with the United Nations is that communist countries never lose an opportunity to use the United Nations as a sounding board for their propaganda. Thus, world communism has abused the prestige of the United Nations for its own purposes and contributed little, if anything, to increase the United Nations as an agency dedicated to promoting world peace.

Destroy Unity of Free World

The most powerful deterrent to world communism is the unity of the free world, headed by the United States. Mainly through the efforts and determination of this country, acting by itself or in concert with friendly nations, the advance of communism throughout the world has been slackened. To a great extent, opposition to communism has been possible because of economic, military, and political alliances between free world nations which are fully cognizant of the inherent falsity of communist claims and of the danger which world communism represents to the freedom and liberty of all mankind.

Communists continually strive to drive wedges between noncommunist nations by fomenting distrust or dissension among them. Khrushchev's deprecation of West Germany during his recent trip to France illustrates the communist intent to split the West. Khrushchev has tried to arouse the age-old enmity of the French against Germany by creating new distrust and fear of a strong, prosperous West Germany. Communists everywhere have exploited recent antisemitic incidents in West Germany, claiming that the alleged resurgence of Nazism is a threat to world peace. Meanwhile, the world's most prolonged antisemitism continues in the Soviet Union. Senator THOMAS J. DODD in a scholarly report asked the question: "Did the communists instigate the epidemic (of swastikas) or did they simply exploit it for 'cold war' purposes?" [97]

Communists endeavor to persuade uncommitted countries to become neutral or anti-American, if not pro-communist. On his recent Asian tour, Khrushchev boasted of Soviet industrial and economic might, while portraying the United States as a declining power. Moreover, he continually referred to the USSR's devotion to "peace" and its policy of peaceful coexistence, reciting the unilateral reduction of Soviet armed forces, his proposal in the UN for total disarmament, and the Soviet plan for banning nuclear testing. To keep neutral Indonesia and Afghanistan in line, Khrushchev granted $250,000,000 in credits to the former and reminded the latter of past Soviet credits, adding that more economic aid could be extended by further agreement.[98]

Nations of the free world have, of course, many different values. They are united, however, in their determination to preserve the one overriding value they all enjoy—freedom. This mutual, steadfast determination to preserve freedom is the free world's most potent weapon against additional communist expansion. It is for this reason that communists are devoting such a large portion of their time, energies, and funds to their efforts to disrupt the solidarity of the noncommunist world.

LAW AS A COMMUNIST WEAPON

Law as an Instrument of Peace

In their relentless quest for world domination, communists seek the fullest protection of the law as a weapon to aid their cause. In the countries over which they have established control, they use it as an instrument of force. In the countries they are seeking to subvert, they abuse it and use it to shield their subversive activities. It is, therefore, a double-edged weapon which communists wield with ruthless efficiency to undermine the foundation stones of democracy, liberty and freedom.

To comprehend fully the overall threat which communism presents, it is vitally important to understand the extent to which communists use law as a weapon in their relentless attack upon the free world.

Communists analyze the subject of law and judicial process from the same perspective they analyze all other aspects of human relations. To communists, the law is not rooted in the mind of man per se. On the contrary, it is rooted in the material conditions of life. All judicial and political concepts and practices are viewed as outgrowths of the economic structure of society. To communists, law of its very nature is inseparable from the state, and as the state is an organ of force, law amounts to nothing unless there is force behind it to compel obedience. Therefore, behind the present-day legal structure of communism, there is the iron fist of the dictatorship of the proletariat, i.e., the ruling CP.

In view of Lenin's statement that "dictatorship is power based upon force and unrestricted by any laws," the inference is clear: Communists regard force as primary and law as secondary. Law is merely the instrument of force. This interpretation of law is in direct contradiction to the legal concepts of Western civilization.[99]

The late Andrei Y. Vyshinsky, the purge expert and one-time prosecutor for the USSR, stated that "law is merely the will of the dominant class, elevated into a statute." There is ample evidence that the party directs the law both in legislation and in administration. Whatever party officials want enacted into law is enacted by the state-controlled legislatures; whatever the party wants the courts to do with criminals is done.[100]

The Soviet Constitution contains one very elastic clause which can be utilized to accomplish anything the Soviet rulers desire under guise of lawful authority. Chapter 1, Article 11, provides: "The economic life of the U.S.S.R. is determined and directed by the State national-economic plan, with the air of increasing the public wealth, of steadily raising the material and cultural standards of the working people, of consolidating the independence of the USSR and strengthening its defensive capacity." [101]

Thus the Soviet Constitution establishes legitimacy for anything they wish to accomplish under the broad provision "strengthening its defensive capacity."

Role of Soviet Courts

The courts, according to Soviet legal authorities, must follow the CP's directives, Vyshinsky said:

"A court of whatever sort is an organ of the authority of the class dominant in a given state, defending and guarding its interests." [102]

Another Soviet authority has stated:

"In our Soviet State the courts are considered a part of the leading political apparatus and care should be taken, by appropriate measures, that the courts actually are instruments of the policy of the Communist Party and the Soviet Government." [103]

Role of Soviet Public Prosecutor

An integral part of the courts in the U.S.S.R. is the public prosecutor. According to Lenin, this official has the responsibility of seeing that "not a single decision of a single local authority be divergent from the law." The public prosecutor, established by the Soviet Constitution, is organically bound to the courts.

The public prosecutor has the duty of carrying out tasks conferred on him by the CP or by the Soviet Government. This means that the party, while not exercising penal powers, nevertheless gives instructions to the public prosecutor to execute party wishes, even to purging Party members. It is the obligation of the prosecutor to advise the court of the policies of the party and the Government so that the Communist regime may be protected and enhanced.[104]

Role of Soviet Judges

In the U.S.S.R., all judges are "elected"; however, it is obvious that only those judges are permitted to run for office who are subservient to the regime, and who are approved by Communist Party leaders. In other words, the "election" of judges is actually an appointment of judges who will render the "right decisions" for the Communist cause.

The Soviet system also provides for the "people's assessor," who enjoys all the rights of a judge and participates in hearing and deciding cases before the court. The assessor, too, is "elected." One judge and two assessors serve the state in hearing and deciding cases.[105]

Soviet Judicial System

The jury system is called by Communists a "bourgeoisie-democratic" feature which perhaps had value after the end of feudalism, but not for a socialist society. Vyshinsky condemned the jury system as "the bulwark of that order of social relationships which rests on private capitalist property."

Soviet trials are marked by the objectionable feature that the accused appears in open court following a secret pretrial investigation, during which he is denied the aid of legal counsel. Except for reasons of state, cases are examined in open court after such secret pretrial. This allegedly "guarantees" the legality of trials and supposedly "insures" that the rights of citizens are "respected."

In the Soviet Union when the matters under examination concern military and other state secrets, as well as sex crimes, the trials can be held in closed courts. Since it is possible for the CP or the Government to label almost any criminal offense a crime against the state and one involving state secrets, in practice Soviet citizens can easily

be denied the open trials so blandly prescribed by the Soviet Constitution.[106]

Toward a Soviet America

It is not difficult to speculate as to what type of legal system communists would install in this country should they ever achieve their goal of a communist America. William Z. Foster, chairman emeritus of the CPUSA, visualized such a possibility and described it in his book, "Toward Soviet America":

"The Soviet court system will be simple, speedy, and direct. The judges, chosen by the corresponding Soviets, will be responsible to them. The Supreme Court, instead of being dictatorial and virtually legislative, as in the United States, will be purely juridical and entirely under the control of the C.E.C. (Central Executive Committee). The civil and criminal codes will be simplified, the aim being to proceed directly and quickly to a correct decision. In the acute stages of revolutionary struggle special courts to fight the counter-revolution will probably be necessary. The pest of lawyers will be abolished. The courts will be class-courts, definitely warring against the class enemies of the toilers." [107]

Use of Courts for Propaganda Purposes

The complete contempt and disrespect of the communists for the American judicial system has been displayed time and time again since the beginning of the American communist movement. No better propaganda opportunities present themselves than trials involving leaders or members of the CP. Communists regard such trials as public forums from which they can proclaim the communist ideology.

"A Communist must utilize a political trial to help the revolutionary struggle. Our tactics in the public proceedings of the law court are not tactics of defense but of attack. Without clinging to legal formalities, the Communists must use the trial as a means of bringing his indictment against the dominant capitalist regime and of courageously voicing the views of the Party." [108] William L. Patterson, former national secretary of the International Labor Defense (ILD) and later executive secretary of the Civil Rights Congress—both activities in defense of communists—once observed:

"The class struggle begun on the streets or in the shop is carried into the courtroom."

"A lawyer has to concern himself only with the juridical aspects of the case. He is not asked to engage in the political defense of the accused, but his legal defense of the accused, because of the nature of the cases the ILD is engaged in, becomes at once political.

"The ILD believes that only mass pressure can bring about the release of a class war prisoner; that pressure must be supplemented by legal defense. The legal defense must be of the most expert character. Every legal technicality must be used." [109]

The agitation and propaganda benefits to be gained from the courtroom were first recognized in this country at the trials of communist leaders who were arrested in August 1922, during the national convention of the CP in Bridgman, Michigan. The party's top echelon considered the question of the policy to be followed during these trials and concluded that advantage should be taken of the opportunity to reach the American people with communist propaganda. Charles Ruthenberg, then the party's general secretary, and other communist officials thereupon took the witness stand to state the fundamentals of communism. The testimony they gave received extensive publicity, with the result that millions of Americans, for the first time, were subjected to communist propaganda.[110]

Communist defendants usually demand a trial by jury to enable defense witnesses and their lawyers to propound communist tenets to the judge, jury, and spectators. Sometimes the defendant pleads his own case. Trials of communists arrested during clashes between police and demonstrators are widely publicized in the communist press. During such trials, communists seek to use the courtroom as a means of protesting against "brutal" police methods.

The celebrated Smith Act trial in New York City in 1949 affords a perfect example of Communist tactics in American courts. The trial involved 11 members of the national board of the CPUSA who had been indicted for violating the Smith Act. The trial began in January 1949, and ended the following October with the conviction of all defendants. The trial was the longest Federal criminal case in United States history. Press coverage was the most complete since the 1935 trial of the Lindbergh kidnapper.[111]

Eugene Dennis, one of the defendants, acting as his own counsel, made the opening address to the jury. He stated that he and his codefendants would show that the CP "is the political party of the most forward-looking American workers—and that it does not bear the remotest resemblance to the fantastic 'conspiracy' painted by the prosecution." [112]

A number of contempt citations were handed down by Judge Harold R. Medina, the trial judge. During the course of the trial, Judge Medina found it necessary to jail four of the defendants for contempt of court. The defense counsel themselves were adjudged guilty of 40 different contempts. At the conclusion of the trial, certain defense attorneys and Dennis were sentenced for contempt of court.[113]

Thousands of telegrams and postcards were sent to Judge Medina by Communists and their sympathizers. Within one day, after jailing three of the defendants, John Gates, Henry Winston, and Gus Hall (now general secretary CPUSA) for contempt of court, the judge received more than 3,000 telegrams, all defamatory or insulting.[114]

The trial was the most picketed trial in American history. Almost daily, there were communist demonstrations and picket lines in Foley Square in front of the United States Courthouse where the trial was held. At times, pickets numbered several thousand. Scores of policemen, mounted and on foot, had to be assigned to control the crowds.[115]

At the 1952 Smith Act trial—also held in New York City—of another group of secondary communist leaders, the CP was disappointed at the failure of the trial to produce as much publicity as it had hoped for. As the trial progressed and the lack of publicity became apparent, the defense strategy changed. Party leaders decided that the trial should be terminated as speedily as possible.

Communists always strive to have the final word at their trials, the occasion of the sentencing of communist defendants is invariably used by them to proclaim their innocence and to dramatize their convictions as "political" or "class war" prisoners.

At the 1949 trial of the communist leaders, the defendants were determined to squeeze the last ounce of propaganda from the sentencings. Two of them, Gilbert Green and Henry Winston, addressed the Court before their sentences. Green declared that he was "guilty of no crime" but was being imprisoned because of his "political beliefs." Winston stated that he stood before the judge "branded as a criminal who committed no crime whatever." [116] When Robert Thompson, another defendant, rose to address the court with a long prepared statement before sentencing, the judge pointed out that the court had no desire to hear a political speech. The entire text of Thompson's speech was later printed in a communist publication.[117]

Communist Defense Tactics

The CPUSA, viewing the United States as the "enemy," has devised various methods for evading exposure and prosecution at the hands of this "enemy." The International Labor Defense, the forerunner of all communist legal arms, published a pamphlet some years ago entitled Under Arrest! How to Defend Yourself in Court! What To Do When Arrested and Questioned! This document is the basic outline followed by communists over the years. According to this pamphlet, the policeman "is a servant of the boss class" and "is your enemy." Defendants were instructed to give their name but nothing more, not even an address. "Have no faith in fake promises of the cops or the district attorney," was the warning issued. Defendants were urged to demand a jury trial so as to "have much more opportunity to raise class issues." [118]

This pamphlet provides the key to the defiant attitude exhibited by communists in court. The "capitalist courtroom" must be used "as a forum from which the workers on trial expose before their fellow toilers the true nature of the courts—as a tool in the bosses' economic and political oppression." Communists were urged by the pamphlet to quote the Declaration of Independence, Thomas Jefferson, Abraham Lincoln, and Woodrow Wilson in support of their right to revolution.[119]

Reminiscent of the procedure followed to the letter by the defense in the 1949 Smith Act trial, causing weeks of delay, the pamphlet instructed that the "defense" challenge the entire panel of prospective jurors on the ground that it is composed of people whose social and economic interest will prejudice them against the defendant." [120]

Role of Communist Lawyer

Although very few of the more than 200,000 lawyers in the U.S. are communists, these few communist lawyers have given much aid to the Communist Party. They have given assistance to the party's organizational apparatus and projects, to its numerous front groups and enterprises, and to the promotion of the communist cause in the judicial, legislative and executive agencies of our Government. More than 100 communist lawyers were identified in sworn public testimony before the House Committee on Un-American Activities in the

[120] Ibid., p. 89.

decade from 1947 through 1957. Since a communist owes his primary loyalty to an international revolutionary conspiracy, the anomaly of a communist lawyer is apparent. A communist lawyer's first allegiance is to the CP itself and in direct conflict with his oath to uphold the Constitution.

A group of Los Angeles lawyers, who had quit the CP in disillusionment in the latter 1940's described their party experiences. Most of them had been recruited into the CP after other lawyer members had induced them to attend informal "legal" discussion groups where they were gradually exposed to Marxist philosophy. When they actually joined the party, the new recruits were placed in a special lawyers' group, whose membership was kept secret. There they received intensive indoctrination aimed at guiding their thinking along accepted CP channels. Communist lawyers are not allowed to disagree with party theory and policies. They either abide by party dictates or leave the party.

The behavior of defense counsel in the 1949 New York Smith Act trial was in complete accord with the party's standard courtroom strategy. Throughout the long trial, a group of defense lawyers indulged in a spectacular display of abusive and disruptive conduct. These lawyers were determined to interrupt the legal proceedings by any means and to introduce communist propaganda at every opening as long as the trial continued.

The CP's position regarding congressional committees investigating subversion has always been to challenge the very existence of such bodies. It has also instructed its members, who are subpoenaed to appear as witnesses before these committees, to refuse to furnish any information relative to communist activities. To insure complete resistance to congressional committees, communist lawyers are often assigned to communists who have been subpoenaed.

In appearances before the HCUA as counsel to uncooperative witnesses, many Communist lawyers have further violated the ethical standards of the bar by a display of contemptuous and abusive behavior. The HCUA on occasion has found it necessary to have such counsel escorted from its presence in order to permit a hearing to proceed.

In an effort to obtain a picture of some of the special services which can be performed for the CP by members operating from the vantage point of the legal profession, the HCUA reviewed the public record of a number of lawyers who have been identified as party members in sworn testimony. This record shows that such lawyers have:

Capitalized on their membership in the legal profession to recruit fellow lawyers into the CP;

Misapplied their legal training by assisting communists to circumvent the law in order to carry out Party objectives;

Served in secret communist cells aimed at espionage and influencing United States policy toward communist goals, while holding responsible legal positions in the United States Government;

Carried out important duties as functionaries of the CP itself;

Acted as legal advisors to, and accepted leadership roles in, communist front organizations built around civil rights and other popular themes and issues;

Exploited the prestige of their profession in the course of running for public office;

Devised legal bulwarks for the protection of the Communist Party, its members and organizations under its control.

Thus, although relatively few in number, communist lawyers have been of substantial assistance to the communist cause. While some activities involve the promotion of communist aims in fields far removed from the atmosphere of courts or administrative and congressional hearing rooms, a basic element in all of them has been a deliberate exploitation of the lawyer's special status as a member of the bar. This is well illustrated by the past activities of some members of the National Lawyer's Guild who have lobbied against executive and legislative programs designed to curb the effectiveness of the communist conspiracy in this country.[121] Under the mantle of the legal profession, the communist can operate as an ostensibly respectable and influential member of the community, despite his dedication and subservience to communist doctrine and directive.[122]

Communist Attacks on Constituted Authority

Communists constantly deride the system of law and order that prevails in this Nation. The founders of our form of Government, for example, have been characterized in the communist press as those who prepared the country for "the capitalist frame-up."[123] The Constitution of the United States has been described as "the handiwork of a family circle of land speculators and bankers who carried its adoption in the face of intense opposition by the threat of withdrawing credit from those who failed to support its ratification."[124]

The Supreme Court, congressional committees, and law enforcement agencies find that they are daily targets for communist vituperation. The Supreme Court, for instance, is depicted as "striking heavy blows at American freedom" when a decision it renders restricts communist activities.[125] However, when the Supreme Court reversed the Yates case on June 17, 1957[126] on the ground that teaching and advocating the abstract doctrine of forcible overthrow of the U.S. Government was not punishable under the Smith Act, a top communist functionary termed it the greatest victory the CPUSA ever won.[127] The Daily Worker editorialized on June 19, 1957, as follows: "The curtain is closing on one of our worst periods." And, the Sunday Worker on May 11, 1958, condemned legislation to remedy defects in laws protecting national security as disclosed by Supreme Court decisions.

Congressional committees are labeled by communists as "the stooges of the American imperialist interests for whatever 'job' is to be done anywhere in the world in the name of 'saving the world from communism'."[128]

Communist front groups play a major role in efforts to destroy the confidence and respect of the public in constituted authority. The degree to which this phase of Communist activity exists in our country today is revealed by the testimony of J. Edgar Hoover earlier this year that the FBI then had under investigation 160 known or suspected Communist-infiltrated organizations.[129]

A particularly deadly weapon used by Communist front organizations in incursions on constituted authority is the smear attack. One of the most recent attacks of this nature was a major campaign designed to cripple the antisubversive programs of Congress, abolish the HOUA, and discredit J. Edgar Hoover and the FBI.

The campaign was launched in the fall of 1957 by a Communist front known as the Emergency Civil Liberties Committee (ECLC). Mass meetings throughout the country, a barrage of letters and petitions to Members of Congress and public officials, and similar agitation and propaganda activities were sponsored and encouraged by the ECLC in an attempt to undermine the security programs and weaken the security agencies of the Federal Government. The goals of the ECLC were:

Destruction of the HCUA;

Extinction of the investigative powers of Congress and the states in the field of subversive activities;

Restriction of important functions of the FBI in its investigation of subversive activities;

Creation of a general climate of opinion against the exposure and punishment of subversion.[130]

The mass mob attack and disruption of the hearings of the HCUA in San Francisco earlier this year reflected the growing brazenness of Communists in this country. This mob action was in the pattern of the Communist mob action in Japan insulting the President of the United States and recent similar cast in Italy.

Beachhead of Subversion

What it would mean to this country if Communists were successful in eliminating the FBI operations in this area are revealed. J. Edgar Hoover testified before the House Subcommittee on Appropriations early this year that during the 1959 fiscal year alone, 97,438 security matters were received by the FBI for investigation.[131]

Mr. Hoover pointed out that the FBI's "operations over the years have clearly revealed that the Communist Party of the United States is a tightly knit, hard core of conspiratorial Reds committed without question to the international goal of ultimate world domination." Mr. Hoover added that "As long as this Soviet-dominated apparatus exists in the United States, there will remain among us an aggressive force of dedicated fanatics, constantly at work to destroy the American way of life. It is a beachhead of subversion within our Nation."[132]

Meeting of the Communist menace

Fountainhead of Freedom

The massive challenge which the world communist conspiracy hurls at the world today must be met. The massive offensive of subversion directed at this Nation must be exposed and destroyed. Otherwise, freedom will disappear not only in this country but also in the entire world, for the United States stands today as the principal if not the only power capable of preventing the Red tide from engulfing the universe.

The fainthearted in our society may question whether or not the job can be done—whether or not we can successfully meet the challenge and turn back the offensive directed at us by world communism.

The scholarly and well documented study prepared by the Foreign Policy Research Institute of the University of Pennsylvania recently issued by the Senate Internal Security

Subcommittee makes the following interesting observation:

"The Soviets have assiduously exploited the world's fear of nuclear war to the extent that numbers of people have come to feel, like Bertrand Russell, that it would be preferable to let communism take over the world rather than to resist and risk a nuclear exchange that would mean the end of civilization. This, undoubtedly, is the conclusion that Khrushchev would like to see more generally accepted." [133]

Former President Herbert Hoover gave the answer to such a viewpoint in a speech in February 1960. The fundamental strength of the American people, he said, has sustained us through crisis after crisis in the 184 years this Republic has existed. We can, he said, defeat our enemies, including what he termed the spread of the Karl Marx virus in our society, by sustaining and expanding the fundamental strength of the American people. But to do this, he admonished, we must take a firm stand against the evils that beset us and reaffirm our devotion and dedication to freedom of men.[134]

Former President Hoover's emphasis on the need to reaffirm our dedication to freedom of men was an extension of the key thought expressed by President Eisenhower in his state of the Union message last January. President Eisenhower declared that "our own constitutional system, and the ideals which sustain it, have long been viewed as a fountainhead of freedom." [135]

Protect Our Constitutional System

To maintain this "fountainhead of freedom" which our constitutional system represents is the responsibility of every citizen, but it is the special responsibility of the ABA, whose members are sworn to uphold and defend it. We must reinforce the judicial process against Communists who abuse this freedom in seeking to destroy it.

The bar must be alert to its particular responsibilities to defend vigilantly our liberties and traditions. The terrible consequences of the success of the Communist movement should lead the bar to a new and deep appreciation for the existence of our form of government and the freedom of the individual under law.

Ours is a form of government that acknowledges each individual soul and respects human dignity destined by the very nature of man to be full of creativeness, diversity, change, and growth. It is with this realization that such basic individual rights as freedom of speech, of the press, of assembly, and of religion take on new meaning. The American judicial process holds these rights in trust for the use of the American people.

Correct Deficiencies in the Law

With the knowledge that the communists use every legal loophole to further their conspiratorial efforts in our society, we must dedicate ourselves to eliminating the loopholes that now exist. The Special Committee on Communist Tactics, Strategy and Objectives of the ABA in earlier reports has focused attention on such weaknesses and will continue in this effort until they have been eradicated.

While encouraging response has followed previous recommendations of this committee, there has been no final corrective action by the Congress and these issues have not been pressed to completion. Communists never let up in the constant struggle against us. The American Bar must not let up in its determination to block them at every turn. For this, deeds, not mere words, are required.

Therefore, we reiterate our pleas that the recommended legislative action approved by the House of Delegates in February 1959, be adopted in the following areas:

Smith Act of 1940

The word "organize" should be defined to include a continuing process so that the statute of limitations cannot be successfully invoked. The Supreme Court held that the CPUSA was organized in 1945—the year the CPUSA was reconstituted after a year's existence as the Communist Political Association—and hence any indictment after 1948 was invalid under the statute of limitations. Legislation should be promptly enacted to restore the current enforceability of state sedition laws.

This act should be amended to make it a crime to teach and advocate violent overthrow of the United States Government. The Supreme Court held that mere teaching and advocating the overthrow of the Government was not a violation of the Smith Act unless such teaching and advocating incite to action.[136]

The Government should not be forced to delay invoking judicial process until the damage has been done. Americans must be protected from that which goes beyond the discussion stage and tends to incite efforts to overthrow the Government by force.

Security of Government Employees

Legislation should be enacted to enable the executive branch of the Government to determine and dismiss, if necessary, those who are security risks in both sensitive and nonsensitive Government positions.[137]

Each branch of the Government should be empowered to dismiss any employee who refuses to answer, before a congressional committee or before duly authorized officers of either the executive or judicial branches of the Government, queries concerning Communist Party, Communist front, or other subversive affiliations.[138]

Aliens

The executive branch of the Government should be empowered to interrogate aliens awaiting deportation concerning their subversive activities and associations. They should include the power of the executive branch of the Government to deport aliens who are Communists at any time after they enter the United States.[139]

The following incident recently came to light which highlights the necessity for corrective action. Irving Potash was deported in 1955 after being convicted under the Smith Act in 1949 and sentenced to a 5-year prison term. After his deportation to Poland he reported to Moscow and was sent to Red China and finally returned to Poland. He secretly returned to the United States where he was arrested by the FBI on January 4, 1957. On January 18, 1957, Potash was sentenced to a 2-year prison term and fined $1,000 for illegal entry into the United States and was released on August 26, 1958. The Immigration and Naturalization Service immediately arrested him and tried to deport him again.

Potash is now in New York under supervisory parole, and while under the supervision of the U.S. Government he is serving as National Labor Secretary for the National Committee of the CPUSA. In March 1960 Potash broke his parole by helping to plan a secret meeting of the CPUSA and going to Chicago, Illinois. Again the Immigration Service intervened and despite the fact that Potash had worked with Soviet, Chinese and Polish Communists, despite the fact that he served International Communism, despite the fact he had been deported after his conviction of advocating the overthrow of the Government of the United States by force and violence, the United States Attorney in New York ruled Potash could not be held.[140] He cannot be deported because the Communists will not grant him a visa to return to Poland. Thus by not issuing a visa a Communist satellite can put a capable agent to work while he is under what amounts to Government supervision.

Passports

The executive branch of the Government should be empowered to deny passports to persons knowingly engaged in subversive activities designed or intended to further communism. Clear and unequivocal criteria and standards governing issuance of passports should be established by legislation.[141] It is submitted that membership in the CPUSA is an overt act against the American people and our Government should be able to protect itself against their doing harm to the United States abroad. As a people we cannot organize against communists unless the state is given some operational powers that will meet the needs of actual survival.

Foreign Agents Registration Act of 1948

This Act should be made effective by requiring agents of foreign principles, who are outside the United States but who are disseminating their political propaganda within the country, to label their propaganda for what it is.[142]

Communist Lawyers

The right of the individual States to refuse to admit lawyers and to disbar lawyers who are members of the CP or who refuse to testify concerning their communist activities should be made clear.[143]

Congressional Committees

The record of the HCUA and the Senate Subcommittee on Internal Security is one of accomplishments and achievements despite the fact that they have been the targets of inspired propaganda attacks designed to curb their effectiveness. Continuation of these committees is essential to the enactment of sound security legislation.[144]

Need for Education and Leadership

Confining ourselves to a role of action as legal antagonists of communism is not enough. It is also the responsibility of each of us to lead a concerted campaign dedicated to educating everyone in the Nation to the threat which communism presents. At the same time, it is our duty to inculcate in everyone a new belief in and a new respect for the American way of life. Vice President RICHARD M. NIXON asserted last year that "just as Mr. Khrushchev expresses his belief that our grandchildren will live under communism, we should just as vigorously express our conviction that freedom and not communism is the wave of the future." [145]

J. Edgar Hoover has insisted that Americans can defeat communist ideology and—at the same time—reinforce the structure of our own democracy by the combined process of exposure and education:

"Every exposure of communism's false premises, inherent contradictions, deceitful

tactics, and empty promises helps to shatter its ideological appeal and to fortify against its psychological pressures. But, in this struggle for men's minds, exposure is not enough. Exposure must be complemented by a long-range educational program with a dual purpose. This program must encompass, not only a penetrating study of communism, but also a thorough grounding in the basic principles of our individual freedom under law. This educational program must be designed to train people to think and to distinguish between truth and error." [146]

Mr. Hoover has given seven basic instructions to those who lead in the fight against communism:

Alert yourself—learn the true nature and tactics of communism.

Make civic programs for social improvement your business.

Exercise your right to vote; elect representatives of integrity.

Respect human dignity—communism and individual rights cannot coexist.

Inform yourself; know your country—its history, traditions and heritage.

Combat public apathy toward communism—indifference can be fatal when national survival is at stake.

Attack bigotry and prejudice wherever they appear; justice for all is the bulwark of democracy.[147]

Former President Harry Truman in his recent book "Mr. Citizen" makes this sage observation:

Time is on our side if we know what we are doing and where we are going.

Time is always on the side of free people * * *. We believe in justice and freedom and a good life for everyone and no interference in the internal affairs of anyone. We do not seek to impose our way of life or system of government on any nation.[148]

With these guide lines, the ABA can do its part in combatting communism through a program of exposure and education by arousing lawyers and the general public to help carry on the task. It is shocking to note the number of Americans who condemn communism, yet have not the vaguest notion of the evil which the word encompasses. In this world-wide conflict, free people everywhere are involved. The law cannot compel devotion or patriotism. The call must go out to every corner of the land to awaken and alert every American to the danger. Together we must develop a positive, energetic course of action, based on a knowledge of communism's illusion and a revitalization of our inherently superior strength, and to bring about widespread understanding of the superiority of liberty under communism. Thousands of programs contrast to life under the tyranny of Red Fascism.

The tremendous success of the recently inaugurated Law Day, USA, is just a sample of what can be done. Law Day, USA, has helped immensely to bring home to Americans the contrast between individual freedom under law and political oppression under Communism. Thousands of programs have been held each May 1 in schools, courtrooms, churches, and meeting halls throughout America. Hundreds of organizations have cooperated with the ABA and the American Heritage Foundation. Proclamations have been issued by mayors, governors, and the President of the United States. The broadest impact has come from the local observances where lawyers, judges, teachers, and other citizens from all walks of life have been reminded of their reliance upon law in daily affairs and in their hopes for world peace. These activities are a striking contrast to the May Day celebrations in Communist countries.[149]

The ABA can urge local and state bar associations to develop lecture programs. Specially trained practicing lawyers could speak before high school students, business and fraternal organizations, and church groups on the theme of the advantages of democracy over communism, stressing the duty of each citizen to know the full facts about communism and to interest himself actively in public affairs. It requires a special and extra effort on the part of each of us to join in such a campaign. Members of the ABA should be the greatest foes of communism. Lawyers are certainly "firmly grounded in and inspired by the principles and traditions of our Nation." The legal profession serves as the ultimate guardian of the Bill of Rights and the protector of our freedom. Never before has the responsibility of the bar been so great to assume leadership in the fight against communism to preserve the American way of life. It is our call to duty.

It is the deep conviction of the members of this committee that the American Bar Association could render a useful and lasting service if it took leadership in furthering public education on the superiority of our American way of life under law over the tyranny of the Soviet Dictatorship and its worldwide alliance with Communist parties in various countries of the world.

To this end the committee urges that the American Bar Association call upon State and local bar associations to initiate programs in which qualified members of the bar address school assemblies and special convocations as well as civic organizations for the purpose of contrasting life under our Constitutional Republic with life under communist dictatorship, and to explain the nature, objectives, and tactics of communism and its dangers to our rights and freedoms and to the government of the United States.

To start this program the committee urges that the President of the American Bar Association appoint a committee of eminent and qualified members of the Association to implement this program and to report to the House of Delegates at the next midyear meeting and at each succeeding annual meeting concerning its progress.

Your Special Committee on Communist Tactics, Strategy, and Objectives suggests that if the Special Committee is authorized to be appointed by the President of the American Bar Association, it consider the following suggestions for recommended procedure: (1) The procurement of bar association members with a sufficient background of study of the nature, meaning, and purposes of international communism in relation to American Constitutional Government to enable them to speak interestingly, challengingly, and informatively; (2) Request each secondary school and college to arrange to have a designated member of the bar appear at an assembly or special convocation of its entire student body upon a convenient occasion and date, in this, and each succeeding school year, to address the convocation on the subject of Communism, What It Is and What It Means; and contrast it with liberty under law provided by our Constitution; and (3) Before each annual meeting of the American Bar Association to make a written report, which report shall include, but not necessarily limited to, a statement of the names of the speakers and a list of the schools and colleges at which they have spoken.

The committee cannot close this report without a word of tribute to Julius Applebaum, a member of this committee for many years, who was called to his reward last May. Loyal, capable, tireless, and dedicated, Julius Applebaum was first an American and then an advocate and defender of the profession. Since he contributed materially to the outline and format of this report, this committee therefore unanimously agreed that his name should be appended hereto.

Respectfully submitted.

Henry J. TePaske, Chairman; Peter Campbell Brown, Vice Chairman; Julius Applebaum (deceased); James S. Cremins; Ray Murphy; Louis B. Nichols; C. Brewster Rhoads; Kendrick Smith; Jackson A. Wright; Louis C. Wyman.

THE MILWAUKEE LEGAL AID SOCIETY'S DEDICATION TO JUSTICE

Mr. WILEY. Mr. President, it has been said that one of the most important rights of an American citizen is his right to equal, unbiased and timely justice. It is essential to our American way of life that everyone, whether rich or poor, is entitled to representation by counsel, to his day in court and to the equal protection of the law.

The legal profession has considered it its duty to uphold these rights. The profession has recognized that whenever these rights are denied to anyone, our democratic form of government is weakened. Furthermore, those who are deprived of their rights fall easy prey to ideologies which are hostile to our own. The organized bar has therefore endorsed the position that it is its patriotic as well as its professional duty to safeguard these rights for all persons regardless of financial means.

It is this spirit of public service which has caused members of the legal profession in many large cities to provide legal services for those of their citizens who cannot afford to pay for the professional help that they require. There are now 210 legal aid offices in the country, which is more than a 2½ times increase over the number 10 years ago. In addition, there are 128 volunteer committees of bar associations rendering legal aid service in small communities.

The city of Milwaukee has an impressive tradition in providing this service to its needy citizens. The Legal Aid Society of Milwaukee handled more than 5,000 new cases last year. The Milwaukee Legal Aid Society is supported by the Community Fund and is a member of the Community Welfare Council. These legal aid facilities are also made possible through the aid of numerous lawyers in the city of Milwaukee. The society utilizes also the services of law students at the Marquette University Law School. Lawyers' wives also play a prominent role in this activity, by providing the society with an excellent volunteer service.

Today, in commending the Milwaukee Legal Aid Society for its excellent public service, I should like to list the members of the board of directors of the society: Charles B. Quarles, president; Hon. F. Ryan Duffy, first vice president; Edmund B. Shea, second vice president; Maud Swett, secretary-treasurer; Hon. John A. Decker; Albert B. Houghton; John R. Jones; Mrs. George Lines; and Dr. Ralph P. Sproule.

I should also like to mention the staff of the Milwaukee Legal Aid Society: Mrs. Julia B. Dolan, executive attorney; Roger W. Finnegan, assistant attorney; Francis J. Demet, assistant attorney; and Elsie Bornfleth, office secretary.

REPORT OF PLANNED VISIT BY NIKITA KHRUSHCHEV TO UNITED NATIONS AT NEW YORK

Mr. CHURCH. Mr. President, I have read on the ticker the announcement that the Soviet Premier, Nikita Khrushchev, plans to go to New York, to the United Nations, on September 10.

I am somewhat dismayed that Khrushchev should be again coming to this country, within 4 months of the time he canceled his invitation to President Eisenhower to visit the Soviet Union. One cannot help wonder why he should choose to come to this country in the middle of our presidential election campaign. Will he seek to defeat one of the candidates by damning him with faint praise? Will he seek to elect one or another of the candidates by heaping scorn and ridicule upon him? These are the questions which are implicit in the announcement on the ticker this afternoon.

Mr. President, I think we should resolve here and now that we will not let Mr. Khrushchev influence the outcome of our national elections, and that we will make certain neither party seeks to use him as a foil in the campaign.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield to the Senator from West Virginia.

Mr. RANDOLPH. I have listened with keen interest to the remarks of my colleague from Idaho. It is inconceivable to me, and I am sure it is inconceivable to any Senator, that the visit of Nikita Khrushchev to this country, and any pronouncements he may make while here, would in any wise influence the American electorate, regardless of their party affiliation, and their choice, under the democratic process which we have in this country, of President of the United States.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield.

Mr. JAVITS. I wish to join the Senator from Idaho in the affirmation that it is absolutely inconceivable that the American people would ever allow any such longtime conspirator and revolutionist as Nikita Khrushchev, with a fantastic reputation for saying what he does not think and thinking what he does not say, to mislead them in a presidential election. If anything, it will be good experience for our people in demonstrating what I think is, without question, the fact. When it comes to the Khrushchevs they are very sophisticated. The same is true of American national elections. I think none of us need to have any fear on that score. However, I thoroughly agree with the Senator that it ought to be said, and the better that it be said from both sides of the aisle.

REMOVAL OF COPYRIGHT RESTRICTIONS ON "PLEDGE OF ALLEGIANCE TO THE FLAG"

Mr. EASTLAND. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from the further consideration of House Joint Resolution 704, and that the resolution be passed. It would give to the U.S. Government copyrights on a song and the "Pledge of Allegiance to the Flag."

The PRESIDING OFFICER. The resolution will be stated.

The resolution (H.J. Res. 704) was read, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the musical composition "Pledge of Allegiance to the Flag", covered by copyright EU399400, granted to Irving Caesar on June 3, 1955, assigned by Irving Caesar to Congressman Louis C. Rabaut by an instrument recorded in the Office of the Register of Copyrights in assignment record book 942 at page 57, and assigned by Congressman Louis C. Rabaut to the Congress of the United States by an instrument recorded in the Office of the Register of Copyrights in assignment record book 943 at page 451, is hereby declared to be in the public domain.

SEC. 2. The Joint Committee on Printing is authorized and directed to cause to be prepared three arrangements of the musical composition "Pledge of Allegiance to the Flag" suitable for use in nonprofessional performances. One arrangement shall be for vocal, one for band, and one for orchestral performance. The Joint Committee on Printing shall cause to be printed and distributed one hundred copies of each such arrangement to each Member of Congress and to the Resident Commissioner from Puerto Rico.

SEC. 3. The Joint Committee on Printing shall cause copies of the arrangements authorized by section 2 to be printed for sale to the public through the Superintendent of Documents, and shall cause additional copies to be printed from time to time for such purpose in such quantities as may be necessary to meet public demand.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution (H.J. Res. 704) was considered, ordered to a third reading, read the third time, and passed.

DISSEMINATION OF POLITICAL OPINIONS

The Senate resumed the consideration of the resolution (S. Res. 374) amending Senate Resolution 305, authorizing the Committee on Interstate and Foreign Commerce to undertake a study of the uses of Government-licensed media for the dissemination of political opinions, news, and so forth.

Mr. YARBOROUGH. Mr. President, the proposed Senate Resolution 374 would appropriate $150,000 for the Subcommittee on Freedom of Communications for monitoring and doing other work in the collection of information as required by the resolution creating the subcommittee, and to enable it to make the report required by Senate Resolution 305.

A long time ago in the first broadcasting act there was an equality of time provision in the broadcasting acts as applied to political broadcasts.

This Congress varied that time-honored law in September 1959, by Public Law 86–274, providing that the equal time provisions should not apply to bona fide newscast, bona fide news interview, bona fide news documentary—if the appearance of the candidate is incidental to the presentation of the subject or subjects covered by the news documentary—or on-the-spot coverage of bona fide news events—including but not limited to political conventions and activities incidental thereto.

The same law of September 14, 1959, provided that:

> The Congress declares its intention to reexamine from time to time the amendment to section 315(a) of the Communications Act of 1934 made by the first section of this act, to ascertain whether such amendment has proved to be effective and practicable.

Therefore in 1959, when the Congress amended the Communications Act of 1934 to vary its equal time provision, Congress in the same act declared that it intended to keep on a constant reexamination to determine whether that relaxation of the equal time provision had been effective and practicable.

In carrying out the mandate of Public Law 86–274, the Senate this year adopted Senate Resolution 305 declaring, after reciting the laws and the changes—

> *Resolved,* That the Committee on Interstate and Foreign Commerce, or any duly authorized subcommittee thereof, is authorized under sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to—
>
> (1) Federal policy on uses of Government licensed media for the dissemination of political opinions, news, and advertising, and the presentation of political candidates; and
>
> (2) a review and examination of information and complaints concerning the dissemination of news by such media.

And directs that this subcommittee report back by January 31, 1961.

I think the reasons for the needed appropriation are set forth cogently and briefly by the distinguished chairman of the Interstate and Foreign Commerce Committee, the Honorable WARREN G. MAGNUSON of the Interstate and Foreign Commerce Committee, recommending that this money be appropriated, which is printed in the report on this resolution at page 2. In the interest of time, unless there is a necessity for doing otherwise, I will not read Chairman MAGNUSON's letter in full to the chairman of the Committee on Rules and Administration when it was reported to the Committee on Rules and Administration.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield to the distinguished Senator from Louisiana.

Mr. ELLENDER. I note that the Senate approved a resolution on June 14 of this year which provided $35,000 to carry on this specific investigation. As I recall, the amount originally requested was $45,000, but that my amendment reduced that amount to $35,000.

What is the purpose of this new resolution? Why is more money being requested? Is this money to be used for some new and different investigation?

Mr. YARBOROUGH. Mr. President, I am glad that the distinguished Senator from Louisiana has asked that question. At the time the orginal resolution was passed and $35,000 was appropriated, it was argued on the floor of the Senate that since the Federal Communications budget carried an item labeled "Monitoring," which listed a figure in excess of $1 million, that the Federal Communications Commission would monitor these programs and this resolution would be a mere duplication if we appropriated money under the resolution to monitor political programs. I will confess to the distinguished Senator from Louisiana that I did not then know, and I did not argue to the contrary, that the Federal Communications Commission does not do one bit of monitoring when it comes to monitoring the content of the programs.

The $1 million appropriated was intended to be used to monitor stations' wavelength strength, to see that they do not reach out beyond the length that they are authorized to use. It is a technical monitoring. The appropriation did not contemplate the monitoring of the content of programs. The Federal Communications Commission advises us that they do not monitor one word of the programs.

So we were left without any money for monitoring. We have received some complaints already. We know that complaints will grow in number, and we have no money for monitoring. We have a staff of majority and minority counsel, with no money available, to find out whether the complaints are justified.

The Federal Communications Commission does not monitor one word of any program. The type of monitoring that the Federal Communications Commission does is engineering monitoring, to see that stations keep the proper equipment, the proper wavelength, and have the proper broadcast equipment from an engineering standpoint.

Mr. ELLENDER. As I recall, the Senator said when we considered the original resolution, S. Res. 305, that there would be two employees of the subcommittee; is that correct?

Mr. YARBOROUGH. There were two then.

Mr. ELLENDER. There was one for the minority——

Mr. YARBOROUGH. There were two counsels. They have not even hired a stenographer or a secretary to answer mail.

Mr. ELLENDER. How much of the $35,000 appropriated has been spent?

Mr. YARBOROUGH. Only the salaries of those two gentlemen.

Mr. ELLENDER. What have they accomplished since they have been on the payroll?

Mr. YARBOROUGH. They have made extensive studies. They are collating material.

Mr. ELLENDER. As I recall, the Senator stated in June that only one complaint had been received at the time, and that one originated in Texas. Have there been additional complaints?

Mr. YARBOROUGH. There were complaints during the Democratic Convention in Los Angeles about two different stations at that time, as to their programs night after night—not just one program, but night after night. We had no money to investigate.

The majority and minority counsel asked for tapes. I believe there have been complaints since then. There was one complaint from Florida. This was before our subcommittee was created. A jurisdictional question arose. In Florida a group of men filed application for a bank charter. In the town there was one bank and one radio station, and the group that owned the bank and the radio station hired a newscaster, who made it his business every day to talk about everyone who owned stock in the other bank. There was a complaint about that. From what we have heard, most of these complaints will be one-station complaints, not network complaints, and will arise, probably, within a State or a district. We could give other illustrations. These complaints must be investigated. That is why we have a majority and a minority counsel on the subcommittee.

Mr. ELLENDER. As I recall, during the debate on the Senate resolution, the statement was made on the floor of the Senate that something like $300,000 was spent by the FCC to monitor programs.

Mr. YARBOROUGH. That statement was not made by the Senator from Texas. It was made by someone else. We did not dispute it, because we did not know that no monitoring was done of content. We thought that if the FCC did it we did not want to duplicate that monitoring, so we did not resist it. I believe the distinguished Senator from Illinois and the distinguished Senator from Colorado [Mr. ALLOTT] were the ones who made that statement.

Mr. ELLENDER. But that statement is in the RECORD. I think the distinguished Senator from Illinois also made a similar statement.

Mr. YARBOROUGH. I did not state it, because I did not know that no monitoring was done as to content. We did not want to duplicate it.

Mr. ELLENDER. Am I to understand that the $150,000 being requested is to be used only for monitoring?

Mr. YARBOROUGH. No; not only for that.

Mr. ELLENDER. How many additional employees will it be necessary to hire to carry on this work?

Mr. YARBOROUGH. A budget has been worked out by the staff for this purpose. The staff has consulted experts in the commercial field. The budget is contained in the report. I ask unanimous consent that the budget, printed in the report, be printed in the RECORD at this point in my remarks.

There being no objection, the budget was ordered to be printed in the RECORD, as follows:

Supplementary budget of the Committee on Interstate and Foreign Commerce to make a study of the uses of Government-licensed media for the dissemination of political opinions, news, and so forth, pursuant to S. Res. 305, as amended by S. Res. 374, for the period Sept. 1, 1960, through Jan. 31, 1961

Position	Number	Base salary (per annum)	Gross salary (per annum)	Monthly salary (gross)	Total for period of budget (gross)
Professional staff: Investigators for (4 months)	2	$4,080	$8,968.51	$747.37	$5,978.96
Total	2				5,978.96
ADMINISTRATIVE					
Contribution to civil service retirement fund (6¼ percent of total salaries)					388.63
Contribution to employees health benefit programs (Public Law 86-382, effective July 1, 1960)					54.08
Monitoring expense (4 hours per day for 60 days, 240 hours at average $15 per hour, projected to mass 20 units)					72,000.00
Travel (inclusive of field investigations) 5 persons, 4 months					27,860.00
Rental of recording equipment, 50 States, 2½ months at average of $50 per month per unit, average 2 units per State					12,500.00
Communications (telephone, telegraph, postage, etc.)					2,000.00
Contingent fund					29,218.33
Total administrative expense					144,021.04
Grand total					150,000.00

NOTE.—Funds requested, S. Res. 374, $150,000.

Mr. ELLENDER. A budget is shown in the report, but it does not show the number of employees that it is anticipated will be employed.

Mr. YARBOROUGH. No.

Mr. ELLENDER. The first item is "Contribution to civil service retirement fund—6½ percent of total salaries—$388.63." I presume that item is for the two employees provided under the original resolution.

Mr. YARBOROUGH. I say quite frankly that counsel for the Interstate and Foreign Commerce Committee told me that he would recommend that we not hire any more employees. We think we can save the Government some money by having some of this work done by contract. The private monitoring services who have been contacted would charge about 2½ times what our budget is. Our staff estimates that we could get it done for 40 percent of what a private monitoring service would charge for it. We will try to get the job done as cheaply as possible. It will not be my objective to spend all this money, but to turn some of it back in January.

Mr. ELLENDER. I notice an item of $72,000 in the budget——

Mr. YARBOROUGH. Yes.

Mr. ELLENDER. "Monitoring expenses—4 hours per day for 60 days, 240 hours at average $15 per hour, projected to mass 20 units." Who would get that money?

Mr. YARBOROUGH. The people that must be hired to do it with the machinery that they have. The bids we have received from private monitoring companies are all higher than that.

Mr. ELLENDER. Would they furnish the subcommittee with recordings of the programs?

Mr. YARBOROUGH. Yes. If it is TV, then it is kinescope.

Mr. ELLENDER. It is necessary to play those recordings back.

Mr. YARBOROUGH. If it is a recording, I presume so.

Mr. ELLENDER. Is that the way the investigation is to be done, by letting the staff do it?

Mr. YARBOROUGH. Yes. The majority and minority counsel will do it.

Mr. ELLENDER. In other words, those two lawyers will listen to or view these recordings and decide for themselves whether or not there has been a violation of the law with respect to the equal-time provision?

Mr. YARBOROUGH. I am sorry I did not fully understand the Senator's question.

Mr. ELLENDER. Are we to understand that the two lawyers who will be hired by the subcommittee will play back these recordings to find out whether or not there has been a violation of the law?

Mr. YARBOROUGH. They will study it. That is the purpose of hiring the staff. If it is TV, it will be kinescope, with sound and picture.

Mr. ELLENDER. I notice an item in the budget for travel expense, $27,860. Who would do that traveling?

Mr. YARBOROUGH. The counsel, and also assistants, if they must be hired. They cannot travel everywhere if there are complaints in more than one city. In that case they have to hire assistants. We had that situation in Los Angeles, because complaints came in from there so rapidly. I listened to one of those programs, and I did not think it came within the scope of fair comment. I saw a program on one station that I thought was one of the bitterest political programs that I had ever seen in my life, and I thought I had seen something of that kind of thing in Texas.

Mr. ELLENDER. I notice that the travel item is for five persons, over a 4-month period. That indicates to me that the Senator will have additional workers, in addition to the two counsels that are provided by the original resolution.

Mr. YARBOROUGH. Unless we can make some contracts and get this done cheaper than we can do it by hiring people, we will have to hire other people. The three committee members will have to do some work on this too.

Mr. ELLENDER. Does the Senator mean that the committee members will travel around the country?

Mr. YARBOROUGH. Yes; if we have complaints.

Mr. ELLENDER. Will it be necessary to hold hearings?

Mr. YARBOROUGH. Yes. Of course I want to do something else in the fall too. We will not set out to waste any money.

Mr. ELLENDER. I am not saying that the subcommittee would set out to waste money.

Mr. YARBOROUGH. But as chairman of the subcommittee, I will do my duty.

Mr. ELLENDER. Now, as to these two counsels who will listen to review the tape recordings, would they, too, be the sole judges of what programs would be reviewed?

Mr. YARBOROUGH. The committee will direct its staff, and the subcommittee will direct its counsel, just as subcommittees of the Senate normally do.

Mr. ELLENDER. I notice the amount of $29,218.33 in the budget for a contingency fund. What will that money be used for?

Mr. YARBOROUGH. There is an itemized breakdown that was presented to the full committee.

Mr. ELLENDER. It is not in the report.

Mr. YARBOROUGH. No; it is not in the report. However, there is an itemized breakdown that I would like to present to the Senator. I can find it here, I believe. It was presented to the subcommittee and then to the full committee.

Mr. McGEE. Mr. President, will the Senator yield to me for a comment while he is looking for that statement?

Mr. YARBOROUGH. I am glad to yield to the Senator from Wyoming.

Mr. ELLENDER. I want to get this information for the benefit of the Senate.

Mr. McGEE. I am a member of the subcommittee. I sat in on some of the deliberations of the subcommittee, and I believe I am familiar with the way these figures came into being, and attempted to be realistic about it. It is almost a case of pioneering in an area where complaints have been registered and very little has been done. Whether complaints are real or substantial, we want to know whether someone is a crackpot, for example, and it may require recommendation for some kind of preventive or restrictive or guiding legislation that should be passed. The complaints have come in on the local level, rather than on the network level, and from all quarters of the country.

To decide whether a complaint is a legitimate complaint, or from a crackpot, someone must go out and investigate it. There is uncertainty as to how heavily these complaints will be filed at the peak of a political campaign. We do not know. We try to guess as intelligently as one can do so on a completely new ground. There is no expectation that it will take $150,000, as a certainty; it may turn out to be necessary to spend only $50,000 or $40,000, or less. We do not know what the problem is for sure. We only know that complaints have been filed. We know that complaints have to be looked into, to find out whether they are from quacks or losers, or whether there is a substantive basis for them. Investigating them is the only way in which we can determine that. We may come out with a recommendation that we do nothing more.

Mr. ELLENDER. Will the Senator tell us about some of the complaints he has received? Who makes them?

Mr. YARBOROUGH. I should like to answer that question.

Mr. McGEE. The committee has received several complaints.

Mr. YARBOROUGH. The chairman has received a great many such complaints. One which I received the other day was from a Republican State senator in Pennsylvania, who complained about his opponent, who is a radio announcer. He thinks it is unfair to let the announcer be on the radio every day as an announcer, campaigning in that way.

We have received an inquiry from a Representative in an adjoining State. Other complaints have been received. We expect more of them. We have endeavored to inform Democratic and Republican State chairmen of all the States of the Union of the existence of this subcommittee. Complaints were sought to be made in the past, but those who made them did not know to whom to complain or what to do.

Mr. ELLENDER. Why could not that work be handled through facilities of the FCC?

Mr. YARBOROUGH. Because the FCC has no monitoring service.

Mr. ELLENDER. Could not the FCC investigate complaints, just as the committee would?

Mr. YARBOROUGH. It has not been done in the past. That is why this subcommittee has been created as a watchdog committee. It would not do much good to investigate after a candidate has been defeated in an election. Our duty is to make certain that he gets fair treatment before the election.

Mr. ELLENDER. Will the Senator explain how the contingent fund would operate?

Mr. YARBOROUGH. It operates like other contingent funds.

Mr. ELLENDER. It totals to $29,218, a rather substantial portion of the $150,000 for which the Senator is asking.

Mr. YARBOROUGH. We do not have a red cent in the fund to buy tapes or to buy equipment or to pay other expenses. We cannot expect people to give us their kinescopes on television. There will be certain expenses that will not come under other categories, such as paying telephone bills or for the rental of tape recording equipment. It does not include funds for kinescopes. It does not come under travel. We do not know how much we will spend. This is an attempt to be modest, after consultation by the staff with a number of private recording agencies and private monitoring agencies. That is the only way in which we can proceed, there being no Government service to utilize.

We have talked with the Federal Trade Commission. They do some monitoring, but not of this kind. Their

monitoring is of advertising. Their employees go out into the field to investigate. At night, they listen in hotel rooms. They invite people to send in complaints. They receive lots of information from the complaints which are filed. However, they do no monitoring of this type. Their monitoring is of the advertising of all kinds of commercial products.

We can assure the Senator that we are not trying simply to get rid of the money; we shall use it in such a way as to warrant the confidence of the committee.

Mr. ELLENDER. I do not know what good the subcommittee will do, but I know that once subcommittees are created, there is no end to them. I have been complaining about that for a long time. Twelve years ago, we spent $140,000 a year for Senate special investigations; now the amount is more than $4 million annually.

Mr. YARBOROUGH. In my opinion, the greatest weakness in the Senate is its failure to hire enough employees. We do not have enough to investigate properly.

Mr. ELLENDER. In my judgment we have more than enough employees around here.

Mr. YARBOROUGH. I am a member of the Subcommittee on Education. I think that education is one of the great fields of weakness in our Government. Admiral Rickover has said that the improvement of the educational system is more important than the missile race.

The Subcommittee on Education does not have one employee. It has no secretary or stenographer. I serve as chairman of the Subcommittee on Veterans' Affairs. We have a counsel who works part time there and part time on the subcommittee which handles migratory labor. We borrow him to assist us on the Subcommittee on Education.

However, that is not our present issue.

Mr. ELLENDER. When Senate Resolution 305 was considered by the Senate in June, I warned that this new subcommittee would wind up as a more or less permanent body. I fear it will follow the same course as the old juvenile delinquency subcommittee of the Senate Judiciary Committee. As Senators remember, we created that subcommittee with the hope of getting sufficient evidence over a period of a year or two to cure the evils of juvenile delinquency. This was supposed to have been done through the expenditure of $75,000. But the truth of the matter is that since the establishment of this subcommittee in 1953 we have spent more than $950,000 on it, and although no positive results have come from its activities, it is still in operation. It seems that the more money the subcommittees get, the more they spend.

Mrs. LAUSCHE. Mr. President, will the Senator from Texas yield?

Mr. YARBOROUGH. I yield.

Mr. LAUSCHE. I understood the Senator from Texas to say that he had received a complaint from a candidate who said that a radio announcer is his opponent, and that the announcer is getting an undue advantage.

Mr. YARBOROUGH. Yes.

Mr. LAUSCHE. The Senator from Louisiana inquired whether the Federal Communications Commission did not have the authority to handle such a situation. Does it have that authority?

Mr. YARBOROUGH. I think it has such authority.

Mr. LAUSCHE. But the Senator from Texas said that after the election it would be too late for the Federal Communications Commission to act; that after the election any remedy which might be proposed would be useless to the man who was injured. Is that correct?

Mr. YARBOROUGH. That is correct. The FCC does not have such a monitoring service.

Mr. LAUSCHE. Does not that bring us to the position where the Committee on Interstate and Foreign Commerce, in a political campaign, will have to become the agency which will determine whether there is fairness in the broadcasting of political news? The committee now is Democratic by a substantial majority. The committee would be saying that unfair practices have been followed and that programs have been prejudicial. What would be the situation 2 years from now, if the committee majority should be Republican?

Mr. YARBOROUGH. The situation would be the same as with every committee of Congress.

Ours is a two-party political system which generates, some time, one party in the majority, and the other party in the minority.

I have enjoyed the tributes paid to the majority leader and the minority leader, and to the majority whip and the minority whip. Right now I want to add my word of commendation to them. I have not heard a Senator on this side of the aisle claim that he received unfair treatment from the Senator from Illinois [Mr. DIRKSEN] or the Senator from California [Mr. KUCHEL], nor have I heard a Senator on the other side of the aisle claim that he received unfair treatment from the majority leader or the majority whip, merely because they belonged to opposite political parties.

When judges are appointed to the bench, some are Republicans and some are Democrats. They are appointed because of the faith that they will be fair in their judgments.

We do not expect that the President who will be elected in November, if he is a Democrat, will seek to punish all the Republicans in the country. Similarly, if a Republican should be elected President, we would not expect him to punish all the Democrats. If we could not have faith in the public officials, regardless of the party to which they belong, our democratic system of government would collapse, and we would find our Government usurped by a dictator.

Mr. LAUSCHE. The Senator is comparing unlike with what he claims is like. He is asking that the Committee on Interstate and Foreign Commerce become an executive agency to supervise fairness in broadcasting. That function belongs to the Federal Communications Commission.

Mr. YARBOROUGH. The reason is that in 1959 we relaxed the rule of equal time. So long as there was an ironclad rule of equal time the Federal Communications Commission had a rule of thumb to follow. It was clearcut.

We have experimented with this problem. When Congress passed a law last September, it provided that we experiment, and we declared our intention to reexamine the whole problem. So we are seeking to reexamine, to determine whether we were right when we repealed the requirement for equal time and said that if a person appeared on a newscast or a news documentation, there was no requirement, and we relaxed it further this fall by the resolution permitting the granting of free time.

Mr. LAUSCHE. The Senator is abandoning his position, then, that the committee will step out and correct abuses during the campaign. That is, the committee will either make a study, anticipating the passage of needed legislation, or it will exercise executive function. It is one or the other. I should like to know which function we will exercise.

Mr. YARBOROUGH. I think our duties are set forth in Senate Resolution 305. We are to examine, investigate, study, and review the problem and report back to the Senate; and we are to employ technical, clerical, and other assistants, on a temporary basis, to study complaints.

The committee does not have any authority to fine someone or to admonish a station. That is solely within the province of the FCC.

Mr. LAUSCHE. What, if anything, has been done about the Pennsylvania case, to which the Senator referred?

Mr. YARBOROUGH. Furthermore, we shall investigate to see whether stations live up to a high standard of fairness. One purpose is to ascertain whether they are abusing the privilege, since Congress repealed the provision in 1959.

Mr. LAUSCHE. I agree with what the Senator said a moment ago that we cannot wait until the barn has burned down. It is necessary to step in before an election takes place and to take action.

Mr. YARBOROUGH. But we cannot fine or cancel a license. We may call the attention of a station to the fact that what they are doing is manifestly unfair, according to certain standards. All we can do is recommend that the law be changed, if we find it is being abused.

The mere fact that there is a place where they can come and where opinions can be given is of importance. They might thus be required to follow rules of fair play, rather than indulge in any abuse. But we can only provide for fair standards.

Mr. LAUSCHE. I read from page 3 of the report:

> Monitoring expense (4 hours per day for 60 days, 240 hours at average $15 per hour, projected to mass 20 units)—

What does that mean?

Mr. YARBOROUGH. It means that if it were going on in 20 different cities at one time. And judging from the complaints, we think that is a very moderate number.

Mr. LAUSCHE. That would be while they would be working four hours a day?

Mr. YARBOROUGH. Not over four hours a day. We thought it would be too expensive to have monitoring all the way through. But there are spot announcements, and so forth. If we doubled the number of hours, of course this amount of money would be wholly inadequate. This is a guess.

Mr. LAUSCHE. If the effort is to reach and to deal with the conditions in the elections, the agency to do that would be the Federal Communications Commission.

Mr. YARBOROUGH. Yes, if punishment were to be meted out.

Mr. LAUSCHE. Under the law, is there power in the Federal Communications Commission?

Mr. YARBOROUGH. To do what?

Mr. LAUSCHE. To make certain that the license which is granted is not abused—in other words, that equal time is afforded, and that one side is not favored.

Mr. YARBOROUGH. The agency has the power, but no funds or facilities.

Mr. LAUSCHE. If we provide the agency with the funds, could it do the monitoring? In other words, instead of having the Congress do the work, why not give the money to the Federal Communications Commission, and have it do the work?

Mr. YARBOROUGH. When this law was passed in September of last year, the Congress stated that it would reexamine this amendment from time to time; and in September 1959, it was stated on the floor of the Senate, when the law was being passed—it was stated by the Senator from Rhode Island [Mr. PASTORE] and other Members—that it is necessary to have some kind of supervision or watchdog committee or something of the sort, to see whether the law was adequate or should be changed. The Congress itself was experimenting, and said it was doing so by means of providing for the setting up of three types.

The committee was appointed in September of last year; but we have had no funds with which to function, up to now. If we are ever to function, funds must be provided. Certainly the committee should either be discharged from this assignment or the committee should be given this modest amount of money.

In making our report, which we are required to make in January, we will recommend that the law be left on the statute books; but of course the newscasters should be given the necessary latitude, and so forth. But these funds are needed in order that the investigation be made, to determine whether the directions given to them have been carried out as intended and whether they have given equal time.

Of course we are not infallible; we can make mistakes, too.

This subcommittee is trying to do a job which, in my opinion, should be done. If the Senate wants some other group to do the work, at least the work should be done by some group, somewhere; I am absolutely convinced of that.

Mr. LAUSCHE. In other words, a study should be made. But the committee should not begin to exercise executive power in connection with this Commission; because if it did that, it would never come to an end.

Mr. YARBOROUGH. The committee has no intention of doing that.

AMENDMENT OF PART II OF THE INTERSTATE COMMERCE ACT

Mr. JOHNSON of Texas. Mr. President, will my colleague yield to me?

The PRESIDING OFFICER (Mr. LUSK in the chair). Does the Senator from Texas yield to his colleague?

Mr. YARBOROUGH. I yield.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that my colleague may yield to me, in order that I may request the consideration of Calendar No. 1711, Senate bill 3228, a measure which has been cleared with all, and is not controversial; and we need to send it to the House.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Then, Mr. President, I ask unanimous consent that the Senate proceed to consider Senate bill 3228.

The PRESIDING OFFICER. The bill will be read by title, for the information of the Senate.

The CHIEF CLERK. A bill (S. 3228) to amend the provisions of part II of the Interstate Commerce Act which authorize certain operations within a State as a common carrier by motor vehicle engaged in interstate or foreign commerce if State authorized.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill (S. 3228) to amend the provisions of part II of the Interstate Commerce Act which authorize certain operations within a State as a common carrier by motor vehicle engaged in interstate or foreign commerce if State authorized, which had been reported from the Committee on Interstate and Foreign Commerce, with an amendment, to strike out all after the enacting clause and insert:

That the second proviso to paragraph (1) of subsection (a) of section 206 of the Interstate Commerce Act is amended to read as follows: "*And provided further:* That on and after the effective date of this amendment, no certificate under this part shall be required for operations in interstate or foreign commerce by a common carrier by motor vehicle operating solely within a single State and not controlled by, controlling, or under a common control with any carrier engaged in operations outside such State, if such carrier has obtained from the commission of such State authorized to issue such certificates, a certificate of public convenience and necessity authorizing motor vehicle common carrier operations in intrastate commerce and such certificate recites that it was issued after notice to interested persons through publication in the Federal Register of the filing of the application and of the desire of the applicant also to engage in transportation in interstate and foreign commerce within the limits of the intrastate authority granted, that reasonable opportunity was afforded interested persons to be heard, that the State commission has duly considered the question of the proposed interstate and foreign operations and has found that public convenience and necessity require that the carrier authorized to engage in intrastate operations also be authorized to engage in operations in interstate and foreign commerce within limits which do not exceed the scope of the intrastate operations authorized to be conducted. Such operations in interstate and foreign commerce shall, however, be subject to all other applicable requirements of the Interstate Commerce Act and the regulations prescribed thereunder. Such rights to engage in operations in interstate or foreign commerce may not be transferred apart from the transfer of the corresponding intrastate certificate, and the transfer of the intrastate certificate without the interstate or foreign rights or the termination or restriction in scope of the intrastate certificate shall terminate, or similarly restrict, the right to engage in interstate or foreign commerce. Such rights shall be subject to suspension or termination by the Interstate Commerce Commission in accordance with the provisions of the Interstate Commerce Act governing the suspension and termination of certificates issued by the Interstate Commerce Commission. The Interstate Commerce Commission may impose reasonable requirements with respect to the filing with it of certified copies of such State certificates and other appropriate statements and data, and compliance with applicable requirements established by and under the authority of statutes applicable to interstate and foreign operations administered by the Interstate Commerce Commission, as conditions precedent to engaging in interstate and foreign operations under the authority of such State certificate. In accordance with such reasonable rules as may be prescribed by the Interstate Commerce Commission, any party in interest, who or which opposed in the State commission proceeding the authorization of operations in interstate or foreign commerce, may petition the Interstate Commerce Commission for reconsideration of the decision of the State commission authorizing operations in interstate or foreign commerce, and upon such reconsideration upon the record made before the State commission, the Interstate Commerce Commission may affirm, reverse, or modify the decision of the State commission, but only with respect to the authorization of operations in interstate and foreign commerce."

SEC. 2. Subsection (a) of section 206 of the Interstate Commerce Act is further amended by inserting at the end thereof a new paragraph as follows:

"(4) Any person who or which on the effective date of this paragraph was in operation solely within a single State as a common carrier by motor vehicle in intrastate commerce (excluding persons controlled by, controlling, or under a common control with, a carrier engaged in operations outside such State), and who or which was also lawfully engaged in such operations in interstate or foreign commerce under the certificate exemption provisions of the second proviso of section 206(a)(1) in effect prior to the effective date of this subsection, and has continued to so operate since that time (or if engaged in furnishing seasonal service only, was lawfully engaged in such operations on the effective date of this paragraph during the season ordinarily covered by its operations, and has so operated since that time), except in either instance as to interruptions of service over which such person had no control, the Interstate Commerce Commission shall issue to such person a certificate of registration authorizing the continuance of such transportation in interstate and foreign commerce if application and proof of operations are submitted as provided in this subsection. Such certificate of registration shall not exceed in scope the services authorized by the State certificate to be conducted in intrastate commerce, and shall be subject to the same terms, conditions, and limitations as are contained in

or attached to the State certificate except to the extent that such terms, conditions, or limitations are inconsistent with the requirements established by or under the Interstate Commerce Act. If the effectiveness of the State certificate is limited to a specified period of time, the certificate issued under this paragraph shall be similarly limited. Operations in interstate and foreign commerce under such certificates of registration shall be subject to all other applicable requirements of the Interstate Commerce Act and the regulations prescribed thereunder. Certificates of registration may not be transferred apart from the transfer of the corresponding intrastate certificate, and the transfer of an intrastate certificate without the corresponding certificate of registration, or the termination or restriction in scope of the intrastate certificate, shall automatically terminate or similarly restrict the certificate of registration. Such certificates of registration shall be subject to suspension or termination by the Interstate Commerce Commission in accordance with the provisions of the Interstate Commerce Act governing the suspension and termination of certificates of public convenience and necessity issued by that Commission."

All rights to engage in operations in interstate and foreign commerce under the provisions of the second proviso of this subsection existing prior to the effective date of this paragraph shall cease and terminate, but any carrier lawfully engaged in interstate and foreign operations on the effective date of this paragraph, pursuant to such provisions, may continue such operations for 120 days after the effective date of this subsection and, if an appropriate application for a certificate of registration is filed within such period, such operations may be continued pending the determination of such application. The Interstate Commerce Commission shall prescribe the form of such application, the information and documents to be furnished, the manner of filing, and the persons to whom or the manner of giving notice to interested persons of such filings. Issues arising in the determination of such applications shall be determined in the most expeditious manner and, so far as practicable and legally permissible, without formal hearings or other proceedings. A notice of intent to engage in interstate and foreign operations accompanied by certified copies of State certificates filed with the Commission as evidence of authority to operate in interstate or foreign commerce under the former provisions of the second proviso of section 206(a), shall be prima facie proof that the applicant is engaged in interstate and foreign operations and the scope thereof.

Mr. DIRKSEN. Mr. President, let me say there is no objection to the bill, but I wished to note, for the record, the fact that the senior Senator from California [Mr. KUCHEL] was very instrumental in having the committee accept two amendments which appear in the bill.

Mr. SMATHERS. That is correct; and if the Senator from Illinois had not mentioned the fact that the Senator from California [Mr. KUCHEL] had been most active in that connection, I would have mentioned it. My very able and distinguished colleague, the senior Senator from California, the minority whip, Senator KUCHEL, has made to me recommendations which have been incorporated in this measure.

I may point out that the cooperation of Senator KUCHEL has been very helpful in bringing about a meeting of the minds on this legislation.

Mr. JOHNSON of Texas. Mr. President, the Senator from Florida likewise has been diligent and he has waited all week to have this bill acted on. I told him we would call it up, but that if there were controversy about it, we would not consider it. But there is no controversy about it.

Mr. LONG of Louisiana. Mr. President, may we have an explanation of the bill? Ordinarily I would be strongly inclined to favor anything that the Senator from Florida favors, because I have very great respect for him, although of course he and I do not always agree.

Mr. SMATHERS. I shall be very glad to explain the bill.

The subject matter of the bill was presented by the Interstate Commerce Commission about 2 years ago. At that time the National Association of Railroad and Utility Commissioners objected to the bill as then proposed.

We sent the bill back, and had our counsel and their counsel get together; and over the course of the next year they were able to work out satisfactory language.

Thereafter there was objection from western truckers. Once again, we sent the bill back; and once again we were able to obtain agreement.

We now have agreement on the part of the Interstate Commerce Commission, the National Association of Railroads and Utility Commissioners, and the American Trucking Associations for the trucking industry. All of them favor this measure as a desirable step, insofar as it concerns the regulation of intrastate truckers who make it their business to engage in interstate and foreign commerce. By means of this measure we give to the public utility commission of each State the authority to regulate their own truckers who are, in fact, intrastate truckers, but who wish, by the nature of the business, to carry interstate business from time to time within the confines of a State.

When they make an application for an intrastate certificate before the State commissions after this measure is enacted, it will be necessary for such applicants to indicate whether they also wish to engage in interstate and foreign commerce within the State. State commissions under this bill will have jurisdiction over such requests of intrastate truckers to engage in interstate commerce.

I think there is no objection to the bill, except by one individual trucker in the Southwest, and I believe we can solve his problem. But other than that, substantially all of the industry is very much in favor of the proposal.

Mr. LONG of Louisiana. Will the Senator from Florida describe the amendments?

Mr. SMATHERS. Certainly. The amendments of the Senator from California [Mr. KUCHEL] provide the commission additional authority, for which we had not provided. In addition to giving the bill an effective date of October 1, 1960, the amendments provide that certified copies of State certificates filed with ICC as evidence of authority to operate in interstate and foreign commerce under the former provisions of the second provision of section 206(a), shall be prima facie proof that the applicant is lawfully engaged in interstate and foreign commerce and the scope thereof. The Senator from Louisiana knows there are various types and classes of truckers; he is aware of that, I am sure, from his experience.

Mr. LONG of Louisiana. Well, I have not had any experience in that field.

Mr. SMATHERS. At any rate, we had to change the bill in the respects I have mentioned.

I shall be delighted to read a very clear statement about the bill, if the Senator from Louisiana wishes.

Mr. LONG of Louisiana. I think the Senator's explanation has been adequate. I congratulate him for the long and diligent efforts and the hard work he has devoted to this field. I understand that the subject dealt with here is very complicated; and I am ready to have the vote taken on the bill.

Mr. SMATHERS. I thank the Senator from Louisiana.

I wish to point out that the minority whip, the Senator from California [Mr. KUCHEL] has had very great interest in this matter, and has offered amendments which have made it possible for overall agreement to be arrived at in the industry. He deserves a great deal of credit.

Mr. SCHOEPPEL. Mr. President, today I rise to speak in favor of S. 3228, a bill to amend the second proviso of section 206(a)(1) of the Interstate Commerce Act with respect to intrastate motor carriers operating in interstate commerce.

This legislation would permit State regulatory commissions to grant the right to motor common carriers operating within their State to engage in interstate or foreign operations.

This bill, if enacted, would change the present law and would affect operations in the future. A specific procedure would be authorized so that a State could make grants of authority to motor common carriers possessing intrastate rights. Our bill contains certain provisions which would have the effect of preserving the presently existing rights of motor carriers. It is not, and never has been, the intention of our committee to seek to curtail in any way any operating rights or authority issued to carriers by State certificates registered under the second proviso and I can assure all operators that none of their present existing rights and privileges will be lost.

This is a somewhat technical bill and certain opponents to the legislation have voiced objections because in their opinion, they feel the problem should be given more study and that they were not certain as to what this bill actually would accomplish. For those who read the report carefully and this floor debate, they will find that this is a piece of legislation which would be of benefit to the trucking industry and to our national transportation policy.

A great amount of work has gone into the present bill. It is a legislative proposal which has the support of most groups within the trucking industry and

it is satisfactory to the regulatory bodies of the various States throughout our Nation.

The National Association of Railroad and Utilities Commissioners has approved the bill as it was reported by the committee and I understand that the commissioners are also in favor of certain technical amendments which will be offered on the floor today.

I wish to commend the representatives of the American Trucking Associations and most particularly, Mr. Robert J. McBride, director, legislative research, regular common carrier conference, who has worked on this problem for several years and is thoroughly familiar with all aspects of this legislation. Mr. McBride, with a lifetime of experience in the transportation industry, has rendered valuable service not only to his own conference, but to the Senate Committee on Interstate and Foreign Commerce and also to individual Senators who are members of the committee. I personally want to pay my high respects to Mr. McBride. He has been a faithful and good advocate of his industry. He has always offered his suggestions and advice in a constructive manner and I believe he has kept in mind the best interests of our country and its national transportation policy in so doing. He will shortly enter retirement for a second time and I know that many Members in this body will miss his able counsel.

On this legislation I have been advised by my own regulatory body, the Kansas Corporation Commission, through its chairman the Honorable Harry G. Wiles, that the commission favors enactment of S. 3228.

I have also been in communication with Mr. J. R. (Bob) Halladay who is the managing director of the Kansas Motor Carriers Association at Topeka, Kans. He has advised that—

We are hopeful that the measure, as reported out by the Interstate and Foreign Commerce Committee, will pass during the current session of Congress.

Mr. Halladay speaks for the Kansas motor carriers. I can assure him that I have a high regard for his opinions on transportation legislation involving the trucking industry.

I ask unanimous consent to insert in the body of the RECORD at this point a telegram received from Chairman Wiles; a letter received from Mr. Halladay; a letter addressed to me written by Robert J. McBride concerning S. 3228; and a letter which I have received from Jesse W. Dillon, chairman of the National Association of Railroad and Utilities Commissioners, special committee to study motor carrier interstate registration authority.

There being no objection, the telegram and letters were ordered to be printed in the RECORD, as follows:

TOPEKA, KANS., *June 30, 1960.*

Hon. ANDREW F. SCHOEPPEL,
U.S. Senator from Kansas,
U.S. Senate Building,
Washington, D.C.:

Please be advised that Kansas Corporation Commission favors S. 3228 reported out of the Committee on Interstate and Foreign Commerce on June 15. Urge your support of same.

HARRY G. WILES,
Chairman, Kansas Corporation Commission.

KANSAS MOTOR CARRIERS ASSOCIATION,
Topeka, Kans., July 1, 1960.

Hon. ANDREW F. SCHOEPPEL,
Senate Office Building,
Washington, D.C.

DEAR SENATOR: We would appreciate receiving an up-dating on the status of S. 3228 (the proposal to repeal the second proviso of section 206(a)(1) of the Interstate Commerce Act, concerning interstate operations by motor carriers operating solely within one State).

A number of Kansas carriers are interested in this proposal. We were hopeful that the measure, as reported out by your Interstate and Foreign Commerce Committee, would pass during the current session of Congress. We understand, however, that Senate floor action has been deferred and that there apparently now is some talk of additional amendments.

We would appreciate having your appraisal of the prospects for passage in this session, along with any information concerning any contemplated amendments. The effects of such amendments, of course, may well affect the support for the measure which was expressed by carriers, regulatory officials, and others at the time it was reported out by the committee.

Many thanks.

Sincerely,

J. R. HALLADAY,
Managing Director.

COMMONWEALTH OF VIRGINIA,
STATE CORPORATION COMMISSION,
June 24, 1960.

The Honorable ANDREW F. SCHOEPPEL,
U.S. Senate, Washington, D.C.

DEAR SENATOR SCHOEPPEL: At the 1959 Convention of the National Association of Railroad and Utilities Commissioners, a resolution was adopted setting up a special committee to cooperate with the Interstate Commerce Commission in a study concerning any difficulties arising under the registration of intrastate certificates with the Interstate Commerce Commission, as authorized in the second proviso of section 206(a)(1) of the Interstate Commerce Act. This section provides that a motor carrier engaged in operations solely between points within one State may, by registration of its intrastate certificate, transport interstate traffic within the limits of that intrastate certificate.

In conformity with the resolution, the President of the National Association of Railroad and Utilities Commissioners appointed a committee of five State commissioners to cooperate with the Interstate Commerce Commission. I was named as chairman of the committee. Our committee has met several times with Commissioners Howard G. Freas and Rupert L. Murphy, members of the Interstate Commerce Commission, and, after a great deal of consideration, agreed on an amendment to the Interstate Commerce Act which we think will be fair to the interstate carrier as well as the intrastate carrier.

On June 7, 1960, I mailed Senator GEORGE A. SMATHERS the proposed amendment, a copy of which is attached hereto. Senator SMATHERS has introduced the proposed legislation and the number of the bill is S. 3228. The bill was reported out of the Committee on Interstate and Foreign Commerce on June 15. This proposed amendment was approved by our committee and the executive officers of the NARUC.

Our association is quite interested in this legislation and we shall appreciate it if you will give it your consideration.

Sincerely yours,

JESSE W. DILLON,
Chairman, NARUC Special Committee To Study Motor Carrier Interstate Registration Authority.

AMERICAN TRUCKING ASSOCIATIONS, INC.,
Washington, D.C., June 24, 1960.

Subject: S. 3228 (S. Rept. 1648).

The Honorable ANDREW F. SCHOEPPEL,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SCHOEPPEL: Certain abuses harmful to the for-hire motor carrier industry can be corrected, we feel, by enactment of a compromise bill, S. 3228, favorably reported to the Senate June 22, 1960. Enactment at this session is imperative.

For many years, the Interstate Commerce Commission and the American Trucking Associations sought the remedy to proliferating rights stemming from an obscure provision of the Interstate Commerce Act. This is the so-called second proviso of section 206(a)(1).

Today we have the legislative vehicle to accomplish this without injuring any present intrastate carrier or any present interstate motor carrier.

The measure was worked out in conferences between the National Association of Railroad and Utilities Commissioners and the Interstate Commerce Commission.

American Trucking Associations, representing the motor carriers, endorses the measure. We urge your support of S. 3228 in the compromise version which, we believe, amply protects the interests of both intrastate and interstate motor carriers, and assures a nice balance of authority between the State regulatory bodies and the Interstate Commerce Commission.

Attached for your convenience is a fuller explanation of the provisions of the proposed bill, S. 3228 (S. Rept. 1648).

Respectfully yours,

R. J. MCBRIDE.

S. 3228 (S. REPT. 1648)

The compromise bill would amend the second proviso of section 206(a)(1) as to future registration of intrastate certificates with the Interstate Commerce Commission. Registration would be permitted where a single State common carrier obtains from its State regulatory body an intrastate certificate issued after public notice by publication in the Federal Register of the filing of the intrastate application plus the indication that the applicant wants to engage in interstate commerce; also, where the State commission, upon consideration, has found that public convenience and necessity require that the carrier be authorized to engage in both intrastate and interstate operations. Except for the method of certification, such interstate operations will be subject to all applicable requirements of the Interstate Commerce Act.

The ICC is empowered to impose reasonable requirements as conditions precedent to engaging in interstate operations under authority of the registered State certificate.

The ICC will establish rules under which any person who opposed the authorization of operations in interstate commerce in the State regulatory proceeding, may petition the ICC for reconsideration of the decision made by the State commission. Such reconsideration shall be on the record made before the State commission. The ICC may affirm, reverse, or modify the decision of the State regulatory body in respect to interstate operations.

Existing motor carriers upon application shall be issued certificates of registration by

the ICC authorizing continuance of their operations. In making such application a "Notice of Intent To Engage in Interstate and Foreign Operations" accompanied by copies of State certificates will be prima facie proof that applicant is engaged in interstate commerce and the scope thereof.

Such certificates of registration shall be subject to the same terms as contained in the State certificate and subject to all applicable requirements of the Interstate Commerce Act, including suspension and termination.

Mr. SCHOEPPEL. I understand that the Interstate Commerce Commission approves of this legislation because it will be a much-needed improvement over the present statutory provisions.

Enactment of S. 3228 will prevent the continued creation and multiplication of interstate rights without an adequate consideration and determination of the question as to whether or not there is any public need for such rights. It has adequate safeguards to protect the presently operating trucker and I believe this legislation is in the best interest of developing a sound transportation policy.

I am glad to lend my support to this legislation and urge its passage.

Mr. SMATHERS. Mr. President, the Senator from Kansas [Mr. SCHOEPPEL] has had an extremely great interest in this matter and has done a great deal of work in helping arrive at the overall agreement.

Mr. President, I ask unanimous consent to have printed in the RECORD a statement on Senate bill 3228.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR SMATHERS

This is a bill to amend the so-called second proviso of section 206(a)(1) of the Interstate Commerce Act under which intrastate motor carriers are allowed to register their State certificates with the Interstate Commerce Commission and thus be authorized to engage in interstate and foreign commerce within the confines of the single State in which the motor carrier is authorized to operate.

This registration procedure was provided by the Motor Carrier Act of 1935, now part II of the Interstate Commerce Act, under which interstate motor carriers were brought under Federal regulation.

In 1935 when the act was passed it was considered that the importance of the intrastate motor carrier participation in interstate and foreign commerce would be of minor importance. Consequently, intrastate carriers were given the privilege of registering their State certificates with the ICC and thereby automatically obtain the right to engage in interstate and foreign commerce. The ICC has no choice but to accept these certificates for registration and to allow the carrier to engage in interstate and foreign commerce.

Since the end of World War II motor carrier transportation has greatly expanded and become more complex. Numerous unanticipated abuses have arisen which in the public interest require correction. A number of these abuses relate to improper transfers of certificates to ineligible carriers engaged in multiple State motor carriers operations that should, but do not have, ICC approval; and the splitting of State operating authority with the intrastate rights being retained by the original holder and the interstate portion of the rights being sold to an ineligible carrier.

When considering the issuance of operating rights on intrastate traffic, the State commission is required to limit its consideration to the intrastate aspects of the operation, and evidence pertaining to interstate operations are inadmissible in the record. It should be pointed out that there is use of intrastate certificates to join interstate carrier operations which often result in the formation of important interstate motor carrier routes without ICC approval.

In view of all this there has been general agreement that the abuses that have come into existence require correction.

At the conclusion of the hearings on S. 2417, to amend the "Second Proviso," there was agreement on some points among the interested parties but failure of agreement on others. The parties were directed to get together and if possible produce an acceptable draft of a bill. S. 3228 was later introduced to clarify the extent of agreement reached.

The bill approved by the committee is acceptable to the National Association of Railroad and Utility Commissioners on behalf of the State commissions and to the Interstate Commerce Commission. The bill was worked out by and was sponsored by both groups. The bill has been endorsed by the American Trucking Associations for the trucking industry.

The approved bill would amend the second proviso as to future registration of intrastate certificates with the Interstate Commerce Commission. Registration would be permitted where a single State common carrier obtains from its State regulatory body an intrastate certificate issued after public notice by publication in the Federal Register of the filing of the intrastate application plus the indication that the applicant wants to engage in interstate commerce; also, where the State commission, upon consideration, has found that public convenience and necessity require that the carrier be authorized to engage in both intrastate and interstate operations. Except for the method of certification, such interstate operations would be subject to all applicable requirements of the Interstate Commerce Act.

The ICC would be empowered to impose reasonable requirements as conditions precedent to engaging in interstate operations under authority of the registered State certificate.

The ICC would establish rules under which any person who opposed the authorization of operations in interstate commerce in the State regulatory proceeding, may petition the ICC for reconsideration of the decision made by the State commission. Such reconsideration would be on the record made before the State commission. The ICC would be authorized to affirm, reverse, or modify the decision of the State regulatory body in respect to interstate operations.

Existing motor carriers upon application would be issued certificates of registration by the ICC authorizing continuance of their operations. In making such application a "Notice of Intent to Engage in Interstate and Foreign Operations" accompanied by copies of State certificates will be prima facie proof that applicant is engaged in interstate commerce and the scope thereof.

Such certificates of registration would be subject to the same terms as contained in the State certificate and subject to all applicable requirements of the Interstate Commerce Act, including suspension and termination.

It should be emphasized that all the present rights of intrastate motor carriers engaged in interstate and foreign commerce would be preserved by this bill.

BRIEF EXPLANATIONS OF AMENDMENTS TO S. 3228

Since S. 3228 was approved by the Senate Interstate and Foreign Commerce Committee, certain perfecting amendments have been found necessary to meet objections subsequently raised to the bill as reported.

The amendments accomplish the following:

The clarifying amendments on pages 5 and 8 requested by the National Association of Railroad and Utility Commissioners will set forth more fully the method and procedure to be followed by the Interstate Commerce Commission in the issuance as well as the sale and transfer of certificates of registration from one person or carrier to another person or carrier. These amendments will insure continuance of the existing law with respect to issuance, sale, and transfer of operating authority.

The change on page 9, line 18, is the addition of the word "lawfully" for the purpose of establishing the fact that the holder of the certificate of registration has been found to be lawfully engaged in interstate commerce.

A new section 3 is added to provide a specified effective date of amendment; namely, October 1, 1960.

Mr. JOHNSON of Texas. Mr. President, I ask that the committee amendment be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on the third reading of the bill.

The bill (S. 3228) was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend the provisions contained in part II of the Interstate Commerce Act concerning registration of State certificates whereby a common carrier by motor vehicle may engage in interstate and foreign commerce within a State."

Mr. SMATHERS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. JOHNSON of Texas. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas subsequently said: Mr. President, a while ago action was taken on the bill of the Senator from Florida [Mr. SMATHERS] in the absence of the Senator from California [Mr. KUCHEL]. I refer to Senate bill 3228. At that time we thought the amendments which had been unanimously agreed to by the leadership and by the Senator from Florida [Mr. SMATHERS] and his committee and by the Senator from California [Mr. KUCHEL] had been stated. However, they were not. Therefore, by inadvertence, an amendment which was to have been offered from the floor and had been agreed upon by both sides was omitted from the bill.

I ask unanimous consent that the bill may be so amended, in order to carry out the intention of all concerned; namely, that the Kuchel amendment be adopted, and that the bill as thus amended be deemed, again, to have been passed.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The bill as amended is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the

second proviso to paragraph (1) of subsection (a) of section 206 of the Interstate Commerce Act is amended to read as follows: *"And provided further:* That on and after the effective date of this amendment, no certificate under this part shall be required for operations in interstate or foreign commerce by a common carrier by motor vehicle operating solely within a single State and not controlled by, controlling, or under a common control with any carrier engaged in operations outside such State, if such carrier has obtained from the commission of such State authorized to issue such certificates, a certificate of public convenience and necessity authorizing motor vehicle common carrier operations in intrastate commerce and such certificate recites that it was issued after notice to interested persons through publication in the Federal Register of the filing of the application and of the desire of the applicant also to engage in transportation in interstate and foreign commerce within the limits of the intrastate authority granted, that reasonable opportunity was afforded interested persons to be heard, that the State commission has duly considered the question of the proposed interstate and foreign operations and has found that public convenience and necessity require that the carrier authorized to engage in intrastate operations also be authorized to engage in operations in interstate and foreign commerce within limits which do not exceed the scope of the intrastate operations authorized to be conducted. Such operations in interstate and foreign commerce shall, however, be subject to all other applicable requirements of the Interstate Commerce Act and the regulations prescribed thereunder. Such rights to engage in operations in interstate or foreign commerce shall be evidenced by appropriate certificates of registration issued by the Interstate Commerce Commission which shall be valid only so long as the holder is a carrier engaged in operation solely within a single State, not controlled by, controlling, or under a common control with a carrier engaged in operation outside such State, and except as provided in section 5 and in the conditions and limitation stated herein, may be transferred pursuant to such rules and regulations as may be prescribed by the Interstate Commerce Commission, but may not be transferred apart from the transfer of the corresponding intrastate certificate, and the transfer of the intrastate certificate without the interstate or foreign rights or the termination or restriction in scope of the intrastate certificate shall terminate, or similarly restrict, the right to engage in interstate or foreign commerce. Such rights shall be subject to suspension or termination by the Interstate Commerce Commission in accordance with the provisions of the Interstate Commerce Act governing the suspension and termination of certificates issued by the Interstate Commerce Commission. The Interstate Commerce Commission may impose reasonable requirements with respect to the filing with it of certified copies of such State certificates and other appropriate statements and data, and compliance with applicable requirements established by and under the authority of statutes applicable to interstate and foreign operations administered by the Interstate Commerce Commission, as conditions precedent to engaging in interstate and foreign operations under the authority of such State certificate. In accordance with such reasonable rules as may be prescribed by the Interstate Commerce Commission, any party in interest, who or which opposed in the State commission proceeding the authorization of operations in interstate or foreign commerce, may petition the Interstate Commerce Commission for reconsideration of the decision of the State commission authorizing operations in interstate or foreign commerce, and upon such reconsideration upon the record made before the State commission, the Interstate Commerce Commission may affirm, reverse, or modify the decision of the State commission, but only with respect to the authorization of operations in interstate and foreign commerce."

SEC. 2. Subsection (a) of section 206 of the Interstate Commerce Act is further amended by inserting at the end thereof a new paragraph as follows:

"(6) Any person who or which on the effective date of this paragraph was in operation solely within a single State as a common carrier by motor vehicle in intrastate commerce (excluding persons controlled by, controlling, or under a common control with, a carrier engaged in operations outside such State), and who or which was also lawfully engaged in such operations in interstate or foreign commerce under the certificate exemption provisions of the second proviso of section 206(a)(1) in effect prior to the effective date of this subsection, and has continued to so operate since that time (or if engaged in furnishing seasonal service only, was lawfully engaged in such operations on the effective date of this paragraph during the season ordinarily covered by its operations, and has so operated since that time), except in either instance as to interruptions of service over which such person had no control, the Interstate Commerce Commission shall issue to such person a certificate of registration authorizing the continuance of such transportation in interstate and foreign commerce if application and proof of operations are submitted as provided in this subsection. Such certificate of registration shall not exceed in scope the services authorized by the State certificate to be conducted in intrastate commerce, and shall be subject to the same terms, conditions, and limitations as are contained in or attached to the State certificate except to the extent that such terms, conditions, or limitations are inconsistent with the requirements established by or under the Interstate Commerce Act. If the effectiveness of the State certificate is limited to a specified period of time, the certificate issued under this paragraph shall be similarly limited. Operations in interstate and foreign commerce under such certificates of registration shall be subject to all other applicable requirements of the Interstate Commerce Act and the regulations prescribed thereunder. Certificates of registration shall be valid only so long as the holder is a carrier engaged in operation solely within a single state, not controlled by, controlling, or under a common control with a carrier engaged in operation outside such State, and except as provided in section 5 and in the conditions and limitations stated herein, may be transferred pursuant to such rules and regulations as may be prescribed by the Interstate Commerce Commission, but may not be transferred apart from the transfer of the corresponding intrastate certificate, and the transfer of an intrastate certificate without the corresponding certificate of registration, or the termination or restriction in scope of the intrastate certificate, shall automatically terminate or similarly restrict the certificate of registration. Such certificates of registration shall be subject to suspension or termination by the Interstate Commerce Commission in accordance with the provisions of the Interstate Commerce Act governing the suspension and termination of certificates of public convenience and necessity issued by that Commission."

All rights to engaged in operations in interstate and foreign commerce under the provisions of the second proviso of this subsection 206(a)(1) existing prior to the effective date of this paragraph shall cease and terminate, but any carrier lawfully engaged in interstate and foreign operations on the effective date of this paragraph, pursuant to such provisions, may continue such operations for 120 days after the effective date of this subsection and, if an appropriate application for a certificate of registration is filed within such period, such operations may be continued pending the determination of such application. The Interstate Commerce Commission shall prescribe the form of such application, the information and documents to be furnished, the manner of filing, and the persons to whom or the manner of giving notice to interested persons of such filings. Issues arising in the determination of such applications shall be determined in the most expeditious manner and, so far as practicable and legally permissible, without formal hearings or other proceedings. A notice of intent to engage in interstate and foreign operations accompanied by certified copies of State certificates filed with the Commission as evidence of authority to operate in interstate or foreign commerce under the former provisions of the second proviso of section 206(a), shall be prima facie proof that the applicant is lawfully engaged in interstate and foreign operations and the scope thereof.

SEC. 3. The effective date of this amendment shall be October 1, 1960.

Mr. JOHNSON of Texas. Mr. President, I move that the action we have just now taken be reconsidered.

Mr. KUCHEL. Mr. President, I move to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

Mr. KUCHEL. Mr. President, was my motion to lay on the table the majority leader's motion to reconsider put to the Senate?

The PRESIDING OFFICER. It was; and the motion to lay on the table was agreed to.

NOTIFICATION TO THE PRESIDENT

Mr. JOHNSON of Texas. Mr. President, I send to the desk a resolution, and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The resolution (S. Res. 389) was read, as follows:

Resolved, That a committee of two Senators be appointed by the Presiding Officer to join a similar committee of the House of Representatives to notify the President of the United States that the two Houses have completed the business of the session and are ready to adjourn unless he has some further communication to make to them.

Mr. KEATING. Mr. President, I suggest the absence of a quorum.

Mr. JOHNSON of Texas. Mr. President, I will withhold the resolution, if the Senator does that. It is not a sine die resolution. It is a resolution to notify the President.

Mr. KEATING. If it is a resolution to notify the President, that is fine, and I withdraw the suggestion of the absence of a quorum.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 389) appointing a committee to join a House committee to notify the President of the United States of the proposed adjournment of the session was considered and agreed to.

The PRESIDING OFFICER. The Chair appoints as members of the committee on the part of the Senate the Senator from Texas [Mr. JOHNSON] and the Senator from Illinois [Mr. DIRKSEN].

REQUEST OF DOMESTIC CARPET INDUSTRY FOR RELIEF FROM IMPACT OF IMPORTS

Mr. THURMOND. Mr. President, the callousness of the U.S. Department of State and its foreign-minded personnel has, in my opinion, reached new heights. In this instance I am referring to the State Department's attitude toward the request of the domestic carpet industry for relief from the impact of imports of Wilton and velvet carpets by implementation of the provisions of article XXVIII of the General Agreement on Trade and Tariffs.

Article XXVIII of the General Agreement on Trade and Tariffs provides that—

> On the first day of each 3-year period, the first period beginning on January 1958, a contracting party may modify or withdraw concessions included in the appropriate schedule annexed to this agreement.

The American Carpet Institute has applied to the U.S. Government to modify or withdraw its concessions with regard to Wilton and velvet imports, and in the future to apply the present rate of duty to imports during any calendar year up to an amount equal to 5 percent of domestic consumption for the 12-month period ending June 30 of the preceding year; and on imports in excess of 5 percent of domestic consumption, all concessions should be withdrawn or a flat duty of 40 percent ad valorem should be imposed. The low duty quota should be allocated among exporting countries on the basis of their history of exports to this country.

Mr. President, the Wilton and velvet carpet industry is a perfect example of a domestic industry which has suffered the impact of imports for years without relief and at all times has had its problems completely ignored by the U.S. Government—particularly the executive branch.

From 1948 to 1950 the duty on Wilton and velvet imports was 30 percent ad valorem, and during this period imports were generally on the rise but averaged only about 5 percent of domestic consumption. From the beginning of 1951 through the middle of 1956, the duty on such imports was 25 percent, and during this period imports increased to approximately 12 percent of domestic consumption. In 1956, again in 1957, and again in 1958, the duty on such imports was reduced, and it stands today at 21 percent ad valorem. With each decrease in duty, imports have increased substantially. They rose 52 percent in 1959, and in the first quarter of 1960, they increased 60 percent. Imports of Wilton and velvet carpets are now approximately 23 percent of domestic consumption.

Mr. President, the mushrooming of imports of Wilton and velvet carpets does not reflect a recapture by foreign producers of the domestic American market which was lost during the war. On the contrary, there were very few imports of such carpets prior to the war, and very little foreign capacity for the production of them. In 1939 the United States imported 200,000 square yards. In 1959—20 years later—these imports stood at 7,012,000 square yards. Based on the first quarter rate, 1960 imports will reach 10 million square yards.

Mr. President, the American Carpet Institute has attempted to utilize the provisions of the Reciprocal Trade Act to protect itself from the impact of this tremendous surge of imports. In 1958 proceedings were instituted before the Tariff Commission under the "escape clause." In its decision, handed down in January 1959, the Tariff Commission, in a 3–2 decision, denied relief, and a majority of the Commission indicated that there was no imminent danger to the domestic industry from imports. Now, slightly over a year later, these imports have almost doubled, rising from 12 percent of domestic consumption to 23 percent.

On July 2, I introduced, along with a number of other Senators, Senate Concurrent Resolution 113, which would express the sense of Congress that the relief under article XXVIII of the General Agreement on Trade and Tariffs, which has been requested by the American Carpet Institute, should be granted. This morning I received a copy of a letter from Assistant Secretary of State, William B. Macomber, to the Honorable HARRY F. BYRD, chairman of the Committee on Finance, expressing the views of the Department of State on this resolution. I ask unanimous consent that a copy of this letter be printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUGUST 25, 1960.

DEAR MR. CHAIRMAN: Your letter of August 11, 1960, requests the views of the Department of State on Senate Concurrent Resolution 113 which, if approved, would express the sense of the Congress that the President should take action under article XXVIII of the General Agreement on Tariffs and Trade to increase the duty on Wilton-type carpets by modifying the trade agreement concession applying to these products.

The American Carpet Institute has submitted to the Committee for Reciprocity Information of the Trade Agreements Organizations a formal brief proposing that the President take such action. The Institute has also made an oral presentation of its position during the public hearings now being conducted by that Committee in preparation for the forthcoming tariff negotiations.

We have discussed the Institute's proposal with industry representatives. In these discussions we have explained that our carpet producers have direct recourse to the safeguarding procedure specified by the Congress in section 7 of the Trade Agreements Extension Act of 1951, as amended, noting that if, after a thorough investigation, including public hearings, the Tariff Commission finds increased imports are causing or threatening serious injury to domestic producers, it submits a report to the President who is authorized to increase tariffs or impose quotas on imports to remedy the situation.

After completing such an investigation with respect to Wilton-type carpets in January, 1959, the Tariff Commission reported a finding of no serious injury. It therefore made no recommendation to the President to take action to withdraw or modify the tariff concession applying to these products. We have also explained to industry representatives that they may request a new investigation if they believe the competitive situation has changed. We believe the escape-clause procedure should be followed in cases of this kind.

Article XXVIII of the General Agreement on Tariffs and Trade permits withdrawals and modifications of tariff concessions but calls for other concessions as compensation. We have therefore found it generally advantageous to limit our article XXVIII actions to making technical adjustments in our tariff concessions which may be required, for example, by customs court decisions or special legislation. This approach has strengthened the bargaining position of our negotiating teams in their efforts to enlarge the scope of our trade agreeemnts and to obtain new concessions of benefit to United States exports. This will be an important consideration in the forthcoming multilateral trade conference which has been organized for the purpose of negotiating mutually advantageous tariff reductions.

Although the proposed resolution would not have the force and effect of law, the Department of State believes that its approval is not desirable.

The Department has been informed by the Bureau of the Budget that there is no objection to the submission of this report.

Sincerely yours,

WILLIAM B. MACOMBER, Jr.,
Assistant Secretary
(For the Acting Secretary of State).

Mr. THURMOND. Mr. President, I will not take the time of the Senate to read the letter in its entirety. It is sufficient to say that it is in the usual nonpertinent and condescending language utilized by the Department of State to categorically reject any thoughts of concern over the damage to American interests and American jobs. In spite of the fact that the American Carpet Institute has been before the Tariff Commission as late as last year and obtained the usual unfavorable split decision, the State Department indicated that it would refuse relief and recommend another approach to the Tariff Commission under the escape clause. It is true that the situation of the American carpet industry is much worse now than it was last year, but the majority of the Tariff Commission has made it abundantly clear that it is just as insensible to the destruction of an American industry and the loss of American jobs as is the U.S. Department of State and that any industry is wasting its time and money to seek relief in that quarter.

Mr. President, when will this Congress put a stop to this "Americans last" doctrine? This matter is a constitutional responsibility of the Congress and it is our duty to remedy this situation. It is obvious that in the field of trade the State Department and the executive branch have adopted a policy of "foreigners first," and I sincerely hope that the American people will wake up and demand that their interests be given some consideration by the Congress.

HUMAN EVENTS

Mr. BRIDGES. Mr. President, I note in the CONGRESSIONAL RECORD for August 31, page 18312, a speech by one of my distinguished colleagues, complaining of

and attacking anti-Catholic propaganda in the present political campaign.

I agree with this position. I deplore and condemn such propaganda and attacks. However, I am concerned about one sentence in the speech, which reads as follows:

There will be organizations and publications—like the Ku Klux Klan, the falsely named committee for constitutional government, and a magazine called Human Events, to mention just three—that will peddle messages of suspicion and falsehood, that will attempt to rally prejudice in place of reason.

I happen to be a regular reader of the weekly newsletter Human Events and I am amazed that anyone would bracket Human Events with the Ku Klux Klan. That publication stands for racial and religious tolerance and never, to my knowledge, has it published anything in consonance with the Ku Klux Klan or similar racial and religious prejudice groups. Human Events has never "peddled" messages of suspicion and falsehood, or attempted to rally prejudice in place of reason. There has been nothing in Human Events which could be even remotely interpreted as agreeing with or encouraging "hate groups."

In its current issue Human Events has printed a statement which includes the following statement:

Our position on KENNEDY is simple: Human Events champions the right of a Catholic to become President of the United States. We oppose the Senator solely because of his political philosophy. Human Events regards Adenauer and De Gaulle—both Catholics—as the two greatest living European statesmen.

In closing, Mr. President, I wish to make my position clear on this subject. I do not believe that religion has any connection whatsoever with politics. When a man seeks public office, he should be judged on his merits as a candidate and not because of his creed or any religion belief he has.

I think that ought to be settled very definitely in the minds of the people of this country before the campaign proceeds further in this Nation.

U.S. PERSONNEL IN CHAOTIC CONGO SHOULD BE ARMED OR WITHDRAWN

Mr. BRIDGES. Mr. President, an article appeared in the August 30, 1960, edition of the Oakland Tribune, Oakland, Calif., entitled "U.S. Personnel in Chaotic Congo Should Be Armed or Withdrawn."

This article was written by a great statesman and our distinguished former colleague, William F. Knowland, and I think it deserves the attention of every Member of this body, as well as every thinking American.

Mr. President, I ask unanimous consent to have Mr. Knowland's observations concerning the welfare of Americans in the Congo printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. PERSONNEL IN CHAOTIC CONGO SHOULD BE ARMED OR WITHDRAWN

The beating of eight U.S. airmen, who were on a peaceful mission, by native forces in the Congo is an atrocious and disgraceful business. It is completely unjustifiable or defensible by any standards, and immediate action should be taken.

General Van Horn, commander of the U.N. Forces in the Congo, put on an unprecedented show of force and displayed his anger when he saw the bloody and battered Americans. Well, he might. These victims were unloading a cargo of signal equipment for use of the U.N. when pandemonium broke loose and a wild mob of civilians and soldiers began shouting "Kill! Kill!" They pounced on the unarmed Americans, beat them unmercifully with rifles and clubs. The airmen had no means to defend themselves, which is a ridiculous and tragic situation.

The United States has protested vigorously against the attack. U.N. Under Secretary Ralph Bunche has protested against another Congo attack on U.N. headquarters in Stanleyville where the airmen were beaten. Later, two Swedes, one Liberian and one Australian were arrested by the natives.

What good will protests do? Probably none. The native governments lack control. The country is in chaos, and the Swedish general in command of U.N. Air Forces in Léopoldville, reports that civil and military authority in the Congo has broken down almost entirely. The safety of white technicians and others who are still in the country is in jeopardy.

In view of these conditions, it is incumbent on the United Nations authorities to take immediate and vigorous steps. Under the circumstances we cannot see that protests to impotent governments are going to be effective, or perhaps even recognized. Premier Lumumba's government is not entitled to our moral or economic support.

U.N. officials are reported to be considering an order to their troops to shoot if necessary to defend themselves. Well they might. The present situation is like sending police to deal with armed bank robbers and then telling them to wait for orders from headquarters before using their guns in defense. It is absurd and unrealistic.

Men ordered into an armed area of chaotic civil war, where the natives have been deliberately inflamed by their leader for reasons of their own, should have the right to carry arms and use them if they are attacked. The United States certainly should insist on this right for its personnel.

If the United Nations command does not forthwith arm its personnel and authorize them to use those arms in self-defense then the United States should withdraw all American personnel.

The American people will not tolerate our men being subjected to brutal attack without the means to defend themselves.

We need another Theodore Roosevelt who sent word to a bandit chieftain, Raisuli by name, who had kidnaped an American citizen by the name of Perdicaris.

"Perdicaris alive or Raisuli dead." It got results.

Mr. BRIDGES. Mr. President, this is something I believe in very forcefully. We have observed the pitiful condition of the American airmen, who were flying on a mercy flight and landed in the Congo, where they were brutually beaten up and attacked by Congo forces, though they were unarmed and had nothing with which to defend themselves.

If we are going to send American boys abroad on dangerous missions, they should at least have basic preparation in order to defend themselves when they are attacked. These men not only would have been brutually attacked, but also they would have been murdered if some other troops of some other United Nations unit had not arrived to interfere.

I think it is time we started to stand up in regard to a few of these things, instead of weakly submitting or apologizing for American actions in the world.

I commend the Senator from Florida for his remarks yesterday on the Cuban situation. I do not know how much longer we are going to put up with the Castro stand. He has insulted us and has confiscated our property, yet the American people and the people of many of the associated American countries in this hemisphere hesitate to do anything about it, except to give a little slap on the wrist.

I think the American people favor toughness. I think the American Government should be tougher. It should have a firmer position.

I venture to say, Mr. President, unless we do so we shall be sorry not only in the years ahead but also in the immediate months ahead.

Mr. YARBOROUGH. Mr. President, I concur in the remarks of the distinguished Senator from New Hampshire. I think when we draft these boys into action or permit them to enlist in the Armed Forces, when they are given orders to travel halfway around the globe in U.S. planes, they have a right to expect the protection of the people and of the Government of the United States. It is a sad day in the world when we put these men in uniform, send them out utterly defenseless, and then take a weak-kneed approach in regard to any mistreatment of them.

These men were beaten insensible and left for dead on the airfield. The time has passed when this Government ought to tolerate that treatment. We ought not to send those boys on these assignments, or, if we send them and if they are not armed themselves, they should be provided an armed guard.

I think the position of our flag among the nations of the world is not enhanced by that kind of weak-kneed approach.

CONSTITUTION PROVIDES NO RELIGIOUS TEST

Mr. LONG of Louisiana. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Independent, Anderson, S.C., newspaper, entitled, "U.S. Constitution Says: 'There Shall Be No Religious Test'."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

U.S. CONSTITUTION SAYS: "THERE SHALL BE NO RELIGIOUS TEST"

The 13,000 messengers attending the Southern Baptist Convention in Miami Beach "overwhelmingly" adopted a resolution opposing election of a Roman Catholic to be President of the United States.

The name of Senator JOHN KENNEDY, a leading candidate for the Democratic nomination, was not mentioned in the resolution, but there is no doubt it was aimed at him.

The resolution said in part:

"When a public official is inescapably bound by the dogma and demands of his church, he cannot consistently separate himself from these.

"This is especially true when that church maintains a position in open conflict with our established and constituted American

pattern of life as specifically related to religious liberty, separation of church and state, the freedom of conscience in matters related to marriage and the family, the perpetuation of free public schools, and the prohibition against the use of public money for sectarian purposes.

"Therefore, the implications of a candidate's affiliations, including his church, are of concern to the voters in every election.

"In all cases, a public official should be free from sectarian pressures that he may make independent decisions consistent with the rights and privileges of all citizens."

Does this view represent the thinking of all Southern Baptists? Certainly not.

In the first place, while professing to do otherwise, the resolution contradicts one of the basic principles upon which this country was founded.

The U.S. Constitution states: "There shall be no religious test for office."

The convention's resolution insists there should be a religous test put to every public official. It is saying, in effect, that a man's religious affiliation—a highly personal and spiritual matter—should take precedence over his ability and flitness for the office.

Catholics were among the signers of the Declaration of Independence and were active in the adoption of the Constitution.

Catholics have been elected to every kind of public office in the United States, except the Presidency. Numerous Catholics have been members of the U.S. Supreme Court. Others have been notable leaders in Congress. Many have been or are Governors of the various States.

In this country there are 40 million American citizens of the Catholic faith. Their political views are as varied as those of Baptists or any others of Protestant faith.

It has been proven time and again that Catholics have, and will again, vote against Catholics if they consider the Protestant candidate the abler man. Should Baptists or any other Protestants take the unsound view that a man should be barred from public office even though he might be the abler man?

The Founding Fathers of this Nation made it clear that they meant separation of church and state to apply equally to all—that domination of government by any particular denomination is undesirable.

The myth that any Catholic officeholder is a pawn of the Pope long since has been dispelled. Does the Vatican dictate to the Governments of France or West Germany? Gen. Charles de Gaulle is a prominent Catholic. So is Chancellor Konrad Adenauer. Former Prime Minister Louis St. Laurent of Canada is a leading Catholic. Khrushchev, on the other hand, is a deadly enemy of Catholicism—and the feeling is mutual.

In a recent discussion of the Catholic viewpoint, Msgr. Francis J. Lally, editor of the Pilot, America's oldest Catholic news weekly, was asked this question by U.S. News & World Report:

"What, in general, would be the church's advice to a Catholic voter called on to choose between a Catholic and a non-Catholic candidate for any public office?" The answer was:

"The church's advice is very, very plain. The Catholic is directed to choose for public office the man who has the highest ability, who is at the same time a man of personal integrity.

"It's according to these rules that Catholics have voted in the past, and conscientiously will vote in the future. Religion doesn't enter into it at all.

"Thus, adult Catholics have, without ever asking a question of their neighbors, in recent times, voted for a Presbyterian, a Baptist, an Episcopalian, a Quaker, and a Congregationalist for President—just to name the winners.

"They've done this without ever asking a single question about the religious commitments of these people. This, I think, has been an expression of Catholic confidence in the fact that a man's religious commitments are not something that he forces upon his neighbors.

"All that Catholics ask of their neighbors at the present time, or at any time when a Catholic presents himself for public office, is that their neighbors return them precisely the same confidence."

Can Protestants afford, as Americans, to do any less?

Is Senator KENNEDY the best man for the job? That is the question.

First the Democratic convention must decide if the party thinks so. Then the American people should vote without regard to the nominee's religious beliefs.

If the view should ever prevail in this land that a sincere, God-fearing, Christian of Catholic faith should be rejected in favor of a shallow hypocritical Christian of Protestant faith, then we shall have become politically bankrupt. It would then be time to shut up the shop and turn the United States over to the godless Commies who, as the record plainly shows, are the champion Catholic haters of all.

EXTENSION OF THE SUGAR ACT

Mr. LONG of Louisiana. Mr. President, in my judgment Congress will be shirking its duty if it goes home without passing an extension of the Sugar Act.

I wish to read certain information I have received from Mr. Larry Myers, who has the responsibility for administering the present act in the Department of Agriculture. He told us:

There will be adequate supplies of sugar to satisfy the needs of the United States without supplies from Cuba or the Dominican Republic if we take action soon enough, but we cannot wait until March 31, or any date approximate thereto, and then get legislation and hope to get supplies coming in here by April 1. A hiatus in supplies from the end of the first quarter until new supplies come in could be disastrous.

I ask Senators to note that language. He points out it could be disastrous to this country to have a hiatus in the supply situation, which may come about if we wait through the first quarter of next year.

He further said:

Until last July, we had 5 million tons from domestic sources and 4.6 million from foreign. Of that 4.6 million, 3.5 million came from nearby areas—Cuba, Dominican, Mexico, Haiti, Central America. About 1.1 million came from distant sources, such as Peru and the Philippines. If we omit Cuba and the Dominican Republic, then we have to rely on distant sources for something over 1.5 million tons. We have no doubt of our ability to get the sugar in, but we turn from sugar that is 6 sailing days away to sugar that is 6 sailing weeks away, and we must have leadtime for it, and I think March 31 is a most unfortunate date for this act to end, in view of the fact that we will have a new Congress taking time to get organized and to legislate.

Mr. President, that is an extremely unfortunate situation. If Senators desire to leave, they should recognize that if we leave without acting on an extension of the Sugar Act we shall be faced with what appears to be a chaotic situation throughout the world, so far as world sugar is concerned, and we also shall face what may be a shortage of sugar in the United States during the early months of next year.

Furthermore, Mr. President, this Senator is strongly of the opinion that we cannot have two, three, or four foreign policies. The House Committee on Agriculture cannot have one foreign policy, the President a different foreign policy, and someone else another foreign policy. If the Committee on Agriculture of the House will not permit the Congress to act, I suggest the President should negotiate a treaty to meet this problem and present it to the Senate, so that the Senate can act without having the treaty referred to the House, in order that we may have a single foreign policy for the United States.

I am not prepared to say the President is right or wrong about the action with respect to the Dominican Republic, but I do say we cannot have two, three, four, or five foreign policies at one time and hope to get anywhere with them.

I hope, if the House continues to try to tie the hands of the President in this regard, that the President will negotiate a treaty with some foreign power, to agree that action could be and would be taken when sanctions had been voted or recommended by the Organization of American States. I, as one Senator, would expect to vote to ratify such a treaty in the event the President negotiated it.

HAWAII AND HENRY KAISER

Mr. LONG of Hawaii. Mr. President, it is axiomatic that healthy competition fosters the freedom and high standards of living we cherish so much in our great Nation. I am proud that our newest State is following this American tradition so emphatically. Never has competition been so keen, and never has the spirit of American enterprise been so vigorous as it is today in Hawaii.

In the past, Hawaii has been dependent upon the military, sugar and pineapple for her livelihood. Since the war, however, income from our tourist trade has increased by more than 1,000 percent. Economists are predicting that within a few years this quickly expanding industry will surpass our two basic agricultural commodities in providing income.

Where before only the wealthy could afford its luxuries, Hawaii is now available to people of moderate means, and they come from all parts of the country.

Many government and business leaders of Hawaii have helped make this enormous growth of tourism possible. Most of these leaders have been longtime residents of the islands, and we honor them.

However, one of the most explosive forces behind Hawaii's growth of tourism came to Honolulu in 1954. He is Henry J. Kaiser, a man with big plans who is changing the face of Honolulu. No current history of Hawaii is complete without an account of Mr. Kaiser and his works. I ask unanimous consent to place into the RECORD a recent newspaper article which catches some of the essence of this remarkable man.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Journal American, July 1960]

HE CAME, HE SAW, AND STAYED TO IMPROVE "PARADISE"

(On the Line—By Bob Considine)

HONOLULU.—The most explosive thing that ever happened to Hawaii was not the bombing of Pearl Harbor. It was the arrival in Honolulu in 1954 of Henry John Kaiser. Topheavy with exploits as an industrialist and wartime shipbuilder, the bald and bustling tycoon had come here for a vacation.

As a result of that "vacation" the face of Oahu has undergone sharp change. So has the tempo of this Pacific paradise. Seems that Kaiser was offended by the fact that it was so difficult to rent a hotel room on Waikiki Beach, and so frustrating to arrange for passage here. He rented a house on Kahala Beach, out past Diamond Head, and decided then and there that the islands were too good to hide from millions of Americans.

A thousand obstacles were thrown in his hard-driving path. With incredible agility and energy he vaulted over them. When he was told that he could not build a hotel on Waikiki Beach because there wasn't any more beach left, he brought in acres of sand and lengthened that historic strand.

When his friend Conrad Hilton estimated that 300 rooms would be enough, Kaiser scoffed and built or is building 5,000. When he was told that the "old families" frowned on his presence, he made them like him.

We called on Henry J. to hear him dip into the future. It is an experience as stimulating as a plunge into the turquoise surf. In the airy office he maintains in one of his buildings which changed the skyline on Oahu, the globular 78-year-old sports-shirted tycoon sat surrounded by architects' drawings, maps, building materials, and his friends Eddie Albert and that fine showman-educator's wife Margo, radiant in her billowing muumuu.

Kaiser builds cars in Israel, Argentina, and Brazil, makes steel and aluminum in the United States and many other places, works the biggest gypsum deposit in the world in Mexico, is making planes, kitchenware, missiles, plutonium, and building dams and vast power stations. But his great driving passion at the moment is the creation of Hawaii Kai, a city of 75,000 located beneath towering Koko Head a few miles out of Honolulu.

He speaks of it as if it were finished, as indeed it is in his nimble mind.

"It will cost a billion dollars," he began. "Nobody thought I could get the land, to start with. It's 6,000 acres of the old Bishop estate and it just lay there doing nothing—though it's the most beautiful place in the whole Pacific. My wife and I built a house near it but I couldn't look around me without feeling annoyed that others couldn't share that part of the world.

"So I got it and inside here (he tapped his highdomed head) I can see it now. Hawaii Kai will be the pilot plant of an entirely new concept in living and learning. Our homes and hotels will be a part of our school system. Each living place will be connected with a coaxial cable over which people of all ages can take instruction in any of the arts, science, trades, and humanities. We'll have 50 or 100 channels.

"The world's finest instructors will be on our televised faculty. Hawaii Kai will show the rest of the country the right road to educating its people. Just think of the tens of thousands of young Americans who cannot get into our universities today, for want of money or because of crowded conditions. Sheer and unforgivable waste, that's what it is. In Hawaii Kai they could get that schooling."

We asked him where he'd get the 75,000 persons, and what they'd do for a living.

"We've got a list of 1,500 mainland firms which should want to be a part of Hawaii Kai's science sector—where we will provide an electronic brain calculator for their use. I see firms like General Electric, Convair, and those electronic empires establishing laboratories in Hawaii Kai, turning it into a beehive, but one without chimneys throwing ugly smoke against the sky. It will be finished in 5 years."

Kaiser leaned back in his high-backed desk chair and boomed:

"To be alive in such an age,
With every year a lightning page,
When men speak strong for brotherhood,
For peace and universal good,
When miracles are everywhere,
And every inch of common air
Throbs a tremendous prophecy
Of greater marvels yet to be."

That's Henry J. all over.

Mr. YARBOROUGH. Mr. President, I yield the floor.

VOLUNTARY PENSION PLANS BY SELF-EMPLOYED INDIVIDUALS—(H.R. 10)

Mr. SMATHERS. Mr. President, I wish to make a brief statement with respect to proposed self-employed retirement legislation which we have had under consideration in the Senate for the better part of this year. As every Senator knows, there are 19 million people involved, 7 million self-employed and approximately 12 million employees of the self-employed. Those of us who are strongly in favor of the proposed legislation believe that without giving to the self-employed people some remedy, we permit an existing tax inequity to continue to discriminate against them. The proposed legislation would make it easier for these citizens to set aside certain moneys to take care of themselves in their declining years, and to do so with certain tax advantages, which they do not now have but which are available to other groups of our citizens.

Consequently, we think that until this inequity has been eliminated, we shall have certain discriminations within our tax laws. The time is past due when these discriminatory tax provisions should be removed.

The Senate Finance Committee reported what I thought was a very good bill insofar as its provision applied to the self-employed designed to eliminate these inequities. It added certain other features recommended by the Treasury Department, which some of us did not exactly approve, within the field of corporate-owner-management programs. Nevertheless, in order to get the bill approved, we felt we could accept them and we did.

The bill came to the Senate floor for discussion. We discussed it off and on for the better part of 3 days prior to our adjournment for the convention. The very able junior Senator from Louisiana offered an amendment which he felt, if it were adopted, would make the entire program at least more realistic. This amendment, which I would accept and cosponsor, would make the measure more equitable by providing that those self-employed who would set aside certain sums of money for pension purposes pay a tax on half of that amount of money at the time they put it aside and then, of course, pay the tax on the balance of the money when they retire and receive the money.

The able Senator from Nebraska [Mr. CURTIS] offered another amendment which would have permitted those persons who are self-employed, and who were independent operators, to go into the field and buy certain Government bonds up to an amount of $300 a year. Those bonds would not have matured until the holder reached the age of 65. I think it would have been very helpful in providing once again security for those people who now do not have it in their declining years. This amendment has considerable merit in that the bond purchase plan would only be available to those not covered by any other retirement plan.

We have now come to the end of this session. We have once again run out of time. Obviously, there is considerable opposition to the bill. I have talked with both the minority leader and the majority leader about it. They indicated at one time they were willing to keep us here to talk about it, but the opposition of certain Senators is so strong and so determined that we would probably be here throughout the balance of the fall. So realistically this matter is now one for priority attention when the Congress convenes in January.

I do think that the result of the discussions we have had thus far has been to sharpen the issue. I think we have made great headway. I think we have improved the bill since it came to the Senate from the House.

I and other sponsors of the measure believe that the progress which has been made, plus the assurances which I have been given by the chairman of the Senate Finance Committee as to his great interest in the bill, now that it has been amended, and his assurances that we will have friendly and early consideration of the bill at the next session of Congress, we have every reason to be hopeful that the present inequities in the tax laws with respect to the self-employed will be eliminated, and that we have very good prospects of passing this proposed legislation in the immediate future.

I think it is important to emphasize the view that we should make it possible for people who do not work for some big corporation, who may not be an officer of it or an employee, but who work for themselves—whether they be barbers, real estate operators, sign painters, or whatever their occupation—to make it possible for them under our tax laws to set aside certain sums of money by which they will be able to look after themselves when they reach retirement age. We should try to change in some respects the attitude of encouraging everyone to look to the Government to provide for them when they get into the golden years, when they are no longer working, and used enough money—enough income

coming in to be able to take care of themselves with dignity.

I believe it is important that we pass this type of legislation so that those in that category can provide for themselves in their later years at a time when they are working and productive.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. SMATHERS. I am happy to yield to my colleague from Florida.

Mr. HOLLAND. I wish to say how much I appreciate the fact that my colleague has sponsored this proposed legislation and has kept on consistently fighting for it. I am glad that at least his voice is being raised for that old-fashioned idea of frugality and attempting to save during one's active years, which seems to be a sort of outworn objective in most modern thinking.

Whether the bill is passed or not—and I realize some of the tremendous pressure which is being brought against it as my colleague does—I think my colleague is rendering a real service in calling attention to the fact that this modern philosophy of trying to get all we can from government and putting no importance at all upon the old-fashioned virtues of forbearance from spending everything one is making, and putting a little something away, hoping that independence will be attained and one can face the future in his older years with the assurance that he will be comfortable with his loved ones. He has done a great service. I wish the RECORD to show that I completely approve it. I take off my hat to him for what he is doing.

Mr. SMATHERS. I am grateful to my very able and generous colleague for his kind comments. He has been one of the great workers in this particular field, and has helped considerably. I am grateful to him. I am sure that the self-employed people, who themselves would like to put aside some money to take care of themselves in their declining years, appreciate the work that he has done.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. SMATHERS. I yield.

Mr. LONG of Louisiana. I congratulate the Senator for the diligent and energetic work he has devoted to the effort to have the resolution adopted. The Senator knows that I differed with him, but that to a considerable degree we have been able to resolve our differences. It has been my view that if this type of tax advantage were to be granted it should be done in a way which would be consistent with the principles that exist in various other retirement programs for which Congress administers the funds. I am not saying that Congress should in any way administer the way the money is to be invested in private plans. I insist that the tax treatment should be consistent with the principle of taxation that is in effect with respect to our own retirement fund, Federal employee retirement funds, the railroad employees fund, social security, and other funds. The tax treatment used in connection with those funds is that if a person gets the benefit of tax deferral for the employer contribution, he pays a tax on the part that he personally contributes. When the same person is both the employer and the employee—the self-employed, in other words—it seems to me that, insofar as people look upon themselves as their own employer, they are entitled to set aside half of the amount for a retirement program, tax free, with the other half being subject to taxation. Under these conditions there would still be a very substantial tax advantage compared to existing law. It would place them in line with what we have done for ourselves in our own program. We pay no taxes on the Government's contribution to our retirement until we retire.

We have made a great deal of headway toward meeting objections that have been made, especially those that were made to the bill originally. The Senator knows that there is still objection to it, yet because of the Senator's diligence we are a great deal further toward reaching an agreement on a bill that will be fair to everyone.

Mr. SMATHERS. I am grateful to the able Senator from Louisiana for his remarks. I am particularly appreciative of the fact that he offered an amendment, of which I and other Senators are cosponsors, which, if adopted, would constitute an effective argument against the objection that we were giving special tax treatment to these persons, as distinguished from railroad employees or Government retirees for example.

The amendment of the Senator from Louisiana brings us a great deal nearer to the eventual passage of the bill than we would be if the amendment had not been offered. Therefore, I believe he deserves a great debt of gratitude from those who are interested in the bill and who look forward to its ultimate passage. He has rendered an invaluable service.

Mr. GORE. Mr. President, will the Senator yield?

Mr. SMATHERS. I am happy to yield to my distinguished friend, the Senator from Tennessee.

Mr. GORE. I join with the distinguished and able junior Senator from Florida in the view that this is a problem that deserves and requires the full consideration of Congress. The retirement policies which the Government of the United States sponsors or permits in its tax structure through social security programs and others are a vital part of the American way of life, and a vital part of solving the great problem of the security of the people in the years beyond income producing years.

We need very much to examine the whole question of corporate pension plans and dividends and stock options, and the excesses to which some have gone in this field. It requires the committees of both Houses of Congress to study the problem in its overall phases. I know the able Senator will go into this matter next year and deal with it from the bottom up and from the top down.

Mr. SMATHERS. I thank the able Senator from Tennessee for his comment. I thoroughly agree that the overall problem needs study. The only place we separated in our pursuit of the general subject was on the question as to whether or not we should include this program of retirement for the self-employed, or hold it up until we had considered all the retirement programs, or proceed to these as we get to them. However, there is no question in my mind of a need for what he has said with respect to a consideration by a committee or a subcommittee of the Senate and the House on the effects of the overall retirement programs, and how much is needed and how well the programs work together. There are about 7 million people who find themselves in the position, because of their self-employment, where they are confronted by obstacles in their efforts to set up retirement programs themselves. We ought to eliminate inequities where we can and as early as we can. I appreciate the contributions made by the Senator from Tennessee. He has been consistent in his attitude in that regard. I thank him for his remarks.

SINE DIE ADJOURNMENT—PENNSYLVANIA RAILROAD STRIKE—SUGAR ACT

The PRESIDING OFFICER laid before the Senate House Concurrent Resolution 745, which was read as follows:

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress shall adjourn on Thursday, September 1, 1960, and that when they adjourn on said day, they stand adjourned sine die.

The PRESIDING OFFICER. Does the Senator from Texas propose to make a statement?

Mr. JOHNSON of Texas. Mr. President, I ask that action on the resolution be withheld.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. WILLIAMS of Delaware. I am as desirous of adjourning as is any other Member of the Senate, but I am very much concerned about two situations with which we are confronted. One is the strike on the Pennsylvania Railroad. While I am not an expert in this field, I have been advised that perhaps the executive branch has used all the resources possible under the existing Railway Labor Act to cope with the situation. I suggested earlier today that the majority leader and the minority leader confer with the executive branch to see if the administration felt it had adequate authority under existing law to cope with what I consider to be an extreme emergency, and then I hoped that the Senate would stay in session until we could act.

Mr. JOHNSON of Texas. I believe that has been done.

Mr. DIRKSEN. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. DIRKSEN. The distinguished Senator from Delaware raised that question earlier in the day. I share his solicitude and concern. As a matter of fact, I think half a dozen Senators have

spoken about the possible impact of this strike. So I made inquiry at several sources at the White House.

I am advised that they have the instrumentalities; they have the tools. The matter has taken its regular course. I believe there have been 4½ months' arbitration before the present impasse was reached. Now I am advised from that source, and also indirectly from the Secretary of Labor, that there is nothing more that we can do at the moment. They believe that under the instruments which are available for composing this controversy, they can move forward without additional action by Congress.

Mr. WILLIAMS of Delaware. I appreciate that statement. In my State, this is the only major transportation services we have. It is very vital to us that the trains begin to move again. I appreciate knowing what the Senator has said. With that assurance, one of my questions is eliminated.

One other question relates to whether or not we should adjourn prior to taking action on the President's request for a modification of the present Sugar Act.

Mr. DIRKSEN. I am glad the Senator from Delaware has raised that question, because it anticipates what I propose to say.

I believe I can say with authority that the President of the United States is very unhappy that we have not taken appropriate action to provide him with the necessary flexibility and latitude to deal with the sugar problem. I must say, though, that the Senate—and I say it in testimony to the distinguished majority leader, who has been very helpful in the matter—by a 4-to-1 vote on a substitute proposal, fully acceptable to the Senate, worked its will. But when that bill, as amended, left the door of this Chamber, it was beyond the control of the Senate. It is my understanding that the Senate, under the rules, could not even ask for a conference. If I am wrong, I ask that the Chair, on the basis of any parliamentary advice, correct me. However, I believe I am correct.

The PRESIDING OFFICER. The Chair advises the Senator that it is not in order at this time to ask for a conference, the papers not being in the possession of the Senate.

Mr. DIRKSEN. I understood so. So we could not even ask for a conference, notwithstanding what appeared on the news ticker this morning with respect to the other body and whether the Senate would request a conference. We were in no position, under Senate rules, to do so. Therefore, our hands were tied; and if no action emanated from the other body, that, I thought, was it.

When the President was apprised of this matter, frankly he was very unhappy, and for a very good reason, because he identifies it with a hemisphere situation and the possibility, always, of a critical turn of events.

This was coupled with the question whether Congress might be called back into extraordinary session. I think I can say with authority that the President has no more desire to convene a special session of Congress than do the Members of returning to Washington, particularly in this season, when we look forward to going home, mending a few political fences, and, I think, doing a little campaign work. However, there can be no conclusive answer to that question. I can give the Senate this answer, at least: It will be determined, I believe, by the unfoldment of events and circumstances; and if a critical situation or a really pressing dilemma developed, then perhaps the President would have no choice except to say, "I am sorry, but I must call you back." We hope, of course, that such a situation will not eventuate.

Nevertheless, I express my own disappointment, as well as that of the President of the United States, that action could not be consummated on the bill. What the Senate did is to its everlasting credit. I felt tremendously heartened by the response last night to the amendment in the nature of a substitute. That would have taken care of the situation in its entirety. However, since it was not done, we have no choice except to abide the result and, I believe, to abide the verities of the situation. I have been here long enough to know reality when I see it.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that I may yield to the Senator from New York without losing the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, like other Senators, I have given some thought to this matter as a lawyer. I do not pretend to be an expert on sugar, but as a lawyer I think there is at least a very serious question as to whether the law which we passed in July requires the President to buy sugar or whether, by virtue of his constitutional powers in respect to the foreign policy of the United States, and, indeed, the words of the statute which we passed, which, at least, are, in part, an authorization, the President might not, under proper legal construction stay his hand and not buy at all. There is at least grave doubt whether the statute requires him to buy, although some argue that it does.

The significance of that is this: I think at least the Senate vote demonstrated that an overwhelming majority of this body believes the supply of sugar, even if it should fall slightly short, though I am informed that domestic producers are well able to keep us from being short—but even if it should fall slightly short, I think the evidence showed that the overwhelming sentiment—and I think it represents the overwhelming sentiment of our people—is that our unity with the other American states, in their determination to do what they did with respect to the Dominican Republic, is, to the American people and to the great majority of this body, superior in importance to having a specific exact supply of sugar according to quota.

We are taking only about 330,000 tons out of 10 million which are in use or in storage.

I say this so that the President of the United States might, from some of us—and I know exactly how the Senator from Illinois feels about it—have some encouragement if he feels that the overriding foreign policy interest of the United States commands—and I believe he feels that way, certainly, from what he expressed to us—that we shall forgo the necessity of even a little more sugar for the American people, who did without a great many things in World War II, rather than compromise either the President's power in foreign affairs or the foreign policy of the United States in terms of its unity with other American Republics.

I join with my colleague in his great disheartenment over the fact that this is the situation in which we should have placed our President. But there it is. I hope he may be at least encouraged by some such judgment as that which I have taken the liberty to express, and which others may wish to express.

Mr. JOHNSON of Texas. Mr. President, I thank the Senator from New York for the contribution he has made to the discussion. Earlier today I appealed to him to evaluate the legal situation, to see if we might find some remedy there.

I talked with the leadership in the other body until daylight this morning. Both sides of the aisle have been fully consulted. It is a parliamentary situation. Some Members feel strongly that they will not call up the Senate bill. I hope, however, that no one will mistake the failure to act in the other body for any division in this country, because I thought it was a great tribute to the U.S. Senate last evening when the Senate voted 62 to 17, to carry out, in effect, the President's recommendations.

That overwhelming sentiment of the U.S. Senate should be clear to any would-be enemy of this country.

I am convinced that if the statute does not offer any relief, the President will find ways and means which, in his judgment, will protect the country until Congress reconvenes.

I had hoped that we could pass a bill such as was offered in the nature of a substitute by the Senator from Illinois last night. But a few men do not see it that way. However, a large majority of the Senate believe that way, and a majority of the people of the country have that sentiment and are united in this cause.

Mr. DIRKSEN. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. DIRKSEN. Mr. President, there was a significance in that vote, over and above any domestic implications it may have had from the standpoint of the sugar industry. There was no comfort for any dictator in that vote; and if they get the idea that there could be an admixture of domestic policy and international policy to give them comfort, I think that vote should dispel any such idea.

Mr. JOHNSON of Texas. I heartily concur in what the Senator from Illinois has said.

Mr. KEATING. Mr. President, will the Senator from Texas yield?

The PRESIDING OFFICER (Mr. LUSK in the chair). Does the Senator

from Texas yield to the Senator from New York?

Mr. JOHNSON of Texas. I yield.

Mr. KEATING. I wish to commend the majority leader and the minority leader for the action we took last night. It was convincing. Certainly it was overwhelming proof that the Senate does not wish to have a sugar quota go to the Dominican Republic.

I deeply regret that action was not taken in the other body. It is very questionable, in my opinion, whether the President is not bound—my judgment is that he is bound—to purchase the quota amount from the Dominican Republic. This certainly would not be understood by our friends and neighbors in the Organization of American States. Perhaps the American people can go without this sugar as a consequence of the action of the other body.

I must say—and I have expressed this view before—that this is not the only subject which should be before us today and that there are other matters of immediate and important concern that seem to me to militate against our adjourning at this time. I have expressed my view to the minority leader.

I shall vote against adjourning. But I shall not ask for a yea-and-nay vote, as apparently the disposition is to adjourn.

I thank the majority leader for yielding to me.

Mr. AIKEN. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield to my delightful friend, the Senator from Vermont.

Mr. AIKEN. Mr. President, I should like to say that it is very unlikely that there will be any sugar shortage in this country, whether the President buys 300,000 tons from the Dominican Republic or not. I understand there is at present a very large supply of sugar in the United States, all of which has been acquired at the higher level which we have been paying. As the expiration of the Sugar Act program draws near—on March 31—it is very unlikely that the owners of this high-priced sugar would have any desire at all to hold it off the market or hold it for a higher price—knowing perfectly well that when the act expires, the United States can go into the world market and undoubtedly can buy sugar for a lower price than the price for which we have been buying it in the last few years.

I think we shall, of necessity, have to have some action to protect the domestic producers of sugar in this country, in order to see to it that they continue to produce a good percentage of our requirements. I think it is about one-third of what we consume at the present time. We may have to increase that—and doubtless will. But I would have little fear of a shortage of sugar or any increase in the price of sugar, because only foolhardy operators would undertake to do that.

Mr. JAVITS. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I wish to have a vote taken as soon as possible, because we have a measure which must go to the House, and the House is waiting to receive it.

Mr. JAVITS. Mr. President, will the Senator from Texas yield to me briefly at this time?

Mr. JOHNSON of Texas. I yield.

Mr. JAVITS. First, Mr. President, to emphasize the point as to the legal authority of the President: The President may have advice from some quarters that he has to buy sugar under the act we have passed. I think there is grave doubt on the subject. But I think it almost inconceivable that the President's authority would be questioned if he considered it an authorization, rather than a directive.

Also I find it very difficult to understand what the remedy would be in such a case. The President has every right to exercise his constitutional authority in the handling of our foreign policy in the highest national interest; and we are dealing here with a foreign policy question.

I feel that in the construction of this law, the concept of authorization, rather than direction, would certainly be the one encouraged.

I feel that the Senate has made it clear—and I believe this represents the view of the overwhelming majority of the American people—that the overriding national interest requires us to support the President's unity with the other American Republics in the action which they initiated at San José.

I hope very much that these observations by us may prove helpful to the President.

I should like to state that I, too, shall vote against the motion to adjourn sine die; and I wish to state that my basic reason is my deep feeling that some minimal civil rights legislation should have been adopted at this session in an earnest effort to live up to the campaign platforms of both parties, and that it was at least "must" legislation, considering the grave situations in certain parts of the country, and was at least equivalent in importance with the minimum wage bill, the bill for medical care for elderly people, and other measures with which we dealt so extensively.

Mr. JOHNSON of Texas. Mr. President, I renew my request, and ask to have the question put on the question of agreeing to the concurrent resolution.

The PRESIDING OFFICER (Mr. LUSK in the chair). The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 745) was agreed to.

Mr. JOHNSON of Texas. Mr. President, I move that the vote by which the concurrent resolution was agreed to be reconsidered.

Mr. GORE. Mr. President, I move to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas. Mr. President, I am prepared to ask that the Senate continue in session. I hope the Senate will vote on any measures which may be called up and on the pending measure. I hope they will not be too controversial.

Mr. HOLLAND. Mr. President, before the Senate adjourns, I wish to announce that if I had been present and voting on roll number 76, March 3, 1960, I would have voted "yea" on the motion of the distinguished majority leader to direct the Sergeant at Arms to request the attendance of absent Senators.

Mr. President, under the sine die adjournment resolution, which has just now been adopted, is it not a fact that if the Senate has not concluded its business by midnight, automatically upon the raising of a point of order the Senate will then be adjourned sine die, by order of the Presiding Officer?

The PRESIDING OFFICER. That is correct.

AUTHORIZATION FOR THE SPEAKER AND THE PRESIDENT OF THE SENATE TO SIGN ENROLLED BILLS AND JOINT RESOLUTIONS

Mr. JOHNSON of Texas. Mr. President, I send to the desk House Concurrent Resolution 746, and request its immediate consideration.

The resolution (H. Con. Res. 746) was read and, by unanimous consent, was considered and agreed to, as follows:

Resolved by the House of Representatives (the Senate concurring), That notwithstanding the sine die adjournment of the two Houses, the Speaker of the House of Representatives and the President of the Senate be, and they are hereby, authorized to sign enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

AUTHORIZATION FOR THE PRESIDENT OF THE SENATE TO MAKE APPOINTMENTS TO COMMISSIONS OR COMMITTEES

Mr. JOHNSON of Texas. Mr. President, I send to the desk a resolution for which I request immediate consideration.

The resolution (S. Res. 392) was read and, by unanimous consent, was considered and agreed to, as follows:

Resolved, That notwithstanding the final adjournment of the present session of the Congress, the President of the Senate be, and he is hereby, authorized to make appointments to commissions or committees authorized by law, by concurrent action of the two Houses, or by order of the Senate.

TENDER OF THE THANKS OF THE SENATE TO THE VICE PRESIDENT

Mr. JOHNSON of Texas. Mr. President, I send to the desk another resolution for which I request immediate consideration.

The resolution (S. Res. 390) was read and, by unanimous consent, was considered and agreed to, as follows:

Resolved, That the thanks of the Senate are hereby tendered to the Honorable RICHARD M. NIXON, Vice President of the United States and President of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the second session of the Eighty-sixth Congress.

TENDER OF THE THANKS OF THE SENATE TO SENATOR HAYDEN

Mr. JOHNSON of Texas. Mr. President, I send to the desk another resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The legislative clerk read the resolution (S. Res. 391) as follows:

Resolved, That the thanks of the Senate are hereby tendered to the Honorable CARL HAYDEN, President pro tempore of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the second session of the Eighty-sixth Congress.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered, and unanimously agreed to.

AUTHORIZATION FOR SECRETARY OF SENATE TO RECEIVE MESSAGES FROM THE HOUSE

On request of Mr. JOHNSON of Texas, and by unanimous consent, it was

Ordered, That notwithstanding the final adjournment of the present session of the Congress, the Secretary be, and he is hereby, authorized to receive messages from the House of Representatives.

PRINTING AS SENATE DOCUMENT OF RECORD OF LEGISLATIVE ACCOMPLISHMENTS OF 2D SESSION, 86TH CONGRESS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the record of legislative accomplishments of the 2d session of the 86th Congress be printed in the RECORD and as a Senate document.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUMMARY OF MAJOR LEGISLATION

Mr. DIRKSEN. Mr. President, it has been customary for many years for both the majority and minority leaders of the Senate, at the close of a session of Congress, to put into the CONGRESSIONAL RECORD and have printed as a Senate document their respective statements on the record of Congress.

At this time, I ask unanimous consent to have printed such a statement from the minority side in the CONGRESSIONAL RECORD and to have the same printed, with any necessary revisions and corrections after the adjournment of Congress, as a Senate document, and also to print, after the adjournment of Congress, as a Senate document, a summary of major legislation of general interest.

The PRESIDING OFFICER. Without objection, it is so ordered.

INDEX TO ACTIVITIES AND ACHIEVEMENTS DURING THE REPUBLICAN ADMINISTRATION, 1953–60

1. "The Stewardship of Veterans Affairs Under the Republican Administration, 1953–60," by Senator BRIDGES.
2. "The Housing Record of the Republican Administration, 1953–60."
3. "Development Loan Fund First Proposed by Republican Administration, Reports on First 26 Months of Operation," by Senator BUTLER.
4. "Agricultural Accomplishments Under the Republican Administration, 1953–60," by Senator AIKEN.
5. "The Republican Record of Accomplishments in Atomic Energy, 1953–60," by Senator HICKENLOOPER.
6. "The Republican Record on Behalf of Small Business, 1953–60," by Senator BRIDGES.

8. "The Republican Record on Labor-Management, 1953–60, A Summary," by Senator DIRKSEN.
9. "Commerce, Transportation, Business—A Brief Survey of Advances in These Fields Under the Republican Administration, 1953–60," by Senator SCHOEPPEL.
10. "St. Lawrence Seaway Accomplishments—The World's Greatest Waterway System Developed By and Under the Republican Administration," by Senator WILEY.
11. "Accomplishments of the Republican Administration in Natural Resources and Conservation, 1953–60," by Senator MUNDT.
12. "Republican Responsibility Versus Democratic Reaction in the U–2 Incident and Summit Blowup," by Senator BUSH.
13. "The Republican-Created Commission on Civil Rights—A Summary of Its Accomplishments," by Senator CASE of New Jersey.
14. "Accomplishments of U.S. Space Exploration Under the Republican Administration," by Senator KUCHEL.
15. "The Accomplishments of the Federal Communications Commission During the Republican Administration," by Senator BRIDGES.
16. "President Eisenhower's Travels Abroad," by Senator SALTONSTALL.
17. "The Republican Administration's Record of Impartial Federal Law Enforcement, 1953–60," by Senator COOPER.
18. "Facts and Figures on the Public Debt and Interest Charges Since 1900—The Fiscal Record of the Two Political Parties," by Senator WILLIAMS of Delaware.
19. "Fighting for Freedom—At Home and Abroad," by Senator BRIDGES.
20. "The Nation's Progress in Education, Social Security, Health, and the General Welfare Under the Republican Administration," by Senator SMITH.
21. "U.S. Foreign Policy Under the Republican Administration, 1953–60," by Senator BRIDGES.
22. "Accomplishments of the Export-Import Bank During the Republican Administration, 1953–60," by Senator BENNETT.
23. "Accomplishments of the Farmers Home Administration Under the Republican Administration, 1953–60," by Senator ALLOTT.
24. "Major Accomplishments of the General Services Administration Under the Republican Administration, 1953–60," by Senator PROUTY.
25. "Accomplishments of the Federal Power Commission During the Republican Administration, 1953–60," by Senator COTTON.
26. "Accomplishments of the Federal Trade Commission Under the Republican Administration," by Senator KEATING.
27. "The Stability of the Dollar; the Tax Reduction Record; the Budget and Debt Management Record; and the Advances Made by the Treasury Department During the Republican Administration, 1953–60," by Senator BRIDGES.
28. "Lincoln's Principles and the Republican Party Can Best Lead the Nation in the 1960's," by Senator SALTONSTALL.
29. "The Proud Record of the Republican Party in Enfranchising Citizens of the District of Columbia," by Senator CASE of South Dakota.
30. "Accomplishments of the Federal Aviation Agency Under the Republican Administration," by Senator BRIDGES.
31. "The National Purpose," by Senator SALTONSTALL.
32. "Accomplishments of the U.S. Information Agency During the Republican Administration," by Senator SCOTT.
33. "The Progress Made in the U.S. Postal System Under the Republican Administration, 1952–60," by Senator BEALL.
34. "Improvements in Military Procurement Practices Under the Republican Administration," by Senator CURTIS.
35. "Civil Rights and the Republican Administration," by Senator CASE of New Jersey.
36. "The Nation's Economic Welfare Under the Republican Administration, 1953–60," by Senator MORTON.
37. "Progress Report of Federal Home Loan Bank Board During the Republican Administration, 1953–60," by Senator DWORSHAK.
38. "Summary of Major Accomplishments in the Cooperative Farm Credit System During the Republican Administration, 1953–60," by Senator CAPEHART.
39. "Civil Rights—At Home and Abroad," by Senator FONG.
40. "Our Defense Position—Present and Future," by Senator SALTONSTALL.
41. "What Price Social Welfare to the American People," by Senator GOLDWATER.
42. "Agricultural Accomplishments At A Glance, 1953–60."
43. "The Use of Intelligence Agents and Russian Espionage in the United States," by Senator HRUSKA.
44. "A Sound Record of Accomplishments for our Senior Citizens," by Senator JAVITS.
45. "The Economic Standards of the Republican Administration, 1953–60," by Senator CARLSON.

THE STEWARDSHIP OF VETERANS' AFFAIRS UNDER THE REPUBLICAN ADMINISTRATION, 1953–60

(By U. S. Senator STYLES BRIDGES, of New Hampshire, chairman, Senate Republican policy committee)

Under the leadership of the Nation's best loved and most respected wartime military commander the Republican administration has, since 1953, substantially advanced the affairs of those who have defended the Republic and its flag against aggressors who have sought to deprive men of freedom and the world of peace.

The Republican Party, since its founding a little more than a hundred years ago, has traditionally respected the Nation's responsibility, as George Washington said, "to care for him who shall have borne the battle and his widow, and his orphan." The Republican administration has enhanced its already splendid record in the field of veterans' affairs by a number of major accomplishments as follows:

Compensation and pensions

1. Compensation for the wartime disabled was increased twice, once in 1954 and again in 1957.

2. Legislation was enacted in 1959 which provides more equitable treatment of needy veterans and modernized the veterans' pension program. This legislation also provides pension benefits to widows of World War II and the Korean conflict on the same basis as those for widows of World War I veterans.

Medical benefits

1. Thirteen new veterans' hospitals have been opened and there has been a substantial increase in the number of hospital beds in operation and the average number of patients treated in VA hospitals throughout the year.

2. A $900-million program has been developed and approved to modernize the veterans' hospital system. The first $75-million increment of this 12-year program was included in the 1961 budget.

3. A new Presidential policy was established which authorizes the continued operation of 125,000 beds in the VA hospital system and gives the Administrator of Veterans Affairs the authority to shift and adjust the number and type of beds from one

area to another to coincide with population movements and the changing diagnostic demands for hospitalization.

4. The Medical Research program of the VA has been broadened and strengthened, thus enhancing the quality of medical care for veterans and contributing generally to the health and welfare of the Nation.

Education and training

1. Legislation was enacted in 1956 to provide educational assistance to orphans of war veterans. Since then a total of 19,000 war orphans have received benefits under this act.

2. Two million eight hundred and eighty thousand veterans have received training under VA education and training programs since 1953.

3. One hundred and five thousand disabled veterans have received vocational rehabilitation training benefits since 1953.

Home loans

1. Between 1953 and 1960, a total of 2,639,140 loans to veterans were guaranteed or insured by the VA.

Insurance

1. New benefits have been provided for the GI insurance policyholder, including additional disability insurance, additional conversion rights and liberalized standards for reinstatements.

2. A new investment formula for insurance trust funds allows the investment of these funds at higher rates of interest. Increased earnings will mean increased dividends to policyholders.

Management

1. The VA went through a major reorganization which resulted in economies and improved service to veterans.

2. Modern electronic machines have been installed for the insurance operations and to process the compensation and pension payments. This will result in improved efficiency and economy.

3. The personnel program has been strengthened, resulting in improved morale and efficiency of employees.

4. The stature of the Administrator of Veterans' Affairs has been heightened by having him serve more directly as the adviser to the President in veterans' matters. This includes attendance at Cabinet meetings when matters under discussion involve the VA.

5. The public image of the VA has been improved vastly through sound personnel and management practices.

Figures show scope of activities under Republicans

Summary statistics give a picture of the scope and growth of veterans' benefits from 1954 to 1961 as follows:

	Fiscal year 1954	Fiscal year 1961	Increase
Total VA budget	$4,282,591,740	$5,397,291,000	$1,114,719,260
Compensation payments	$1,730,915,000	$2,066,288,000	$335,873,000
Pension payments	$715,635,000	$1,715,807,000	$1,000,172,000
Regular insurance dividends	$182,300,000	$250,000,000	$67,700,000
VA hospital beds in operation	114,244	121,456	7,212
Average daily patients in VA hospitals	103,491	111,600	8,109
Outpatients visiting	2,152,000	2,279,600	127,600

	June 30, 1954	Estimated June 30, 1961	Increase
Principal value of loans guaranteed:			
Cumulative	$23,948,000,000	$51,640,000,000	$27,692,000,000
Outstanding	17,580,000,000	32,350,000,000	14,970,000,000
Direct loans:			
Cumulative	346,000,000	1,525,000,000	1,179,000,000
Outstanding	298,000,000	1,200,000,000	902,000,000

II

THE HOUSING RECORD OF THE REPUBLICAN ADMINISTRATION, 1953–60—A STATISTICAL REVIEW IN SUMMARY FORM

More houses built than during any similar period in history—nearly 9 million new dwellings, 25 percent more than in the preceding 7 years.

More people now own their own homes than at any similar period in history—three out of every five American families are homeowners, compared to slightly more than one out of two 10 years ago.

More housing for elderly people, and more done to house elderly people than any similar period in history—more than 20,000 private or public units especially designed for the elderly built or started in the last 3 years.

More housing for college students than any similar period in history—more than 37,000 dormitory units for students, teachers, and nurses in training, financed with loans, compared to 13,000 units before 1953.

More American cities engaged in urban renewal than any similar period in history—436 communities—more than double the previous number—have 750 renewal projects under way—four times as many as before 1953.

More done to help localities plan for sewers, water systems, schools, than any similar period in history—advances made to plan 1,300 public works projects involving a total construction cost of nearly $2 billion.

More cities and metropolitan areas engaged in planning for the future than any similar period in history—with grants made for comprehensive planning in 90 metropolitan areas and urban regions and in 1,140 smaller towns throughout the country.

Housing records broken

During this administration the Nation has experienced an amazing growth of home ownership—more families now own, or are buying their own homes than ever before—62 percent compared to 55 percent in 1950. The number of homes owned by their occupants has risen to more than 30 million in the past decade, an increase of over 30 percent.

Since January 1, 1953, until April 30, 1960, housing records have been broken in all directions, testimony to a dynamic as well as well-ordered, well-balanced economy.

Since the beginning of 1953, the number of homes and other dwelling units (apartments, etc.) constructed or started is close to 9 million, compared to 7,100,000 in the 7 postwar years before 1953.

Value of this construction since the beginning of 1953 totals $133 billion, nearly double the dollar value of new homebuilding in the preceding years. Another $45.5 billion has been spent on home maintenance and repairs.

The Federal Housing Administration alone insured more than 2¼ million mortgages on homes to a value of $24.3 billion, and in addition, insured more than 9 million FHA property improvement loans.

Turning to the field of federally assisted low rent housing, the number of (PHA) units started was 127,000.

The administration's anti-inflation policies have paid off in housing. Construction costs in the last 7 years have risen only 16 percent, compared to 66 percent in the preceding 7 years.

During the 7 years of the Republican administration, construction was started on well over 1 million new dwelling units annually, reaching the near record of 1,553,000 units in 1958 under the revised, more complete census system of reporting.

Nineteen hundred and fifty-nine a record housing year

These figures cover a 7-year period. But how about the recent past?

Nineteen hundred and fifty-nine was a big year for housing:

More money—$23⅓ billion—was spent on home construction than ever previously recorded—which does not include a further $7 billion spent for maintenance and repairs.

The Federal Housing Administration in 1959 wrote insurance on 549,600 housing units—the highest number for any year since FHA was established.

Housing for the elderly

One of the proudest achievements of the present administration is that it inaugurated the first Federal measures to help elderly people to get good housing.

In his state of the Union message in 1956, President Eisenhower asked the Congress to revise Federal housing laws "to meet the needs of the growing number of older people." From his proposals came a three-part program written into the Housing Act of that year.

One part of the program that is having spectacular acceptance relates to the provision of private rental housing for elderly persons by nonprofit groups such as churches, labor unions, fraternal groups, and similar associations.

As a result of President Eisenhower's recommendations, and the implementing action by the Congress in the Housing Act of 1956, such nonprofit groups have been able to obtain attractive FHA-insured mortgages—and applications have been rolling in.

In 1959, the administration carried the program a step further by sponsoring legislation to facilitate building FHA housing for elderly rental projects on a profit basis as well as the previous nonprofit basis.

As a result of these two developments, we find beautiful projects being constructed in all parts of the country.

Consider this abbreviated list of projects now in being:

Royal Oaks Manor (Presbyterian), California; Carmel Hall (Roman Catholic), Detroit, Mich.; Michigan Christian Home Association, Grand Rapids, Mich.; OEA Senior Citizens, Omaha, Nebr.; Bethel Methodist Home, Ossining, N.Y.; Evangelical Lutheran Good Samaritan Society Home, Hobart, Okla.; St. James House of Bayton (Episcopal), Bayton, Tex.; Douglas Gardens (Jewish), Miami, Fla.; Vine Court, Church Homes, Inc., Hartford, Conn.

As of April 30, 1960, more than 71 projects with nearly 9,000 living units were either completed or on the road to completion. Meanwhile, scores more were moving up into the pipeline and the number of applications coming in can be counted in the hundreds.

However, this is only one part of the program.

Other changes were made. For example, low rent public housing projects were opened to single elderly persons, 65 or older. Ever since 1937 single persons had been denied admission to such projects.

Further, elderly families were given priority of admission; and the Public Housing Administration was authorized to help local authorities build or remodel dwellings specifically designed for the elderly.

As a result, more than 12,000 units of public housing designed especially for the aging have been added to the public housing supply in 3 years—in addition to the housing of many thousands of elderly families in standard units.

Nursing homes

In 1959, the Administration sponsored legislation to make FHA insurance available for the first time for nursing homes.

This proposal had been long in preparation. Shortly after its passage, hundreds of applications were being received by Housing Agency field offices. Unofficial sources report 2,000 or more interested sponsors hope to use the program aids to expand skilled nursing care throughout the country to provide care for the aging and for other invalid or semi-invalid persons.

Urban renewal

Before the Eisenhower administration, the term "urban renewal" was unknown. It is a new concept for solving the longstanding problem of urban deterioration and decay of our urban areas through combined use of public and private efforts in the urban community. This is not just clearing slums—it is also restoring and preserving good areas and preventing new slums from developing.

More than 1,000 towns and cities throughout the country now have comprehensive local plans, known as workable programs for community improvement, to solve their major housing, planning, traffic, and land use problems through a coordinated attack. No such total community programs existed before 1954.

At the President's recommendation, the Congress has authorized since 1953 $1½ billion in Federal grant funds to aid towns and cities to redevelop and rehabilitate their slum and blighted areas—three times as much as was authorized before 1953.

Under the present administration, the number of towns and cities carrying out renewal projects has more than doubled, totaling 436, and the number of projects is more than 750—four times the number initiated before 1953.

Slum prevention as well as cure

Federal assistance on these earlier projects, moreover, was provided only for clearing slums already in existence.

There were no provisions for preventing slums from coming into existence. So the battle was a losing one from the beginning. It was as if we had built a hospital filled entirely with operating rooms, but with no place for patients to get well and forestall an operation.

A Republican administration and Congress in the historic Housing Act of 1954 initiated an entirely new approach to the slum blight problem—the total approach. This total approach included the following:

Special provisions for mortgage insurance under FHA.

Section 220 for new building or rehabilitation in urban renewal areas.

Special provisions for mortgage insurance under FHA section 221 to provide low-cost housing for families displaced from urban renewal areas.

Special grants for urban planning assistance.

Special grants for demonstration projects that would enlarge our fund of knowledge on urban renewal problems.

Since the problems connected with slum blight are all-inclusive, the approach to them to be effective must also be all-inclusive. Any integrated campaign must be based on a workable program initiated by the local community. Such a program should cover all aspects leading to urban decay—the enforcement of local housing and building codes, the rehabilitation of housing and neighborhoods, the upgrading of municipal services, the effective planning for the orderly growth and development of the community.

Communities adopt a workable program as a condition of receiving Federal financial assistance in the urban renewal field.

New solutions for old problems

Among studies made during 1959 was a survey in depth of the relocation housing program (sec. 221), designed to provide privately built housing for moderate and low income families displaced from their homes by urban renewal, code enforcement, and other forms of public action.

Since its inception in 1954, a total of 105,378 units has been certified as eligible for section 221 FHA mortgage insurance; in 1959 the number certified was 17,915. No such relocation housing assistance existed before 1954.

A search for solutions of another type took place in 18 locations throughout the country by way of the test tube demonstration grant program. No such grants were authorized before 1954.

The purpose of this program is to create practical know-how in the field of urban renewal. Through assistance given to carefully selected pilot projects, its aim is to enlarge our fund of knowledge and produce practical information of use to cities everywhere.

Suburban sprawl

Another farsighted program introduced by this administration in 1954 is the planning program designed to help metropolitan areas combat the new phenomenon in American life known as suburban sprawl.

This was the first such constructive Federal legislation of its kind, and at the end of 1959 there were 94 urban and metropolitan areas receiving planning assistance.

In addition, through another provision of the 1954 Housing Act, more than 1,000 small municipalities were also receiving assistance.

III

DEVELOPMENT LOAN FUND FIRST PROPOSED BY REPUBLICAN ADMINISTRATION REPORTS ON FIRST 26 MONTHS OF OPERATION

(By U.S. Senator JOHN MARSHALL BUTLER, of Maryland)

The development Loan Fund, first formally proposed by President Eisenhower in his special message to Congress on mutual security in 1957, received 585 separate loan applications amounting to $3.68 billion from 59 countries in the first 26 months of the Fund's operation. During this same period, DLF committed $948 million in approved loans and guarantees.

The report, issued June 13 and covering the 26 months to January 1, 1960, was the first detailed annual report to be issued by the new agency.

The Development Loan Fund was created in 1957 as a part of the mutual security program. It extends long-term loans for economic growth projects which may be repaid in the currency of the borrowing country instead of dollars (often referred to as "soft loans"). The Fund operates with close similarity to the Export-Import Bank, in that it makes loans for specific projects rather than providing general economic assistance for countries, as under various titles of the mutual security program.

The Fund started operations early in 1958 with an appropriation of $300 million and authorizations for the fiscal year 1959 of an additional $625 million.

According to the report, transportation and communications projects formed the largest category of enterprise assisted by DLF, with 36 loans totaling $299,300,000.

This category accounted for 32.2 percent of all loans approved.

It included $151,950,000 in loans for the rehabilitation or modernization of railways; $100,950,000 in loans for highway projects; $23,500,000 for ports and waterways; $16,300,000 for telecommunications; and $6,600,000 for airports.

Among the projects assisted were highways into potentially productive but now largely inaccessible areas of Malaya, the Philippines, Ecuador. Paraguay, Honduras, Peru, Haiti, and Iran; harbors and anchorages in East Pakistan and Indonesia; railways in Indonesia, Taiwan, India, Spain, and Pakistan; and telephone and telegraph systems in Liberia, Uruguay, Paraguay, Iran, and Korea.

Industry and mining accounted for 22.9 percent of loans approved, with 33 loans and 1 guaranty totaling $213,130,000. A large proportion of this amount went to India. Other loans will help establish or expand industries in Guatemala, Thailand, Liberia, Tunis, Greece, India, Taiwan, Korea, the Philippines, Bolivia, Indonesia, Nigeria, Turkey, and other countries. They will also stimulate mining in Turkey and Jordan.

Power projects, and multipurpose projects including important power developments, accounted for 15 loans totaling $180 million—19.5 percent of the total. Among these are loans for five large hydroelectric projects in Greece, East Pakistan, Yugoslavia, Korea, and Taiwan. Other loans will assist thermal plants or power distributions systems in Turkey, Yugoslavia, Spain, West Pakistan, Lebanon, and Thailand.

Thirteen loans and one guaranty totaling $64,836,000 were made to intermediate financing institutions in the nature of development banks in 10 countries—Somalia, Iran, Israel, Turkey, Pakistan, the Philippines, Taiwan, Korea, Guatemala, and Lebanon. These institutions in turn will relend the funds to small business enterprises in their respective countries.

Food and agriculture projects—mostly irrigation and drainage projects—accounted for eight loans totaling $54,940,000; and water supply and community development for five loans totaling $29,600,000. In addition, three loans totaling $87,250,000, each embracing a variety of purposes and functions related to general economic development, were made, respectively, to Argentina, Israel, and Iran.

Though DLF has been in operation for more than 2 years, the first year was spent largely in organization and in processing and investigating incoming loan proposals, and no annual report was issued.

IV

AGRICULTURAL ACCOMPLISHMENTS UNDER THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator GEORGE D. AIKEN, of Vermont)

1. Total agricultural assets are at an all-time high of $208.2 billion as of January 1, 1960.

2. Owner equities on January 1, 1960, were $37 billion above January 1, 1953, and hit a new peak of $184.2 billion.

3. Farm ownership is at a record high, and there is a smaller proportion of tenants than ever before.

4. Farm foreclosures are near an all time record low.

5. Total financial assets of farmers, including farmer cooperatives, have risen from $16.7 billion in January 1953, to $19.4 billion, January 1, 1960.

6. Farm debt amounts to only 11½ percent of the value of farm assets.

7. The standard of living on farms is the highest in history, measured in terms of electrical appliances, automobiles, and other conveniences owned by farm families.

8. Repeal of Federal taxes on gasoline used in tractors and other machinery saves farmers $60 million a year.

9. Farmers in 1954 were benefited by the largest tax reduction in history.

10. Per capita farm income rose from $838 in 1950 to $960 in 1959.

11. Well-administered emergency livestock feed programs have helped farmers and ranchers overcome effects of drought, floods, and other natural disasters.

12. Approximately $600 million a year has been extended in disaster and drought aid since 1953. Such aid enabled families to stay on the land.

13. The Water Facilities Act was amended to provide for direct and insured loans for certain soil and water conservation activities in all States to conserve the Nation's water and soil resources. Prior to this amendment, the act had applied to 17 Western States only.

14. Upon the Republican administration's recommendation of July 31, 1953, Congress authorized (in the Watershed and Flood Prevention Act of 1954) State and local agencies to undertake flood-prevention work and agricultural phases of water management in watersheds.

15. Legislation has been passed which has held down the accumulation of surpluses by the Government by an amount estimated to total $14 billion through adjustment in price supports, Public Law 480, and the soil bank.

16. A major reorganization of the Department of Agriculture was effected in 1953 to improve the quantity and quality of its services to the farmer.

17. The bipartisan National Agricultural Advisory Commission was established in 1953 to review agricultural policies and work with the administration in developing and administering farm programs.

18. Social security coverage was extended to farmers in 1954, ending 19 years of discrimination.

19. The Rural Electrification Administration continues to meet the growing demand for electric and telephone service in rural areas, including the expanding needs of rural industry. More than one-third of all REA electrification loans have been made since January 1953. During this 7½-year period, about 925,000 new consumers have been added to the lines of REA-financed electric systems. In calendar year 1959, five out of six of these were nonfarm consumers. An estimated 1 million subscribers have received new or improved telephone service since January 1953 as a result of the REA telephone loan program. Electric loans in fiscal 1960 amounted to more than $200 million; telephone loans exceeded $100 million.

20. The rural development program is raising living standards of those on the lowest rung of the economic ladder through the cooperation of the Federal Government and local authorities and private leadership. Work is progressing in 30 States and Puerto Rico.

Stabilization

21. The payment-in-kind export program for grain and cotton came into being in 1956 and 1958. This program resulted in higher prices to producers. This also resulted in fewer commodities coming to CCC—a saving to the Government.

22. The new uniform grain storage agreement rates in effect July 1, 1960, will mean saving between $85 million and $100 million yearly. The 19 percent lower storage rates generally represent a net saving to farmers who use commercial facilities.

23. More than $20 billion worth of food and fiber was moved out of storage and into use at home and abroad in less than 7 years through disposal programs designed for the needy and drought and storm relief and to help the free nations throughout the world.

24. More than 28 million acres of farmland have been taken out of production by the conservation reserve program of the soil bank and put to soil conserving uses. These acres would have otherwise added to surpluses, whereas participating farmers are now adding to their income, thus making unprecedented strides in the conservation of soil, water, forests, and wildlife resources.

Credit

25. Total credit extended farmers by the Farmers Home Administration during fiscal 1960 is estimated at $310 million, compared with $228.7 million in 1953. Arrangements were made in 1959 for FHA credit to more fully meet the needs of part-time farmers. Loans totaling $12 million will be made in rural development counties in 1960; the 1959 total was $10.2 million.

26. The agricultural credit system was made more responsive to farmers' needs. The Farm Credit Administration was made an independent agency.

Exports

27. The food-for-peace program was set in motion by President Eisenhower and is enabling the United States and other food-exporting nations to better share their abundance with people in the free world. It is helping to feed hungry people, is supporting economic development of friendly countries, is providing additional outlets for U.S. farm production, and is helping to develop future markets.

28. Exports of farm commodities grew from $2.8 billion in 1953 to an all time high of $4.7 billion in fiscal 1957, and for the past 3 years have averaged about $4 billion per year. Exports in fiscal 1960 are estimated at $4.5 billion, the second highest total on record.

29. The agricultural attaché system was returned to USDA from the State Department to make more effective efforts to expand foreign markets for farmers.

Forest Service

30. Operation Outdoors was set up to expand family recreational facilities in the national forests. In 1953 35.4 million people visited the national forests; in 1959 the number was 81,521,000. The Forest Service has built 7,036 new family units for camping and picknicking and rehabilitated 8,973. It has also built 23 new winter sports areas, 38 new swimming places, and 10 new organization campsites.

31. A new milestone was reached by the Forest Service in 1959 when for the first time 2 billion trees were planted, double the 1958 record.

32. Timber cut in national forests is at the rate of 8.3 billion board feet, the highest on record. The yield of the national forests is being sustained and constantly increased. The income from these sales largely offsets the cost of running the national forests.

33. National forest receipts passed the billion dollar mark in 1958. It took 50 years to collect this amount from use fees and the sale of forest resources. In 1959 receipts hit $142.7 million. At this rate it will take less than 10 years to collect the second billion dollars.

34. Progress has been made in reducing forest fire losses and in 1957 they were reduced to an alltime low.

Marketing

35. The special milk program was inaugurated in 1954. The program in 1960 operated in 83,000 schools and child care institutions, where nearly 2.4 billion half pints of milk helped improve diets of our children.

36. The school lunch program absorbs large quantities of plentiful foods and improves diets of 13 million participating children. Fiscal 1960 purchases totaled $540 million. Complete meals in 1960 were increased more than 1 billion over the 1 billion served in 1951.

37. About 60 million people in 82 foreign countries have been receiving food and fiber donated by the United States. Over 4 million American people are sharing in our abundance through donations of surplus foods.

38. In periods of oversupply, 906 million pounds of meat products, poultry, and eggs worth $388 million were bought for the school lunch program, welfare institutions, and needy people. Cattle, hog, poultry, and egg prices were thus bolstered without the Government getting into the meat business.

39. Producers of dairy products, one of the mainstays of agriculture, will receive estimated cash receipts of $4.7 billion in 1960, an alltime high.

40. A major consumer health protection measure, the Poultry Products Inspection Act, went into effect January 1, 1959. During the first year nearly 5 billion pounds of poultry were examined and certified as wholesome.

Research

41. Appropriations for agricultural research have been increased by 117 percent since 1953. Much of this has gone into successful research to find new uses for our farm abundance, and to develop new crops for current needs.

42. Research workers in 1959 discovered the mechanism of plant growth. In a major breakthrough they isolated a pigment that controls germination, flowering, and seed formation.

43. Important new facilities were established to insure future agricultural progress and livestock health. Among these is the Plum Island Animal Disease Laboratory, Long Island Sound, where diseases foreign to our country are being studied for control purposes. Native diseases will be studied at the new National Animal Disease Laboratory at Ames, Iowa. Victories have been registered in the battle against two serious livestock diseases—screwworm infestation in cattle in the Southeastern United States and vesicular exanthema in hogs.

44. New concepts in eradication of insect pests have resulted from the successful use of radiation in the sterile-male method against screwworms in Florida.

45. Success was achieved in the campaign to help wipe out an outbreak of foot-and-mouth disease in Mexico which, had it spread, would have meant incalculable losses for U.S. stockmen.

46. The drive to eradicate brucellosis from the United States passed a milestone in June 1960, when New Hampshire became the first State completely free of the disease. Twenty-four other States have almost eliminated the disease. (Brucellosis is a primary threat to the Nation's cattle; in man it is known as undulant fever.)

Soil conservation

47. The Great Plains Conservation Program was established in 1956 and is operating in 351 countries. A total of 12 million acres was covered by cost-sharing contracts as of May 1, 1960. The long-range purpose is to minimize drought, flood, and wind erosion damage in the Western States once embraced in the Dust Bowl.

48. The number of soil conservation districts asisted in 1959 totaled 2,865 compared to 2,493 in 1952. The land of 21 States, Puerto Rico, and the Virgin Islands is covered by soil conservation districts.

49. In recognition of the Nation's mounting need for water conservation, this Department has stressed protection of watersheds. As of June 1, 1960, 236 local watershed projects in 45 States were receiving assistance. Authorizations for planning assistance had been extended to 549 projects in 48 States.

50. The importance of water to farm and city people has been stressed by this administration. The first Soil and Water Conservation Advisory Committee was established, and meets regularly to plan for the future.

51. The internal revenue law was amended, to permit farmers and ranchers to deduct

from their taxes expenditures made for installing certain soil and water conservation practices.

V

THE REPUBLICAN RECORD OF ACCOMPLISHMENTS IN ATOMIC ENERGY, 1953–60

(By U.S. Senator BOURKE B. HICKENLOOPER, of Iowa)

The Atomic Energy Commission programs for developing the uses of atomic energy have been reshaped and organized in the past 7 years to place full emphasis upon the President's fundamental policy, announced in 1953, that this great new source of energy should be dedicated to man's betterment—not to his annihilation.

Under this policy, the Republican administration has taken the first steps toward economic benefits, both in this country and among our friends in other nations, has accomplished sound progress in the search for new knowledge, and has promoted the peace of the world through scientific and economic cooperation, and through providing the free world with a defensive shield of atomic weapons.

Background

When the Republican Party took office, the Nation was rich in opportunities for peaceful utilization of atomic energy, and the full weapons potential also remained to be developed. An international deadlock—unbroken since 1946—prevented all constructive international cooperation in the field of atomic energy. The Federal Government held a monopoly of ownership of atomic energy facilities and of atomic knowledge. Late in 1952, the Joint Committee on Atomic Energy had reported that "Since spring, 1950 * * * there has been no major project whose purpose is to achieve a reactor directly advancing industrial power." The United States had a strong stockpile of atomic weapons, but thermonuclear bombs had only recently been tested. The first nuclear-powered submarine was still on the way. Major production plants were under construction in the years after the outbreak of the Korean conflict. The United States was still largely dependent on imports for the raw materials of nuclear power and nuclear weapons.

All of these situations were left to the Republicans when Mr. Eisenhower took office in January 1953.

International

The international deadlock was broken when, on December 8, 1953, President Eisenhower made a world-applauded address before the United Nations General Assembly, and brought forth the first fresh approach to this problem since 1946: that peaceful boons from atomic science could be achieved by united effort, and need not wait until the intricate problem of weapons control was solved.

Since that time, 42 nations, and the city of West Berlin, have joined with the United States in bilateral agreements to develop and apply this new source of energy to economic betterment and human welfare throughout the free world.

The nations of Western Europe formed the Euratom community to develop and build nuclear power stations in cooperation with the United States.

The International Atomic Energy Agency, which President Eisenhower proposed in his historic address, has become an actuality with 70 nations cooperating for peaceful uses of the atom. The Organization of American States is moving forward with atomic sciences and applications.

In recent months there have been conferences between the Western Allies and the Soviet Union on means of ending the menace of nuclear warfare, and weapons tests have been suspended.

The United States has given comprehensive libraries of atomic energy information to 58 countries, and 5 international organizations. It has made or authorized grants to 19 nations to assist in research reactor projects, and is making grants of research equipment.

Our Nation has allocated more than three-quarter billion dollars' worth of uranium 235 for sale or lease to friendly nations, and has provided deferred payment for the fuel for power reactors overseas. An equal amount has been made available for similar purposes in the United States.

The United States initiated the first International Conference on Peaceful Uses of Atomic Energy in 1955 in which 72 nations participated. In this and in the second United Nations Conference on Peaceful Uses of Atomic Energy held in 1958, this country presented for unlimited use a great volume of data to assist further progress in beneficial uses. Cooperation in the application of atomic energy to the welfare of man has become a living fact throughout the free world.

The new atomic charter

The President's pledge before the world in 1953 was swiftly supported in 1954 by a new charter for the peaceful development of atomic energy in the United States, and for cooperative work with other nations. This notable legislation of the Republican administration—the Atomic Energy Act of 1954—opened the door for private ownership and development of atomic power. It ended the Federal monopoly on atomic science and technology. It authorized and energized international cooperation for all peaceful purposes. It made possible the rapid advances of the last 6 years in applying atomic energy to mankind's betterment.

Atomic power

The United States leads the world in atomic power today, a leadership measured not in the production of high-cost kilowatts, but in the basic technology and variety of approaches to the problem of competitive costs for power. Industry is cooperating fully in the attack on this problem.

Eight nuclear powerplants that were not even on the designing boards when this administration took office are now operable, and 21 additional plants have been authorized for construction, either by Government or by industry.

Most of the plants are relatively small, but we can expect—on the basis of plants already authorized—a total of some 1,400,000 kilowatts of electricity on the line by the end of 1964. Most of this capacity will come into operation during 1960, 1961, and 1962.

A survey of expenditures and commitments for nuclear reactors, as of the end of 1959, showed that about $1.7 billion was being invested in civilian and military reactors under construction or active development by the Government and industry. About $1 billion of the total was for civilian projects and the remainder for military projects, including more than $650 million for naval powerplants.

This administration has formulated and adopted as guidelines for the Nation's development of civilian nuclear power these five broad objectives:

1. To reduce the cost of nuclear power to competitive levels in high-cost energy areas of this country by 1968.

2. To assist friendly nations now having high-energy cost to achieve competitive levels in a shorter period.

3. To support a continuing long-range program to further reduce the cost of nuclear power.

4. To maintain the U.S. position of leadership in the technology of nuclear power for civilian use.

5. To develop breeder-type reactors to make full use of nuclear energy latent in both uranium and thorium.

The Republican administration has laid plans for an aggressive 10-year effort to accomplish these objectives. We are laying down detailed programs for efficient development. With expanded industrial cooperation, we believe this effort will make it possible to achieve economic nuclear power in high-cost areas of the United States by 1968 with two types of reactors—those cooled with water, and those cooled with organic materials such as benzene derivatives. We believe that, later on, it will be possible to attain economic costs in wider areas of the country.

The Republican administration is continuing its pattern of cooperative development under Federal leadership with the vigorous support of publicly and privately owned utilities.

The leadership of this administration has produced and will continue to produce technology, and to promote development so that, before this country must have nuclear energy to supplement conventional fuels in meeting the ever-growing energy needs of this expanding economy, nuclear power will be available at competitive costs.

Nuclear merchant ships

Late this year, the world's first nuclear-powered merchant ship, the NS *Savannah*, will begin initial test operations in domestic waters. When initial operations are successfully completed, the *Savannah* will visit various ports on both coasts of North America, after which a cruise in foreign waters will be scheduled.

Operation of this vessel will carry over into ships of peace the success of the Navy's developing fleet of nuclear craft. Plans for other merchant ships, and for increasingly efficient nuclear plants, are under development.

The United States is extending into this promising field the technological leadership it already has demonstrated in design, construction, and operation of power reactors.

The promise of research

The flow of knowledge and ideas from research in the atomic energy sciences which has contributed to this Nation's advances has been broadened and expanded.

The Atomic Energy Commission's major laboratories have been strengthened and provided with new facilities for research in physical, medical, and biological sciences. Research in colleges and research institutions has been largely increased. For the current year, there were 1,083 contracts for research of this kind that in total amounted to $52 million—an increase of 75 percent in numbers and more than 185 percent in dollar amounts over 1953.

A portion of this research is directed toward producing useful power from heavy hydrogen in the fusion reaction—the field of controlled thermonuclear research. Encouraging first results have been won, and each year sees further gains.

This program is for the future, but to make sure that this Nation and the world gain every possible advantage from this field, our research in controlled thermonuclear power has been expanded several hundredfold, and the results made available to the public, to science, and to industry.

Every practical use for nuclear energy that our scientists and technologists can extract is being fully exploited.

The United States is investigating the possible peaceful uses of nuclear explosives (the plowshare program).

Many peaceful applications such as scientific measurements, excavation, exploitation of natural resources, production of power and isotopes, and the development of new industrial chemicals appear to be feasible. Initial experiments are being considered in excavation, power and isotope production, and in oil recovery. No detonation of nuclear devices has been authorized.

Initial tests have been successfully completed in a series of experiments leading toward the use of nuclear energy to propel space vehicles.

Lightweight, compact nuclear batteries—actually miniature electric plants—are being developed for a wide range of applications, including power for space vehicle instruments. They give promise of having other practical uses—to power remote weather stations and navigation aids, and as power sources for isolated stations.

Radioisotopes

Since 1953 the use of radioisotopes in research and in practical applications has increased threefold. As tools of research, as diagnostic and therapeutic devices in medicine, and as adjuncts of industrial operations, these radioactive varieties of chemical elements have already yielded the equivalent of large dividends on the tax investment in atomic energy.

The ills of a million medical patients are being diagnosed or treated with the aid of radioisotopes each year—a rapidly developing program urged by the Republican administration.

In agriculture, radioisotopes have opened the way to new and more accurate knowledge of the action of fertilizers on crops, of weedkillers and other chemical aids to agriculture. Radiation applied to plant genetics has assisted in developing rust-resistant strains of oats and wheat, and stronger, higher-yielding strains of peanuts. The screwworm fly—that costly pest of the cattle industry—has been practically eradicated from the Southeastern States, and the campaign of eradication is being extended.

In industry, savings through the use of isotopes have been increasing rapidly since 1953 and further savings lie ahead. Radioisotopes are being used to preserve food and avert food contamination, to improve sewage disposal, to combat sewage and stream pollution, and to increase industrial safety.

Many isotope applications have become standard practice for an entire segment of industry.

Over 90 percent of the tire fabric and 80 percent of the tin cans made in the United States now are controlled in production by radioisotope thickness gages. Similar devices are contributing to the efficiency of steel rolling mills.

To hasten realization of these, and of other benefits from the use of radioisotopes, the Atomic Energy Commission has undertaken, with the encouragement of the Republican administration, a development program to discover new uses of public benefit, to increase training and understanding in industrial uses, and to make larger quantities of radioisotopes available at lower cost.

Over 1 million curies of radioisotopes valued at $20 million have been shipped to doctors, researchers, industries, and private processors.

Industrial participation

The great increase of industrial participation in the atomic energy program, and the growth of international cooperation, were made possible by the grants of authority under the new charter, the Atomic Energy Act of 1954. Under the previous law, a vast body of scientific and technical knowledge necessarily was held secret.

Since passage of the act, the United States has established a privately owned atomic energy industry, licensed, regulated, and inspected to assure the public health and safety.

This progress would not have been possible without the success of vigorous efforts to place in the public domain, accessible to all, most of the nonweapons technological data previously held secret by the Government. This enormous, but careful, release of information has been accomplished without compromising the essential defense and security of this country.

Indicative of this progress is the rate of declassification of technical reports during the last 6 years. In 1954 fewer than 9,000 reports had been declassified; by 1960 the total had grown to more than 30,000.

In addition, the United States has made strong efforts to see that the technical information produced in the atomic energy program has been assembled into reports and distributed. In 1954 some 300,000 individual copies of reports had been placed on deposit at libraries through the country for open use by scientists and engineers; by 1960 this number of documents had grown to over 2,400,000. The reports also have been made available through public sale.

Health and safety

The Republican administration has actively enforced safeguards for the public health in every phase of atomic energy activity.

It laid down the licensing and regulation procedures for U.S. industry, based on years of experience and research in Government operation.

It established a Federal Radiation Council to advise on safety standards, and a Reactor Safeguard Committee to review licensed reactor installations from the standpoint of safety—both bodies afterward being given a statutory charter by the Congress.

This country has readily made available to the use of all nations its knowledge and techniques in the fields of radiation safety—the basis for an unprecedented record of safety in the Federal atomic energy program which has received numerous safety awards—so that this vast new source of energy may be put to work for mankind with a minimum of hazard.

Production

During this administration, a complex of production plants was completed which pours out a steady flow of uranium 235 and plutonium for production of the nuclear weapons that guard the free world, and for the production of power in nuclear reactors.

The United States has become the world's leading producer of uranium ore. In fact, the rate of discovery and the flow of raw materials in this country became so large that, since 1957 and 1958, it was necessary for the Government to announce a limitation on development and purchase to bring the domestic supply, plus its commitment for imports, more nearly in line with requirements. This contrasts with the inadequate supplies of uranium up to the mid-1950's—under another administration.

Atomic defense

The United States has, of course, continued to produce and improve powerful weapons for the defense of the free world.

The noblest product of this Nation's atomic energy program is the shield for the peace of the free world. The number of weapons has increased many fold in total numbers as well as in the variety and military usefulness of fissionable material. New designs have been introduced, and others are under development, which greatly simplify the logistic problems of nuclear weapons use, and which meet specific military requirements. As a result of these gains, increased emphasis became possible on defensive weapons to protect the people of the free world from airborne or missile-borne attack.

The contribution of atomic energy to free world defense goes far beyond the design and production of weapons and new methods for their delivery. It has made possible a fleet of nuclear-powered warships without equal in the world.

The first nuclear-powered submarine was launched in January 1954. Since that time, the *Nautilus* and other nuclear submarines—the *Skate*, the *Seawolf*, the *Triton*—have cruised thousands of miles beneath the surface, have crossed and recrossed the North Pole beneath the ice, have circled the globe while submerged. They are the first true submersibles in the world, as contrasted with the earlier submarines which were actually surface craft capable of submerging.

This achievement, unique in the world, has added greatly to the international stature of the United States as a pioneer in technology, and as a leader in atomic energy development.

This administration has been prompt to seize upon and exploit our lead in this important aspect of defense.

We are building a nuclear navy, presently including 37 atomic submarines, constructed or authorized—10 already are operating—3 surface vessels, a missile armed cruiser and destroyer, and an aircraft carrier.

We are developing small portable nuclear power stations for use in remote regions such as on the DEW-line radar warning system.

Summary

The progress of this Nation in all aspects of atomic energy during the Republican administration has been sound and rapid—in peaceful uses of this new source of energy and its products, in developing power, and in promoting human welfare in this and other countries.

Equally, this awful power has been harnessed for the defense and protection of the free world.

The promise for mankind's betterment, and for peace, is strong and encouraging.

The progress is steadily forward.

VI

THE REPUBLICAN RECORD ON BEHALF OF SMALL BUSINESS, 1953–60

(By U.S. Senator STYLES BRIDGES, of New Hampshire)

American small business has grown and prospered more in the 7½ years of the Republican administration than at any time during the previous 20 years.

Today, there are 4,666,000 businesses in the United States, an alltime high, and 95 percent of them are small enterprises.

The Small Business Administration, created in 1953 by the Republican 83d Congress upon recommendation of the Republican administration, now is a permanent agency, by act of Congress in 1958—upon the recommendation of President Eisenhower.

Twenty thousand business loans have been made by the Small Business Administration for an aggregate of about $930 million, of which about $787 million have been furnished by SBA, the remainder coming from local banks and lending institutions which participated.

SBA loans of all types—though running high into the thousands—have been good loans in more than 98 cases out of 100. Fewer than 2 percent of all SBA loans have been written off as losses. This record attests to the character of those who are the backbone of our economy—the small businessman.

Enterprises in all States, the District of Columbia, Puerto Rico, and the Virgin Islands have been aided.

The Small Business Administration's activities extend far beyond the lending program.

More than 9,000 disaster loans have been made—at 3 percent interest—to owners of homes, businesses, and charitable institutions damaged or destroyed by floods, storms, droughts, or other natural disasters. These loans have amounted to some $96 million, with local banks furnishing about $3½ million and the SBA furnishing the remainder.

The Congress declared, in creating the agency, that particular effort should be di-

rected toward helping small businesses to participate in Government contracts and services.

Under what is called the joint set-aside program, SBA has worked closely with other Government agencies to get proposed Federal purchases, sales, and services specifically earmarked for competitive bidding by qualified small enterprises. The results in this case have been great. More than 79,700 contracts, valued at nearly $5 billion, have been channeled into small businesses by this program.

Similar services by SBA include certificates of competency, which go to concerns showing their capacity to perform specific Government contracts. About 700 of these certificates have been issued, resulting in contracts amounting to $105 million.

Another program is called registration of facilities. Under it, small concerns are placed on appropriate bidders' lists. There are approximately 46,600 firms registered with SBA under this program.

A popular SBA program is that of research and development which is carried on at Government expense and the findings or benefits passed on to small concerns not individually able to do it themselves.

Other SBA projects provide small plant production surveys and regular listings of new products and processes which small firms might want to take up.

The Small Business Administration's management assistance program has been of widespread value. The agency publishes a variety of technical aids for small manufacturers, wholesalers, and retailers, which are distributed free upon request. Nearly 8 million of these have been distributed.

This program includes special management courses offered by public and private schools and other institutions. Instituted 6 years ago, this project has been offered in 275 institutions for a total of 800 courses. More than 24,000 small business owners and managers have attended. The cost is borne by tuitions.

Financial grants have been made to schools and colleges across the country for specific small business management research studies. These findings are later released, in published form, to small businesses.

The Small Business Investment Division, created by Congress in 1958, helps finance small firms at the local level.

This program has generated (mid-June) over $80 million in funds, mostly private, which are available for long-term loans and equity financing of small businesses through privately owned and operated Small Business Investment Companies (SBIC's), licensed by the Small Business Administration.

Already, more than 100 SBIC's have been formed. They are located in all parts of the country. Hundreds of small firms have been financed by these SBIC's in a wide variety of industries.

SBA helps small businesses through loans to State and local development companies. This is to help establish diversified industries in local communities through Government cooperation with local citizens. In this way, SBA has helped to finance some 50 projects in 19 States totaling some $10 million.

The small business record of the Republican administration is one of outstanding assistance in helping to keep the national economy healthy and prosperous and to provide jobs.

VII

FARM CREDIT IMPROVEMENTS UNDER THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator GORDON ALLOTT, of Colorado)

As a young lawyer in the farm community of Lamar, Colo., many years ago, I saw firsthand the hazards which beset the farmer and have marveled since that time at the courage and self-reliance with which the American farmer approaches his problems.

Situations outside his power, such as drought, wind, and erosion, create havoc. Other conditions over which he has no control also occur. In these the farmer and rancher can rightly expect assistance from their Government.

Since the beginning of my service in the Senate, I have sought new legislation to simplify the national farm credit laws. Every means should be utilized to help the farmer help himself by alleviating the problem of obtaining suitable and adequate financing at the time it is needed.

Farmers and ranchers have traditionally demonstrated the ability to handle their myriad of problems with the least possible Government interference. An outstanding example of the Government working shoulder to shoulder with the farmer is the cooperative Farm Credit System under this Republican administration.

Summary of major accomplishments in the cooperative farm credit system

Legislative Accomplishments

Beginning with the Farm Credit Act of 1953, in the first year of the Republican administration, a series of laws have consituted major steps in increasing farmer participation in ownership, improving credit service, reducing Federal Government investment and subsidies in the system, and strengthening the system in other ways. Important features of each law are summarized below:

A. Farm Credit Act of 1953 (Public Law 202, 83d Cong.):

1. Established congressional policy of increasing borrower participation in ownership of the Federal farm credit system.

2. Again made the Farm Credit Administration an independent agency in the executive branch of the Government.

3. Improved coordination through changing the basic organization of the Governor's staff.

4. Increased farmer participation in the management and control of the farm credit system through establishment of the Federal Farm Credit Board and through an increase in the elected members of the district farm credit boards.

5. Provided for increased decentralization and for delegation by the Farm Credit Administration to the Federal land banks and the production credit corporations (FICB's after January 1, 1957) of certain powers and duties of the Administration over the Federal land bank associations (formerly national farm loan associations) and the production credit associations.

The 1953 act was the foundation for the subsequent laws. It restated the objectives of the cooperative system, and directed the Federal Farm Credit Board to make recommendations of means for carrying out these objectives. The following acts were based on recommendations made by the Federal Farm Credit Board.

B. Farm Credit Act of 1955 (Public Law 347, 84th Cong.):

1. Federal land banks:

(a) Loan service of land banks to part-time farmers was expanded; more than 30,000 loans amounting to about $160 million were made to part-time farmers through 1959.

(b) Permitted land bank loans to be closed on the basis of appraisals by land bank designees.

(c) Eliminated the restriction that loans to farming corporations be limited to livestock operations so that land banks may make loans to closely held or family-type farming corporations. Loans totaling about $24 million were made to 387 such corporations through 1959.

(d) Increased the land bank loan limit from $100,000 to $200,000. Since the 1955 act about 777 loans were made for amounts exceeding $100,000.

2. Production credit associations:

(a) Authorized the production credit associations to pay dividends on class A (investment) stock without requiring like dividends to be paid on class B (voting) stock.

(b) Removed restrictions on guaranty funds of production credit associations, thereby giving the associations more freedom in the use of their capital funds to meet the credit needs of their members.

3. Banks for cooperatives:

(a) Provided a plan under which the borrowers from the banks for cooperatives will gradually acquire ownership of the banks and retire all Government-owned stock in the banks.

(b) Provided for retirement of Government-owned stock in the banks through quarterly stock purchases by borrowers and from net savings of the banks.

(c) Reorganized the Central Bank for Cooperatives and provided for election by its borrowers and by district banks for cooperatives of three members of the seven-member board of directors. Directors not so elected are appointed by the Governor.

C. Farm Credit Act of 1956 (Public Law 809, 84th Cong.):

1. Merged the production credit corporation in the Federal intermediate credit bank in each farm credit district, thereby simplifying the district organization and effecting a saving in operating costs.

2. Provided a plan under which production credit associations will gradually acquire ownership of the credit banks and retire all Government-owned stock in the banks.

3. Authorized the distribution of credit bank earnings on a patronage basis to the production credit associations and other financing institutions (OFI's). Patronage dividends must be paid in stock (to production credit associations) or participation certificates (to OFI's) as long as there is Government capital in the banks, but thereafter such dividends may be paid in cash.

4. Authorized each district bank to borrow from and lend to each of the other district banks.

5. Authorized the credit banks to discount or purchase loans with maturities up to 5 years.

6. Broadened the purposes for which production credit association loans may be made.

7. Remove the credit banks from budget control under the Government Corporation Control Act, effective January 1, 1959. This gave the credit banks the same authority as the land banks and the banks for cooperatives to expend corporate funds without regard to certain restrictive statutes.

D. Farm Credit Act of 1959 (Public Law 86–168, 86th Cong.):

1. It transferred from the Farm Credit Administration to the Federal land banks responsibility for making appraisals in connection with Federal land bank loans. The designee program was retained but the requirement of a second appraisal was repealed. It transferred land bank appraisers from the Farm Credit Administration to the land banks, except that certain appraisers were retained by the Farm Credit Administration on the staffs of the chief reviewing appraisers, to be known as farm credit appraisers.

2. The 5 percent interest rate limitation on farm loan bonds was repealed.

3. The $200,000 maximum loan limit applicable to land bank loans was repealed but loans exceeding $100,000 continue to require Farm Credit Administration approval.

4. The face amount of a land bank loan may exceed 65 percent of the appraised normal value of the farm by the amount of stock which is paid for out of the loan.

5. The names of the national farm loan associations and the secretary-treasurers of

such associations were changed to "Federal land bank associations" and "managers" respectively.

6. The Federal land banks were authorized to make unamortized or partially amortized loans under rules and regulations issued by the Farm Credit Administration.

7. The status of employees of the farm credit banks was clarified and employees of the district banks are exempt from the provisions of civil service laws and rules and regulations and various other laws relating to Federal employees.

E. Other legislation:

1. Banks for cooperatives:

(a) Authorized the Central Bank for Cooperatives and regional banks for cooperatives to issue consolidated debentures.

(b) Enlarged the board of directors of the Central Bank for Cooperatives to 13 members.

2. Federal land banks (Public Law 55, 84th Cong.): (a) Authorized Federal land banks to purchase certain remaining assets of the Federal Farm Mortgage Corporation.

3. Developments and improvements in loan service:

Many improvements in credit service resulted from the foregoing legislation. The developments and improvements listed below are partly the result of and partly in addition to the authorities and changes provided in the legislation.

(a) Credit extended reached peak levels. Total amount loaned by all banks and associations, excluding interagency loans and discounts, increased from $2.2 billion in 1953 to $4 billion in 1959. Loans outstanding December 31 increased from $2.2 billion to $4.4 billion during the same period.

(b) The total volume of bonds and debentures issued, the principal source of funds used in making loans, reached peak levels, increasing from $1.4 billion in 1953 to $3.3 billion in 1959. This period provided a good test of the ability of the banks to market their securities under varying conditions ranging from recession and credit ease to high levels of business activity and credit restraint. No applicants were denied loans because of a lack of funds during this period.

(c) The making and discounting of intermediate-term loans for capital purposes, such as machinery, farm improvement and foundation livestock, were tried out experimentally in 1954 and approved on a permanent basis in 1956. By June 30, 1959, such loans had grown to a total which constituted about 12 percent of all loans held by the Federal intermediate credit banks.

(d) In 1956 production credit associations, on an experimental basis, began entering into agreements with purchasing cooperatives to help finance their members when buying supplies. Such arrangements have now been made with hundreds of supply cooperatives and a number of independent supply dealers in several farm credit districts.

4. General operating improvements:

As in the case of developments in loan service, improvements in other phases of operations have resulted partly from the legislative changes and partly from administrative action.

(a) In accordance with the 1953 act, numerous delegations of authority have been made by the Farm Credit Administration to the Federal land banks and to the production credit corporations (and Federal intermediate credit banks since they were merged under the 1956 act). These delegations have had the effects of streamlining operations and reducing the personnel required in supervision of the system.

(b) Although the work has increased, indicated by a doubling of the total loan volume outstanding, substantial reductions in personnel employed have been made in both the Farm Credit Administration, the supervisory organization, and the banks and associations supervised.

(c) Major adjustments of standards used in appraising farms for land bank loans, in order to adapt loan policy better to changing agricultural conditions, were made in 1954 and 1958.

(d) Although substantial amounts of Government capital in the banks and associations were repaid to the Treasury, their total net worth was increased:

[Millions of dollars]

	Dec. 31, 1953	Dec. 31, 1959	Change
Government capital	277.2	219.2	−58.0
Farmer capital	185.4	336.4	+151.0
Surplus and reserves	531.9	650.2	+118.3
Total net worth	994.5	1,205.8	+211.3

VIII

THE REPUBLICAN RECORD ON LABOR-MANAGEMENT, 1953–60

(By U.S. Senator EVERETT MCKINLEY DIRKSEN, of Illinois)

Minimum wage

In 1955 the minimum wage under the Fair Labor Standards Act was raised from 75 cents to $1 and the Department of Labor has continuously recommended an extension of minimum wage protection to several million additional workers.

The average weekly wage in the Nation's manufacturing industry has jumped from $69.60 for a 40-hour week when Mr. Truman left office to $91.20 (as of May 1960) under the Republican administration.

Unemployment insurance

The benefits of the unemployment insurance program were extended under the Republican administration to provide, for the first time, permanent coverage for 2.6 million ex-servicemen. Coverage was also extended to 2.4 million Federal employees and 1.2 million employees of small businesses.

Temporary additional benefits were initiated for those whose payments had been exhausted during periods of high unemployment; this action greatly relieved personal hardship and helped to stabilize the economy.

Legislation was sponsored and enacted under which advances were made to States for unemployment compensation purposes where State benefit funds were seriously depleted.

The States were actively encouraged to improve their unemployment compensation benefits. Since 1953 all States have made improvements in their unemployment compensation laws. All States, except one, increased the benefits under their plans; as a result, average weekly benefits have been increased by 40 percent and maximum duration of benefits has been extended more than 2 weeks.

The Railroad Unemployment Insurance Act was materially strengthened by increased benefits and extended periods of coverage.

Labor-management legislation

The Republican administration sponsored and supported the enactment of legislation to encourage and permit greater participation of union members in the affairs of their unions and to rid labor-management relations of racketeers and crooks.

Collective bargaining

It has been the firm policy of the Republican administration to strengthen and promote the processes of free collective bargaining. The administration has conducted a continuing and vigorous campaign to encourage a better understanding between labor and management and to improve the entire tenor of labor-management relations.

In 1959 there were 27.5 percent fewer strikes involving 46.9 percent fewer workers than in 1952, demonstrating a remarkable improvement in general industrial peace in spite of the prolonged steel strike which, by itself, accounted for over three-fourths of the man-days idle which occurred during the year 1959.

In 1959 agreements were concluded without appreciable work stoppage in a great many major industries, including anthracite coal, electric and gas utilities, west coast longshore, paper and petroleum refining.

Occupational safety and health

Enforcible saftey standards, regulating equipment, processes, and work places, were established for longshoremen and ship repair workers, which will greatly reduce the hazards of their work.

Field offices in the major ports of the United States provide safety services to the maritime industries, State governments, Federal agencies, and labor unions.

Comparisons are being made of existing State safety regulations with American safety standards. These studies will assist States in improving their safety regulations and promote greater uniformity in such standards.

Four President's Conferences on Occupational Safety have been held in the past 7 years. The conferences, under the chairmanship of the Secretary of Labor, have provided a forum for all groups, large and small, to discuss means of reducing work injuries.

Maximum use of manpower

The Department of Labor, under the Republican administration, has made comprehensive analyses and projections of the manpower resources of the Nation covering the present decade and, in advance, the decade 1960–70. It has informed leaders in industry, education, unions, and local and State governments, and mobilized public action and resources to meet the manpower requirements of the future.

Youth in the labor force

The Department of Labor, through its Bureau of Labor Standards, has promulgated and administered a broad program to meet the developmental needs of the young worker to fill job opportunities. Services cover a broad range, including the distribution of effective advisory information to employers.

A program, designed to prevent school dropouts and to keep children in school until they have received the maximum educational training commensurate with their abilities, has been highly successful.

Cooperative arrangements were made with 9,271 high schools for testing and counseling about 300,000 seniors in 1959. A new edition of the Occupational Outlook Handbook, covering employment outlook for about 600 major occupations, was issued in November.

Older workers

The Republican administration has vigorously promoted the employment of older workers by employers so that the crucial deficit in our human resources can be effectively met during the coming decade. Educational programs to dispel unfounded beliefs as to older worker employability and specialized counseling and job placement, in conjunction with the affiliated State employment services, have been emphasized and expanded.

Women workers

The Department of Labor has placed new emphasis upon the activities of the Women's Bureau and elevated its head to the position of an Assistant to the Secretary. Much progress has been made in securing legislation to promote the welfare of women workers. A number of new programs have

been initiated to expand opportunities for women, in higher level jobs and new occupations.

Farm labor

The use of foreign labor has been rigidly scrutinized to insure that it would not adversely affect the employment of domestic farmworkers. In addition, the Department of Labor, operating on its own initiative and with the cooperation of the President's Committee on Migratory Labor, has encouraged the development of State standards in the migratory farm labor area. Of the 28 State migratory farm labor committees which now exist, 22 have been established since the President's Committee was created in August 1954. The emphasis of both the Federal and State committees has been in securing adequate housing, transportation, child labor, and crew leader legislation codes.

Equal job opportunity

More progress has been made in the last 7½ years in eliminating discrimination in employment than ever before. Each year the nondiscrimination clause in Government contracts has taken effect in 7 million contractual transactions involving over $25 billion in goods and services. The President's Committee on Government Contracts (of which Vice President NIXON is Chairman and the Secretary of Labor, Vice Chairman), set up by President Eisenhower to make that clause effective, has been very successful in its task. An increasing number of skilled positions and promotions are becoming available for Negro workers.

Employment of veterans

The Republican administration has maintained a vigilant campaign to insure the full observance of the reemployment rights of veterans. In the past 7 years the Department of Labor has handled 53,000 ex-servicemen's cases. Of these, only 1½ percent had to be referred to the Department of Justice; the remainder were settled to the satisfaction of all parties concerned through discussion and negotiation.

Since 1952 almost 10 million veterans were placed in jobs through the local offices of our Federal and State employment service; a great many of these veterans received individual employment counseling.

Pension and welfare funds

As a first step, protection was provided beneficiaries of pension and welfare funds through a disclosure act requiring reporting of financial operation of funds to the Secretary of Labor. The Department has continuously pressed for legislation essential to make the act effective and enforcible.

Cooperative efforts with the States

The Department of Labor has since 1953 placed particular stress upon improving the wages, hours, and working conditions of America's working men and women through action by State and local communities. Gratifying results have been achieved by close cooperation with State authorities; more progress in good labor legislation has been made by State legislatures since 1953 than in any comparable period since the basic labor laws were originally enacted.

Substantial headway has been made in minimum wage legislation. Thirty-five States now have minimum wage laws. Since January 1953 five States have enacted such laws for the first time. In five more States, which already had such legislation, new and improved laws were adopted. In addition, 10 States raised their statutory minimum limits.

Because of legislative action since the Republican administration took office in 1953 to date, workmen's compensation benefits of $40 or more are now being paid in 30 jurisdictions, with 16 of these providing benefits of $50 or more.

Major improvements in child-labor laws were made in about a dozen States from 1953 to date. In the same period, the number of States having Fair Employment Practices Acts, prohibiting discriminatory practices of employers, employment agencies, and unions, has increased from 8 to 16.

Enforcement of fair labor standards legislation

Diligent efforts have been made to prevent unscrupulous employers from taking advantage of their employees and unfairly competing by violating the provision of fair labor standards legislation.

In fiscal year 1959 a total of 1,360 enforcement actions took place under the Fair Labor Standards Act and the Walsh-Healey Public Contracts Act.

This is the largest number of cases litigated in any year since these acts have been in effect and more than twice the number of cases which occurred in 1955.

In the last 7 fiscal years, more than $60 million has been paid to over 700,000 employees by employers who had violated the minimum wage and overtime provision of these laws.

This represents approximately 20 percent more back wages than was collected in a comparable period under the previous Democratic administration.

Since January 1953, almost 300 firms and individuals have been ruled ineligible as a result of violating the Davis-Bacon Act and related legislation. This is in striking contrast to a total of only four actions imposed in the entire 17-year history of this law from 1935 through 1952.

Administrative improvements

The establishment services of the Department of Labor have been evaluated and many new programs initiated to improve the skills and employment opportunities of the labor force, to provide statistical and other essential data to labor, management, and the public; the Washington and field offices have been reorganized and the career service strengthened.

International affairs

To achieve U.S. foreign policy objectives, the Government's international labor activities have been strengthened. Labor attachés have been increased from 35 to 62 and the United States has provided effective leadership in the International Labor Organizations. These efforts have been reinforced by active cooperation with American trade unions.

IX

COMMERCE, TRANSPORTATION, BUSINESS—A BRIEF SURVEY OF ADVANCES IN THESE FIELDS UNDER THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator ANDREW F. SCHOEPPEL, of Kansas)

Good times mean more jobs, good wages and decent profits; and under the Republican administration times have never been better.

The gross national product has soared from $345 billion in 1952 to over $500 billion today. The Department of Commerce, under the Republican administration, helped make our economy strong.

In January 1953, when the Republican administration took office, the average weekly wage in manufacturing was $69.60 for a 40-hour week. Today, it is $91.20.

Transportation

The long overdue St. Lawrence Seaway was finally made a reality by the relentless efforts of the administration, turning the Great Lakes areas into our "fourth seacoast."

It was formally opened in 1959 by Queen Elizabeth and President Eisenhower.

The NS *Savannah*, the world's first nuclear merchant ship, was launched in 1959 by Mrs. Eisenhower. It is a joint project of the Maritime Administration and the Atomic Energy Commission.

The National System of Interstate and Defense Highways was begun in 1956 and is now progressing as rapidly as available funds will allow. The Federal financing of these highways is on a pay-as-you-go basis, thus directing the financial burden toward the users of the highways rather than the general taxpayer.

Exhaustive transportation studies were completed with a view to stimulating competition and reorganizing those Government departments directly concerned.

Over 500 commercial-type Federal activities have been abolished; for example, the Inland Waterways Corporation's Federal barge line was sold to a private firm, turning a deficit liability into a taxpaying asset.

Scientific and technological research

In 1960 the Coast and Geodetic Survey began a full-scale oceanographic examination which will add to our knowledge of the sea and will undoubtedly uncover new sources of food, fuel, and metals. The Survey's modernized seismic wave warning system saved hundreds of lives following the recent Chilean earthquake.

In basic scientific research the National Bureau of Standards is now in the vanguard, contributing significantly not only to business but also to our national defense and space efforts.

The research work of the Weather Bureau has brought us near to a major breakthrough in understanding and predicting the weather of the world. The successful launching of the Tiros weather satellite captured the attention of the entire world.

The installation of advanced computers in the Patent Office has revolutionized its patent search procedure, making it feasible to speed up processing of an accelerating number of patent applications.

Business statistics and services

Taking its cue from the President's special message to Congress in March 1960, the Department's Bureau of Foreign Commerce launched an extensive export promotion program.

It is expected that this export drive will contribute significantly to the attainment of new markets and profits for American business and, in so doing, create new jobs and minimize the deficit in our balance of international payments.

The Bureau of the Census, operating with the latest electric computers and tabulating machines, is completing the decennial census of population in record time and with unparalleled accuracy and efficiency.

Various commercial statistics now compiled by the Bureau of the Census have been of great assistance to private business planners.

The Office of Business Economics has become the oracle to the question, "How is business?" Its basic indexes are used by economic prognosticators and planners with greater reliance than ever before. Government, labor, and business can now plan for tomorrow without relying on the divining rod approach of yesterday. The story depicted by these economic statistics dramatically demonstrates the strength of the free enterprise system.

The Business and Defense Services Administration was set up in 1953 with 25 industry divisions to provide American business with up-to-date information and advice. Its Office of Area Development was established to cope with the problems of diversifying industry and relieving chronic unemployment. Mindful of the chaos in Government during World War II, the administration created the National Defense Executive Reserve, consisting of business and professional men who would occupy key posts in the event of an emergency.

President Eisenhower proclaimed 1960 as Visit the U.S.A. Year, and it is expected that in 1960 there will be a 20-percent increase over 1959 in the amount of money spent by visitors to the United States. This money will help to relieve the balance of payments deficit, without the use of artificial controls.

To demonstrate the strength of our free enterprise system and to achieve better international economic relations, the Office of International Trade Fairs has stimulated the U.S. participation in 83 oversea fairs in 28 countries since 1954. By this means, the administration, in cooperation with free enterprise, is helping sell more American products in previously untapped foreign markets.

The Republican administration has diligently administered the Export Control Act to assure an embargo on trade with Red China and to prevent strategic commodities from falling into the hands of the Communists.

X

ST. LAWRENCE SEAWAY ACCOMPLISHMENTS—THE WORLD'S GREATEST WATERWAY SYSTEM DEVELOPED BY AND UNDER THE REPUBLICAN ADMINISTRATION

(By U.S. Senator ALEXANDER WILEY, of Wisconsin)

The St. Lawrence River, together with the Gulf of St. Lawrence and the Great Lakes Basin, provides a continuous waterway extending 2,342 miles into the heart of the North American Continent from the Atlantic Ocean. They constitute the greatest inland water system in the world.

The St. Lawrence Seaway project, connecting these waterways with the Atlantic Ocean, was created by law May 13, 1954—and was a Republican-sponsored project from start to finish. The $124 million seaway was established as a self-sustaining and self-liquidating enterprise. Construction activities were financed by proceeds from revenue bonds issued to the Secretary of the Treasury. The cost of operations, payment of interest, and the repayment of borrowings are financed from toll revenues.

Although the St. Lawrence Seaway in its generally accepted scope extends only from Montreal to Lake Erie, it is nonetheless a vital part of the St. Lawrence River-Great Lakes Waterway. It provides the connecting link between the lower reaches of the St. Lawrence River and the Great Lakes.

By the use of 15 locks, oceangoing vessels and large lake-type vessels are raised or lowered a total of 552 feet. This is the highest total elevation that large vessels are lifted or lowered in any waterway of the world. The St. Lawrence Seaway provides navigation facilities for large ships with cargo carrying capacity up to 8,500 tons for oceangoing general cargo vessels and up to 25,000 tons for lake bulk-type vessels.

The St. Lawrence Seaway from Montreal to Lake Erie is operated under concepts, principles, and laws which distinguish it from other waterways in the United States and Canada.

The seaway is international in character. The navigation facilities are located in both Canada and the United States.

The seaway is operated by governmental corporations of two countries, the St. Lawrence Seaway Development Corporation of the United States and the St. Lawrence Seaway Authority of Canada. Each corporation is given certain powers and obligations for carrying out the responsibilities of its respective laws. The Seaway Development Corporation has authority to make arrangements and negotiations with the Seaway Authority of Canada on the operation and maintenance of the seaway.

The major accomplishments of the St. Lawrence Seaway Development Corporation are as follows:

1. The St. Lawrence Seaway was opened to deep-draft vessels on April 25, 1959, on a toll basis. During the 1959 navigation season, 6,595 cargo vessels transited the seaway with 20½ million tons of cargo. The income derived from the seaway was sufficient to pay all operating costs and to return to the Treasurer of the United States $2,150,999 as a payment on the accrued interest and debt of the Corporation. The U.S. portion of the seaway is operated with a small number of employees. The total employment in June was 179.

2. The U.S. portion of the seaway, which consists of the Eisenhower and Snell locks, the 10-mile Wiley-Dondero Channel, dredging in the Thousand Islands and in the South Channel at Cornwall, as well as the construction of the related navigation facilities including floating plant, has for all practical purposes been completed. The Corporation constructed jointly with the Seaway Authority of Canada the Cornwall-Massena International Bridge. This was done under a tight construction schedule which was reduced in time from 7 to 5 years.

3. All arrangements with the Seaway Authority of Canada, and the Power Authority of the State of New York and the Hydro-Electric Power Commission of Ontario were made and the work coordinated in order to meet the completion schedule of the agencies in the two countries involved.

4. The St. Lawrence Seaway Development Comporation completed a study and negotiated an agreement on tolls with the St. Lawrence Seaway Authority of Canada. The agreement was approved by the President on February 25, 1959, and later made the subject of an exchange of notes between the United States and Canada.

5. The St. Lawrence Seaway Development Corporation and the St. Lawrence Seaway Authority of Canada prescribed operating rules and regulations for vessels transiting the seaway. These joint regulations are uniform throughout the seaway.

6. The construction of the seaway, exclusive of interest during construction, was financed for about $124 million. This is well within the $140 million borrowing authority authorized by the Congress to construct the U.S. portion of the seaway.

XI

ACCOMPLISHMENTS OF THE REPUBLICAN ADMINISTRATION IN NATURAL RESOURCES AND CONSERVATION, 1953–60

(By U.S. Senator KARL E. MUNDT, of South Dakota)

More progress has been made between January 1953 and May 1960 in the intelligent conservation, prudent use, and orderly development of America's priceless natural resources, than in any comparable 7-year-plus period in our history.

With the Republican Party giving true meaning to national conservation goals, these have been some of the salient accomplishments:

1. Vast new sections of the arid West have been opened to productive life through the Republican administration's insistence on accelerated construction of reclamation dams and reservoirs.

2. Unprecedented increases in the production of hydroelectric power have contributed to a blossoming of industrial development throughout many of the Western States.

3. Our great network of national parks has been expanded and revitalized.

4. Fish and wildlife conservation has moved forward at a rate unmatched in previous history.

5. Effective steps have been taken to insure wise development of our mineral resources.

6. During fiscal year 1959, the Department of the Interior's Bureau of Land Management took in revenues of over $136,700,000 from the conservation and development of the Nation's public domain lands. Since 1785, total revenues from the lease and sale of public domain lands and resources have exceeded $2 billion. The significance of the fact that more than half of this sum has come in since January 1953 needs little emphasizing. At the same time—recognizing the growing values of public domain lands under departmental management—a set of stringent anti-speculation policies have been adopted to provide full protection of the public interest.

7. The urgent short-term and long-range water needs of the Nation are being met through imaginative new programs.

8. Statehood has been won for Alaska and Hawaii, thus opening vast new resource reserves to increased productivity and development.

9. Important new programs have been launched to conserve and develop the human resource represented by our Indian population.

This list consists of only the highlights of a massive total conservation upsuge that has, directly or indirectly, helped to better the lives of all Americans under the Republican administration.

These striking accomplishments, achieved through forward-looking programs, are in close accord with the basic conservation philosophy of the Republican Party.

Promotion of cooperative planning and effort—teamwork—in natural resource conservation and development has been a cornerstone of the positive resource policies of the Eisenhower-Nixon Republican administration. This teamwork approach has paved the way for a resource development effort by both public and private enterpise without parallel in our history. The 1953–60 period seems certain to go down in history as our most golden era in resource progress.

The Republican Party is keenly aware of the fact that today's generation has a solemn obligation to conserve our physical and scenic resources for tomorrow's children. At the same time, the Nation's high standards of living give ample proof that intelligent conservation and orderly development of natural resources are compatible.

Reclamation

Today—after nearly 50 years of the Federal Government's reclamation program which was proposed and started by the Republican Party under President Theodore Roosevelt—some 7,500,000 acres of irrigable land in the 17 Western States are served by reclamation projects. Power-generating capacity stands at more than 5 million kilowatts. Crops produced with reclamation water are worth nearly $1 billion a year.

These are impressive figures.

But far more impressive is the record of accomplishment in the more recent 1953–60 Republican years. This Republican administration has underway the largest water resources construction program in history—a record $1.2 billion was requested in the 1961 budget for flood control, navigation, irrigation, power, and related water resources projects.

In the field of reclamation, since 1953 the Republican administration has sponsored, and Congress has authorized, 51 reclamation projects, or project units, including the billion-dollar Colorado River storage project, the largest reclamation undertaking ever approved in a single piece of legislation.

Included also were the Glendo unit of the Missouri River Basin project in Wyoming, recently dedicated; the Talent division of the Rogue River Basin project in Oregon; the Trinity River division of the Central Valley project in California; the Lavaca Flats, Mirage Flats extension, and O'Neill units of the Missouri Basin project in Nebraska.

Taken together, these 51 new projects or project units will have a storage capacity of nearly 42 million acre-feet—an increase of 50 percent over the Bureau of Reclamation's storage capacity in mid-1953.

These 51 new projects will ultimately provide full or supplemental irrigation water for nearly 890,000 acres of land—an area larger than Rhode Island and a 12 percent increase over the total irrigable acreage of reclamation projects for the 1953 crop year.

Their hydroelectric powerplants will deliver each year about 8½ billion kilowatt-hours of energy—an increase of one-third over the total energy generated at Bureau hydroelectric plants during the fiscal year ending June 30, 1953—the last fiscal year planned by the Truman administration.

Over the same 7-year period, on some of these projects and on units of others authorized earlier, the administration has undertaken 44 new construction starts including nine supplementary projects, and involving a total present and future investment of nearly a billion dollars.

For the 8 fiscal years ending June 30, 1961, the Department of the Interior has had or requested a total of $1,765 million appropriated for the work of its Bureau of Reclamation. In other words, nearly $1 out of every $3 made available for reclamation activities since 1902 ($4,723 million) will have been appropriated during the Eisenhower administration.

This impressive financial support for western resource development has been possible in spite of record peacetime defense costs, and in spite of the fact that in every fiscal year but one, the Congress, controlled in every session but one by the Democrats, has failed to appropriate as much money as the Republican administration requested for reclamation work.

The importance of the reclamation program to the West cannot be overestimated. Bureau of Reclamation projects deliver annually about 260 billion gallons of water for 106 municipalities and 68 industrial entities scattered throughout the West. Irrigation water is delivered to more than 128,000 farms, embracing more than 8 million acres. These farms produce crops valued at nearly $1 billion annually. The daily activities of nearly 10 million persons who live on farms in industrial areas and in cities provided with water from reclamation projects are vitally affected by these artificially developed supplies of lifegiving water.

These, then, are some of the spectacular accomplishments in reclamation by the Eisenhower-Nixon Republican administration in the short span of a little more than 7 years. The results of this achievement have contributed immeasurably to the economic stability, not only of the West, but the Nation as a whole.

In addition to authorization of the billion-dollar Colorado River storage project, which will store and transport water for consumption in a four-State, semiarid area larger than New England, a second far-reaching legislative accomplishment of the Eisenhower-Nixon administration was the enactment of legislation to provide loans and grants for local construction of small (less than $5 million in Federal participation) reclamation projects and distribution systems for existing reclamation irrigation projects. This program—long advocated by western water user groups—was not finally authorized until 1955, yet a total of nearly $40 million had been appropriated for loans and grants by early 1960, and other requests were awaiting final action.

A third highly significant legislative milestone of this Republican administration in regard to reclamation was passage of Public Law 85–500, known as the Water Supply Act of 1958.

This act provides authority for the U.S. Army Corps of Engineers and the Bureau of Reclamation of the Department of the Interior to make provision for storage, not only for immediate but also for future water supply needs in connection with Federal multipurpose projects, thereby permitting the Federal Government and local interests to share equitably in the benefits of multiple-purpose construction.

Hydroelectric power

Some indication of the almost incredible scope of the natural resource accomplishments of the Republican administration may be found in an examination of the results achieved from a single phase of conservation in a single area of America.

The Pacific Northwest today, with its plentiful and low-cost hydroelectric energy—increasing more than twofold in the years since 1953—is the strong right arm of a burgeoning era of progress and prosperity. In little more than 7 years, the Federal Government's Columbia River power system grew from two multipurpose dams—Bonneville and Grand Coulee with an installed capacity of 1,814,400 kilowatts—to 17 multipurpose projects completed or under construction with an ultimate installed capacity of 7,818,650 kilowatts.

Currently, the Pacific Northwest region has 161 hydroelectric plants with nearly 10,600,000 kilowatts of installed capacity—two-thirds of them completed or placed under construction during this administration.

Presently under construction, scheduled, or under active consideration are 74 additional projects with an installed capacity of nearly 12 million kilowatts. Half of this capacity is either actively under construction now, or firmly scheduled.

Since 1953, power generated at Federal dams in the Pacific Northwest has totaled 228.3 billion kilowatt-hours—a figure nearly 3½ times greater than that for the preceding 10 years. During this some period, generation from non-Federal dams nearly doubled.

Over $1.5 billion has been allocated to power facilities in the short span of something more than 7 years, a fourfold increase over the total for the previous 10 years due to the progressive construction of hydroelectric dams by the U.S. Army Corps of Engineers and the Department of the Interior's Bureau of Reclamation, together with the transmission facilities of Interior's Bonneville Power Administration. As of May 1, 1960, more than $647 million has been repaid to the U.S. Treasury from power revenues—all of this under the Republican administration.

Recreational resources

Probably in no other area of our national life are the immediate demands being placed on an invaluable resource by the explosive nature of our population growth more dramatically illustrated than in the increasing pressures on America's recreational resources.

Fantastic as they have been, the Nation's population gains do not begin to approach the corresponding rate of increase in outdoor recreational activities by countless millions of Americans.

In our national parks, for example, there were just 1 million visitors in 1920. By 1959 this figure had risen to over 62 million—an increase of more than 6,000 percent—and the upward curve was continuing.

In the progressive years of the Republican administration, the Department of the Interior spearheaded intensified efforts of recreational planners at all levels of government to provide wholesome outdoor recreational facilities for the multiplying millions of Americans today—and to assure at least corresponding benefits for the generations yet unborn.

Through the dynamic programs of its agencies, the Department, in less than 8 years, has achieved advances in this important era of national life unmatched in previous history. These were some of the accomplishments:

1. The National Park Service, with its 10-year program, Mission 66, made spectacular forward strides in preserving, protecting, and improving the irreplaceable national park system. At the same time, since January 1953, more than 600,000 acres have been added to the system, and a number of new areas have been established within the jurisdiction of the National Park Service, including the establishment of the 29th national park in the Virgin Islands. The total budget for the National Park Service for the first 4 years of Mission 66—a sum approaching $300 million—exceeded the total for the 13 years prior to this administration.

2. The Bureau of Reclamation, whose prime responsibility is development of irrigation for the water-hungry West, established important new water recreational facilities in the arid areas of the Nation through the creation of great manmade lakes at reservoirs.

3. The Fish and Wildlife Service carried out far-reaching programs to provide abundant supplies of fish and game for recreational hunting without depleting wildlife resources.

4. In less spectacular, but equally important ways, the Bureau of Land Management and the Bureau of Indian Affairs made positive contributions to improving and increasing America's recreational facilities.

Under Mission 66, the National Park Service—which administers about 180 areas of scenic, scientific, or historical importance—made rapid strides during the Republican administration years in restoration and development of park areas.

When this long-range program was inaugurated in 1956, the Nation's parks were neither staffed nor equipped to protect their irreplaceable features, nor to provide proper facilities for the increasing millions of visitors—expected to reach or surpass a total of 80 million when Mission 66 is completed. Lodging and eating facilities were inadequate and outmoded. Interpretive services for proper park enjoyment were lacking, while priceless park features were deteriorating.

From mid-1956 to early 1960, the Park Service, through the investment of more than $100 million, provided new and better park roads, trails, parkways, visitor centers, museums, campsites, utility systems, and a variety of interpretive services throughout the Nation. The sign, "A Mission 66 Project" became a familiar landmark to millions of traveling Americans. Again, all of this under the Republican administration.

During the same period, private enterprise invested more than $17 million to provide new hotels, lodges, motels, restaurants, and other accomodations which allow park visitors to do more than merely drive through park areas.

In the years of the Eisenhower-Nixon Republican administration the Department of the Interior moved to salvage some of the remaining potential park areas when it requested Congress to approve legislation which would authorize the acquisition of at least three additional national shoreline areas.

In 1959, the national wildlife refuges administered by the Department's Fish and Wildlife Service recorded some 10 million visitors—in contrast with about 3.5 million in 1951.

Like other owners of land in scenic areas away from metropolitan centers, Indian tribal groups during the progressive years of this administration have become increasingly aware of the attractiveness of certain reservation areas to sportsmen and tourists. The White Mountain Apache Tribe in Arizona, for example, has on its reservation about 80 percent of that State's trout stream mileage. It created a large manmade lake in a mountain setting, stocked it with fish, and laid out 500 summer cottage sites for lease. In this and other ways, the Indians during this administration—with the encouragement of the Bureau of

Indian Affairs—developed important new recreational resources for the enjoyment of many Americans.

Recognizing America's swiftly growing interest in water recreation, the administration won congressional approval of recreation as one of the specific beneficial uses of the gigantic upper Colorado River storage project.

This enormous project will contribute not only large amounts of water for irrigation and hydroelectric power generation, but also, because of the positive conservation leadership of this administration, will create a great network of manmade lakes which will provide many hours of wholesome recreation for our growing population in years to come.

Use of the manmade reservoir lakes of the Department's Bureau of Reclamation has mounted phenomenally during the Republican administration. In 1955, some 10 million people visited and enjoyed the water recreational facilities of reclamation reservoirs. By 1959 a total of 19.5 million persons used these recreational resources—an increase of almost 100 percent in about 5 years.

Fish and wildlife conservation

Typical of the greater recognition given during this administration to the need for improved conservation of our fish and wildlife resources was the reorganization of the Department's Fish and Wildlife Service under the Fish and Wildlife Act of 1956.

Under this far-reaching legislation, the sport fisheries and wildlife and the commercial fisheries activities of the Department were divided into separate bureaus of the Service under a commissioner. A new Assistant Secretary of the Interior was designated to supervise all fish and wildlife programs.

A spectacular action under this administration was the laying of the necessary groundwork for establishment of the 9-million-acre Arctic Wildlife Range, an area three times as large as any existing American national wildlife area. When the action is completed, the total of national wildlife areas will soar close to 27 million acres—protected for present and future generations of Americans.

In the period of little more than 7 years, a total of 23 refuges, with a total acreage of 114,152 in 22 States, were added to the national wildlife refuge system, and action was begun for the establishment of several others.

Another outstanding action was passage of the new $3 duck stamp law designed to greatly accelerate additions to the network of national waterfowl refuges in the four flyways. The Duck Stamp Act of 1958 ended the diversion of duck stamp funds for other than refuge purposes. Under it, all net revenues on stamp sales are earmarked for selection and acquisition of habitat for waterfowl.

Highly important in the conservation and development of the Nation's fish and wildlife resources were these additional departmental actions during the Eisenhower-Nixon Republican administration:

1. A controversial issue which had been unsolved for many years—oil and gas leasing on refuges—was settled by prohibiting such activity on national wildlife refuges in the 48 contiguous States except in case of oil drainage.

2. In the interest of the salmon fishery of the Northwest, the Department of Interior actively urged that no further dams be built on the Middle Snake River in Idaho below the mouth of the Imnaha until other possibilities for water storage on that river system had been thoroughly explored and considered.

3. Amendments to the Coordination Act of 1946 were sponsored by the Department and now make possible enhancement of fish and wildlife values, as well as the mitigation of losses of such values in Federal water development projects. These amendments make improvement of fish and wildlife a specific purpose of Federal water resource projects—making fish and wildlife an equal partner in this resource development field.

4. The Federal aid program administered by the Fish and Wildlife Service resulted in new high marks of conservation progress. The magnitude of this program may be judged by the expenditures since January 1953. A total of some $150 million—Federal aid and State funds combined—was invested by the various States on Federal aid projects for the restoration of game, and nearly $50 million for the restoration of fish. This, of course, did not include restoration projects wholly financed by the States. In the Federal aid fish restoration work, States completed or initiated construction of 186 lakes with a total surface of 25,000 acres. For the restoration of game, States acquired in fee title, through the Federal aid program, approximately 1¼ million acres of land at a cost of more than $45 million, about one-third of which is being used for waterfowl management.

5. In addition to the 23 new refuges established in the national refuge system, the Department of Interior also brought about the establishment of more than 40 new units in the system of cooperative areas—Federal lands operated as wildlife management areas by the States under agreements developed by the Fish and Wildlife Service.

6. Research in the early years of the administration proved a definite link between unwise use of pesticides and the destruction of several species of desirable birds, land animals, and fish. As a result of these findings, the Department supported legislation which authorizes long-range studies on the effects of pesticides and to recommend formulations and practices which would not endanger fish and wildlife. A measure of the growing importance attached to this program may be seen in the fact that the 1958 appropriation of $280,000 was increased to $2,565,000 in 1959.

At the same time, departmental programs aimed at combating various forms of threats to our commercial fisheries resources made important progress since January 1953. For example, explosive increases in the abundance of sea lampreys in the Great Lakes in recent years brought about the destruction of the once valuable lake trout fisheries in Lake Huron and Lake Michigan and greatly reduced the trout population in Lake Superior. During the productive years of this Republican administration, the Bureau of Commercial Fisheries developed electrical barriers to kill spawning adult lampreys, and chemical lampricides to kill developing lamprey larvae in the spawning stream gravels. These methods show excellent promise of reducing the lamprey populations to low levels so that the valuable lake trout fishery can be restored.

Here, too, the Republican concept of teamwork between Federal, State, and local agencies, together with private industry, has led to a unified approach to the problems of our commercial fishing industry.

7. A program of standards development for inspection of fishery products was initiated by the Department's Bureau of Commercial Fisheries, and was carried out in close cooperation with the industry. The result has been development of five voluntary U.S. standards for major fishery products. These standards define the characteristics of good quality fish and are available to everyone.

Sound public land management

During fiscal year 1959, the Bureau of Land Management took in revenues of over $136,700,000 from the conservation and development of the Nation's public domain lands. Since the Bureau was created in 1946, revenues have totaled more than $1.2 billion. Over 80 percent of these revenues have come in since the Republican administration took office in 1953. Since that year revenues have exceeded appropriations by more than 6.4 to 1.

Major developmental actions affecting the resource programs of the public domain in recent years have included the opening of some 20 million acres of northern Alaska lands to mining and mineral leasing development. The area is known as PLO 82 and is adjacent to Naval Petroleum Reserve No. 4. The opening of these lands to exploration and development may pave the way for major new economic development for the new State.

Of no less importance to the conservation of public lands has been the recent improvement of fire detection and suppression methods in the Western States. The Bureau has placed into effect regulations to carry out the Department's responsibilities under Public Law 167, which provides for multiple use of surface resources on public lands and protects the public interest in those resources through regulatory provisions. Public Law 167 represents the most important change in the mining laws since enactment of the Mineral Leasing Act of 1920, and constitutes one of the most vital conservation measures in history.

Minerals and metals programs

Twice, in 1957 and 1958, the Republican administration presented a comprehensive minerals program to the Democratic-controlled Congress. Congress failed both times to enact this recommended legislation. The only significant portion of the two major minerals programs which was authorized by Congress was the long-range domestic minerals exploration plan. This legislation established the Office of Minerals Exploration within the Department of the Interior. The program of this office provides for the sharing of the risk between the Government and private industry to carry out minerals exploration projects which would not normally be undertaken with private capital alone.

The administration has also recommended passage of S. 1537, which would establish policy guidelines by the Congress, to be followed by the Government in recommending and establishing minerals programs. The effect of such legislation would make the maintenance of a sound and healthy minerals industry a major consideration of the Federal Government. It has not been enacted.

The Department of the Interior's Bureau of Mines continues its emphasis on research involving high-temperature and special-structural metals, and is attempting to develop new uses for materials having unusual properties.

An outstanding accomplishment of the Bureau during 1959 was the development of a method for making shaped castings of molybdenum at the Electrometallurgical Research Laboratory at Albany, Oreg. Recently, deposition of high purity tungsten into simple controlled shapes by a novel process developed by the Bureau has generated tremendous interest among the designers of missiles. Its possible application in helping to solve the problems incident to high-temperature alloys is significant.

Emphasis was placed by the Department's Geological Survey on the development of new geologic concepts, techniques, and tools to aid in the search for mineral deposits and to determine the water supplies of the Nation.

As a result of geochemical research, a tungsten deposit was located in western Colorado, and new methods of interpreting rock alterations and geochemical anomalies led to a major discovery of silver-lead-zinc ore in Utah. About $11,760,000 for geologic and mineral resources surveys and mapping will be expended during the 1960 fiscal year.

After failure of the Democratic-controlled Congress to enact either recommended program, quotas on imports of lead and zinc were imposed by President Eisenhower, October 1, 1958. In conjunction with moderately increased consumption, these quotas served to improve the situation of these two commodities during 1959. Mine production of lead and zinc have increased.

By proclamations dated March 10 and April 30, 1959, the President provided for regulating imports of crude oil and its principal products into the United States. Subsequently, regulations were issued implementing the proclamations and establishing in the Department of the Interior an Oil Import Administration under the direction of an administrator and an Oil Import Appeals Board.

This program was initiated to encourage a healthy climate for domestic oil exploration.

Mineral resource development

Under the Eisenhower-Nixon policy of "creative conservation," the years since January 1953 have witnessed a period of rapid economic growth and scientific advancement despite substantial defense stockpiling of strategic materials. During this period, the Nation's mines and mineral plants have sustained a high level of output and, largely through improved technology, developed new resources to meet future needs.

At the beginning of the Republican administration, petroleum production from the public lands amounted to some 80 million barrels a year.

Today, just a little more than 7 years later, annual production has soared to more than 142 million barrels—enough oil to heat 5 million homes.

In 1949, 124 billion cubic feet of natural gas was extracted from public domain lands.

By early 1960, this total had been raised to nearly 446 billion cubic feet—an increase of more than 300 billion cubic feet in a decade.

In 1949, there were some 22,000 outstanding mineral leases on public lands in the United States covering slightly over 19 million acres.

Today, after little more than 7 years of this Republican administration, over 107 million acres are covered by more than 132,000 leases.

As with water and land resources, the spectacular advances in mineral resource development since January 1953 have been made possible in large measure by the successful sponsoring by the administration of vital new legislative measures.

Passage of the Outer Continental Shelf Lands Act in 1953 marked the beginning of Federal mineral leasing of offshore submerged lands and the rapid expansion of private exploratory development investments in mineral production.

Providing legal sanction for the application of modern-day multiple-use land management, Public Law 585 of 1954 opened the door to mining and mineral leasing development on the same tracts of land. This law was followed a year later by two laws, one authorizing the extraction of uranium and other source materials from lignite coal deposits, and the other permitting mining claims on some 7.2 million acres set aside as power and water sites in 24 States.

In 1955, Congress passed Republican-backed legislation often described as the most important single conservation measure since passage of the Taylor Grazing Act of 1934. Public Law 167, the Multiple Surface Use Act, had the effect of unlocking immense values of surface resources on millions of acres in dormant and abandoned mining claims.

Early in the administration the Department of the Interior initiated an incentive program to encourage exploration for domestic sources of critical and strategic minerals and metals by providing for Government participation in the costs and risks involved.

The program is unique in that for the first time a joint effort was made by the Government and private industry for minerals exploration. The results have been highly satisfactory, adding substantial mineral reserves to the Nation's resources.

Meeting our water problem

Realizing that the enormous demands for water will continue to increase as our population expands and our standard of living rises, the Eisenhower administration has pursued with urgency a vigorous program to find an economical means of converting saline water.

The Department of the Interior's Office of Saline Water has already made a sevenfold reduction in the cost of converting salt water to fresh water, and the outlook for the future is bright, despite the fact that the Democratic-controlled Congress has refused in 4 years out of the last 7 to appropriate as much money as requested for this program.

Saline-water conversion pilot-plant tests give strong indication of a breakthrough in preventing the formation of scale on distillation equipment. Scale formation is one of the major technological problems in distillation processes. This exciting new development will be utilized in the first of five saline-water-conversion demonstration plants to be built by the Department of the Interior. U.S. Senator FRANCIS CASE, of South Dakota, has established himself as a farsighted statesman in pushing this program from the start.

One of the plants will work by an electrodialysis process and will be located in the northern Great Plains in Webster, S. Dak. It will be designed to convert brackish water to fresh at the rate of 250,000 gallons per day.

Imagine the blessings which will be brought to the arid area of this country, and to the world, if we can be successful in this program. Republican leadership will assure success, if it is at all possible.

Statehood won for Alaska and Hawaii

Congressional approval of the Republican platform promise and President Eisenhower's request that both Alaska and Hawaii be admitted into the Union, was largely due to the persistence of the Eisenhower administration's ardent statehood advocate, Secretary of the Interior Fred A. Seaton. As spokesman for the administration, Secretary Seaton helped lead both statehood campaigns.

Indian affairs

The policies of the Republican administration have struck at the root of the problems of the American Indian and mark a turning point in the history of Indian affairs in the United States.

In 1953, only 79 percent of the Indian children between the ages of 6 and 18 on reservations were enrolled in school. For the current school term, the figure is 93 percent, and when the new term begins in the fall there will be facilities to meet the educational needs of all school-age Indian children on reservations throughout the United States, most, of course, being located in the Western States.

During this administration, the Department has taken positive steps to repair the damages of past educational deficiencies among adult Indian people. Today, an adult education program is being conducted at 80 locations, and 3,000 Indians and native Alaskans are enrolled.

Since 1956, the Bureau of Indian Affairs also has conducted a program of vocational training in trade schools and on-the-job training in industrial plants.

In conclusion

Never in our history has there been such progress, in so short a time, to benefit so many people, as the progress made under the Republican administration in its two terms.

XII

REPUBLICAN RESPONSIBILITY VERSUS DEMOCRATIC REACTION IN THE U–2 INCIDENT AND SUMMIT BLOWUP

(By U.S. Senator PRESCOTT BUSH, of Connecticut)

We have long been aware of the North-South conflict within the Democratic Party, and the rifts which exist between the radical wing and the moderates and conservatives.

But a more serious division has recently arisen on an issue which never should have been injected into partisan domestic politics. I refer, of course, to the discordant voices in the Democratic Party since the U–2 espionage plane incident and the collapse of the summit conference.

Who speaks for the Democratic Party on foreign policy, and the related issues which involve the security of the United States, and the safety of every American family?

Is it Adlai Stevenson, who claims President Eisenhower gave Khrushchev a "sledge hammer and a crowbar" to wreck the summit conference?

Or is it Jim Farley, who says Stevenson attempts to use the U–2 incident "to 'sledge hammer and crowbar' another disastrous nomination for himself as the apostle of appeasement out of the Democratic Party"?

Is it JACK KENNEDY, who said the President should "apologize" or "express regret" to Khrushchev for the flight of the U–2 over Soviet territory?

Or is it LYNDON JOHNSON, who shouted to the Washington State Convention at Spokane: "I am not prepared to apologize to Mr. Khrushchev. I am not prepared to send regrets to Mr. Khrushchev"?

I have said this issue should never have been injected into partisan domestic politics. But since the Democrats have done it, I say to you that we are fortunate as we proceed to nominate our candidate for President.

We can leave it to the Democrats to accuse each other of being, in Mr. Farley's words, "apostles of appeasement." We can let the Democrats imply, as Senator JOHNSON did, that if a certain Democrat were elected President he might feel compelled to "apologize" or "express regret" to Khrushchev.

The Vice President's demonstrated ability

We have a candidate for our Presidential nomination who has demonstrated—in Moscow—his ability to stand up to Khrushchev, and refuse to knuckle under in response to truculent threats.

We have a candidate who has demonstrated—in Latin America—his physical courage under assault by Communist-led mobs.

We have a candidate who, by his long service on the National Security Council, knows what must be done to preserve the freedom of the United States and of the free world.

We have a candidate, tested and trained for the job, supremely qualified to assume the grave responsibilities of the President of the United States.

We have a candidate who will be a worthy successor to our great President, Dwight D. Eisenhower, a man who knows the Eisenhower policies and is ready to build upon that firm foundation to a greater America—RICHARD M. NIXON.

What the U–2 accomplished

I should like now to discuss the U–2 incident and the torpedoing of the summit conference by Mr. Khrushchev in terms of what these events mean to us as Americans.

The flights of the U–2 planes over Soviet territory which have taken place over the past 4 years have given the United States information of incalculable value.

We have learned the location of the Russian missile bases, planes, submarines and centers of arms production, including atomic

plants. Photographs taken at the extraordinary height of 70,000 feet have revealed these vital target areas with striking clarity.

The penetration of the borders of the Soviet Union by our planes has disproved Khrushchev's boasts about the invulnerability of his air defenses. It now appears conclusive that the Soviet's antiaircraft missiles have been unable to reach our planes flying at heights of 70,000 feet, and that Pilot Powers' plane was downed only after a "flameout" forced him to descend to lower levels.

This knowledge was essential to the defense of the United States and of the entire free world. Committed as we are not to strike the first blow against any nation, our security has depended upon our ability to retaliate against any attack upon us or our allies with instant, terrible destruction. To retaliate effectively, we must know where the vital targets are, and we must know that SAC, our major retaliatory force, can get through to them.

The U–2 flights gave the men with responsibility for our defenses—President Eisenhower, the Joint Chiefs of Staff, the civilian Secretaries of our armed services and others within a limited circle—the knowledge they had to have to plan a safe level of our own military power. This information was not available, for obvious security reasons, to Senator SYMINGTON and other critics who have been demanding billions of dollars more in spending for defense.

Intelligence operations must continue

President Eisenhower has suspended U–2 flights over the Soviet Union for the balance of his term. We shall have to depend on other methods, including photo reconnaissance satellites which soon will be in the skies, for gathering this information which the United States must have for her protection, and the protection of the free world.

Our intelligence operations must continue, by whatever means are available, until the Soviet Union accepts President Eisenhower's offer to have the United Nations conduct "open skies" surveillance over the entire world.

The collapse of the summit conference was a blow to the hopes of the British and others among our allies, who believed that face-to-face meetings by the heads of states could bring meaningful progress toward peaceful coexistence.

But it also resulted in a strengthening of the unity between the United States and her allies. Mr. Khrushchev's vitriolic denunciations of President Eisenhower have sent a wave of revulsion around the world, and have drawn the nations of the West closer together. There is going on, among our allies, a realistic reappraisal.

Here at home, the breakdown of the summit conference also calls for reappraisal of our position in the world, and of our responsibilities. On assignment by the Senate Committee on Armed Services, I have visited our military outposts, not only in Western Europe, but also in the Far East. I have been with the 6th Fleet, in the Mediterranean, and the 7th Fleet in the straits of Formosa and the Philippine Sea. I believe I have some understanding of the dangers we face and of the extent of our commitments throughout this troubled planet.

Communists make coexistence seem unrealistic

To me, talk of peaceful coexistence has seemed unrealistic in view of Communist China's bitter enmity of the United States. It might have been possible to reach agreement with the Soviet Union on control of atomic weapons, for it is as much in her interest as ours to keep this terrible destructive power out of the hands of the Chinese Reds. But it is hard to see how we could reach significant overall disarmament agreements with Russia when we are committed to resist aggression by Communist China in the Far East.

In this unstable area, the Chinese Communists are constantly probing for weak spots. Had it not been for the 7th Fleet, a constant reminder of the power of the United States, I believe many small nations in the East would already have been crushed by the Reds.

Now that world tensions have been heightened by the breakdown at the summit, America must face the unpleasant fact that we may well become involved in at least small wars, and possible fairly large ones in the Far East.

The summit collapse may prove to be a blessing in disguise if it awakens the American people to reality.

We must accept risk; pay price

If we are to maintain our exposed positions all over the world we must recognize the risks and be willing to pay the price.

Now that our Western Allies have been restored, with our help, to positions of economic strength, we must call upon them to do more in the common defense.

But even should our allies share more of the costs, we must still pay a large price for our security.

That price means greater expenditures for defense, for scientific and space research and for education, including scientific and vocational training.

It means giving up some of our luxuries, and the "business as usual" philosophy.

It means an unceasing search for ways to achieve economies in our National Government; a ruthless war on waste and extravagance wherever found; and a system of priorities in Government spending which "puts first things first." Failure to face up to these necessities could mean higher Federal taxes.

As Americans and as Republicans, as the party of responsibility, we have a solemn obligation to place these facts before the people.

The times are too serious for a campaign in which unpleasant facts are obscured, the sky is the limit on promises, and the question of who is to pay if promises are fulfilled is conveniently ignored. Both parties have conducted this kind of a campaign in the past, although I believe our opponents have sinned in this respect far more than have we.

And I believe the American people will respond to a campaign of truth and honesty. In times of stress in this great Nation, the people have always risen to the occasion. So shall it be in this troubled year of 1960.

XIII

THE REPUBLICAN-CREATED COMMISSION ON CIVIL RIGHTS—A SUMMARY OF ITS ACCOMPLISHMENTS

(By U.S. Senator CLIFFORD P. CASE, of New Jersey)

Perhaps the most dramatic and far-reaching legislative accomplishment of this Republican administration was the enactment, for the first time in 82 years, of the Civil Rights Act of 1957, followed by the Civil Rights Act of 1960.

In 1957, the then Attorney General Herbert Brownell, Jr., representing the President, made a request to the Congress for a full-scale public study regarding the denial of the right to vote and other deprivations of equal protection of the laws because of race, color, religion or national origin which allegedly were being perpetrated against certain minority groups in this country.

The Republican administration asked for a full-scale public study, declaring that it should be objective and free from partisanship, broad, and at the same time, thorough. These were the reasons that the administration felt a bipartisan commission, independent of the Congress, could best, fairly, and objectively appraise the civil rights situation as it exists in the United States. In response to this request, Congress established the Commission on Civil Rights as a part of the first civil rights act passed since 1875. On September 9, 1957, the President saw his wishes come to fruition when he signed the civil rights bill.

The contents of the act

Specifically, the Civil Rights Act of 1957 directed the Commission to (1) investigate allegations in writing under oath or affirmation that certain citizens of the United States are being deprived of the right to vote and to have that vote counted by reasons of their color, race, religion, or national origin; (2) study and collect information concerning legal developments constituting a denial of equal protection of the law under the Constitution; (3) appraise the laws and policies of the Federal Government with respect to equal protection of the laws under the Constitution.

Staffing the Commission

On November 7, 1957, the President nominated the following members of the Commission: Stanley Reed, retired Supreme Court Justice, chairman; John A. Hannah, president of Michigan State University; John S. Battle, former Governor of Virginia; the Reverend Theodore M. Hesburgh, president of the University of Notre Dame; Robert G. Storey, Dean of the Southern Methodist University Law School; and Assistant Secretary of Labor J. Ernest Wilkins. Shortly thereafter, Mr. Justice Reed resigned. The President then nominated Dr. Hannah to be chairman and Doyle E. Carlton, former Governor of Florida, to be the sixth member of the Commission.

The Senate confirmed the nominations on March 4, 1958. On February 18, 1958, the President nominated Gordon M. Tiffany, former attorney general of New Hampshire, to be Staff Director of the Commission. This nomination was not confirmed by the Senate until May 14, and it was not until this time that the Commission could effectively proceed with its task.

Thus, with 16 months remaining before its report was due to be presented to the President and the Congress, the Commission went about its job of making findings of fact and recommendations to the President and Congress.

On January 19, 1959, J. Ernest Wilkins died, and the President nominated Dean George M. Johnson, a Commission staff member, to replace Mr. Wilkins as a member of the Commission. The Senate confirmed Dean Johnson's nomination on June 4, 1959.

The Commission report

On September 9, 1959, the Commission's first report was presented to the President and the Members of the Congress. Of the 14 recommendations made, 13 were unanimous. Only one of the six Commissioners dissented on the 14th recommendation.

The patience and care of the President in selecting the members of this Commission to deal with the very delicate problem of civil rights was rewarded by the report and by the recommendations which these members so carefully formulated.

Perhaps the most important recommendation made was the voting registrar proposal which would deal with cases of discrimination against any citizen because of race, color, creed, or national origin in exercising his franchise.

Shortly after the report was presented, the Congress, just prior to its adjournment and at the request of the President, extended the life of the Commission for another 2 years. Both the administration and the Congress recognized the important contributions being made by the Commission in the field of civil rights, and thus endorsed its work.

The recommendation for voting registrars soon captured the interest of many Mem-

bers of Congress and of the administration. Hearings were held in early January 1960 on the Commission's proposals. At the same time, the administration, on the basis of the Commission's findings regarding discrimination in voting, proposed the "voting referee plan."

After 2 months of debate by Congress, the administration's referee plan was adopted and signed into law by the President this spring. The Commission had also urged the preservation of voting records, which became a provision in the 1960 Civil Rights Act signed by the President. Other recommendations made by the Commission which did not require legislation have been considered and initiated by Government agencies.

Commission studies voting, housing, education, justice, and employment

Initially, the Commission, because of the limits of time, only considered civil rights activities in three areas. These were voting, housing, and education. Although recommendations were made in all three fields, one of the Commission's most important accomplishments so far concerns education. Two conferences have been held, one in 1959 in Nashville, Tenn., and another in 1960 in Gatlinburg, Tenn., where public officials from States which had proceeded with desegregation of their schools appeared before the Commission, and met together to discuss their common problems.

These were the first such conferences held under Federal sponsorship. Generally, the educators attending the conferences found it helpful to exchange views and share their experience in dealing with similar problems.

The Commission recently announced that it had decided to expand its field of inquiry into two additional subject areas. These are public employment and the administration of justice. These studies are just beginning and the Commission hopes to appraise civil rights in these areas, thus making a positive contribution through findings and recommendations.

The Commission's next report is due on September 9, 1961. This report will include findings and recommendations in the fields of voting, housing, education, administration of justice, and public employment.

XIV

ACCOMPLISHMENTS OF U.S. SPACE EXPLORATION UNDER THE REPUBLICATION ADMINISTRATION

(By U.S. Senator THOMAS H. KUCHEL, of California, Senate Republican whip)

The accomplishments and aspirations of the U.S. space exploration program under the Republican administration can be divided into the following sections for a clear-cut picture of what the United States has done and is doing:

1. Organization and resources.

2. A scorecard detailing competition with the U.S.S.R.

3. A brief survey of the U.S. space program as evidenced in the successful shots in that program.

4. A delineation of important milestones in the National Aeronautics and Space Administration's ten-year plan.

Organization and resources

When NASA declared itself to be ready for business on October 1, 1958, it began work on:

A. Completing the several programs which were initiated by the Advanced Research Projects Agency of the Department of Defense.

B. Developing a sound but bold and imaginative long-range plan with specific projects for the next 2 years calling for concentrated attention to the need for more powerful launch vehicles and a program of satellite and deep space flights that will approximate 26 major flights in each year.

C. Integrating the efforts of the 8,000 people inherited from the great NACA organization with the 2,400 fine people of the Jet Propulsion Laboratory and the 5,500 people who made up the famous Von Braun group at the NASA Marshall Space Flight Center, and the developing 2,000-man operation at the new Goddard Space Flight Center at Greenbelt, Md., and drawing together a headquarters staff of more than 550 people in Washington.

D. Creating this new organization when the eyes of all the world placed the United States in the spotlight of the space race.

As of July 1, 1960, the NASA will be operating at a $915 million annual rate as compared with a $335 million annual expenditure rate 21 months earlier. (The grand total of all U.S. missile programs from an obligational standpoint for fiscal year 1961 is estimated at $6,962 million, subject to revision.) With a total of more than 18,000 people—one-third or more of them professional people—NASA represents the Government's greatest research organization and, in many ways, its most unique. Its product is new knowledge and the development of the techniques necessary to acquire that knowledge and apply it for the benefit of mankind.

Competition with the U.S.S.R.

The U.S.S.R. appears to excel the United States in the thrust of its rocket-powered launch vehicle system. Their substantially higher thrust level has permitted them to undertake spectacular missions requiring the carrying of relatively advanced guidance equipment in addition to the payload instrumentation—a combined weight substantially beyond that which we have been able to fly.

In spite of this advantage, it seems clear that the United States has clearly bested the Soviet Union in the breadth and depth of its program development and particularly in the quality, quantity, and importance of the scientific results of its flights.

It is reasonable to believe, however, that the steady growth of the U.S. program, the obvious willingness of the United States to share its information and competence with other nations, and the beneficial and, at times, striking information being derived from the U.S. experiments is beginning to make itself felt as a positive counterforce to any Soviet propaganda.

Highlights of the Nation's space exploration program (with some remarks about results of the U.S.S.R. program): The direct exploration of space by means of unmanned vehicles traveling in space began on October 4, 1957, with the launching of Sputnik I by the U.S.S.R. In the intervening 30 months there have been launched successfully 22 additional earth satellites which have yielded much scientific information about the space environment by radio telemetry of data to the ground. Three satellites were launched by the U.S.S.R. on November 3, 1957, May 15, 1958, and May 15, 1960.

The United States has launched 19 satellites, the first on January 31, 1958, and the most recent on May 24, 1960. Five were called Explorers, launched by Jupiter C's in three cases, Thor-Able II in one, and Juno II in one.

Three were Vanguards.

Seven were Discoverers, launched by Thor-Agena A's.

One used an Atlas for the communications experiment, Project Score.

One, the meteorological satellite of Project Tiros, was launched by a Thor-Able IV.

One, the navigation satellite Transit, was launched by a Thor-Able Star.

One, the missile early warning satellite Midas, was launched by an Atlas-Agena.

Seven space probes have been launched since October 4, 1957, three by the U.S.S.R., four by the United States.

All of the U.S.S.R. space probes were directed toward the moon; one launched on January 2, 1959, was claimed by the Russians as having passed within a few diameters of the moon and went into an orbit around the sun.

The second, launched on September 12, 1959, hit the moon, or so the Russians said.

The third, launched on October 4, 1959, passed close enough to take pictures of the far side of the moon and was deflected by the gravitational field of the moon to return toward the earth.

The first U.S. space probe, launched on October 11, 1958, traveled to a distance of 70,700 miles.

The second, launched on December 6, 1958, traveled to a distance of 63,580 miles.

The third, launched on March 3, 1959, went into orbit around the sun, communication with it being maintained to a distance of 407,000 miles.

The fourth was launched on March 11, 1960, inward toward the orbit of Venus, and on May 8 was at a distance of a little more than 8 million miles from the Earth with data still being received by telemetry.

Each of the satellites and space probes has produced much information on various aspects of the space environment itself and of environmental conditions within space vehicles. Many of the missions have been directed toward scientific objectives relating to the Earth and its atmosphere and ionosphere. To illustrate the types of information returned, you may consider the return from Sputnik II, Lunik III, Pioneer V, and Tiros I.

Sputnik II was launched into an elliptical orbit with initial perigee of 140 miles and initial apogee of 1,038 miles inclined at 65 degrees to the equator. It carried the dog, Laika, for measurement of physiological reaction of an animal to space flight. Its instruments measured cosmic rays, solar ultraviolet, and X-radiation. Temperature and pressures within the satellite were measured.

Significant solar influence on density in the upper atmosphere was noted from measurements of fluctuations in satellite drag which were directly correlated with solar activity. Cosmic ray counting rate increased with height, not understood at the time, but later found to be associated with the Van Allen radiation belt discovered with the instruments in Explorer I.

Lunik III apparently produced the first pictures of the far side of the Moon. Lunik III demonstrated maneuverability in a large spacecraft, the successful storage of pictures on film and their later transmission back to Earth, according to the Russians. Apparently no further scientific data were obtained because of early failure of the power supply or transmission system.

The Pioneer V space probe, weighing 94.8 pounds, was accelerated to a velocity of 24,869 miles per hour in an orbit about the sun inclined inward toward the orbit of Venus. Its period is about 311 days. Its perihelion is about 74,700,000 miles, which is about 18 million miles closer to the Sun than the orbit of the Earth.

Long-range projection of the trajectory forecasts that Pioneer V will be farthest from the Earth—183 million miles—in September 1962 and that the Earth and probe will approach within 16 million miles in November 1965.

Because of the eccentricity of the probe orbit, the probe again will come within 15.6 million miles in April 1966. A closer approach than this will not occur until 1989 when the the two will come within 2 million miles of each other, according to present estimates.

The probe carries instruments to measure charged particles in space, i.e., an ionization chamber and Geiger-Mueller tube to measure total radiation, and a triple coincidence cosmic ray proportional counter. The probe also carries a micrometeorite counter, a

magnetometer, and instruments for measurement of temperature and attitude. Power is furnished by solar cells mounted on paddles. There are two transmitters, designed to permit communication at distances up to 50 million miles—although there are now indications that degradation of the batteries may halt transmission between 10 and 20 million miles.

Tiros I is a 270-pound satellite which carries two television cameras to observe cloud formation and transmit the pictures to stations on the ground.

It was launched in a nearby circular orbit with perigee of 435 miles and apogee of 468 miles with a period of 99.15 minutes. It is stabilized by spinning, thus maintaining a fixed direction in space. Pictures are obtained when the satellite is in that part of its orbit where the camera sees the sunlit portion of the earth.

The satellite is provided with tape recorders which can record as many as 32 pictures for later transmission to the ground stations.

Thousands of pictures have been obtained of cloud formations.

Tiros promises a major forward step in observations of major storms and frontal systems.

On the basis of this and future meteorological satellites, it is hoped to develop within a few years an operational system for routine use in weather forecasting.

Space travel by man

For present purposes, the NASA is interested in the bearing of the information obtained on the prospects for space travel by man. The data obtained on the pressure, density, and temperature are required for rational design of any spacecraft, whether carrying man or instruments. Similarly, data on the ionosphere are of interest because of the electrical charging of the vehicle and its effects on radio communication from the vehicle and on its drag.

One of the major results of the first satellite launchings was the discovery by James A. Van Allen and his colleagues of a belt of charged particles trapped in the magnetic field of the earth which produced radiation on striking a space vehicle.

Further studies have shown that the structure of this region is quite complex and the outer zone varies in extent with solar activity.

We have learned considerably about outer space, but much basic information is yet to be obtained before man ventures very far away from the Earth. Specifically, there are formidable technical developments needed to assure the success of manned journeys to the Moon and to the planets of the solar system.

The U.S. long-range plan for space exploration

Listed below are the highlights of the 10-year plan developed by NASA and presented to the Congress early in 1960. It is to be noted that forecasting research and development activities for many years in the future is a questionable procedure.

What can be undertaken 2 years from now depends on what is learned in experiments to be undertaken in the intervening 2 years. Nevertheless, in a rapidly moving technology involving long leadtimes, it is possible to identify objectives which should be possible of accomplishment given normally accelerated advancement of the technologies involved and assuming an adequately paced funding program.

Under these ground rules, the following listing represents certain long-range objectives of the U.S. space exploration program:

NASA mission target dates

Calendar year 1960:

First launching of a meteorological satellite.

First launching of a passive reflector communications satellite.

First launching of a Scout vehicle.

First launching of a Thor-Delta vehicle.

First launching of an Atlas-Agena-B vehicle (by the Department of Defense).

First suborbital flight of an astronaut.

Calendar year 1961:

First launching of a lunar impact vehicle.

First launching of an Atlas-Centaur vehicle.

Attainment of manned space flight, Project Mercury.

Calendar year 1962:

First launching to the vicinity of Venus and/or Mars.

Calendar year 1963:

First launching of two-stage Saturn vehicle.

Calendar years 1963–1964:

First launching of unmanned vehicle for controlled landing on the Moon.

First launching Orbiting Astronomical and Radio Astronomy Observatory.

Calendar year 1964:

First launching of unmanned lunar circumnavigation and return to Earth vehicle.

First reconnaissance of Mars and/or Venus by an unmanned vehicle.

Calendar years 1965–1967:

First launching in a program leading to manned circumlunar flight and to permanent near-Earth space station.

Beyond 1970: Manned flight to the Moon.

XV

THE ACCOMPLISHMENTS OF THE FEDERAL COMMUNICATIONS COMMISSION DURING THE REPUBLICAN ADMINISTRATION

(By U.S. Senator STYLES BRIDGES, of New Hampshire)

Progress in the common carrier services

The past 7½ years, during the Republican administration, have seen unprecedented expansion, growth, and modernization in all segments of our common carrier communications industry and in the services it furnishes to the public and the national defense.

In the domestic telephone field, the number of telephones has increased from 48 million to more than 70 million, plant investment has doubled from $13.3 to $26.5 billion, and operating revenues have grown from $4.4 billion to $8.5 billion.

During this period, the rates for interstate telephone services subject to the jurisdiction of the FCC have undergone little change. In 1953, the FCC permitted the Bell System to make a general increase of 8 percent in interstate long-distance telephone rates. However, in 1959, as a result of action initiated by FCC, these rates were reduced by about 3 percent.

The first comprehensive formal investigation of all interstate private line telephone and telegraph services and the rates therefor, was instituted by the Commission in 1956. During the course of these proceedings, the Commission, on an interim basis, ordered reductions made in the rates for certain private line telephone services, while permitting the carriers to effect interim increases in other private line telegraph rates. A final decision in this proceeding is expected this year.

The Commission has also fully implemented a program for the prescription and periodic revision of depreciation rates applied by all of the Bell System companies. This program is safeguarding the public against excessive accruals for depreciation expense (amounting currently to more than $950 million annually in the Bell System).

In the domestic telegraph field, although public demand for the message telegraph services of Western Union has steadily declined, Western Union is becoming a major source of supply for private line telegraph facilities required by industry and Government, particularly the national defense agencies. Since 1953, the Commission has authorized Western Union to extend or supplement its lines by addition of more than 2 million telegraph-channel miles and recently authorized construction by Western Union of its first transcontinental radio relay system which, when completed, will be used principally to furnish private line services to Government and commercial subscribers.

In the international segment of the communications industry during this Republican administration, the Commission issued authorizations in connection with the installation of submarine telephone cables to Europe and Puerto Rico, and (prior to statehood) to Alaska and Hawaii. These new facilities have vastly increased the capacity of the overseas communications systems which, theretofore, had been furnished almost entirely by radio. This development has also made possible the introduction and expansion of overseas services of all kinds, particularly customer-to-customer private line telephone and telegraph services and "backbone" global communication facilities needed by the Defense Departments.

The participation in international telegraph and telephone conferences has increased extensively in recent years. The U.S. delegation to the Administrative Telegraph and Telephone Conference held in Geneva in the fall of 1958 was headed by Commissioner John C. Doerfer, their chairman. Common Carrier Bureau personnel have been very active in technical study groups and committees which have met at frequent intervals.

Progress in the safety and special radio services

The safety and special radio services encompass the activities necessary for the discharge of the Commission's responsibility with respect to the licensing of stations for purposes other than broadcasting or common carrier. This group represents the use of radio by industry, business, forestry, ships, planes, police, etc.

The growth and expanded utilization of radio communications in the safety and special radio services is illustrated by the following statistics:

Total authorizations outstanding:	
June 30, 1953	232,111
May 30, 1960	637,166
Total transmitters authorized:	
March 1, 1953	584,797
June 30, 1959	[1] 1,728,947

[1] 1960 tabulation of total authorized transmitters not yet available. It is expected the increment over 1959 will be sizeable in view of tremendous increase in the citizens radio service.

The significant policy and rule developments contributing to this development since 1953 are listed and briefly described and evaluated below.

1. Implementation by Commission rules as well as by changes to the Communications Act recommended by the Commission pursuant to the Safety of Life at Sea Convention of 1948. This convention became effective in 1952. The result of these changes has been greater usage of radio by ships on the high seas, and concomitant enhanced safety to life and property.

2. Implementation by Commission rules as well as by changes to the Communications Act recommended by the Republican administration pursuant to the Agreement for the Promotion of Safety on the Great Lakes by Means of Radio between the United States and Canada, which became effective in 1954. The result of this program has been increased usage of radio with correlative increased safety for life and property on Great Lakes shipping.

3. Further development of the Commission's radio equipment type acceptance program, with special reference to the marine

and the aviation radio services, has resulted in greater standardization of optimum technical requirements.

4. Furtherance of a universal radiotelephone calling and distress frequency and integration of safety systems for radiotelephone equipped ships by requiring ships and coast stations using the 2 megacycle radiotelephone frequency to maintain a listening watch on the 2182 kilocycle frequency.

5. Pursuant to authority contained in Public Law 321, approved during the Republican 83d Congress, which amended section 319 of the Communications Act, waived generally the construction permit requirement for most categories of stations in the safety and special radio services. This has reduced unnecessary paperwork by the public and the Commission.

6. By a series of channel splitting proceedings, have reduced the channel separation standards and increased technical requirements in most of the Safety and Special Radio Services. This development, flowing from technological developments, has greatly increased the possible utilization of the same frequency space available.

7. Adopted new policy governing assignment of frequencies in the 72–76 megacycle band so as to permit continued usage of this band for nonbroadcast repeater-control links without causing harmful interference to reception on adjacent television channels 4 and 5.

8. Consolidated previous Highway Truck Radio Service, Urban Transit Radio Service, and Intercity Bus Radio Service into a new Motor Carrier Radio Service, which permits more effective usage of frequency space allocated thereto, and extends permissible radio usage to urban, in addition to suburban areas.

9. Extended by appropriate body of rules the CONELRAD program to all the Safety and Special Radio Services. This system minimizes the navigational aid an attacking enemy might obtain from radio emissions.

10. By clarification of the rules governing the Special Industrial Radio Service, and by the creation of the Manufacturers Radio Service, the Business Radio Service, and the Telephone Maintenance Radio Service, made private radio communication available to all segments of the Nation's business and commercial enterprises.

11. Revised rules governing the Citizens Radio Service which created more categories of radio stations thereunder, added and changed frequencies available thereto, and eliminated certain eligibility restrictions, with the result that private communication radio has become available to all citizens for both business and personal uses.

12. Implementation by Commission rules of the 1956 amendment to the Communications Act which requires certain vessels carrying more than six passengers for hire to be fitted with radiotelephone installations. Again, safety of life and property has been enhanced by this program.

13. Creation of new aeronautical search and rescue mobile radio station, thus aiding in such safety operations by aircraft.

14. Certain microwave bands of frequencies made available on a regular basis to licensees of airborne navigational aids, thereby facilitating greater efficiency and safety in air travel.

15. Creation of Local Government Radio Service, which permits non-Federal governmental entities to use radios for administrative traffic, as well as multiple usage for a variety of public safety functions, thereby implementing the Republican administration's policies respecting States' responsibilities.

16. Following survey of communications needs in Alaska, revised rules governing frequency usage in Alaska so as to employ geographical frequency assignments. This has resulted in more efficient frequency usage in that State which has special communications problems. Elsewhere in the continental United States, some geographical sharing of frequencies has been instituted also in the Industrial Radio Services, thereby effectuating greater frequency economies.

17. Implementation by Commission rules of legislation permitting licensing of aircraft radio stations to aliens under certain controlled conditions. This facilitates the flow of international air traffic without interruption to radio communications.

18. Specific plans for Radio Amateur Civil Emergency Service (RACES) have been approved and RACES licenses issued. These plans delineate civil defense functions whereby certain amateurs are authorized to participate in such defense functions during national emergencies, using certain regularly allocated amateur frequencies.

19. Study of competing needs and usages for frequencies above 890 Mc. (microwaves). At present, microwave utilization in the Safety and Special Radio Services is limited for the most part to short term developmental grants. A Commission report and order, which looked toward opening areas of the microwave spectrum to regular private usage in these services, is now in abeyance pending Commission action on requests for reconsideration.

20. Study of competing needs and usages for frequencies in the frequency range 25 to 890 Mc. Analysis of information presented to the Commission and ultimate rulemaking proceedings flowing therefrom are expected to result in further increased effective frequency utilization.

Progress in the broadcast services

The broadcast services include standard broadcast (AM), frequency modulation (FM), television (TV), and associated auxiliary services.

1. Establishment of the nationwide television system. During the past 7 years a major achievement of the Commission has been its activities in guiding, promoting, and fostering the establishment of a nationwide television system. Between 1953 and the present, the number of authorized TV stations has increased from 283 to 717. Whereas in 1953 television stations were limited primarily to the major metropolitan centers, today there are one or more stations operating in over 300 separate communities. Similarly, the number of TV sets in use has grown from 21 million to over 52 million and the percentage of homes with TV sets has grown from 40 to 87 percent. Over 80 percent of the homes with TV now are able to receive four or more TV stations. In addition to these figures, there are 150-odd translator stations. Thus, almost every person in the United States is within the reach of at least one television signal. Thus, in the past 7 years, television has become an integral and pervasive element in American life providing education, entertainment, and news to practically the entire American Nation.

The Commission has played a major role in speeding applications and devising methods of permitting stations to go on the air in as many communities as possible within the shortest time feasible, consistent with the requirements of due process. The Commission has also been engaged in intensive study to find ways and means of encouraging a further expansion in the growth of TV stations.

To provide this fantastic growth in the number of television stations on the air required, under the law, long and complex public hearings on hundreds of competitive applications for these stations. It is estimated that half a million pages and 125 million words of testimony and exhibits were involved. The analysis of this vast amount of testimony by the Commission's staff, the oral arguments on each case before the Commission, the rulings on the literally thousands of exceptions filed by the parties, the writing of the final decisions in all of these cases, and the defense of the scores of appeals to the courts was, indeed, a monumental job. The Commission and its limited staff literally devoted themselves night and day to this task in order to make this accomplishment possible.

2. Further growth of radio: Concomitant with the phenomenal development of TV has been a steady and continuing expansion in aural radio, both AM and more recently FM. The number of authorized AM stations in this period has grown from 2,524 to 3,541. The Commission has been able to grant licenses to more and more stations to serve as local outlets for their communities. Whereas in 1953 there were approximately 1,300 cities and towns with one or more radio stations, the number has now grown to approximately 2,000. More recently there has been a revived interest in FM broadcasting and the Commission has given every encouragement to the growth and advancement of this service. The number of authorized FM stations has grown from 743 in 1953 to 1,023 in 1960.

3. Color TV: In December 1953, the Commission established the rules and regulations for a compatible color TV system. Within the framework established by the Commission there has been a gradual and steady development of this improved service, which may over a period of time replace black-and-white television in substantial part.

4. Educational TV: The Commission has recognized the importance of reserving TV channels for the exclusive use of educational organizations and has resisted any efforts to divert such channels to other uses. The Commission has authorized 70 stations scattered throughout the United States and its possessions. Recently, in December 1959, the Commission authorized an experiment in airborne TV for educational purposes which has potentialities for promoting nationwide educational networking.

5. Subscription TV: One of the most knotty problems which the Commission has been called upon to resolve is the proper role of a subscription TV service in the United States. The Commission was acutely aware of the overwhelming public interest in maintaining the present system. At the same time, it recognized the desirability in the public interest of encouraging experimentation and growth of a new service. Accordingly, the Commission in March 1959 established the basis upon which tests could be made to ascertain the public interest in and the need for a subscription TV service without damage to the present system.

6. TV in rural areas: The Commission is keenly aware of the public interest in providing TV service to as many people as possible, including the scattered populations in rural areas for whom TV is particularly important. The Commission has authorized 300 translator stations whereby small communities in isolated areas can obtain service at relatively low cost. It is now exploring other means of encouraging the widespread utilization of TV by rural communities.

7. New technical development in the radio art: The Commission has been active in providing for wide experimental development of stereophonic radio.

8. Since 1952, regional and bilateral broadcasting agreements have been negotiated. These agreements are designed to give domestic broadcasters as much protection as possible from harmful interference which might otherwise be caused by broadcasters outside the country, while at the same time recognizing that the available broadcast channels must be shared on an equitable basis with neighboring countries. Outstanding among these agreements are the North American Regional Broadcasting Agreement and the United States-Mexican Radio Broadcasting Agreement. Both deal with the standard AM broadcast band. The

former was signed in 1952 and ratified in 1959, concurrently with the latter.

Progress in field engineering and monitoring

The Commission has a field organization which assists in the discharge of its obligations under law and treaty. Field engineering and monitoring work is performed by staff located in a Washington headquarters and 49 offices and monitoring stations throughout the United States and Puerto Rico. It consists of three basic activities—enforcement, application processing and licensing, and monitoring. Enforcement includes the physical inspection of radio stations to determine compliance with the Communications Act, Commission Rules and Regulations, and other laws; investigation of interference complaints and unlicensed operations; and administration of parts 15 and 18 of the rules covering industrial, scientific, and medical equipment. Application processing and licensing covers licensing of stations and examination and licensing of radio operators, both amateur and professional; issuance of safety certificates to ship owners or licensees; and examination of applications for compliance with rules governing antenna placement, marking, and lighting. Monitoring covers the identifying, observing, and measuring processes which help insure proper operating procedures and signal characteristics of radio stations.

A list of major accomplishments and advances in the performance of these activities follows.

1. Completion of the conversion and modernization of our long range direction finding system. This has provided greatly increased accuracy and efficiency of operation.

2. Establishment of two TV mobile enforcement units and two microwave mobile monitoring facilities. This has improved our enforcement capability.

3. Relocation from rented to surplus Government property of two monitoring stations. This has reduced operating expense and increased efficiency. We have also relocated an additional monitoring station with resultant increased effectiveness and accuracy of operations.

4. Establishment of two marine offices (Tampa, Fla., and San Pedro, Calif). This has significantly increased our effectiveness and efficiency, especially in the small boat field.

5. Institution of an interim licensing procedure at 22 marine offices. This has expedited the issuance of operating authority to new licensees of small boats, and this is important to their convenience and safety.

6. Complete revision of the examination and grading procedure for the examination and licensing of a possible quarter of a million applications for commercial class radio operator licenses annually. This has reduced delays and increased efficiency.

7. Inspection and certification of approximately 500 Great Lakes vessels annually as required by international agreement with Canada. This new undertaking will improve operation and increase safety on the Great Lakes.

8. Establishment of 33 Cooperative Interference Committees in accordance with the policy of the administration to provide increased self-help in solution of interference problems by commercial "user organizations." The number of Television Interference Committees (similarly organized and sponsored) for clearing amateur interference was also increased from 293 to 529.

9. Cooperative arrangement with the Department of Defense to provide for the tracking and reporting of telemetering information of high altitude balloons for improvement of weather observations.

Progress in frequency allocations, treaty work, and technical standards

Allocation of the radio spectrum among the conflicting claimants for its use is a continuing responsibility involving in some way nearly all segments of the Commission's activities. Since radio waves cross both State and national borders, allocation work is carried on at both national and international levels. Securing maximum utilization of frequencies in a crowded spectrum also involves continuing review of technical standards to make sure that each radio station uses no more spectrum space than necessary. Considerable progress has been made in each of these two related areas of activity since 1952.

1. A wholesome reorganization of international radio frequency allocations resulted from a series of international radio conferences between 1947 and 1951. Thereupon, the Commission adopted a 4-year program which, with industry cooperation, was completed successfully. Thousands of assignments to individual radio stations were changed. Other nations took concurrent action. The result was to bring about more effective worldwide usage of that part of the radio spectrum useful for long-distance communications.

2. In addition to implementing the agreements of the earlier conferences, the Commission engaged in a 2-year preparatory study, in cooperation with the Department of State, to prepare for a major international radio conference which was held in 1959. From the standpoint of the United States, this conference was highly successful, providing a basis for more satisfactory and more efficient spectrum usage in the future. The U.S. delegation was headed by an FCC commissioner.

3. The Commission has participated in the negotiation of several bilateral arrangements with Canadian and Mexican telecommunication regulatory bodies. These have provided more effective transborder communications and have minimized the number of cases of harmful interference between stations operating on either side of the border.

4. Commission support has aided the establishment of frequency allocations and site protection for radio astronomy and allied scientific work. Without such action, scientific operations in this new field would be greatly handicapped. The job is not yet finished.

5. A program of type acceptance and type approval of radio transmitting equipment used in most radio services has been instituted. These programs call for actual tests of equipment to determine their suitability for licensing before use of the equipment is authorized. By thus screening transmitting equipment before licensing, the use of substandard or poorly designed equipment is reduced or eliminated. This has greatly reduced radio interference in the radio spectrum and has eased the burden imposed upon industry of showing compliance with necessary technical regulations.

6. A very serious threat to the effective use of high frequency communications—interference to the various radio services by incidental radiation devices such as industrial radio frequency heaters and medical diathermy machines—has been brought under control by adoption of new rules and strenuous enforcement procedures which include hearings and court injunctions. As a result, the incidental radiation (which conservatively has been estimated currently to amount to about 160 million equivalent watts of power) from these industrial and medical machines has been confined by the new regulations to specific narrow bands in the radio spectrum or has been eliminated by effective shielding methods. Communications involving safety of life and property thereby have been made more safe and more effective.

7. New technical standards have been adopted which reflect the improved state of the art in all radio services. Some examples of the new standards include:

(a) Technical standards and regulations providing for color television;

(b) Split channel standards in land mobile communications service which effectively doubled the number of channels available to such important services as police, highway emergency, taxis, industrial, and telephone communications;

(c) Single sideband provisions which permit more effective communications in less spectrum space than conventional systems;

(d) Standards limiting the spurious, or undesired, radiation from transmitters and receivers.

The combined effect of such standards has been to reduce the potentialities of harmful interference between various radio services, to provide better broadcast and television service to the public, and to facilitate more effective communications to all radio users.

Conelrad and NIAC

The Commission, in cooperation with the Air Force, has instituted and administers a highly important defense measure. This is the program known as Conelrad (CONtrol of ELectromagnetic RADiation). The purpose of Conelrad is to minimize the radio navigational information which might be obtained from U.S. radio stations during the time of air attack while at the same time providing for the use of these radio facilities for defense purposes. From its inception in 1953 to the present, the Conelrad program has expanded and has satisfactorily proved its worth to authorities responsible for military and civilian safety in time of enemy attack. Conelrad facilities and procedures also have been found to be of great value during peacetime emergencies such as occur during floods or tornadoes.

Under authority set forth in Executive Order No. 10312, the Commission has established a National Industry Advisory Committee (NIAC) consisting of representatives from each of the organized radio services licensed by the Commission. The purpose of this committee is to further formulate and develop plans to be used in the event of a national emergency such as (1) development of standby emergency communication facilities, (2) development of plans to restore normal communications as soon as possible after the Conelrad radio all clear, and (3) to assist the military and Federal, State, and local civil defense officials. The first accomplishment of the NIAC was the finalization of an interim plan to provide broadcasting facilities for "national program" on an emergency basis.

Forty-eight State industry advisory committees have also been established. These committees have somewhat the same duties as the NIAC, but on the State and local level. Several of these State industry advisory committees have established State defense networks (FM) for use in preattack and postattack conditions.

Legislative activities

In 1953, the demand for broadcast communication services and facilities reached an alltime high. The Commission was at a serious disadvantage in meeting this demand because of certain amendments to the Communications Act, which were enacted in 1952.

In general, these amendments imposed a rigid system of separation of functions prohibiting the Commission from consulting its staff on technical questions in adjudicatory proceedings; established a detailed procedure requiring the issuance of prehearing notices to applicants even in those cases where a hearing appeared inevitable and where such fact was obvious to all known parties in interest; and made provision for the filing of a protest to the grant of any license made without hearing upon such vague and indefinite grounds as to enable parties whose interest in such proceedings was primarily delayed to unreasonably prolong the institution of needed broadcast service.

Recognizing the need for eliminating unnecessary detail, reducing the volume of paper work, and speeding up the hearing procedure to facilitate the provision of better communication service to the public, the Republican administration instituted a persistent legislative program in an effort to persuade Congress to relieve it from onerous and unnecessary statutory obstacles which impeded the attainment of its statutory mandate "to make available * * * to all of the people of the United States a rapid, efficient, nationwide * * * wire and radio communication service."

With each succeeding Congress since 1953, the Commission has proposed amendments to the so-called protest provisions of the Communications Act with the view toward preventing protests filed against the grant of applications from being used for the purpose of delaying the institution of new radio and television service to the public.

In 1956, Congress enacted the Republican administration's proposal authorizing it to deny a protest, after oral argument, without a full evidentiary hearing, upon a finding that the facts alleged by the protestant, even if proved true, would not be grounds for setting aside the grant. Congress also enacted the Commission's proposal authorizing it, in the exercise of its discretion, to permit a grant against which a protest is filed to remain in effect pending the Commission's decision after hearing on the protest.

In addition, the entire protest procedure provided for by section 309 of the Communications Act has been under intensive study by the Commission with the assistance and cooperation of the Federal Communications Bar Association. These studies have resulted in the formulation and presentation to the Congress of legislative proposals by the Federal Communications Bar Association, with the concurrence of the Commission, designed to strike an equitable balance between the rights of interested parties affected by the Commission's grant of broadcast licenses and the public interest considerations inherent in the development and expansion of the communications service to all of the people of the United States.

In 1956, Congress also passed certain amendments proposed by the Commission which provided for greater procedural flexibility in the hearing requirements in cases involving interlocking directorates and consolidation of common carriers.

In its endeavor to further expedite the disposition of adjudicatory cases, the Commission for several years proposed an amendment which would permit its review staff to more fully assist it in those matters which do not involve the final disposition of a case, thus allowing the Commission to concentrate its attention on more important and pressing questions of law and policy. This proposal was passed by the Senate (86th Cong., 1st sess.) and recently was reported out of the House Committee on Interstate and Foreign Commerce.

Also proposed by the Commission, passed by the Senate and now awaiting House action, is an amendment to eliminate the requirement of a prehearing notice to applicants and known parties in interest in those cases where a hearing appears inevitable. In most cases the applicant knows or has the means of knowing the nature of the objections to his application, hence the giving of such notice serves no useful purpose and produces the adverse effect of delaying the final disposition of the case.

The extension of TV service to the more sparsely populated areas of the country, particularly the Rocky Mountain States, has met with difficulty because of conditions peculiar to that region. The lack of large concentrated areas of population sufficient to sustain the maintenance of an adequate television operation and the rugged terrain which acts as an obstacle to the efficient propagation of an acceptable television signal have combined to deter the expansion of television service in this area.

As a result, many communities have devised their own broadcast systems through the installation of antennas, popularly called boosters which rebroadcast the signals from a station in a distant metropolitan location. These boosters are broadcast stations, the operation of which requires a license from the Commission. Moreover, the Communications Act prohibits issuance of a license for a broadcast station the construction of which was commenced without a permit for its construction having been granted by the Commission. Since all of these boosters were constructed without the issuance of the requisite construction permit, the Commission has been powerless to grant a license authorizing their operation.

In order to overcome the construction permit requirements contained in the Communications Act, and to provide an orderly system of television service to the more sparsely populated areas of the country, the Commission proposed an amendment which was passed by the Senate (86th Cong., 1st sess.) and now awaits House action to permit it to grant licenses to booster operations engaged solely in the rebroadcasting of TV signals, thereby assisting the Commission in its efforts to implement a satisfactory plan for authorizing TV service to isolated areas.

The Commission also proposed an amendment which would prohibit any person from directly or indirectly making a presentation respecting the merits of a case under adjudication without giving notice to all parties to such proceeding. This proposal is pending before the Senate Interstate and Foreign Commerce Committee.

The Commission has proposed an amendment, passed by the Senate and now awaiting House action, which would repeal a provision of the act which permits commissioners to receive an honorarium for the presentation and delivery of speeches and papers.

In 1956 (84th Cong.), Congress enacted the Commission's proposal amending section 1343, title 18 United States Code to prohibit fraud by wire or radio.

The Commission's legislative proposals, portions of which have been incorporated in an omnibus bill recently reported out of the House Committee on Interstate and Foreign Commerce, make it a criminal offense for any persons to participate in the production or presentation of TV quiz shows involving a contest of intellectual skill where the result of such contests is prearranged or predetermined, and extends the Commission's jurisdiction over persons other than broadcast licensees who engage in the practice of payola.

Major litigation

Because of the tremendous growth in radio and television as well as the other regulated industries, the Commission in the past 7 years has become increasingly involved in litigation in the Federal courts, having been a party to 122 cases in 1959 as against only 36 cases in 1953. Some of the significant radio and television cases that were litigated include the following:

The Commission's decision to accomplish an equitable distribution of television broadcast facilities throughout the country through the establishment of a publicly announced table of allocations with assignments to specific communities was upheld in the courts in *People Broadcasting Company* v. *Federal Communications Commission* (209 F. 2d 286) and *Logansport Broadcasting Corporation* v. *Federal Communications Commission* (210 F. 2d 24). With this approach, which is different from that followed in radio, the Commission has been able to make such changes in assignment of television broadcast facilities to the specific communities as the changing conditions may warrant.

The decision of the Commission to issue radio station licenses on the basis of which community had a greater need for this service was found proper by the court in 1954 in *Allentown Broadcasting Corporation* v. *Federal Communications Commission* (232 F. 2d 57, cert. den. 350 U.S. 1015).

The Commission's determination to prevent an undue concentration of ownership of broadcast licenses was reflected in the issuance of multiple ownership rules, and the validity of this action was upheld by the U.S. Supreme Court in 1956 in *United States* v. *Storer Broadcasting Company*.

The Commission's decision to provide for as many television facilities as possible by assigning transmitting frequencies in both the very high and ultra high frequency bands in the different communities throughout the country was sustained by the courts in 1956 (*Coastal Bend Television Company* v. *Federal Communications Commission* (234 F. 2d 686).)

The position taken by the Commission that the private use of the radio spectrum must be subordinated to national defense requirements and consequently to prohibit private use of frequencies allocated for use in national defense was sustained by the court in 1959 in *Bendix Aviation Corp.* v. *Federal Communications Commission* (272 F. 2d 533).

PRESIDENT EISENHOWER'S TRAVELS ABROAD

(By U.S. Senator LEVERETT SALTONSTALL, of Massachusetts)

There has been some criticism recently of President Eisenhower's travels abroad. I believe that this primarily stems, simply enough, from the fact that all has not gone exactly as well as it might have in our relationship with friends abroad and our efforts to seek peace. But the reasoning offered is that the administration is substituting so-called personal diplomacy for normal and traditional diplomatic procedures.

I listened to Secretary of State Herter testify on the State Department appropriations bill, and he touched upon the President's trip to the Far East. Mr. Herter emphasized the importance of regular channels for international contact. But he stressed that the purpose of President Eisenhower's travels were to increase friendliness and understanding across the world, and not to negotiate with foreign chiefs of state. The one exception, of course—and the point has been clearly made—was the trip to Paris for the summit meeting.

Criticism based on misunderstanding

It seems to me that the criticism I have mentioned is founded on a misunderstanding, either accidental or contrived, of the true purpose of the President's trips. There is need, therefore, for a clear distinction to be made between international contact among Government officials for actual negotiation and, on the other hand, for the generation of good will.

Perhaps the catchy term "personal diplomacy" has been used too often to describe the President's intent. It has certainly been used imprecisely and even inaccurately. Diplomacy relates directly to conducting negotiations; to arranging treaties, for instance.

The President's travels did not have negotiations as their purpose and, therefore, could not supplant the normal diplomatic processes, which have continued unabated. Perhaps we should carefully make the distinction between "social" and "business" purposes when we characterize the Eisenhower trips.

When the term "personal Presidential diplomacy" is used it must be applied specifically to a situation like the Paris summit

meeting, rather than tossed around casually as a description of everything the President does outside the borders of the United States.

Goodwill missions, efforts to convince far-flung peoples of the basic unity of free men everywhere, travels to demonstrate the dynamic belief of the United States in world peace—these must be separately identified and given full credit for what they are.

I believe these purposes are not only valuable, but necessary, considering the nature of the world today and the character of the Soviet challenge.

Goodwill trips are standard practice

It is actually standard practice for chiefs of state and heads of government to advance their national interests by goodwill trips, and with good reason. We all know of Chairman Khrushchev's efforts in this regard, continuing, in one way or another, since the highly publicized Bulganin-Khrushchev team visit to India in 1955. There is no doubt that this is a crucial weapon in the battle for men's minds, and it would be preposterous for anyone to suggest we should leave it for the Russians alone.

The need for goodwill tours for the President of the leader of free world nations has been advanced by the revolution in transportation and communications technology.

If a head of state can easily and practically visit those he claims to be his foreign friends, it becomes increasingly difficult for him not to do so.

New nations want prestige of U.S. friendship

There is another revolution, so-called, which affects the matter also, and more basically. The new, yearning, emerging nations of the less developed areas have high aspirations for success and prestige in a world previously closed to them.

This is the revolution of rising expectations. In order to encourage these peoples to sustain self-determination, independence, and progress in a free democratic context, we must prove our affection and regard for them.

We must seek to build their self-confidence and self-respect. We go to their homelands to do this, demonstrating directly and personally our recognition of and regard for them. This the President has sought to accomplish in his immensely successful visits to the Near East in 1959, and Latin America and the Far East in 1960. His European trip in 1959 was directed toward vigorously cementing the ties of unity and friendship between ourselves and our Western allies.

Khrushchev feared free world success at Paris

Indeed, a prime reason for Chairman Khrushchev's cancellation of President Eisenhower's visit to the Soviet Union was the fear that such a trip might be too successful from the free world's point of view. The same apprehension undoubtedly directed the organized Communist efforts to block the President's visit to Japan more recently. President Eisenhower's tremendous reputation as a man of peace has had a profound effect on the tactics of international communism.

The dissatisfaction of the Tokyo agitators must be measured against the overwhelming outpourings of affection, admiration, and support from millions of people who have greeted President Eisenhower across the world.

We must not overdraw this recent and temporary damage to our prestige. In many visits—for the first time—of the American head of Government to overlooked nations and peoples, President Eisenhower has demonstrated his willingness to go many thousands of extra miles to improve the chances for peace. Foreign leaders have assured us of the great value to the cause of peace of these journeys, and they have received universal support from within the United States.

XVII

THE REPUBLICAN ADMINISTRATION'S RECORD OF IMPARTIAL FEDERAL LAW ENFORCEMENT, 1953–60

(By U.S. Senator JOHN SHERMAN COOPER, of Kentucky)

One of the most important and satisfying accomplishments of the Republican administration during the past 7½ years has been the reestablishment and continuing growth of public confidence in the impartial administration and enforcement of the Federal laws under the Department of Justice.

Among the factors responsible for this renewed respect for Federal law enforcement have been:

1. The refusal of Government consent to nolo contendere pleas except in unusual circumstances.

2. The abandonment of the health policy in criminal tax prosecutions.

3. The publication of compromise settlements of all kinds.

4. The elimination of private practice for U.S. attorneys and their assistants, thus removing the possibility of conflict of interest.

5. The publication of Executive pardons and the names of those sponsoring such pardons.

6. The employment of the very highest caliber of professional and nonprofessional personnel.

In addition to obtaining attorneys of established reputation and broad experience, an honor law graduate program was established in 1953 to attract to the Department top graduates of the country's leading law schools. To date, 279 talented young attorneys from 73 law schools, representing 40 States and the District of Columbia, have been appointed without regard to considerations of race, religion, or political affiliation.

A sustained drive to eliminate delay in the Government's legal business has been conducted. The primary result of this drive has been the disposition of practically all old cases. An equally important result has been the impressive reduction in the number of cases and matters pending.

During the last 7½ years, despite an overall increase in work brought about by reason of economic expansion and new Federal laws, the total number of items pending, which includes both cases in court and preliminary matters, has been reduced from 74,972 to 48,542, a reduction of 26,430 items, or 35 percent.

The backlog of cases pending, exclusive of preliminary matters, has been reduced from 23,413 to 16,784, a reduction of 6,629 cases, or 28 percent.

In the 7½ years preceding the year 1953, total collections by U.S. attorneys aggregated $202,251,691. In the similar period since 1953, such collections have totaled $234,786,314, an increase of $32,534,624, or 13 percent.

These and the accomplishments described below have taken place without increase in the overall employment in the Department of Justice. On June 30, 1953, the total employment was 30,423; on June 30, 1959, it was 29,987.

Criminal law enforcement

In criminal law enforcement the Republican administration has conducted an intensive and coordinated drive against all forms of organized crime, including narcotics, gambling, illicit liquor operations, tax evasion, and labor racketeering. Highlighting the drive by the Justice Department was the recent conviction of 20 of the conspirators who attended the hilltop meeting at Apalachin, N.Y., in November 1957.

In the labor racketeering field, 143 convictions have been obtained under the Hobbs Act and Labor Management Relations Act as compared to a total of 3 convictions prior to 1953. The list of those convicted includes union officials ranging in importance from the president of the International Longshoremen's Association down to business agents of local unions, in cases where the amounts extorted as the price of labor peace varied from a few thousand to over a million dollars. In addition, the ranking Ohio Teamster official, William J. Presser, was recently convicted of contempt of Congress and obstruction of the Senate Rackets Committee's investigation of the Teamsters Union.

An intensive drive against narcotic violators has resulted in over 10,000 prosecutions with sentences running at an average alltime high. International narcotic smuggling rings smashed include the 1958 conviction of Harry Stromberg and 18 others, and the 1959 conviction of Vito Genovese and 14 others, with the Supreme Court declining to review both cases.

A vast gambling syndicate operating out of Terre Haute, Ind., was broken up by the conviction of its operators on wagering tax evasion charges in July of 1959. In May of 1960, Harry Donovan, multi-million-dollar numbers racket kingpin operating in Richmond, Va., apparently with police protection, pleaded guilty to an 11-count wagering tax indictment.

In addition to thousands of prosecutions against relatively small-scale moonshine producers, the crime drive has centered on eradicating syndicate leaders of large illicit liquor conspiracies in the metropolitan areas. In January 1960, notorious liquor law violators, John and Maurice Levigno, were convicted of conspiracy and operation of large illicit stills in Brooklyn and Long Island City.

Hoodlums and racketeers convicted on tax evasion charges include Pete Licavoli, reputed leader of the old Purple Gang in Detroit, and Paul "The Waiter" De Lucia, alias Paul Ricca, alleged successor to Al Capone in Chicago.

Denaturalization and deportation of racketeers and vice lords is also a part of the program, and denaturalization decrees have been obtained against such figures as Accardi, Corrado, Frank Costello, Vito Genovese, Joe Profaci, and Paul "The Waiter" Ricca, among others.

Frauds upon the investor and consumer public have resulted in a number of significant convictions, the latest being that of Alexander L. Guterma and others for extensive investment frauds.

An average of 1,400 Food, Drug, and Cosmetic Act cases have been brought each year to protect the public against adulterated and misbranded products, and a vigorous drive has been made against the illegal sale of sedatives and "pep" pills.

Former Government officials, such as RFC official E. Merl Young, Assistant Attorney General T. Lamar Caudle, and Presidential Secretary Matthew J. Connelly, have been indicted and convicted for irregularities in office. Other important convictions include that of Henry W. Grunewald in a $160,000 tax-fix conspiracy, with whom were five others who were given long prison sentences and heavily fined.

Civil litigation

Civil litigation represents the largest single category of cases in the Justice Department.

During the past 7½ years, the Civil Division has reduced the pending caseload from 76,540 to 13,533 cases by delegating to U.S. attorneys authority to handle smaller routine cases and by conducting an all-out drive to cut the backlog.

The separate Customs Division was eliminated, and its functions were incorporated within the Civil Division and the staff reduced from 22 to 12 attorneys.

A centralized appellate section was organized which last year achieved success in 75 percent of all the appeals handled by it.

The Japanese claims program, involving 24,000 claims and over $130,500,000, was com-

pleted, and the 2 branch offices of the program were closed.

In the first test cases to recover millions of dollars in windfall profits taken by contractors under FHA programs, the results were so successful that administrative compromises were obtained before trial in virtually all other cases and there are only 17 such suits still pending.

A backlog of 2,966 price and rent control cases has been practically liquidated, and only 4 cases remain pending.

In the forfeiture actions brought against such shipowners as Onassis, Niarchos, and Kulukundis, and various Chinese companies, results were so successful that normal Civil Division collections rose from $16 to $18 million a year to over $30 million for 3 years running, and a quarter million tons of new shipping is being built in American yards under the settlements negotiated in several of these cases.

The growth of claims against the United States in foreign courts necessitated the establishment of a special foreign litigation unit and the organization of a network of attorneys in many foreign capitals to represent the Government's interests in the more than 274 cases now pending abroad.

Tax matters

During the 6 years prior to 1953, the pending load of tax cases had almost tripled from 2,500 to 7,000. Despite a continuing proportionate increase in new cases, the Tax Division of the Justice Department not only brought the backlog under control, but reduced the pending workload by over 2,700 cases, concluded a large number of older cases, and cut in half the time required for handling the average tax case from 3 to 1½ years.

During this period, also, this Division of the Justice Department saved the Treasury or collected directly from delinquent taxpayers $350 million, or over 2½ times the amount recovered in the previous 4 years, and 4,344 tax fraud convictions were obtained, as against 2,260 in the prior 12 years.

Among those convicted were former Internal Revenue Commissioner Joseph D. Nunan, Jr.; former Teamster Union President David Beck; Racketeers Frank Costello, Paul "The Waiter" Ricca, Umberto Anastasia, and Peter Licavoli; gamblers Benny Binion, Frank Erickson, Sidney Brodson, and Elmer "Bones" Remmer; labor racketeer Orell B. "Duke" Soucie; Eugene C. James of Chicago, Laundry Workers Union official; Hugh L. Culbreath, former sheriff of Hillsborough County, Fla., an associate of big-time gamblers; and Frank Keenan, Chicago, former Cook County assessor.

The Tax Division has been successful in 78 percent of the tax cases decided by the Supreme Court and in over 70 percent of those decided by other appellate courts, and today its dockets, for the most part, are in current condition.

Antitrust action increased under Republicans

In the field of antitrust, so important to the preservation of our free enterprise system and the American consumer, a continuation in the pace of stepped up law enforcement saw 63 new cases filed in the fiscal year 1959, more than double the total filed in 1952. Moreover, 70 new cases have already been filed in the current fiscal year. Sixty-six cases were closed in fiscal 1959 and 41 cases have been closed thus far in the present fiscal year. On May 31, 1960, 127 cases were pending.

Since 1953, 215 civil antitrust cases and 171 criminal antitrust cases have been filed. Of these, 31 have been proceedings under the hitherto unused section 7 of the Clayton Act, as amended in 1950, respecting corporate mergers.

Two new contempt cases were filed in 1960, bringing the total since 1953 to 11. This figure represents more than one-third of all such cases filed since the enactment of the Sherman Act in 1890.

The Sherman Act amendment increasing maximum fines has resulted in a rise in fines imposed from $127,000 in 1952 to $914,200 in fiscal 1959. Thus far in fiscal 1960, through May 31, 1960, fines assessed total $993,250. The total dollar amount of fines assessed has shown a substantial increase in every year but one since 1952.

One of the most important milestones in the antitrust field was the establishment in 1953 by the Attorney General of a national committee of some 60 members to study the antitrust laws.

As a result of the committee's work, there was gathered into one place for the first time a statement of prevailing views on major issues of antitrust policy. The Department of Justice gave careful consideration to the report and obtained from Congress amendments to increase from $5,000 to $50,000 the maximum fine which may be imposed for a Sherman Act violation, and authority for the Government to sue for actual damages or injuries resulting to it or its business or property from violations of the antitrust laws. The Division also supported a bill, enacted by Congress in the current session, providing that the Department of Justice be accorded advance notification of proposed mergers of national banks.

Civil rights

The Civil Rights Division of the Justice Department, established in December 1957, is charged with the enforcement of all Federal statutes in the field of civil rights. Since its inception it has processed more than 4,300 complaints of violations of a wide range of statutes and, as of May 1960, has 124 cases pending in court.

Under the Civil Rights Act of 1957, as part of its enforcement program to protect the right of all citizens to vote without racial discrimination, the division instituted three test suits in Georgia, Alabama, and Louisiana which have now been favorably decided by the Supreme Court of the United States. The Louisiana action resulted in restoring to the voting rolls the names of 1,377 Negroes illegally stricken.

Twenty-one other matters under the 1957 act are presently pending in various stages of preparation.

Under the additional authority granted by the Civil Rights Act of 1960, demands for inspection of voting records maintained by local voting registrars have been made in 12 counties. In five of these counties, local authorities have permitted inspection; in other counties there has not been cooperation, and lawsuits have been commenced to compel compliance with the law. The division also conducted successful criminal prosecutions for Federal law violations relating to campaign and election practices.

Convictions involving police brutality have been obtained, and trial of prison guards for mistreatment of inmates will commence soon. Several cases involving the use of "third-degree" methods for obtaining confessions are pending in Ohio against members of a county sheriff's office. An important prosecution under the Fugitive Felon Act, involving flight to avoid State prosecution for kidnapping and murder, resulted in convictions of three offenders and the return of the principal defendant to State authorities in Minnesota for trial and subsequent heavy sentences.

Lands Division of Justice Department

The United States owns about 34 percent of the entire area of the 50 States, and the Lands Division is responsible for all of the land litigation and title work relating to this property.

Some indication of the magnitude of work involved may be seen from the fact that in the field of land acquisition alone, the Lands Division closed in the period 1953 to June 1960, condemnation proceedings or negotiated purchases of over 100,000 tracts of land involving final payments of more than half a billion dollars.

Wherever consistent with the public interest, these takings have been accomplished through settlements, rather than through protracted trials. During the past year, for example, negotiated purchases and condemnation settlements represented about 94 percent of the total dollar volume of all land acquisition closings.

Contributing largely to this record is the effort made during recent years to improve the quality and therefore the reliability of the Government's appraisals of property, in part by the increased use of and reliance upon independent local appraisers.

This has also resulted in the more expeditious handling of cases, as illustrated by the fact that during the past 3 years alone, the number of tracts involved in cases more than 5 years old has been reduced by 63 percent, and in the range between 3 and 5 years the percentage of reduction has been more than 20 percent.

In 1953, at the start of the Republican administration, the Lands Division was instrumental in the formulation of a new policy greatly reducing the amounts of land acquired for dam and reservoir projects. This permitted maximum retention of private rights in land consistent with operation and maintenance requirements. This policy has saved untold millions of dollars in acquisition costs and has allowed equal numbers of millions of dollars worth of land interests to remain on the local tax rolls.

Recognizing the importance of the specialized work in defending the Government against large and complex tribal claims under the Indian Claims Commission Act of 1946, a separate Indian Claims Section was established in 1953, staffed without increase in the total number of division personnel. The aggregate of such claims in the hands of this section is several billions of dollars.

In the field of water and related resources, much progress has been made in representing the interests of the United States in such historic litigation as the Gulf "submerged lands" cases, *Arizona* v. *California* (the lower basin of the Colorado River), and *Wisconsin* v. *Illinois* (the Great Lakes). During this period, rights in offshore oil were largely resolved in the landmark Tidelands cases.

The Lands Division achieved success in fiscal year 1959 in 85.7 percent of the appeals it handled, compared to a 1949–54 average of 73 percent. This is a clear-cut example of Justice Department efficiency under the Republicans.

The division was also principally responsible for the work of the Interdepartmental Committee for the Study of Jurisdiction over Federal Areas within the States, a committee created by direction of the President. This was the first comprehensive factual and legal study in the sensitive area of Federal-State relations, and promises to resolve many important and troublesome problems arising from jurisdictional difficulties.

Immigration and Naturalization

During the past 7½ years, the Immigration and Naturalization Service, through organizational changes and the introduction of new programs and procedures, has achieved significant accomplishments in all of its varied areas of responsibility.

In 1959 a total of 2,865,567 passengers were admitted from foreign countries by sea or air—twice as many as in 1953. With a primary inspection staff increase of just 11 percent, however, the Service, through simplified documentation, improved physical layout, and more efficient inspection procedures, has met this enlarged responsibility effectively and expeditiously.

In 1954, the practice of detaining in Government-operated institutions applicants for admission whose status was doubtful was discontinued, and all large facilities, including Ellis Island, were closed.

In the past 7 years, an average of 132,000 persons became naturalized citizens each year. The Republican administration reduced the waiting period for naturalization applicants from 18 months in 1953 to 40 days in 1960.

As the result of stepped-up enforcement and redeployment of the border patrol, so-called wetback invasion has been stemmed and the daily apprehensions of Mexican illegal entrants reduced from 2,500 to 70.

Since the uprising of the Freedom Fighters in November 1956, almost 32,000 Hungarian refugees have been admitted to the United States under the Attorney General's exercise of the parole provisions of the law. This action was ratified by Republican-sponsored legislation which adjusted the parole status of these homeless people to that of permanent residents.

In the field of law enforcement, primary emphasis has been placed upon the prosecution of criminal, immoral, narcotic, and subversive aliens, rather than on the casual "paper" violator.

Among the 65 persons who attended the Crime Syndicate meeting at Apalachin, N.Y., in 1957, 5 were aliens and 30 naturalized citizens. Of the aliens, Russel Bufalino and Simone Scozzari have been ordered deported; the physical condition of Carlo Gambino precludes completion of his deportation case; and the two others were found not to be deportable. Sam Monachino, a naturalized citizen, fled to Canada and there renounced his American citizenship. Vito Genovese has been denaturalized, and proceedings have been brought against Dominick D'Agostino. Joseph Barbara, at whose home the "delegates" convened, and Salvatore Tornabe have died.

Leaflets dropped from Florida-based planes over Cuba and other incidents resulted in a request from the Secretary of State to the Attorney General for departure control of all persons leaving the United States by private aircraft for Cuba. Since November 2, 1959, the service has covered some 200 private airfields and 100 plane rental agencies, to prevent flights that would increase tensions in the Caribbean area. The Commissioner has served 49 persons with official notices not to depart from the United States for Cuba by private aircraft.

Internal security

One hundred and nine leaders of the Communist Party have been convicted by juries for violating or conspiring to violate the Smith Act, all but 28 of these being subsequent to January 1953.

As a result of the Supreme Court's decision in the Yates case in 1957, laying down more stringent standards of proof, 70 of these cases were dismissed. However, 39 top leaders remain convicted, 4 under the membership clause of the Smith Act, and the remainder under the conspiracy statute. Two cases raising the question of the constitutionality of the membership clause are scheduled to be heard by the Supreme Court next fall, and a 1959 conviction of six Communists in Denver for conspiracy to violate the Smith Act is pending in the court of appeals.

Since the Supreme Court's affirmance of the Barenblatt case in 1959, upholding the authority of the House Un-American Activities Committee, there have been nine convictions for contempt of Congress in the internal security field, and eight additional contempt of Congress cases are pending in the Court of Appeals for the District of Columbia.

Nine officials of the Mine, Mill & Smelter Workers Union were convicted, and three others entered pleas of nolo contendere in 1959 to conspiracy to defraud the Government by fraudulently using the facilities of the National Labor Relations Board through the filing of false non-Communist affidavits. The nine defendants have taken an appeal. Previously, seven members of the United Electrical, Radio & Machine Workers Union, most of whom were Communist Party functionaries, were convicted of conspiring to file false non-Communist affidavits with the Labor Board. This case was affirmed by the court of appeals and is now pending on petition for certiorari.

The court of appeals in 1959 upheld the decision of the Subversive Activities Control Board after remand by the Supreme Court that the Communist Party, U.S.A., must register with the Attorney General as a Communist-action organization under the Internal Security Act of 1950. Argument will be heard by the Supreme Court in October 1960. Following the Board's original determination in 1953, the Internal Security Division of Justice moved against 21 Communist-front organizations to have the Board order their registration as such. Registration orders of the Board have been entered against 12 of these organizations, 10 of which have appealed. Eight actions were dismissed on motions of the Government. One action awaits final order of the Board.

Two actions were brought under the Communist Control Act of 1954 to have the Board determine that two labor organizations are Communist infiltrated. One case was dismissed on the Government's motion due to loss of witnesses, and the second is at trial.

Since 1954, active registrations under the Foreign Agents Registration Act of 1938, as amended, have increased from 271 to the present 401. Four individuals and one organization were successfully prosecuted for failure to register under the act.

Recent convictions for conspiracy to commit espionage have included Col. Rudolf Abel, Soviet State Security Service (KGB), Jack and Myra Soble, and Jacob Albam; indictments have been returned against George and Jane Zlatovski, and Alfred and Martha Stern, all of whom are fugitives outside the United States.

The Internal Security Division of the Justice Department also:

1. Obtained convictions against 23 Puerto Rican Nationalist Party members for seditious conspiracy.

2. Convicted 215 persons, mostly Cuban revolutionary sympathizers of Fidel Castro, under the neutrality and munitions control statutes.

3. Brought 18 prosecutions under the Trading With the Enemy Act largely involving trade with Red China, of which nine have been successfully concluded.

4. Obtained 49 convictions of subversives relating to perjury, false statements in Government forms and falsifications of affidavits filed pursuant to the Labor Management Act of 1947.

5. Sustained the constitutionality of the Witness Immunity Act of 1954 in the Ullman case.

6. Secured two convictions for conspiracy and obstruction of justice.

7. Defended 48 civil cases brought against Government officers involving Government employee discharges, passport matters, and military discharges in the internal security area.

This is the factual record of the Republican administration's impartial administration and enforcement of Federal laws.

XVIII

FACTS AND FIGURES ON THE PUBLIC DEBT AND INTEREST CHARGES SINCE 1900—THE FISCAL RECORD OF THE TWO POLITICAL PARTIES

(By U.S. Senator JOHN J. WILLIAMS, of Delaware)

This is an analysis of the fiscal record left by the two political parties since 1900.

Since 1900, Republicans have controlled the Presidency during 32 of the 60 fiscal years. Democrats were in office during 28 years. However, President Truman disclaimed responsibility for events during the 80th Congress (fiscal years 1948 and 1949); in the following analysis, therefore, those years are assigned to Republicans, not Democrats.

In this analysis, credit is assigned to the party which was in power at the beginning of the fiscal year, not the end.

During 34 Republican years:

	In millions
Total budget deficits	$30,383
Total budget surpluses	20,279
Net deficit	9,654

During 26 Democratic years:

Total budget deficits	$273,588
Total budget surpluses	5,112
Net deficit	268,476

Summary:

Net deficit, 1901–60	$278,130,000.
Republicans' share	3.5 percent of total.
Democrats' share	96.5 percent of total.
Interest burden in Federal Budget for fiscal year 1961	$9,585,000
Republicans' share (3.5 percent of total)	335,000
Democrats' share (96.5 percent of total)	9,250,000

Additional data

Interest burden, fiscal year 1961, as percent of total Federal Budget:	*Percent*
Total	12.0
Republicans' share	.4
Democrats' share	11.6

Total cost of interest payments on the Federal debt:	*In billions*
1901 to 1960	$124.6
1901 to 1933	12.7
1934 to 1960	111.9

NOTE.—Total interest payments, 1901–30, $10.8 billion. Estimated interest payments, 1961 alone, $9.6 billion.

FIGHTING FOR FREEDOM—AT HOME AND ABROAD

(By U.S. Senator STYLES BRIDGES, of New Hampshire)

With the 2d session of the 86th Congress drawing to a close, there are many questions in our minds about the future. Some fateful decisions that will affect the lives of all of us will be made very soon.

There are many things going on in the world that will affect all our lives for all time to come.

Summit collapse not a national tragedy

Foremost in our minds is the international situation. The collapse of the summit conference startled many of us. It was as though we were strolling along a quiet country road, and suddenly a dog, snapping and snarling, runs at us from a farmyard. We don't know whether to kick at him, or throw a stone, or to keep on our way, ignoring him. So it was when Khrushchev began snapping and snarling at Paris.

But, let me assure you of this: the collapse of the summit conference was no national tragedy. A great many Americans have opposed such conferences all along. We remembered earlier summits, when Western heads of state were outmaneuvered and cheated by Khrushchev's predecessor—the cunning Stalin.

Khrushchev's 180° turn from so-called "peaceful coexistence" at Paris was just a reminder of how fully he remains a dedicated Communist. When he saw that he wasn't going to get away with anything, he flip-flopped around and tried to embarrass the President for his own political advantage.

Khrushchev is a pure Communist agitator, from the top of his head to the soles of his feet, but especially in the area of the larynx.

Any time he can talk the world into a crisis, you can be sure he will do so. His failure at Paris was that he did not panic the world. Our President, to his everlasting credit, withstood his inflammatory onslaught with dignity and forbearance. In my opinion, that saved the day for the free world.

Red-inspired riots will not break Japanese-American ties

But crisis follows crisis in these troubled times; the Communist agitators never rest. They stirred up student-Socialist riots in Japan in a vain effort to scuttle the Japanese-American peace treaty. Then, when President Eisenhower's planned visit was postponed, they tried to make something of that, too. They said the United States "lost face," but let's look at it another way. When you want to invite a friend to your home, but your children are so bad that you are ashamed to go through with it, who is embarrassed? Or, if you refuse to break bread with a friend because his household is too rowdy, who should be ashamed, you or your friend?

The fact is, we acted the part of the mature friend and gave Japan the opportunity to postpone the visit, thus saving face. In my opinion, our action was generous, just, and proper. Our friendship with the Japanese people and their Government, carefully nurtured during all the years since the tragedy of World War II, will continue and flourish. The Communists won't drive a wedge between us, because we won't let them.

Our foreign policy has kept the peace

The fundamental purpose of our foreign policy is to keep the peace. That is the test. During the past 7½ years—since the end of the Korean war—our foreign policy has been eminently successful. No American armies are fighting in foreign lands. No American blood is wetting alien soil. No American boys are dying on faraway battlefields.

That is the acid test of our foreign policy. Let us pray that our efforts to wage peace will be equally successful in the years ahead.

Whether we call it "cold war" or what-have-you, resistance to the international Communist conspiracy is a condition of survival for the foreseeable future. We've got to maintain the moral strength and courage to sustain future diplomatic blowups, and we've got to back it up with military power. Certainly we could not have come through the past 7 years in peace, unless we had had the military strength to back up our foreign policies.

Growth of U.S. military power since Korean war

In 1953, no ship afloat was powered by atomic energy. Today we have 9 nuclear submarines in commission and 23 under construction or being converted.

In 1953 the Polaris missile system was just a dream.

This year it is a reality, as 2 of these submarines, each capable of firing 16 warheaded missiles while submerged, join our active defense forces.

At the close of the Korean war, just 7 years ago, an airplane expected to operate at speeds greater than the speed of sound was in its early design stage. Today, Mach 2 aircraft are part of our regular forces, and a Mach 3 plane is on the way.

In 1953, the Atlas Intercontinental Ballistic Missile was a hazy concept. It was surrounded by doubters. They said it would be operational by 1965. But today—1960—we have Atlases on the launching pads, with an incredible record of sucecssful test firing, and a proved accuracy far exceeding

the most optimistic hopes of a few years ago.

In 1953, the Intermediate Range Ballistic Missiles, Jupiter and Thor, were not even contemplated. Today, the Thor is in the hands of our allies in the United Kingdom, and the Jupiter booster launched our first earth satellite in 1958.

Since that first launching, the United States has put 24 satellites into orbit, compared with a total of six space vehicles for the Soviets. Today, we have 13 satellites circling in space, including the remarkable Transit-II-A, launched June 15. This two-package scientific achievement is designed to benefit all of humanity. The American people, who provided the knowledge and skill that went into Transit-II-A, deserve the congratulations and thanks of the entire world.

Two, perhaps three, Soviet space devices are in orbit today, transmitting no information. Beyond any question, we have far surpassed them in overall scientific achievement in the exploration of outer space.

Two years ago, the launching of a satellite made headlines in every newspaper. Today, it does well to make page one at all. Anti-aircraft and tactical missiles, air defense and offense systems come off of the drawing boards and into ships, planes, and land installations—and are taken for granted. Our ground forces have been constantly modernized during the past few years, and just a few weeks ago, more funds were voted for these purposes.

All these changes I have mentioned have taken place in just 7 years—since the close of the Korean war—and during a Republican administration. It's amazing to me that so much could have been accomplished, and there is absolutely no doubt in my mind that this progress in the military field, backing up our foreign policy, has been the main factor in keeping the peace during these trying years.

Peace lets us give attention to domestic problems

Following the great economic crisis of the 1930's, World War II in the 1940's, and the Korean war in the early 1950's, we took full advantage of the years of peace and gave attention to domestic problems.

As I recall a TV commercial—it goes, I think—"Better things for better living, through chemistry."

I'd like to paraphrase that and say, "Better living, for more Americans, through sound Government and the free enterprise system." And I'd like to add a personal opinion—that's a pretty good "commercial" for the progress that we have made since the close of the Korean war.

During this period the American free enterprise system has served our people magnificently.

I would also like to mention that, in 1952, the average weekly earnings of factory workers was $67.97. Last month, it was over $90. Is this not indicative of our tremendous economic growth?

During this same period, homeownership has risen at a steady and healthy rate—and I mention that because I know of no more reliable and significant indicator of economic health. Today, more than 60 percent of us own or are buying our own homes.

The problem of inflation

During the quarter century of crisis to which I referred, when economic catastrophe was followed by war, more economic troubles, and yet another war, the problem of inflation reared its ugly head, and the cost of living soared.

The 100-cent dollars slipped downward to 90 cents, to 80 cents, to 70 cents, and so on, until, during the Korean war, it skidded to 52 cents. We put the brakes on the inflationary roller coaster in 1953, and since then, have held the depreciation of the dollar to just a few cents. It is now worth approximately 48 cents, in comparison with the 1939 dollar.

To express inflation another way—the Consumer Price Index rose 89.4 percent between 1940 and 1952. It rose 9.8 percent between 1952 and 1959.

But, no matter how you express it or illustrate it, it is a terrible thing.

In my opinion, although we have effectively slowed down inflation in the past 7 years, it is still the major domestic problem facing the Nation.

A study in 1957 by the Social Security Administration showed that the average monthly benefit for retired workers had risen only 13.6 percent in terms of real dollars between 1940 and 1957. This means that the typical social security retiree is scarcely better off today than he was nearly 20 years ago. Thus, all the economic progress we're so proud of has not been shared by retired persons.

Now, maybe I'm old-fashioned, but I think a person who works 30 or 40 years and, one way or another, prepares for retirement through savings, participation in a pension plan, and/or the social security program, is entitled to live out his remaining years in comfort. When a person saves on the basis of a 100-cent dollar, but upon retirement finds he must pay for food, shelter, and clothing on the basis of a 50-cent dollar—it's like changing the rules on him in the middle of the game. And I don't think it's right to change the rules on him when he reaches retirement age. When the rules are changed inadvertently, as in inflation, I think we should try to do something to compensate the retiree for the damage.

The Bridges social security proposal

There are various proposals before Congress having to do with helping our senior citizens. One, which I introduced, would permit a man or woman to earn up to $1,800 a year without sacrificing any of his social security benefit. This, it seems to me, is logical and justifiable. This Nation needs the wisdom and skills of our "elder statesman" citizens. And *they* need the freedom to work and earn, to the limit of their own judgment. The present law puts a penalty on those who are able and happy to work and earn.

The administration's medicare plan

Another proposal before Congress of interest to our retirees is the plan for hospitalization insurance for citizens over 65 years old.

Actually, there are two proposals. One is the Forand bill—a compulsory, socialized medicine approach that would be operated by the Federal Government. The other is the administration's medicare plan—a voluntary plan that would be operated jointly by the Federal Government and the States.

The Forand bill benefits many people who do not need the benefits, but leaves out 4 million aged not covered by social security, more than half of whom have incomes of less than $1,000 a year. And the Forand bill is compulsory for those it does cover.

I hate compulsion.

I believe in personal freedom.

I support the medicare plan because I think it is the best plan for the most people. And it is a voluntary plan.

Fighting inflation is fighting for retirees

I hope that the medicare plan and my proposal for the modernization of our social security laws will become law. Both will help. But, there is another fight which, in the long run, is even more important to our senior citizens. That is the battle against inflation.

There are three principle causes of inflation. One is profiteering by business. Another is excessive wage demands by labor. The third, and this is the one I am most directly interested in, is Government spending and monetary matters.

Government deficit spending is simply printing paper money and feeding it into the mainstream of our economy without a compensating supply of goods and services. The result, as someone has expressed it, is: "Too much money chasing too few goods." The result is a soaring cost-of-living index, and the depreciating dollar.

Reckless Government spending won't solve problems

There is no magic formula that will solve the domestic problems confronting our Nation. They cannot be solved by political drumbeating or the reckless spending of the people's money.

While every thoughtful citizen wants a full measure of goods and services for every dollar he spends, our senior citizens are the first to detect signs of inflation, and the first to feel its effects.

Balanced budget key to progress

The mistaken idea has been planted that the drive for a balanced Federal budget stifles progress. On the contrary, by balancing the budget, the Federal Government can contribute to solid progress by stabilizing our dollars. The alternative is creeping or leaping inflation—depending on the amount of deficit spending.

Inflation is not progress—it is only the illusion of progress. During inflation we receive higher wages, but they buy less than before, so how can we say we are making progress?

The greatest service our Government could do for the people right now is to put its fiscal house in order. The greatest service the people could do for their Government is to demand fiscal responsibility of their elected representatives.

Dollars and people

One political accusation that I am sick and tired of hearing is the one that goes something like this: "My opponent is interested in dollars; I am interested in people."

That is the cry of the demagog. What hogwash.

This absurd charge is usually leveled at any conscientious public servant who questions a costly Government spending program designed to benefit a special interest group.

Well, let me ask this: Who's dollars are we talking about? Aren't they the people's dollars? Or have we forgotten our own screams of anguish and our rages against Government spending the last time income taxes were due?

I think two questions should be asked of every Government spending proposal. (1) Can we afford it? and (2) Is it the best use of the public's money in the public's interest?

I view with suspicion any politician who lacks the courage, honesty, or wisdom to face up to the hard decision of how best to spend public money.

We should think twice before entrusting such a man with our welfare and our tax money.

Well-informed citizens—our hope for the future

The hope for the future is a well-informed public. If the problems I have mentioned are solved, and I am confident they will be, it will come about mainly through the interest and efforts of the people.

By now, the cold war has demonstrated that to survive and prosper in a free society, America must rely on its human resources, including its most mature minds.

XX

THE NATION'S PROGRESS IN EDUCATION, SOCIAL SECURITY, HEALTH, AND THE GENERAL WELFARE UNDER THE REPUBLICAN ADMINISTRATION

(By U.S. Senator MARGARET CHASE SMITH, of Maine)

Soon after he took office, President Eisenhower recommended establishment of the

Department of Health, Education, and Welfare to bring to the highest councils of Government the human problems of the people.

The 83d Congress approved his plan, and the first new Cabinet office in 40 years came into being in April 1953, under the sponsorship of a Republican administration.

In one way or another, the programs developed, recommended, and put into effect by the Republican administration touched the lives of every man, woman, and child in America. The goal of all these programs was to conserve and strengthen the Nation's greatest natural resource—its people.

Since the Department was created, dramatic progress has been made in the national effort to achieve better health, better education, and greater economic security.

The administration has supported and obtained legislation to:

1. Strengthen the Nation's educational system.

2. Broaden the coverage and the benefits of the Social Security Act.

3. Expand a rehabilitation program which offers new hope for the disabled.

4. Strengthen our research efforts in science and medicine.

5. Provide more adequate health services and facilities.

6. Provide improved protection to consumers against harmful foods and drugs.

This progress has been made within a policy of fiscal responsibility in the conduct of Government, and under programs designed to encourage greater initiative and enterprise by individuals, private agencies, and local and State governments.

Progress in health

In 1954, the first full year of the Department of Health, Education, and Welfare's operation, expenditures for the Public Health Service totaled $242 million. The President's 1961 budget calls for $825 million—an increase of 241 percent. In the past 7 years:

1. Medical research has been vastly expanded, with particular emphasis on cancer, heart diseases, mental illness, and other major killers and cripplers. Federal assistance to medical research has increased more than fivefold since 1954. Major new research centers have been put to work.

2. Health and medical facilities have been significantly expanded. The Federal-State program to assist in constructing hospital and medical facilities has been broadened to include chronic disease hospitals, nursing homes, rehabilitation facilities and diagnostic and treatment centers. A new grant program has been established to enable medical schools and other institutions to improve and expand their laboratories and research facilities.

3. The supply of manpower skilled in the health sciences has been increased. Training grants and fellowships have been established or expanded for promising research scientists, public health personnel, graduate professional nurses, and practical nurses.

4. Greater emphasis has been placed on the promotion of public health and preventive medicine among the American people. New or greatly strengthened programs have been developed:

(a) Radiological Health: The Public Health Service has greatly expanded its research, training, and consultative activities in the field of radiological health under the Republican administration. It is working toward the development of methods to reduce exposure from radiation sources, and it has intensified its systematic measurements of radiation levels in air, water, and milk.

In March 1958, a new Division of Radiological Health was created by the Service to provide technical assistance to State agencies in dealing with medical, industrial, and other activities involving radiation hazards to health.

In August 1959, the President established the Federal Radiation Council to coordinate all governmental radiological activities and to insure policy consideration of the health factors involved in the highest councils of Government. Responsibility for the collation, analysis, and interpretation of data on environmental radiation levels was assigned for the first time to a single agency—the Department of Health, Education, and Welfare. The council established basic guidelines for radiation protection standards in its first report to the President in May 1960, and is now making detailed studies to assure continued effective protection of the American people against radiation hazards.

(b) Water pollution: In 1956, the Republican administration sponsored legislation which led to passage of the Federal Water Pollution Control Act.

This act authorized a broader research program, research fellowships, increased assistance to States, grant programs for State water pollution control activities and for construction of municipal sewage treatment works, and a Federal enforcement role in abating interstate pollution. In April 1959, water pollution control activities were elevated to division status in the Public Health Service to reflect the increasing importance of this program. For the first time in history, the President has called a National Conference on Water Pollution, to be held this December, to focus attention on future needs in this critical area.

(c) Air pollution: Legislation in 1955 established a Federal program of research and technical activities to strengthen control of air pollution. The Public Health Service is collaborating with State and local governments, universities, industrial organizations, and research institutions in a major effort to acquire new knowledge and develop effective measures for prevention and control of the increasing problem of air pollution. In 1958, the Republican administration sponsored the first National Air Pollution Conference, held under PHS auspices, which provided a nationwide impetus to air pollution control activities.

(d) Health data: The Republican administration recommended and Congress authorized a continuing national survey of health and illness in the United States—the first such program in the world. The survey, begun in 1957, is conducted through actual interviews with householders throughout the Nation about illness in the family, accidents and injuries, disability, hospitalization, and medical and dental care. As comparative data are collected over a period of time, this survey will prove invaluable in planning for facilities and staff to meet health needs.

5. Since the transfer of the Indian Health program to the Public Health Service in 1955, dramatic progress has been made in health and medical services to the 385,000 American Indians and Alaskan natives. In 1959, administration-sponsored legislation was enacted providing urgently needed sanitation facilities and services in Indian communities.

6. In addition, legislation has been sought of a Democratic-controlled Congress to make possible further progress in the health field. Major pending proposals sponsored by this administration would:

(a) Establish a broad and balanced program to provide health and medical care for persons over 65 who do not have the resources or the opportunity to obtain adequate protection against the staggering financial burden of long term and other expensive illness.

(b) Improve the Nation's health and medical facilities and increase the supply of medical manpower by:

(i) amending the Hospital and Medical Facilities Construction Grant program to provide greater emphasis on hospital modernization, research and planning for more effective use of medical facilities and services, and construction of special facilities for mental health and for the care of long-term patients.

(ii) authorizing a 5-year program of construction grants for teaching facilities to expand the training capacity of schools of medicine, dentistry, osteopathy, and public health.

(iii) authorizing a 5-year program of project grants to strengthen or expand graduate training in schools of public health and other institutions providing graduate training of public health nurses and sanitary engineers.

(iv) authorizing a 5-year program of Federal credit assistance in the construction of group practice facilities.

(v) providing institutional grants for research in the health sciences to permit colleges and universities to pursue basic research on a more stable foundation, and with full Federal payment of the indirect costs of research.

(c) Strengthen the Water Pollution Control Act to provide increased authority to enforce decisions designed to abate pollution of interstate waters.

(d) Strengthen the Air Pollution Control Act to give the Surgeon General the authority to make investigations and hold public hearings on air pollution problems of broad significance.

Greater food and drug protection

Expenditures for the Food and Drug Administration in 1954 were $6.2 million. The President's 1961 budget calls for expenditures of $17.8 million—an increase of 187 percent. In the past 7 years:

1. Food and Drug Administration inspection force has been tripled since 1954 in order more effectively to guard the Nation's food and drug supply and remove unsafe products from the marketplace.

2. Basic scientific research programs have been intensified, scientific staffs have been increased, laboratory equipment has been modernized, two new field headquarters have been established, and construction of a new headquarters building with modern laboratories have been authorized.

3. Far-reaching legislation has been sought and obtained to improve the protection of the public against harmful, unclean, or misrepresented foods, drugs, or cosmetics. A landmark in this effort was the Food Additives Amendment of 1958, which required that food additives be shown safe for human consumption before use. This legislation established the principle that the burden of proof must rest squarely on the manufacturer to assure the safety of products prior to their sale to consumers.

4. In addition, legislation has been recommended to provide a scientifically sound basis for approving colors that may be safely used in foods, drugs, and cosmetics, and to establish other safeguards including, where necessary, appropriate tolerance limitations on the amount of the color that may be used.

Progress in education

In 1954, Federal expenditures for the Office of Education were $217 million. The President's 1961 budget calls for expenditures of $442 million—an increase of 104 percent. During the past 7 years:

1. The Office of Education's informational, statistical, and technical consultant services to the Nation's schools and colleges have been greatly improved. In 1954, administration-sponsored legislation established a long-needed program of research of problems in education in cooperation with colleges, universities, and State departments of education.

2. In 1955, the first White House Conference on Education was convened by President Eisenhower to bring about "the most thorough, widespread, and concerted study the American people have ever made of their educational problems." The Conference provided a detailed examination of elementary and secondary education, including school

building needs, organization and financing, educational goals, and public understanding and support.

3. The President's Committee on Education Beyond the High School, composed of distinguished lay leaders and educators, made a thorough study of present and future needs of higher education. The Committee's recommendations, submitted in December 1957, focused national attention on the needs of the colleges and universities in the decade ahead.

4. Early in 1958, the administration sponsored legislation to help overcome deficiencies in the educational system and stimulate the fullest development of the mental resources and technical skills of the Nation's young men and women. The National Defense Education Act of 1958, which substantially embodied the administration's proposals, is already recognized as a landmark in the history of American education.

The act established:

A broad student loan program to enable talented students who need financial help to obtain a higher education, and a fellowship program to help overcome the national shortage of adequately trained college and university teachers.

Grants to the States to strengthen instruction in science, mathematics and modern foreign languages in the public schools.

Grants to the States to strengthen testing, guidance and counseling programs in the secondary schools in order that talented students may be more readily identified and encouraged to develop their abilities.

Authorization for modern foreign language centers and institutes to train teachers and increase the number of persons skilled in foreign languages.

Grants to States to assist in training individuals for employment as highly skilled technicians.

5. A total of $1.7 billion has been appropriated during this administration for assistance to schools in federally affected areas.

6. In 1956, the Library Services Act established a program of Federal grants to stimulate the extension of public library services to rural areas.

7. A program of grants to the States and to colleges and universities was established in 1958 to encourage expansion of teaching and education programs for the mentally retarded.

8. Through the surplus property utilization program, many schools and colleges throughout the country have acquired additional facilities and enriched their courses of study. Hospitals and research institutions have also benefited from the program, which in the past 7 years has made available over $1 billion worth of real estate and equipment no longer needed by the Federal Government.

9. In addition, legislation has been sought to make possible further progress in the field of education. In each of the last three Congresses, the administration has sponsored legislation to provide Federal assistance to the States in the construction of needed public elementary and secondary school buildings. To help colleges and universities meet anticipated enrollment increases, the administration is sponsoring legislation to establish a Federal program of assistance to institutions of higher education which would provide payments of up to one-third of the cost of constructing needed academic and housing facilities.

Progress in social security

Since 1953:

1. Coverage under the Social Security Act has been broadened to make 12 million additional people eligible to provide retirement income benefits for themselves and their dependents. Coverage has been extended to include members of the Armed Forces, farmers and farm operators, lawyers, ministers, and other self-employed people.

2. Socal security benefit payments have increased from $2.5 billion in 1952 to an estimated $10.3 billion in 1960. During this period, the number of persons receiving benefits has grown from 5 million to more than 14 million. Benefits provided under the system have been increased in 1954 and again in 1958: the average benefit to a retired worker has risen from $49.25 at the end of 1952 to $73.12 as of February 1960. The amount of money retired men and women have been permitted to earn without loss of benefits has been increased. In 1956, the President signed legislation to provide benefits for disabled persons 50 and over, and in 1958 these benefits were extended to their families.

3. Federally aided programs of old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled now provide for some 5.8 million needy people. Federal grants for these programs, totaling over $2 billion a year, have stimulated the States to provide increased payments and more effective social services for needy persons.

4. In 1956, administration-sponsored legislation stimulated significant improvement in medical services to the needy. Payments for medical care have risen from $180 million in 1956 to an estimated $360 million in 1960.

5. In addition, legislation has been sought to make possible further progress in the welfare field. Changes have been recommended to broaden the coverage of the old-age, survivors, and disability insurance program, including the removal of the age-50 limitation on the payment of disability insurance benefits. Legislation has also been introduced to establish a broad and balanced program of health and medical care for persons over 65 who do not have the resources or the opportunity to obtain adequate protection against the staggering financial burdens of long-term and other expensive illness.

New hope for the disabled

In 1954, Federal expenditures for vocational rehabilitation totaled $23.6 million. The President's 1961 budget calls for $69.4 million—an increase of 194 percent. In the interim, the administration has sponsored and carried out a broad expansion of the vocational rehabilitation program.

Funds have been provided for the training of doctors, nurses, social workers, and other needed specialists in rehabilitation. Today more than 80,000 handicapped people are now being rehabilitated annually, and a goal of 93,000 rehabilitations has been set for fiscal year 1961.

The new emphasis on restoring the disabled to productive lives combines humanitarian ideals with sound economy. Since the program was expanded in 1954, some 400 thousand disabled men and women have been returned to active employment. These include thousands in the professional fields of medicine, education, and engineering, where the Nation urgently requires additional manpower. Others work on farms or in trades. By restoring the ability of these people to earn their own living, their own sense of self-respect and dignity has also been restored. Moreover, many of them have been transformed from individuals dependent on tax revenues into self-reliant taxpayers.

Persons rehabilitated since 1954 have earned more than $1.9 billion and have paid about $150 million in Federal income taxes. About 80,000 of these people had been on Public Assistance receiving payments at the rate of about $65 million annually. An even larger number would probably have become dependent on public support after exhausting their resources and those of their families if the Federal-State program of vocational rehabilitation had not entered their lives and prevented dependency on public funds.

Progress for the older men and women of America

The Republican administration has given special attention to the needs and opportunities of the Nation's older citizens. The Federal Council on Aging has been reconstituted at Cabinet level to provide overall coordination of executive branch planning and activities on behalf of the aged population. Within the Department of Health, Education, and Welfare, a special staff on aging has been established and a Center for Aging Research has been created at the National Institutes of Health. For the first time in history, a White House Conference on Aging has been called by President Eisenhower for 1961.

In one way or another, every operating agency of the Department is concerned with the welfare of the 16 million citizens over 65.

Progress for the children and young people of America

The Republican administration has devoted special attention to the needs and opportunities of the Nation's young people.

Grants have been increased for maternal and child health services, care of crippled, and mentally retarded children and child welfare services.

Welfare services have been extended to children in urban as well as rural areas.

A special unit in the Children's Bureau and a special research program at the National Institute of Mental Health have been established to study the problems associated with juvenile delinquency.

In a joint report to Congress in February 1960, the Children's Bureau and NIMH called attention to the need for increased research, field studies, and demonstration projects in the prevention and treatment of juvenile delinquency. The White House Conference on Children and Youth, in March of 1960, spotlighted ways to improve opportunities for all children in the coming decade.

In addition, improvements have been made in the aid to dependent children program as a part of public assistance to needy persons.

XXI

U.S. FOREIGN POLICY UNDER THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator STYLES BRIDGES, of New Hampshire, senior Republican Senator and chairman of the Republican policy committee)

The accomplishments of the Republican administration in the field of foreign affairs reflect the basic purpose of our foreign policy: to preserve and enhance the security and freedom of the United States.

In our efforts to create a more stable world order, the United States has sought to:

(a) Strengthen collective security.

(b) Deter the use of force.

(c) Create international status in new frontiers of activity.

(d) Progress toward safeguarded arms control.

(e) Promote negotiation of outstanding international disputes.

(f) Help make the United Nations more effective.

(g) Make of the interdependence of a shrunken world a force for peace rather than a breeding ground for war.

U.S. foreign policy—whether it be considered good or considered bad—makes itself felt in every city, town, and hamlet of this great Republic. Our military posture, our domestic prosperity—in fact, our very survival as a Nation—are all affected by success or failure in the conduct of our foreign relations.

Under Republican leadership our foreign policy is based on an alert awareness of

reality. Certainly all Americans—regardless of political party—want the necessary armed strength and preparedness. Certainly all Americans also know that we must not dissipate our economic strength in a wild variety of crash programs.

Many of us have warned for years—and today, and at every opportunity—that at home and abroad we face the challenge of those who would destroy us by Marxian or brute power. Even a process of sugarcoating each socialistic pill would produce a devastating narcotic effect upon once freemen.

We must remember that the big Red spider of communism has strung a barbed wire fence around one-third of the earth's surface.

We must remember that we cannot appease the hunger of communism by throwing it great chunks of free people and free lands.

We must remember to beware of those who would preach the siren doctrine of easy coexistence.

We must remember that peace at any price means the ultimate communization of the world.

With these reminders, the United States, during the past 7½ years under the Republican administration, has performed notably in the following fields of foreign policy:

Collective security

Since 1953, under the leadership of the United States, the free world system of collective security has been substantially strengthened.

Some 50 countries are now associated with the United States in regional or bilateral security pacts.

No member nation of this collective security system has been engulfed by international communism.

These security arrangements no longer assume the aspect of mere military alliances.

They are the framework of consultative processes that day by day are steadily reforming the society of free nations.

Our collective security pacts are not mere expedients. They introduce a fresh concept into the structure of world order.

During the past 7 years NATO has evolved into an effective military and political instrument enabling the Atlantic community to thwart Soviet efforts to dominate Western Europe.

The development of political consultation in NATO in recent years under the Republican administration has demonstrated that interdependence is not merely an empty symbol but a practical necessity for free world survival.

As proposed by the United States, NATO is now engaged in a planning effort addressed to the next 10 years.

In 1954, by the Manila Pact, the Southeast Asia Treaty Organization was created to strengthen the determination and capability of the nations of that area to resist the expansionist thrusts of Communist China. In recent years, certain nations of the area which are not members of the Southeast Asia Treaty Organization have come to understand and appreciate its importance for the preservation of freedom.

The Anzus treaty which has strengthened the close ties between Australia, New Zealand and the United States is another illustration of how our security alliances contribute immensely to the development of common purposes in other fields than military.

In 1954 at the Tenth Inter-American Conference at Caracas, there was promulgated the Declaration of Solidarity of the American States. It declared that the domination or control by the international Communist movement of the political institutions of any American state would threaten us all and endanger the peace of the Americas.

During recent years, the Organization of American States has further developed as an instrument of hemispheric cooperation. The August 1959 Conference of the Foreign Ministers of the American Republics in Santiago clearly demonstrated the determination of these republics to maintain peace in the hemisphere through common action on problems creating international tensions.

An outstanding example of this common action came in early 1959 when Panama was threatened by revolution fomented outside her borders. Prompt action by the Inter-American Peace Commission was an important factor in ending this threat.

The United States is working continuously with the other American Republics in the Organization of American States and in the Inter-American Peace Commission to reduce international tensions in this hemisphere, particularly in the Caribbean area, where they are now most acute.

In the Middle East, the United States, although not a member, has strongly supported the Baghdad Pact organization, which was established in 1955. Although the Government of Iraq recently indicated its withdrawal, this organization—now known as the Central Treaty Organization—remains a solid instrument of collective security for the northern tier of states in the Middle East.

The joint congressional resolution on the Middle East helped the administration to provide prompt economic and military aid to Jordan, and to meet through bilateral agreements the need for renewed evidence of U.S. support for Iran, Pakistan, and Turkey.

The situation in the Middle East today is clearly improved as compared with 1958, as a result of actions by the United States, the United Nations, and the states in the area.

With American support, Germany has made a rapid economic recovery, and is now among our strongest allies.

In France, we are witnessing an inspiring example of national renewal.

Free China's extraordinary economic development is a symbol to the entire Far East of how much more freedom can do to improve the lot of people than can slavery.

The building of strength in freedom in these countries, many of them in chaos only a few years ago, is an inspiring success, not only for them, but for U.S. policies which have contributed so much to this result.

Deterrence of force

Under the Republican administration, the United States has by its conduct sought to establish the principle of renunciation of aggressive force and has shown its ability and will to deter such use of force by others.

At the time of the Suez episode in 1956 and the Israeli-Egyptian hostilities, the United Kingdom and France, and then Israel, withdrew their armed forces and accepted a United Nations solution.

When Lebanon considered itself threatened from without and appealed to the United States for emergency aid, we responded with promptness and efficiency. When the emergency was relieved, we promptly withdrew our forces.

In the Far East, the Chinese Communists, with Soviet backing, initiated military action designed, as they put it, to "expel the United States" from the Western Pacific. We stood beside the Republic of China in their successful resistance to that attack. We have refused to recognize Red China, and strongly oppose the admittance of Red China to the U.N.

In 1959, when the freedom and independence of Laos were threatened, the United States supported the establishment of a United Nations Security Council subcommittee to proceed to Laos. This international group succeeded by its presence in contributing to easing a potentially dangerous situation. We hope the U.N. can continue to turn back any possible aggressor against Laos.

The United States and Japan signed a new security treaty providing more equitable and workable relationship with this important Far Eastern ally. This treaty was concluded despite the mounting in Japan of one of the most intensive international Communist campaigns ever organized. This international Communist effort evidences the importance to the free world of the close ties which our policy has built between the United States and Japan.

International law

President Eisenhower has sought acceptance of one facet of international law. This is where national control has not yet entrenched itself, and where the nations might seek some international status in certain areas. However, whether the promises of the leaders of international communism can even be remotely relied upon remains to be seen.

Three U.S. proposals exemplify the international approach.

1. Polar areas: In April 1958, the United States proposed in the United Nations Security Council a system of international inspection of the arctic area to reduce the danger of surprise attack over the north polar region and to reduce the danger of miscalculation. This proposal was vetoed by the Soviet Union.

In May 1958, the United States proposed that the countries which heretofore have shown particular interest in Antarctica, including the Soviet Union, join in negotiating a treaty to guarantee the peaceful use of Antarctica and continue international scientific cooperation there. That treaty was signed by the United States and 11 other nations December 1, 1959, guaranteeing by an effective and unprecedented system of inspection that this vast area will be used solely for peaceful purposes. The treaty is now in process of ratification by the several nations.

2. Atoms for peace: In his famous address at the United Nations on December 8, 1953, President Eisenhower proposed a method to "find the way by which the miraculous inventiveness of man shall not be dedicated to his death, but consecrated to his life."

Under the "atoms for peace" program, the United States has negotiated bilateral agreements with some 40 nations. Research reactor grants have been approved for 17 nations. Negotiations are under way with others. We have developed close and constructive relations with EURATOM, the Atomic Energy Community of France, Germany, Italy, Netherlands, Belgium, and Luxembourg.

The International Atomic Energy Agency, proposed by the Republican administration, was designed to promote peaceful uses of atomic energy around the world. It was finally established in 1957. It gives some promise of the beginnings of an international approach to the problems of atomic energy.

3. Outer space: In January 1958, President Eisenhower proposed to the Soviet Union "that we agree that outer space should be used only for peaceful purposes. We face a decisive moment in history in relation to this matter." This bilateral proposal was subsequently advanced in the broader forum of the United Nations, since it is of concern to all nations, and an ad hoc committee on peaceful uses of outer space was created.

The Soviet Union at first refused to participate, but eventually joined in December 1959 a United Nations 24-member committee on the peaceful uses of outer space. This committee is to study feasible means for giving effect to programs in peaceful uses of outer space and to make preparations for a possible international conference in 1960 or 1961. Here again we must be watchful of moves made by Communist leaders.

Disarmament

In August 1957, the United States, together with the United Kingdom, France, and Canada, submitted a comprehensive arms control proposal to the Soviet Union which, if implemented, would constitute a step toward what might some day be the goal of general disarmament. This proposal had four basic parts:

1. It proposed that the Soviet Union join in inaugurating a system of inspection to provide dependable safeguards against large-scale surprise attack.

2. It proposed a threefold move in relation to nuclear weapons.

(a) Cessation of the production of fissionable material for nuclear weapons.

(b) A system whereby existing nuclear weapons stockpiles could be gradually reduced by transfers to peaceful uses.

(c) A tentative suspension of nuclear testing.

3. It proposed a start on reducing and regulating conventional armaments and armed forces.

4. It proposed the working out of a system to insure that outer space missiles would be used exclusively for peaceful and scientific purposes.

The Soviet Union did not even care to discuss our proposals at that time.

In 1958, President Eisenhower proposed a conference of Soviet and Western experts, which quickly agreed on the nature of measures required to control an international agreement to suspend nuclear testing. Political negotiations have been under way for some time in an effort to translate these technical possibilities into dependable realities. To give the negotiations time to succeed, the President extended the previous U.S. unilateral suspension of nuclear tests.

The President has also proposed that, if the negotiations cannot agree on procedures to inspect a complete test suspension, a preliminary agreement might be concluded suspending nuclear tests in the atmosphere and under water.

These negotiations continue, but their outcome is dependent on the willingness of the Soviet Union to reach a meaningful agreement.

Technical discussions were also undertaken in 1958, at the suggestion of the President, to seek definition of measures required to lessen the danger of surprise attack. These discussions resulted in a clearer understanding of each side's position but, because of Soviet intransigence, no substantial progress was achieved.

In the summer of 1959 the United States, United Kingdom, and France proposed to the Soviet Union that disarmament negotiations be resumed by these four powers and that certain other states be invited to participate.

This proposal was accepted and the Ten Nation Disarmament Commission began meeting at Geneva in March of this year.

The Western Powers presented to the Ten Nation Commission a three-phase safeguarded arms reduction program which could lead to the goal of general disarmament. This Disarmament Commission is continuing its deliberations. Whether it will make substantial progress depends on the willingness of the Soviets to accept a safeguarded and verifiable arms control arrangement.

International negotiation

Arab-Israeli dispute: In August 1955, Secretary of State Dulles, with specific authority from President Eisenhower, proposed a program for progress toward resolution of the Arab-Israeli dispute. It involved three points:

1. Possible substantial participation by the United States in a loan to assist Israel to pay compensation to refugees.

2. Possible U.S. participation in formal treaty engagements to prevent or thwart any effort by either side to alter by force the boundaries between Israel and its Arab neighbors.

3. Possible U.S. help in reconciling the vital interests of all the parties in the matter of boundary definition.

India-Pakistan dispute: The United States has encouraged and assisted the World Bank in its effort to negotiate a just settlement of the serious dispute between India and Pakistan over the Indus waters.

Negotiations with the Communists: Every reasonable and decent effort has been made to find a modus vivendi with the Communists. In an effort to reduce the danger of general war—

1. We made the Korean armistice which ended the hostilities in Korea.

2. We participated in the Geneva Conference of 1954 which ended the hostilities in Indochina.

3. We continue to seek in the Warsaw talks with the Chinese Communists to assure that in the Taiwan area force should not be relied upon by either side to bring about the reunification of China.

4. We have joined with the Soviet Union in concluding the Austrian Peace Treaty which liberated Austria.

5. In 1955, President Eisenhower met with the Soviet leaders at the summit in Geneva. At that time, he presented his famous "open skies" proposal which, had it been accepted by the Soviet Union, would have gone a long way to reducing the danger of a great surprise attack.

6. In 1958, we made a comprehensive agreement with the Soviet Union for exchanges in the fields of culture, technology, and education. This agreement operated successfully for 2 years and recently has been extended for 2 more.

We shall continue our endeavor to bring home to the people of the U.S.S.R. a true picture of the United States. Vice President NIXON'S trip to the Soviet Union last year served to emphasize directly to the Soviet people the desire of the United States for peace and friendship.

7. In November 1958, the Soviet Union threatened to take unilateral action against Western rights in Berlin by May 1959 unless the three Western Powers accepted the Soviet proposal for a so-called free city. The United States, United Kingdom, and France refused, with full NATO support, to compromise their rights or to negotiate under duress. When the Soviet Union then indicated that its deadline was of no particular significance, the three Western Powers agreed to negotiate concerning the question of Germany, including Berlin and a peace treaty, at a Foreign Ministers' Conference. Secretary of State Herter spent 10 weeks in Geneva in 1959 seeking a settlement of the German problem and, failing that, of a modus vivendi on Berlin. This Conference clarified and narrowed the differences with the Soviet Union but did not produce agreement.

Negotiating with the Soviet Union is long, hard work—if there can be any worthiness in negotiating with the Russian leaders and, at that, it is difficult to trust them. Months of careful planning went into the preparation by the Western Powers for the summit conference scheduled for May 16, 1960, which the U.S.S.R. would not even allow to take place. Even though it did not take place, the Soviet's abrupt rupture of the meeting increased the solidarity of our alliances. In his report to the American people on this development, President Eisenhower made these three points:

"First. We must keep up our strength, and hold it steady for the long pull—a strength not neglected in complacency nor overbuilt in hysteria. So doing, we can make it clear to everyone that there can be no gain in the use of pressure tactics or aggression against us or our allies.

"Second. We must continue businesslike dealings with the Soviet leaders on outstanding issues, and improve the contacts between our own and the Soviet peoples, making clear that the path of reason and common sense is still open if the Soviets will but use it.

"Third. To improve world conditions in which human freedom can flourish, we must continue to move ahead with positive programs at home and abroad, in collaboration with free nations everywhere. In doing so, we shall continue to give our strong support to the United Nations and the great principles for which it stands."

In discussing this refusal of the Soviets to allow the summit meeting to take place at Paris, Secretary Herter said on May 27:

"We intend to go ahead with existing negotiations, to stand by our commitments and to foster open communication and peaceful exchanges. Above all, we shall not cease from the most determined, patient, resourceful endeavor to find ways to bring the arms race under control and thus to meet the nuclear menace that hangs over mankind.

"I hope that we will not become so fixed in preoccupation with the Soviet challenge as to lose sight of our own constructive purposes—which are larger and more important than merely resisting or reacting to external threats. We have our own vision of the future toward which we want to see the world evolve. We have our own programs for helping to bring that future about—for holding high the light of freedom, for sharing its message and rewards with emerging nations, for trying to create an international community in which the rule of law will replace the rule of force."

We can recall that it took about 3 years of negotiation with the Soviet Union to create the International Atomic Energy Agency, 2½ years for the Cultural Exchange Agreement, 8 years and 400 meetings for the Austrian State Treaty.

The real truth is that the Russian leaders wrecked the scheduled summit meeting because they discovered they would not be able to get all kinds of concessions like they did at Yalta and Potsdam.

United Nations

In the last 7 years, the United States has repeatedly taken the lead in trying to strengthen the United Nations and the processes of international cooperation which the United Nations represents. A few examples follow:

1. In December 1953, President Eisenhower proposed the atoms for peace program to the United Nations.

2. In the economic field, we played a leading role in bringing about two new entities linked with the United Nations: the International Finance Corporation and the Special Fund. The International Finance Corporation, which came into being in July 1956 as an affiliate of the World Bank, invests in private enterprise abroad, thus stimulating the vital private sector of developing economies. The Special Fund, which was set up by the United Nations General Assembly, provides funds for broad regional and basic technical assistance and survey projects more extensive than those financed by the United Nations technical assistance program. We must carefully watch these UN operations lest we lose one bit of our national sovereignty, plus large sums of money.

3. The United States also took the lead at the United Nations General Assembly in creating a committee on outer space. The activities of that committee, we hope, may contribute to the peaceful and cooperative exploration of this new dimension in human experience.

4. At the same time, we have continued to try to strengthen the United Nations procedures. Thus, in January 1958 the United States renewed its proposal to restrict use of the veto in the Security Council. This offer was refused by the Soviet Union.

5. Our leadership has been manifested with particular vigor in recent crises which have brought threats to the peace before the United Nations.

6. When a Middle Eastern crisis arose in 1958, we promptly notified the United Nations of the action that we were taking in Lebanon to meet that crisis and called for an emergency session of the General Assembly to deal with the crisis. At that session, President Eisenhower proposed not only steps to counter the immediate threat in Lebanon and Jordan, but also long-range measures to improve basic conditions in the Middle East: An Arab Development Institution, a standby United Nations force, and possibly a United Nations study of Middle Eastern arms control. The countries concerned are making progress in laying the basis for an Arab Development Institution; the Secretary General has engaged in planning and consultation regarding a United Nations standby force.

7. We have strongly supported the General Assembly in the adoption of resolutions condemning offenses against mankind, such as the wholesale murder of the people of Tibet by the Chinese Communists and the brutal Soviet repression in Hungary.

8. We have welcomed to the community of nations the new countries of Africa. Our support of their admission to the United Nations is but a part of our dynamic policy of friendship and cooperation with these new nations as they attain independence.

As a result of U.S. action such as those indicated above, and of the Security Council action respecting Laos, the United Nations may become a more vital force in support of peace today than it was 7 years ago.

The tireless efforts of former Secretary of State Dulles not only made him a symbol of the fight by freedom against the Communist menace but also led to worldwide recognition of the success of the Republican administration's foreign policies. Secretary Herter has carried forward this great record at Geneva, Santiago, Ottawa, London, Paris, Bonn, and during the President's trip to Europe in September 1959.

The bipartisan nature of President Eisenhower's foreign policy is evidenced by the fact that Secretary Dulles continuously informed appropriate congressional bodies. During his 6 years as Secretary of State he took part in 213 such meetings. This close cooperation with the Congress is continuing under Secretary Herter.

In recent years, there has been a growing clarification of understanding around the world of the real purpose of the Communist leaders—to subject all the world to the dominant influence and control of international communism.

In the Middle East, the deadly designs of communism are now far more clearly realized than a few years ago.

Brutal Chinese Communist repression in Tibet and border incursions and demands against India have brought home aggressive Communist designs more clearly to the peoples of South Asia.

In Southeast Asia, liberty-loving peoples are struggling successfully to remain masters in their newly built national homes.

In Europe, there are a number of inspiring examples of national renewal and recession of Communist influence.

President Eisenhower's historic trip in December 1959, to 11 nations on the 3 continents of Asia, Africa, and Europe, and his trip to the Far East in June of this year, brought home to literally millions of persons the President's message of peace and friendship, in freedom and the sharp contrast between this policy and the pressures and strings attached to relationships with the Soviets. The President also made important visits to South America, to Canada, and Mexico, as well as several visits to European capitals.

The leaders and peoples of nations of the free world now understand better than ever the sincerity of American policy favoring their independence and the willingness of America to support unconditionally their efforts to stay free and to do so in their own way, which may indeed be a non-Western way. As President Eisenhower said at the NATO meeting in December 1957: "There is a noble strategy of victory—not victory over any peoples, but victory for all peoples."

Interdependence

President Eisenhower's policies have been based on a belief that economic growth and interdependence are necessary conditions for stable and free nations.

Here are a number of things that the Republican administration has done in the last 7 years to promote that growth and interdependence:

1. It has given support to the reciprocal trade agreements program. At President Eisenhower's request, the Congress in 1958 extended this program for a period of 4 years, the longest single extension during the 25-year history of the program.

The value of American foreign trade (excluding military exports) in 1953 was $23.2 billion, and in 1959 was $29.3 billion.

2. In 1957 the Congress, at the request of the Republican administration, established the U.S. Development Loan Fund with a capitalization of $300 million. This was a step to meet the needs of less developed countries for loans on terms less rigorous than those offered from existing sources. In 1958 and 1959 the Congress appropriated $1.1 billion more for the Development Loan Fund. It was the first U.S. financial institution set up specifically to help less developed countries. In its short life the Fund has made a significant contribution to economic growth. Qualifying projects awaiting its review are far more numerous than the Fund can handle.

3. The United States has also moved vigorously to encourage the flow of private investment to less developed and other free nations. Under the Republican administration's investment guarantee program which provides insurance against noncommercial risks, such as inconvertibility of currency, expropriation, or war, nearly 40 nations have signed agreements and considerably over $200 million in insurance contracts have been issued.

The United States has negotiated and sought to negotiate treaties designed to create more favorable conditions for private investment abroad.

The Republican administration has commissioned two outstanding studies of means to encourage private investment and is currently considering measures to implement their recommendations.

We have encouraged and assisted the creation in foreign countries of development banks to make loans to private enterprise and of local productivity centers to render that enterprise more productive.

We encouraged the creation in 1956 of the International Finance Corporation, as an affiliate of the World Bank, to make investment in private enterprise abroad.

4. In August 1958 the President instructed the Secretary of the Treasury to propose to other members of the World Bank and the International Monetary Fund that the resources of these institutions be enlarged so that they could continue their effective work in promoting economic growth and monetary stability. As a result, the Governors of both institutions recommended that member governments increase their subscriptions to the Fund and Bank by 50 percent and 100 percent respectively.

In February 1959 the President asked the Congress to authorize $3.175 and $1.375 billion increases in the U.S. subscriptions to the Bank and Fund. This has been done.

5. The President also authorized the Secretary of the Treasury to discuss with other governments the possible establishment of an International Development Association, as an affiliate of the World Bank. These discussions were fruitful, and we may expect to see this agency in operation in the near future, helping to mobilize free world resources to meet the less developed countries' need for financing on flexible terms.

6. At the Republican administration's initiative, 18 European nations have joined Canada and the United States in preliminary steps to reconstitute the Organization for European Economic Cooperation. When the reconstituted OEEC is a reality, we should be able to collaborate more effectively in promoting sound economic growth in the free world and in mobilizing the resources of its industrialized members to help the newly developing lands.

7. The United States took the lead in proposing establishment of an institution to promote economic development in Latin America.

On April 9, 1959, the charter of a $1 billion Inter-American Bank was initiated in Washington. The ratification of this agreement by the United States and by all the other American states—except Cuba—has brought into being a sizable new source of funds for economic development loans to our good neighbors. The Bank's charter also provides for assisting in the development of managerial and technical skills, and the Bank will assist in social development projects where necessary.

8. In August 1958 the Republican administration offered the cooperation of the United States in the establishment of an Arab regional development financing program if the Middle Eastern states concerned were prepared to support such a venture. Exchanges of views among these states have taken place, and the initiative now lies with them.

9. A Common Market for Europe has long been officially supported by President Eisenhower, and in January 1959 the six-nation Common Market of Western Europe became a reality. Measures have also been taken to create an area of freer trade among seven other nations of Western Europe. In addition, Western European currencies have become more freely exchangeable and there is a strong movement for broader economic cooperation in Western Europe. The support of the United States played no small part in these accomplishments.

10. The United States has also moved to encourage and participate in the study of key raw material problems of particular concern to less developed countries. Through our good offices and on our initiative, the International Coffee Study Group was established in June 1958 to consider possible means of dealing with problems arising in international trade of coffee.

Through this study group the Mexico City Emergency Coffee Agreement was continued and expanded to consider the present imbalance in world coffee supply and demand. The United States at the ECOSOC meeting in July 1958 agreed also to become a member of the Commission on International Commodity Trade, which considers general problems relating to international trade in basic commodities.

11. On the initiative of the Republican administration an International Food for Peace Conference was held in May 1959 to discuss ways and means of utilizing wheat to relieve

hunger and to promote economic development among the less developed countries of the free world.

It was participated in by the five major wheat exporting countries. It established a Food for Peace Wheat Utilization Committee to consider specific problems, such as how to make more effective use of wheat in improving living standards, in raising nutritional levels, and in strengthening the economies of free countries. This committee met in June.

At the conclusion of the meeting the other wheat exporting countries expressed their willingness to cooperate to the fullest possible extent in carrying out the objectives of the President's food for peace program.

12. Parallel with these new initiatives, the Republican administration has continued to support the mutual security program, which provides economic and military aid to free countries around the world.

13. The administration has moved energetically and successfully toward eliminating our unfavorable balance of trade with other nations. At our urging, more than a dozen nations have removed trade restrictions on American goods, and several others have indicated an intention to take similar action.

In conclusion

The Republican administration's foreign policy rests on two simple propositions: We want peace, liberty, and well-being for ourselves; and we cannot be sure of peace, liberty, and well-being unless other nations also have them.

XXII

ACCOMPLISHMENTS OF THE EXPORT-IMPORT BANK DURING THE REPUBLICAN ADMINISTRATION, 1953–1960

(By U.S. Senator WALLACE F. BENNETT, of Utah)

The overall accomplishment of the Export-Import Bank of Washington during the 7½ years of the Republican administration should be viewed in terms of the Bank's purpose. The primary purpose of the Eximbank is to assist in the financing of U.S. exports through dollar loans abroad. With minor exceptions, each dollar lent abroad by the Bank is spent in this country in the form of a purchase from U.S. manufacturers, suppliers, and service companies.

The Bank pays interest on the money it borrows from the Treasury and lends abroad; the Bank also pays dividends to the Treasury on its $1 billion authorized capital. The earned reserves are deposited with the Treasury.

For the 7½ years of the Republican administration—January 1953 to May 31, 1960—the following statement summarizes the activities described above.

	In millions
Total dollar amount of loans authorized	$4,732.1
Total dollar repayments	2,758.8
Total dollar interest on loans (income)	733.4
Interest to Treasury on money borrowed	224.6
Dividends to Treasury on $1 billion authorized capital	157.6
Operating costs	12.3
Losses charged off	2.6
Added to reserves	336.3
Total reserves and surplus as of May 31, 1960	628.9

The Republican administration encompasses a period (1954–59) during which a concerted effort was made to increase not only the dollar amount of loans, but also the number of individual loans authorized. Results were particularly noticeable in the Latin American area, due to the fact that the volume of business in Europe had slackened somewhat because of favorable results of postwar reconstruction.

Latin America

	1950–54	1955–59	Percent increase
Loans	$1,023.4	$1,643.8	60.6
Credits	(102.0)	(614.0)	502.0
Disbursements	773.3	1,166.4	50.8
Repayments	219.4	604.0	175.3

On a worldwide basis, comparable evidence of gain can be shown. At the close of business December 31, 1952, the Eximbank had on its books 305 active credits for a total of $4,134.3 million; and at the close of business May 31, 1960, there were 1,133 active credits totaling $4,732.1 million. In the number of credits, this is an increase of over 300 percent. The small difference in the dollar amount is due to huge reconstruction credits for Europe that were still active. For the same period, the dollar volume of credits authorized but undisbursed on record December 31, 1952, was $600.3 million, and at the close of business May 31, 1960, was $1.5 billion.

Another area of significant gain is that of private capital participation in Eximbank loans. The Bank's statutory authority is specific about its status with regard to commercial financial institutions. The Eximbank is to complement and supplement private capital, not to compete with it. Accordingly, the Bank does not lend where private sources are readily available. The Bank also seeks and encourages private banks to enter into Eximbank transactions without recourse upon the Bank, the exporter, or the borrower.

Prior to 1952, commercial bank participations, without recourse on the borrower or the Export-Import Bank were negligible. From 1952 to the present date, 59 commercial banks have participated with the Export-Import Bank, and without recourse on it or the borrower to the extent of $256,718,000.

It is expected that in the future, and under the impetus of the Republican program for expanding U.S. exports, the Bank's role will be even greater, as will the part played by private financial institutions. It is to be hoped that life insurance companies, with their reservoirs of loanable funds, can be induced to play a larger part in the financing of foreign trade. There are some signs of thoughts in this direction by some of the larger companies in the insurance field.

The year 1960 has seen intense interest in the national balance-of-payments position with regard to world trade. The necessity for increasing U.S. exports prompted the President to advise the Congress on March 17 that the Government should help enlarge export opportunities. In the same message, the Eximbank was charged with the responsibility for issuing short-term political risk guarantees to American exporters.

The Eximbank placed a new short-term political risk guarantee program in operation on May 23. In this program, the Bank guarantees 90 percent of invoice value of exporter shipment against noncommercial losses, e.g., inconvertibility or nontransferability of foreign currencies, imposition of foreign laws or regulations, cancellation of import license, war and civil commotion, and expropriation of goods by foreign entities.

Since the Eximbank has no field establishments, a system was devised by which commercial banks across the country would act as agents for the Eximbank in the actual issue of the guarantees. An exporter, wherever he may be, has access to the guarantee through the banks without complicated negotiation with Washington. More than 100 commercial banks have signed to act as Eximbank agents to date, with more expected to sign. Several guarantees were issued during the first 2 weeks of operation.

In addition to devising the new short-term political risk guarantee, the Eximbank has modified its medium-term transaction formulas for exporter loans, and credits, with the aim of making them more workable and attractive to both the U.S. manufacturer and commercial banks.

The Eximbank has stepped up its activity in loans involving the purchase of U.S. aircraft and aviation facilities. The Bank has participated in U.S. sales, the invoice value of which was $428.9 million. The Bank loans in these transactions totalled $242.2 million for U.S. purchases by foreign flag and private carriers, with 63 percent of the latter amount occurring in the past 5 years. In addition, $30.9 million has been lent for airports and airport equipment abroad, almost all of it during the 7½ years of the Republican administration.

Typical loans of this sort made this current fiscal year show a global distribution in the Eximbank's assistance: $25.5 million to Australia for the flag line Quantas, for three jet liners plus modification of seven other jets already owned by Quantas; $20 million to Belgium for Sabena, five jets; $6.9 million to Brazil for Varig, two jets; $16 million to the Union of South Africa for three jets; and $14 million to Spain for Iberia, three jets.

(NOTE.—The above dollar amounts are not total cost of aircraft and related equipment, but rather the amount of Eximbank participation in total sale.)

The Eximbank has assisted the American farmer in selling his produce abroad. Cotton, wheat, and tobacco have been the principal agrarian commodities for which foreign sales have been financed. Of these, cotton has been the largest single commodity financed. In the Bank's 26-year history, over a billion dollars have been loaned for the purchase of U.S. cotton. In the 7½ years of the Republican administration, $524 million has been loaned for cotton exports. This amounts to roughly 50 percent of all cotton credits during the Bank's history.

In addition to cotton, tobacco, and grains, two noteworthy cattle loans, each for $5 million to the Government of Mexico, have resulted in sales of U.S. beef and dairy cattle for the establishment of Mexican herds.

To focus attention on the work of individual divisions and offices of the Eximbank, it should be noted that: (1) the Eximbank has a staff that is quite small in relation to the magnitude of its operations, numbering about 100 professional people in a total staff of 226; and (2) the contributions of individual divisions and offices are an integral part of each project or transaction, with the total effort of the Bank in each instance transcending and encompassing individual work areas. On the latter point, in a typical project of the first magnitude, findings of the Engineering Division with regard to engineering aspects and feasibility of the project would be incorporated in the staff study of the loan application. The same applies to the Economics Division which would study economic effect and economic feasibility, to the Legal Division, the Loan Division, the Private Capital Division, and the Office of the Treasurer. In this way, accomplishments of the departments of the Eximbank must be considered as units contributing to the Bank's overall progress.

Typical projects in which division and offices participated:

Peru: Toquepala copper mining project in which the Bank made the largest private single loan—$115 million to assist in opening a copper ore body in southern Peru; complete mining and processing installation to produce blister copper; started production February 1960 with the total cost of the enterprise $234 million.

Brazil: $37 million to assist in the financing of dam and hydroelectric installation of the Rio Grande River.

Mexico: $46.5 million to assist in financing integrated steel mill at Monterrey.

Japan: $43.4 million to assist in the expansion and modernization of three steel facilities—Fuji, Yawata, and Toyo Kohan.

Iran: $33.3 million to assist in the modernization of state railways.

Liberia: $15 million for the development and extension of 300 miles of highway.

In August 1954, the Export-Import Bank Act was amended to increase the lending authority of the Bank from $4.5 to $5 billion, to reestablish a bipartisan board of five directors, and to create an advisory committee.

It is felt that the advisory committee has been most successful in its operation. There are nine committee members, chosen from top-level representatives of industry, labor, commerce, finance, agriculture, and education. Each successive committee has been exemplary in its interest in Bank activities, has put forward constructive advice drawn on a wealth of experience, and has been extremely helpful in the shaping of Eximbank policy and practice.

In August 1957, the Export-Import Bank was authorized to make loans in foreign currencies available under section 104(e) of Public Law 480. In March 1960, the Eximbank announced its 100th foreign currency loan under Public Law 480. That loan brought the equivalent dollar value of these loans to $57.2 million, the hundred loans having been made in 16 countries.

In May 1958, the Bank's dollar-lending authority was increased to $7 billion to meet increasing demand for U.S. exporter assistance—another Republican-sponsored move to help American industry and labor.

XXIII

ACCOMPLISHMENTS OF THE FARMERS HOME ADMINISTRATION UNDER THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator GORDON ALLOTT, of Colorado)

The Farmers Home Administration, an agency of the U.S. Department of Agriculture, extends both short-term and long-term credit to American farm families, together with technical farm management assistance and guidance.

Such credit facilities enable farm families to improve and expand their operations wherever the financial resources of banks and other private lending agencies are not readily available to them. These loans are available only to those farmers who are unable to obtain credit from traditional lending institutions such as banks and cooperatives.

The Allott-Cooley bill to revise and simplify the entire authority of the Farmers Home Administration was approved this year by the House, after careful and thorough consideration and improvement by the House Agriculture Committee. Hearings have been held by the Senate Agriculture and Forestry Committee.

It is greatly to be hoped that this significant legislation will be enacted into law during the 86th Congress. It has been advocated strongly by, and developed with extensive help from, the Department of Agriculture and the Farmers Home Administration.

H.R. 11761 represents a 5-year evolution from the original bill with the same purpose first introduced by myself in 1956. It would establish a reasonable and organized authority for the Farmers Home Administration as a substitute for the complex hodgepodge of 35 statutes and 1,200 pages of regulations. It would allow the hard-pressed field personnel to provide more prompt, more effective, and more flexible assistance to the farmer in need of credit who is unable to obtain it from private sources.

This needed legislation is approved by the Republican administration, the House of Representatives, and the farmers. It would be a tragedy if, in the political confusion of the closing days of the session, the Democratic-controlled Senate should fail to endorse it.

In these past 7 years, the Republican administration has made the agricultural credit system more responsive to farmers' needs. In line with this objective, the Farm Credit Administration was given a new status of importance when it was made an independent agency of the Government.

In the past 7 years of the Republican administration, Farmers Home loans totaling approximately $2¼ billion have been made to and insured for deserving farm families.

All loans made and insured during fiscal 1960 by the Farmers Home Administration will total approximately $310 million, compared with $229 million in 1953. The following are contributing to this total:

1. Operating loans, provided to help farmers purchase equipment, livestock, feed, seed, and fertilizer, and to finance other farm and home expenses, total approximately $198 million in fiscal 1960. In 1953, the comparable figure was $130 million.

2. Farm ownership loans to develop family-type farms, to purchase such farms, to enlarge undersized farms, and to refinance certain debts amount to an estimated $43 million in fiscal 1960, as compared to $30 million in 1953.

3. Farm housing loans to build or repair farmhouses and other essential farm buildings total approximately $40 million in fiscal 1960, compared to $19 million 7 years ago.

4. The insured loan program has been greatly improved since 1953 and, despite money market conditions which make it difficult to obtain funds for this particular program, the volume of such loans since 1953 has averaged $30.4 million annually, compared to an average of $10.1 million per year in prior years.

In addition, loans amounting to $12 million are being made in those counties participating in the rural development program in 1960, thus helping the low-income farm families most in need of aid to strengthen and secure their farms and make them more efficient and profitable.

Emergency loans are also available in areas designated as having sustained a disaster such as drought or floods.

Soil and water conservation loans for farmstead and irrigation purposes have been broadened since 1954 to extend far beyond the boundaries of the original 17 Western States which previously had been the sole beneficiaries of this program.

In addition, in 1956, the Farmers Home Administration was authorized to make loans to local organizations to help them finance their share of the cost of developing small watersheds.

XXIV

MAJOR ACCOMPLISHMENTS OF THE GENERAL SERVICES ADMINISTRATION UNDER THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator WINSTON L. PROUTY, of Vermont)

Reorganization: Complete reorganization of GSA has been accomplished under the Republican administration. This reorganization resulted in closer and more efficient working relations between GSA's central office and its 10 regional offices as well as increased emphasis on the provision of real property, personal property, transportation and public utilities, and records management services to other Government agencies.

Employment: Despite substantial increases in activities and services rendered, total employment has been reduced from 29,141 in January 1953 to 27,722 at the end of May 1960.

Defense Materials Service

Stockpile objectives: Attainment of national stockpile objectives has been practically completed, and present emphasis is placed on proper management, preservation and security of an inventory in excess of $8 billion. GSA's Defense Materials Service has been completely reorganized to reflect this change in program direction, with a careful analysis having been completed for the purpose of (1) establishing long-range qualitative maintenance standards for all stockpile materials required for defense purposes, and (2) determining the ultimate disposal of those items in excess of stockpile objectives.

Strategic materials physical inventory: For the first time, the enormous task of taking a complete physical inventory of the 38 million tons of 100 different strategic materials at more than 200 storage locations was undertaken in late 1956 and will be completed in mid-1960. This included a complete verification of the book accounts and extensive improvements in the physical condition of stockpile materials resulting from the repackaging and repiling of over 5 million tons of materials.

Strategic materials contracts: Intensive review of existing contracts has resulted in important reduction in the Government's liability thereunder amounting, since July 1957, to $367,325,000.

Nicaro nickel plant: The expansion of the Government-owned nickel plant at Nicaro, Cuba, completed in 1957 with a saving of over $7 million from funds authorized, increased the production annual capacity from 30 to 54 million pounds, thus making it the second largest nickel producer in the free world. Production costs have been maintained at a favorable level, despite substantial increases in the cost of materials and labor. In 8 years, the plant has produced almost 275 million pounds and has demonstrated both the technical and economic feasibility of the operation. Nickel sales to industry in the past 10 months have reached an all-time high, notwithstanding the adverse effects of the steel strike. Having received no acceptable offer for the purchase of Nicaro, after formal advertising, further disposal efforts will be deferred pending improvement in the political situation in Cuba. However, the fact that the plant has been kept in operation, under very unfavorable conditions, during and subsequent to the Cuban revolution, is considered a substantial accomplishment.

Disposals of stockpile excesses: Stockpile excesses have been reduced during fiscal year 1960 by approximately $83 million worth of materials, including more than $58 million worth of rubber, approximately $8 million worth of hog bristles, $4½ million worth of coconut oil, $4 million worth of abaca cordage fiber, and various other materials.

Public Buildings Service

Construction program: A badly needed construction program for Federal office buildings throughout the country to provide adequate office space for the Federal establishment was inaugurated, following nationwide community surveys establishing the need therefor. Under this program, 32 buildings have been completed, 46 buildings are under construction, and an additional 28 are being designed for location on Government-owned sites or on sites being acquired. The repair and improvement of badly deteriorated Federal buildings has been put on a planned program basis. In addition, an air conditioning program has been inaugurated for Federal buildings, where climatic conditions warrant and, through fiscal year 1960, 26 percent of the required work has been programed and financed.

Nation's Capital: In Washington, D.C., a program looking toward the ultimate elimination of unsightly "tempo's" and the construction of new permanent Federal office buildings was inaugurated and is now well

under way. Since 1953, 17 separate temporary or obsolete buildings containing nearly three-quarter million square feet of space have been demolished in connection with the construction program.

Construction of the Department of State addition is 96 percent finished, with completion expected by November 1960. The cornerstone of the CIA building at Langley, Va., was laid on November 3, 1959, with completion of this building scheduled by the summer of 1961. Excavation for the new Museum of History and Technology of the Smithsonian Institution on a site formerly occupied by two World War II temporary buildings has been completed, and construction of the building is under way with completion scheduled for the spring of 1962.

Construction of Federal Office Building No. 6 on Independence Avenue is 38 percent finished, and completion is scheduled for June 1961. Sites have been acquired for Federal Office Buildings Nos. 7, 8, 9, and 10, and architectural plans are being prepared. A site has been tentatively selected for Federal Office Building No. 5. Funds for the construction of Federal Office Buildings Nos. 8, 9, and 10 have been requested in the budget for 1961, and these three buildings, when completed, will provide office space for approximately 7,000 employees, with resulting improvement in Government operating efficiency and the release of approximately 1.4 million square feet of leased and substandard Government-owned space.

Surplus disposal policies: In conjunction with the Bureau of the Budget, firm policies have been established under the Republican administration in connection with the utilization of excess and the disposal of surplus Government-owned real property. These policies have resulted in the liquidation of unneeded Government-owned real property, the restoration of a substantial number of valuable properties to local tax rolls, and a significant monetary return to the Government.

Surplus disposal program: Acceleration of a nationwide program of disposal of surplus real property has been emphasized. In addition to properties conveyed to public bodies and eligible institutions for various public purposes, including airport, park and recreational, education, health, and wildlife conservation under priority or price preference provisions of disposal laws, 1,430 properties have been sold to private enterprise at a selling price of more than $183,248,700.

Federal Supply Service

The General Services Administration operates a worldwide procurement and distribution system for common-use items; manages excess and surplus personal property of the Government as well as its motor vehicles; determines supply requirements and regulates procurement of personal property and nonpersonal services by Government agencies; and provides advice and assistance to civil agencies in improving and strengthening their internal supply systems.

Supply procurement and distribution: Procurement for other agencies of personal property and nonpersonal services through the GSA supply system has increased from $504 million in 1952 to approximately $840 million currently under the Republican administration. Some 60,000 line items of various commodities are being made available to all Federal agencies.

The volume of GSA supply depot transactions is reflected in the increase of line items shipped from approximately 1½ million in 1952 to over 4 million currently under the Republican administration. Improved management is demonstrated by the fact that total employment in stores operations actually declined during this period, while costs of operation per $100 of sales were reduced by almost 50 percent.

The quality of supplies, materials, and equipment purchased by GSA for other Government agencies has steadily improved under the Republican administration through introduction of modern and efficient quality control techniques.

Property management: In exercising its responsibility for promoting maximum utilization of excess personal property among Federal agencies, GSA has transferred excess Government-owned property to other Federal agencies for further use in the amount of some $864 million (at acquisition cost) since 1952. During the same period, donations of surplus personal property were approved to State agencies for educational, public health, and civil defense purposes in the amount of almost $2 billion.

Motor equipment management throughout the Government has been strengthened by the establishment of some 56 consolidated interagency motor pools containing over 16,800 vehicles, which provide motor vehicle services to Federal agencies at substantial savings. Over 5,000 fewer Government vehicles are utilized under this system than would have been required under individual agency management. In addition, action has been taken to improve the management, operation and safety practices of the total Federal fleet of over 211,000 vehicles, with combined savings of over $45 million annually resulting from the introduction of these improved management practices.

Supply management: GSA further unified and increased the effectiveness and economy of Government-wide methods and systems during the Republican administration by providing helpful guidance to other agencies in modern supply techniques, and by making some 80 studies of individual agency supply systems which greatly improved their effectiveness.

Uniform and efficient contracting and procurement policies and procedures have been developed and promulgated for all departments and agencies of the Federal Government through the establishment of the Federal Procurement Regulations System, which is being steadily expanded to provide a full body of codified regulations on this subject.

In collaboration with the Department of Defense, a joint effort has been proceeding toward development of a single, standard supply catalog. GSA has concentrated on items used primarily for civilian agencies. To date, over 192,000 civilian agency items have been identified in the Federal Catalog System. The number of specifications and standards developed to improve quality of commodities used by the Federal Government has also steadily increased.

National Archives and Records Service

Records management: A Government-wide paperwork management program was initiated in 1956, as recommended in 1955 by the Second Hoover Commission. Significant progress has been made in correspondence management. The consolidation of existing agency records centers under the GSA system of Federal records centers, as recommended in 1949 by the First Hoover Commission, was virtually completed. The holdings of records in these centers was expanded from 1,630,000 cubic feet in 1953 to 5,500,000 cubic feet in 1960.

Plans have been completed for the transfer to GSA on July 1 of the Department of Defense Military Personnel Records Center at St. Louis, Mo.

National Archives: The centralization in the National Archives of all valuable older records of agencies of all three branches of the Federal Government—executive, legislative, and judicial—was completed.

Public exhibits: Through an accelerated exhibits program begun in 1953, built around the display of the Constitution, Declaration of Independence, and Bill of Rights, the number of visitors to National Archives exhibit areas was more than doubled.

Presidential libraries and papers: A Presidential Libraries System was established under legislation approved in 1955. Under this system, GSA accepted and placed in operation the Harry S. Truman Library at Independence, Mo. The Dwight D. Eisenhower Library, under construction at Abilene, Kans., has been accepted by GSA and will begin operation early in 1961.

Publication was begun in 1958 of a new series of Presidential documents which are compiled, indexed, and published annually in book form under the title, "Public Papers of the Presidents."

Transportation and Public Utilities Service

Traffic surveys: A program of onsite surveys of freight traffic management and transportation methods in civilian executive agencies has been completed. The survey reports contained 253 recommendations. Of this total, 242 recommendations or 95 percent have been accepted by the organizations affected. A summary report entitled, "Freight Traffic Management in Civilian Agencies," and outlining areas for economy and improvements in agency transportation operations, has been released.

Agency assistance: Based on a need revealed by our traffic surveys, an informational handbook entitled "How To Prepare and Process U.S. Government Bills of Lading" was issued in November 1959. This booklet was designed to assist personnel in preparing and processing Government bills of lading more efficiently and economically; 22,500 copies have been purchased by industry and Government organizations through April 1960.

Transportation and public utility management savings: The traffic management program conducted by GSA resulted in a saving of $16.9 million in fiscal year 1959; and it is expected that savings for fiscal year 1960 will equal this amount.

A further saving, totaling $366,000 in fiscal year 1959, was obtained through the public utilities management program.

Action taken by GSA in connection with communication litigation has produced savings to the Government which now amount to $8 million per year, and it is expected this will grow to $15 million per year when the semi-automatic ground environment (SAGE) project is complete.

Business services program

GSA has an active broadscaled program to assist the businessman to achieve his maximum potential in doing business with the Government, with particular attention and emphasis given to the problems and interests of small business. Thirteen business service centers and many subcenters, located in principal cities throughout the country, are daily engaged in informing small firms of the market which GSA offers for their products. The centers also provide necessary bidding documents and specifications, and counsel and advise small firms in their efforts to participate in GSA procurement and disposal programs. In the calendar years 1953 through 1959, of GSA's procurement of $3,665,676,592, there was awarded to small business $1,956,067,984, equivalent to 53.4 percent.

XXV

ACCOMPLISHMENTS OF THE FEDERAL POWER COMMISSION DURING THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator NORRIS COTTON, of New Hampshire)

Today, electric power ranks first and natural gas fifth in size among the industries of the United States. The Federal Power Commission's activities are closely interrelated with the development of the Nation's vast hydroelectric power resources, its great electric utility growth, and the mushrooming spread of the relatively young interstate natural gas industry.

The FPC has a basic responsibility of protecting the public interest through its

jurisdiction over interstate transmission and sale at wholesale of natural gas and electric power moving in interstate commerce, the accounts of these companies, the construction of interstate pipeline facilities, and the licensing of non-Federal hydroelectric projects. Through its regulatory activities, the Commission protects the consumer's interest and assures a healthy climate for industry in order to promote the expansion necessary to meet the Nation's rising energy needs.

The Commission's regulatory responsibilities have increased tremendously during the last 7½ years under the Republican administration because there has been phenomenal growth of the electric power and natural gas industries. The FPC, which regulates the interstate aspects of these two great industries, has carried on a continuous searching examination of its internal operations, organizations, and procedures to meet these expanding obligations.

The Commission has continued to make available comprehensive statistics and other operating, financial, and cost data. The value of this service is evidenced by its widespread use by the industry, financial organizations, investors, the general public, and the Congress. In addition, through the Commission's prescribed accounting and reporting requirements, the Commission has exerted powerful influence in matching financial soundness and protection of investors with the unprecedented growth of the industries.

A. Electric power: During the last 7½ years the electric power industry has experienced vigorous growth.

Beginning in 1953, the installed generating capacity of the Nation's electric utility generating plants was 82.2 million kilowatts, compared with 159.7 million kilowatts as of April 30, 1960. For the years 1952 and 1959, respectively, electric power production rose from 399 billion kilowatt-hours to more than 709 billion kilowatt-hours, an increase of about 78 percent.

Increases in revenues and facility investment paralleled the increases in generating capacity and production.

Without any appreciable increase in rates, the annual revenues of the electric power industry from ultimate consumers in 1959 amounted to more than $10.5 billion, compared with about $6.1 billion for 1952.

Plant investment in this same period rose from $30 billion at the end of 1952 to $58 billion at the end of 1959. Selected annual statistics for the electric power industry are shown in appendix A.

The Federal Power Commission since 1953 has issued licenses for non-Federal hydroelectric projects of unprecedented size and importance in various regions of the country.

B. Natural gas industry: Advances in the natural gas pipeline industry have been equally impressive. The interstate transmission of gas for resale has risen from about 4.2 trillion cubic feet in 1952 to approximately 7.7 trillion in 1959, an increase of 83 percent.

Natural gas pipeline revenues from sales to other gas utilities for resale were nearly $2.5 billion in 1959, compared with about $908 million in 1952. Net plant investment growth paralleled the increases in transmission and revenues, rising from approximately $3.4 billion in 1952 to more than $6.8 billion in 1959. Selected annual statistics for the natural gas industry are shown in appendix C.

During the past 7½ years, natural gas has become available in many States and regions which previously were without this service. At the beginning of 1953 natural gas was available in 41 States, while it now moves into all but 3 of the 50 States, the exceptions being Vermont, Maine, and Hawaii. The most notable examples of recent service extensions include pipelines into the Pacific Northwest and down the Florida Peninsula.

This new service required great extensions of the already giant network of interstate lines, through the issuance of certificates by the FPC.

The approval and issuance of these certificates added nearly 46,000 miles of new gas transmission lines and other facilities valued at approximately $4.7 billion.

These actions have facilitated expansion of the entire industry, and between 1952 and 1959 the number of natural gas customers increased from 18.4 million to 29.9 million. Appendix D gives statistics on certificates authorizing construction and operation of pipeline facilities since January 1, 1953.

To help meet the mounting demand for natural gas service in markets far distant from producing areas, the FPC also encouraged the development and expansion of underground storage facilities by interstate pipelines.

By this means, the companies are able to pump large quantities of natural gas into storage areas close to the using markets during the summer months, when much production and transmission capacity otherwise would lie idle.

Withdrawal of the gas during the cold winter months when demands exceed pipeline capacity enables consumers to be served without large additions to pipeline capacities.

Developed underground storage capacity is now estimated at about 2.9 trillion cubic feet compared with 1.7 trillion cubic feet at the beginning of 1953.

C. Improvement in procedures: To expedite the Commission's operations in considering formal matters, its rules of practice and procedure, and its regulations under both the Natural Gas and Power Acts are under constant study and review to improve their effectiveness.

Some major improvements, for example, involve: (1) a revised uniform system of accounts for gas and electric utilities to provide reclassification of utilities by size, to prescribe accounts for nuclear electric powerplant operations, and to reduce the number of expense accounts for nuclear electric powerplant operations, and to reduce the number of expense accounts classifications, etc.; (2) prescribing by rule the greater use of conferences in connection with hearings to provide for discussion of matters to be heard, identifying controversial issues, and exploring the possibilities for agreement; (3) a revised procedure for making natural gas rates on file in the Commission, but under suspension, effective by permitting the applicant simultaneously to file a motion to place rates in effect and a bond or an agreement and undertaking to refund any amounts later found by the Commission to be excessive; (4) combining when possible into one hearing noncontested applications for natural gas certificates, thereby reducing the number of Commission actions, and providing a faster response to industry needs.

An improvement in prospect is represented by the recommended legislation pertaining to delegation of certain substantive authority to one or more Commissioners or to Commission staff. Enactment of this legislation will permit further streamlining of Commission procedures and lighten the workload on an already overburdened Commission.

D. Administrative organization: Major changes have been effected in the Commission's organization beginning with the appointment in 1954 of an Executive Director empowered to exercise the administrative and executive direction vested in the Commission's Chairman. This delegation permitted the Chairman to devote more of his time to the heavy load of policy and substantive matters confronting the Commission.

At the same time, concentrating top management responsibility in an Executive Director facilitated uniform program planning, direction, coordination, and control essential to better gearing the Commission activity in coping with the large and increasing number of natural gas and electric power matters.

XXVI

ACCOMPLISHMENTS OF THE FEDERAL TRADE COMMISSION UNDER THE REPUBLICAN ADMINISTRATION

(By U.S. Senator KENNETH B. KEATING, of New York)

The Federal Trade Commission performs a job in the field of business regulation which is of paramount significance, not only to the business community generally, but particularly to small business and the consuming public. This Commission promotes fair play in business by attacking practices which are monopolistic, deceptive, or otherwise unfair. Some of the highlights of its achievements are:

1. During the current fiscal year, which will be the Commission's first complete year under Chairman Earl W. Kintner, the Commission has already instituted more corrective proceedings than at any time in the history of the agency since it was established in 1915. The fiscal year has not, as yet, been completed, but a new record has already been set.

2. Fiscal years 1958, 1959, and 1960 are the first three complete fiscal years during which the Commission has consisted entirely of members appointed by President Eisenhower. It is interesting to compare the record of the past three full fiscal years with that of fiscal years 1950, 1951, and 1952, when the Commission last consisted entirely of appointees under the previous administration:

Fiscal year	Employees	Antimonopoly—		Antideceptive—	
		Complaints	Orders	Complaints	Orders
1950	654	27	16	97	63
1951	684	29	23	80	98
1952	672	29	24	75	108
1958	738	86	46	270	235
1959	732	80	64	272	276
1960 (to date)	751	118	36	318	282

3. Note from the foregoing that the complaints issued during this current incomplete fiscal year alone, in both the antimonopoly field and the antideceptive field, exceed the total issued for the last 3 years put together under the previous administration. Note also that this volume of work has more than trebled with only a very slight increase in the number of employees, even though the agency took on the added duties of administering the Fur Products Labeling Act, which became effective shortly before the change of administration, the Flammable Fabrics Act, and the Textile Fiber Products Identification Act.

4. Notwithstanding the fact that the workload so sharply increased, the handling of matters has, at the same time, been substantially speeded up, as indicated by the following tables giving comparative statistics for the age of cases pending in litigation in 1952 and in 1960:

	Antimonopoly		Antideceptive	
	1952	1960	1952	1960
Pending—number	85	182	127	233
Under 2 years old—percent	45	74	57	91
2 to 6 years old—percent	34	21	23	8
Over 6 years old—percent	21	5	20	1

5. When the first chairman appointed by the new administration took office on April 1, 1953, he discovered that 42 formal briefed and argued cases had been waiting decision of the Commission for over 30 days. Ten had been assigned to a Commissioner for report in 1953, 27 in 1952, and 5 in 1951 (3 of these on January 5, 1951). No similar problem exists today; the Commission is keeping current in its decisional work.

6. One of the most important laws enforced by the Commission is section 7 of the Clayton Act, as amended in 1950, known as the Anti-Merger Act. It proscribes mergers of corporations in interstate commerce where the effect may be substantially to lessen competition or a tendence toward monopoly. Although the law was amended in 1950 to cover acquisitions of assets, the previous administration gave it only token enforcement, instituting only one proceeding. Under the current administration, corporate mergers have been the subject of an intensive economic study and report, and 36 proceedings have been instituted.

7. The Commission normally effects corrective action in formal proceedings through the issuance of an order to cease and desist. Of course, unless such orders are obeyed, they serve little purpose. Not until the present administration has there been any program for the systematic checking of compliance with outstanding past cease and desist orders. While the purpose of the current program is primarily to obtain compliance, it has also resulted in a marked increase in the institution of civil penalty proceedings against violators where necessary. Since 1953, 81 cases have been certified to the Department of Justice for civil penalty proceedings, and judgments of over a quarter of a million dollars obtained.

8. The Commission's basic job is to get people to abide by the laws it administers. The current vigorous enforcement program has been accompanied by a similar intensified effort to obtain voluntary compliance wherever possible. Recently, the Commission has undertaken the issuance of guides dealing with various kinds of practices, in order better to inform the business community of what is required to comply with the law. These have included:

Cigarette advertising guides, September 1955.

Tire advertising guides, May 1958.

Guides against deceptive pricing, October 1958.

Guides against bait advertising, November 1959.

Guides against deceptive advertising of guarantees, April 1960.

Guides under sections 2 (d) and (e) of the Clayton Act, as amended by the Robinson-Patman Act, June 1960.

The last set of guides mentioned represents the first time that an effort has ever been made to spell out in simple language for the guidance of the businessman what the law requires of him in an important segment of the antitrust field.

9. Notwithstanding the fact that the Commission's investigational subpena powers have been spelled out in the law since 1914, it was not until the current vigorous enforcement program was begun that the extent of these powers was litigated through the courts. It has now been established that the Commission may subpena records in the investigation of Clayton Act cases, and also subpena records of those not under investigation themselves. *F.T.C.* v. *Tuttle* (C.A. 2, 1957) 244 F. 2d 605, cert. den. (1957), 354 U.S. 925.

10. Another example of the way in which the Commission is carrying out its responsibilities through vigorous use of its enforcement powers is the procedure it is now developing whereby its authority to require reports from corporations is used in the investigation of cases involving possible law violation. This procedure enables the Commission not only to speed up investigations, but also to investigate practices of competitors in an industry on a broad scale simultaneously, and thereby avoid to a large extent the necessity of singling out a few industry members to their competitive detriment. This is another example of the way in which the current Commission is constantly trying new methods so as better to discharge its statutory responsibilities.

11. Last December, more than 50 representatives of major civic, professional, and welfare organizations met with top Commission personnel for a 2-day Conference on Public Deception. This conference represented a major forward step educating and alerting the buying public about tricky false advertising practicing procedures and other tricky selling methods.

12. Recently, when attention was invited to the practice of giving payola in the broadcast field, the Commission acted promptly and effectively. Already, 85 complaints and 38 orders to cease and desist have been issued against record manufacturers and distributors.

Thus, in this agency, we see an outstanding example of one which, during the past 7½ years, has done more to carry out the powers Congress has given it to protect the competitive system than at any time in its history. Congress set up the Federal Trade Commission as an administrative agency, to handle problems in its field in several ways. It is doing so. It is telling the businessman what is expected of him. It is advising the consumer how to protect himself. It is enforcing the laws entrusted to it by Congress as it has never done before. It has speeded up its work. And, it is doing three times the job it did just 10 years ago, not with three times the people, not with two times the people, but with an almost token personnel increase of barely over 10 percent. Therefore, it is readily understandable why Mr. Henry Bison, Jr., General Counsel of the National Association of Retail Grocers of the United States, stated at their 61st annual convention:

"The Commission has certainly shown great vigor and spirit during the past year. It is the outstanding Federal regulatory commission in Washington, and provides a good example of the public service which an administrative agency is uniquely suited to perform. All five members of the Commission deserve the acclaim of the food industry. And we must never forget the many able and dedicated members of its staff."

XXVII

THE STABILITY OF THE DOLLAR; THE TAX REDUCTION RECORD; THE BUDGET AND DEBT MANAGEMENT RECORD; AND THE ADVANCES MADE BY THE TREASURY DEPARTMENT DURING THE REPUBLICAN ADMINISTRATION, 1953–1960

(By U.S. Senator STYLES BRIDGES, of New Hampshire, senior Republican member of the Senate Appropriations Committee and chairman of the Senate Republican policy committee)

Stability of the dollar

When the Republican administration took office in January 1953 it found that the dollar had lost almost half of its purchasing power since 1939.

The consumer's dollar in January 1953 was worth only 52 cents in terms of the food, clothing, shelter, and other items it would buy compared to 1939.

During the past seven years the value of the dollar has decreased by about 5 cents as contrasted with the 48-cent loss in the preceding 14 years. Furthermore, there has been no appreciable change in the value of the dollar during the last year.

Inflation acts like a special tax which hits hardest widows and orphans, retired persons, and working people with fixed incomes.

The relative stabilization of the purchasing power of the dollar during the Republican administration has, in effect, saved these groups from such a special tax. Financial stability has been achieved simultaneously with record-high levels of personal income and consumer spending. The highest standard of living in American history has thus been reached.

Tax reduction

The 1954 tax reduction during the Republican administration, amounting to $7.4 billion was the largest tax cut in history.

The largest item in the tax reduction program was a cut of $3 billion in individual income taxes.

Individuals also shared in the savings from the excise tax reductions and in the benefits provided in the tax revision law of 1954. Of the $7.4 billion returned to taxpayers, tax savings of approximate $4.6 billion went to individuals and $2.8 billion to corporations.

Individuals received:	
Individual income tax savings	$3,000,000,000
Savings in excise tax cuts	800,000,000
Tax revision law savings	800,000,000
Corporations received:	
Excise profits tax termination	2,000,000,000
Share in excise tax cuts	200,000,000
Tax revision law savings	600,000,000

The percentage distribution of the $7.4 billion was 62.2 percent to individuals and 37.8 percent to corporations.

The reduction in individual income taxes was about 10 percent for the lowest and middle income brackets. It was only slightly more than 1 percent in the top brackets.

Subsequent to 1954, the administration opposed revenue-losing measures because of the need of revenues to balance the budget.

However, as part of the farm program, provision was made for refund of the excise tax on gasoline used on a farm.

These refunds amounted to $74 million in the fiscal year 1958 and $79 million in the fiscal year 1959.

In addition, between 1955 and 1960, a number of excise tax changes were enacted which in the aggregate reduced excises by about $700 million. Most of this reduction, over $500 million, resulted from repeal in 1958 of the excises on transportation of property and oil by pipeline. Revisions in the admissions tax in 1956 and 1958 reduced revenues by approximately $80 million, and a reduction of the cabaret tax in 1960 decreased revenues by $20 million.

A balanced budget

The Government has continually directed its efforts toward balancing the Federal budget.

This is an accomplishment to which the Republican administration has been pledged from the beginning.

For the individual it is linked directly with stability in the cost of living, in employment, and in earnings.

It puts a sound floor under the Nation's economy.

It inspires the public confidence that is essential to continued economic expansion and sustained prosperity.

It is a convincing demonstration to those nations of the world who have a growing stake in a continuing sound American economy that we are conducting our fiscal affairs in a responsible manner.

Budget surpluses have been achieved in 3 of the last 6 fiscal years and despite the recession engendered deficits of 1958 and 1959, a modest surplus was realized in the fiscal year 1960, and a surplus of $4.2 billion is projected for fiscal 1961 under the President's program.

Tax revision

The tax revision law enacted in 1954 provided benefits for every American by remov-

ing hardships on millions of individual taxpayers, effecting the simplification and clarification of our earlier tax laws, closing some loopholes, and reducing some unnecessary restraints on business.

Tax pressures and injustices were eased by the new code for such groups as working mothers, parents of children who are helping pay their way through schools, retired people, families with heavy medical expenses, farmers in need of new equipment, people with sick and accident policies, persons with nonrelative dependents, farmers engaged in soil and water conservation, and many others.

This code rearranged the tax burden so as to make it easier for the economy to move forward. The goal was to improve the laws so as to help the economy to grow and so create more and better jobs and better living for everyone. Provisions for more liberal depreciation allowances, and in a small measure offering relief from the double taxation of dividends, helped accomplish this.

An important development pushed by Republicans was the Technical Amendments Act of 1958 (Public Law 85–859, approved September 2, 1958).

This measure strengthened the revenue system by closing loopholes and by foreclosing unintended benefits, most of which were the result of carrying over provisions of the 1939 code into the 1954 code.

This act also removed hardships which had previously existed in the tax law.

In addition, the Small Business Tax Revision Act of 1958, which was incorporated in Public Law 85–859, provided substantial tax relief for small business.

Among the provisions aiding small business were: more liberal loss deductions in certain cases involving small business corporations, extension of the net operating loss carryback, more liberal depreciation allowances, more time to pay estate taxes attributable to investment in closely held business enterprises, and an increase in the amount of earnings that a small business may accumulate without being subject to the tax on improper accumulation of surplus.

Besides these broad tax acts there have been a number of specific adjustments in the tax law to correct inequities and provide limited relief. For example, in 1960 the 3-percent limitation was removed with respect to medical expenses incurred by a taxpayer for the care of a dependent parent who is 65 years of age or over, thus allowing the deduction of the first dollar of these expenses.

Further progress was made toward tax simplification. The card return form 1040A was revised in 1958 to permit its use by employees with less than $10,000 of income (rather than $5,000). As a result of this and other changes, as many as 31 million individuals can now qualify to use this simple tax return as compared with 14 million who filed it for 1957. A new income tax return form 1040W, was introduced in 1959 to serve the needs of individual income taxpayers not eligible to use punchcard form 1040A, but whose affairs do not require all the detail specified on regular form 1040. The new form may be used by taxpayers whose incomes consist of salaries and wages regardless of amount, and not more than $200 of dividends and interest, and no other items of income.

A concerted effort was made to expedite the completion of regulations to simplify and increase understanding of the tax law. In this connection, a new regulation on travel expenses was developed which relieves employees who account to their employer for their business travel expenses from reporting such expenses in their individual tax returns. Another regulation permits teachers to deduct educational expenses if their purpose is to update and expand knowledge of the subject taught, to learn improved teaching methods, or otherwise improve teaching effectiveness.

The Excise Tax Technical Changes Act of 1958 revised many excise provisions. Because of lack of time, excises were not given full consideration during the development of the new Internal Revenue Code in 1954. The 1958 act was designed to correct inequities and disparities of a technical nature and was not concerned with the general question of excise tax rates. Major revisions were made in the terminology of the taxes on communications, the method of computing the stamp taxes on stocks, the statutes relating to distilled spirits, and the provisions relating to credits and refunds.

In recognition of the need for a permanent and equitable method of taxation of life insurance companies, the Secretary of the Treasury, in April 1958, sent to the House Ways and Means Committee suggested approaches to the long-range solution of this problem. These suggestions were incorporated in the Life Insurance Company Income Tax Act of 1959, signed into law by the President on June 25, 1959.

To strengthen our Federal system of Government, the Republican administration recommended the enactment of proposals made by the Joint Federal-State Action Committee which called for the transfer of responsibility for certain functions from the Federal Government to the States and the relinquishment of a portion of certain Federal taxes to assist the States in financing these responsibilities.

As the budget permits, additional reforms will be undertaken to increase the fairness of the tax system, to reduce the tax restraints on incentives to work and invest, and wherever feasible to simplify the tax laws. The Treasury Department is making a study of various possible tax adjustments and is cooperating with the House Ways and Means Committee in developing plans for an inquiry into the opportunities for constructive reform of the Federal tax system.

Enrollment to practice before the Revenue Service

New Treasury programs have been instituted to assist taxpayers in their dealings with the Revenue Service. The almost exclusionary type of examination required for applicants for enrollment to practice before the Revenue Service who were not lawyers, certified public accountants or former Service employees was abandoned and a new realistic examination prepared.

Another change will permit the many small taxpayers who have their returns prepared by people who are not lawyers or CPA's to have the preparer represent the taxpayer before examining officers and revenue agents.

These changes will make available to taxpayers a greater number of well-qualified people to represent them at any level of the Service and will also permit the preparers of returns to assist taxpayers in resolving their unusually minor problems with the Service.

Debt management

Debt management policies of the Treasury Department under the Republicans have been keyed to the administration's objective of promoting high employment, rising production, and a stable dollar.

Financings have been designed to tie in with Federal Reserve System actions to keep the supply of money and credit in line with the needs of the country. In addition, the administration has sought by numerous means to distribute the debt more widely among the people.

Since January of 1953 about $50 billion of marketable bonds running 5 years or more to maturity have been sold, in contrast to only $5 billion in the previous 6 years. This has prevented a further erosion in the average length of the debt.

The Treasury has instituted a number of technical improvements designed to facilitate its financing operations. The pricing of new issues at a slight premium or discount has enabled the Treasury to attune its offerings more closely to the market and consequently to get the best deal at the cheapest cost to the Government, consistent with other debt management objectives.

The Treasury has extended the auction method of selling securities to include 6-month bills, and has extended this principle to 1-year bills maturing on a regular basis four times a year. The auction method puts the burden of pricing on those who participate in the bidding and reduces the uncertainty and unsettlement in the market that tends to arise when the Treasury sells issues at a fixed price.

The Treasury has also taken steps to routinize its other short-term debt operations by concentrating these short-term maturities as much as possible in mid-February, May, August, and November, and to even up, as far as possible, the short-term debt coming due during each of these four dates. This is helping to assure a smoother operation in rolling over these maturities. These technical improvements in the short-term area will also be helpful in setting the stage for longer term financing.

In the 85th session of Congress the Treasury requested legislation which would have provided:

1. Removal of the 3.26-percent interest ceiling on savings bonds which, together with other changes, would permit the Treasury to go forward with a reinvigorated savings bond program.

2. Removal of the 4¼-percent interest rate ceiling on new Treasury bond issues—an imperative need to enable the Treasury to avoid an excess of short-term financing.

3. Technical amendments designed to improve the management of the public debt, foremost being a provision for the deferral of tax gains or losses by participants in advance refunding operations in which holders of Treasury securities (in advance of maturity) are offered securities with longer maturities in exchange.

The legislation in its final form enabled the Treasury to increase the yields on series E and H savings bonds to 3¾ percent retroactive to June 1, 1959. As a result the savings bond sales and redemption picture has improved measurably, easing the problem of maintaining a widespread distribution of an important segment of the public debt in the hands of millions of small savers.

The provision for deferral of tax gains and losses in advance refunding operations was granted by Congress and in June 1960 the Treasury offered holders of the 2½ percent bonds of 1961 an opportunity to exchange a portion of their holdings for a 4-year note or an 8-year bond. Over $4 billion of the $11 billion outstanding 2½-percent bonds were exchanged for the new securities, mostly for the 4-year note. This, of course, significantly reduces the future problem of refunding the large 2½-percent bond in November 1961 and is an additional step toward the objective of improving the maturity structure of the marketable public debt.

It is most unfortunate that the Democratic-controlled Congress failed to take action on the requested removal of the 4¼-percent interest rate ceiling on new Treasury bond issues and continuation of this arbitrary restriction is unjustifiable. The Treasury will continue to press for the flexibility necessary to handle the Government's financial affairs in a sound manner.

International financial arrangements

The Secretary of the Treasury is Chairman of the National Advisory Council on International Monetary and Financial Problems, which coordinates the policies and operations of the U.S. representatives on international financial institutions and the international financial policies and operations of U.S. Government agencies, including the

Export-Import Bank, the International Cooperation Administration, the Development Loan Fund, and other agencies involved in foreign lending. The Secretary of the Treasury is also U.S. Governor of the International Monetary Fund, the International Bank for Reconstruction and Development, and the International Finance Corporation.

The Treasury Department played the major role in carrying out the President's recommendation that the resources of the International Bank for Reconstruction and Development and the International Monetary Fund be increased by substantial amounts.

The purpose of the increases is to enable the two institutions to continue to carry forward in the years ahead the constructive policies that they have pursued during the first 13 years of their existence.

In June 1959 the President signed the legislation authorizing U.S. participation in the increases, and the Treasury Department promptly took steps to make the required payments. By September 1959, a sufficient number of countries had signed their approval of the increases to meet the minimum amounts required under the terms of the proposal. This forward-looking step in the international field thus has become a reality.

The Treasury has take part in major financial negotiations and consultations with a number of countries, including the United Kingdom at the time of the Suez crisis in 1956 and the establishment of nonresident convertibility in 1958. Other discussions were held with the Federal Republic of Germany, France on various occasions, Turkey, Argentina, Brazil, India, and several others.

The Treasury Department of the Republican administration took a leading part in developing a plan for, and played a major role in, negotiations for the establishment of the Inter-American Development Bank with the 21 American Republics as members. The charter for the proposed Bank was initialed in April 1959, and the Treasury Department bore the main responsibility for obtaining legislation providing for U.S. membership. The President signed the required legislation on September 1, 1959.

All American Republics except Cuba have taken similar steps and accepted membership. The Bank has elected a president, directors, and principal officers and will begin operations on October 1, 1960.

The existence of the Bank will further affirm the deep interest of the United States in its economic relations with the Republics of the Western Hemisphere.

The Treasury has made and renewed exchange agreements with a number of Latin American countries to assist them in keeping their currencies in orderly relations with the dollar and in maintaining their exchange systems free from restrictions, generally in cooperation with the International Monetary Fund.

Most recently the Secretary of the Treasury has vigorously pressed forward the proposal to create a new multilateral lending organization, to be known as the International Development Association.

This organization would be an affiliate of the International Bank and would be authorized to make loans for the economic development of less developed areas on terms more flexible than those which the International Bank can provide.

The institution will provide for the cooperative association of the industrial countries of the free world with the United States in an institution devoted to development lending on flexible terms. In addition, the International Development Association may provide an opportunity for the utilization of some of the foreign currencies derived from oversea programs of the United States. The National Advisory Council, in August 1959, reported favorably to the Congress on the establishment of such an organization. At the annual meeting of the Governors of the International Bank, in September 1959, the Secretary, as U.S. Governor, proposed a resolution calling upon the Executive Directors of the International Bank to formulate Articles of Agreement for an International Development Association. This resolution was unanimously adopted by the Board of Governors, and legislation providing for U.S. membership is being considered in the Congress.

Through the measures noted above the United States has again demonstrated a high degree of effective leadership in the international financial field.

Management improvements

Constant attention to ways in which the Treasury's work can be performed more efficiently and economically has made it possible to reduce the number of civilian personnel in the Department from 87,800 in January 1953 to 74,200 in January 1960, a reduction of 13,600 employees, or 16 percent. At the same time, workload figures in most bureaus have increased significantly. For example, the number of checks issued has increased by 50 percent, the number of checks paid by 30 percent, the number of persons clearing customs by 25 percent, the number of regular Treasury securities issued by over 100 percent, the number of carriers entering the United States by 35 percent, and the number of coins manufactured by 55 percent.

During the first full fiscal year after the Republican administration took office, almost $21 million was saved as a result of immediate economy measures taken. When initial economy efforts lagged, the Secretary gave personal leadership to a search for economies throughout the Department which gave impetus to the Department's regular efforts to improve management. The Department's management improvement efforts under the present administration have resulted in total tangible annual savings of $74.5 million.

Many of the economies resulted in direct improvements in services to the public, such as the following:

1. Goods in world trade move through the American customs with less difficulty and less delay. A huge backlog of unliquidated entries has been substantially reduced. Redtape has been cut on merchandise classification and duty rate determination. Prompt determination of duties on imports has been made possible, with the determinations based on current prices in our foreign trade.

2. Customs declaration forms for the individual passenger have been greatly simplified and continued improvements have been made in income tax forms.

3. Tax administration has been greatly improved by prompt settlement of tax disputes.

Internal operations have been greatly simplified and speeded up by organizational realinements and the decentralization of functions, by the continued modernization and mechanization of procedures, and by increased attention to the recruitment and training of personnel of the highest type. A few examples of these improvements follow:

1. The number of supervisory regional offices of the Internal Revenue Service was reduced from 17 to 9.

2. The use of electronic equipment for paying and reconciling Government checks, and for processing the redemption of savings bonds will save approximately $4 million on a governmentwide basis.

3. Widespread technological improvements have been made in the manufacture of currency and coins, such as the installation of eight new sheet-fed rotary intaglio presses to print currency at the Bureau of Engraving and Printing with savings of $1.8 million.

4. Improved audit and collection procedures in the Internal Revenue Service have resulted in increased revenue collections.

5. The Internal Revenue Service is collecting Federal liquor and tobacco taxes by means of returns instead of by sale of tax stamps with expected annual savings of $1.2 million.

6. The Federal Boating Act of 1958 is designed to promote boating safety in the United States. It requires the numbering for indentification of all motor propelled boats and gives the U.S. Coast Guard civil penalty authority in addition to its present criminal penalty authority for reckless operation of motorboats. Cost of the program is expected to be met by fees to be paid for numbering certificates to be issued to boat owners. The number of pleasure boats in operation is estimated to be increasing by about 500,000 a year since 1947 to a total of over 8 million in 1959.

As the senior Republican Member in the Senate I am proud of the great progress and advancement made on behalf of the American people by the Treasury Department under the Republican administration.

XXVIII

LINCOLN'S PRINCIPLES AND THE REPUBLICAN PARTY CAN BEST LEAD THE NATION IN THE 1960'S

(By U.S. Senator LEVERETT SALTONSTALL, of Massachusetts)

The Republican Party is best equipped to lead the United States through the promise and peril of the decade of the 1960's. The essential values implanted in our party by Abraham Lincoln qualify it to face and meet the major challenges of the new decade.

Lincoln stands out in history because of his courage, humanity, and profound insight into the great moral problems of his times. These are the characteristics he so firmly rooted in the Grand Old Party.

Population explosions, huge industrial and urban expansion, revolutions in space-age technology, an ever-growing government with an ever burgeoning budget, and the constant threat of a giant, arrogant, inhumanly efficient totalitarian state characterize our present world.

The task of protecting human freedom and advancing human welfare is more complex, more sophisticated in the 1960's than it was in the 1860's. Yet the same fundamental principles of leadership needed in America 100 hundred years ago are in demand today. I believe that the Republican Party will again answer the call.

Eight years of profound and durable leadership

The accomplishments of the Eisenhower administration in the field of international relations, human affairs, and economic policy during the past 8 years are profound and durable.

The present Republican leadership established a firm but flexible foreign policy with its stands at Lebanon, Taiwan, and Berlin, its decision at Suez, the "atoms for peace" proposal, cooperative help for the underdeveloped areas, and dynamic efforts in person-to-person diplomacy.

It maintained a powerful military establishment, initiated the Nation's first missile program, and spent over five times as much money on scientific research than did the preceding administration.

It enacted the first civil rights legislation in 80 years, and strove tirelessly to stimulate the initiative of the individual in our overorganized society.

The Eisenhower administration rejected the something-for-nothing and credit-card-economy philosophies in fiscal affairs, and launched a crucial fight against inflation—looking forward to the opportunities and obligations of future generations.

However, such progress is now only significant as a solid foundation for what we build in the future—as Lincoln once said: "The struggle of today is not altogether of today—it is for a vast future also."

To advance freedom and insure peace

These are the three great challenges of the 1960's:

1. The Sino-Soviet threat—the challenge for world peace and security with justice.

2. Human freedom—the challenge for equal rights, individual self-reliance, and betterment for all men.

3. Economic strength—the challenge for growth and stability with fiscal integrity.

The concept of peace and prosperity is taken seriously by the Republican Party.

Peace must be for all men before it can be insured for any men. Thus, we move beyond our borders to advance freedom and reduce the causes of war—giving help and recognition to emerging nationalism in Asia and Africa.

Prosperity must be real, blooming locally throughout the land, not superimposed artificially and arbitrarily by an oversized central bureaucracy.

Qualities of the Republican Party

Four inherent qualities of the Republican Party are essential to the Nation and the world in the coming decade: They are:

1. A belief in unity and solidarity capable of joining men together in a common bond, rather than dividing them through emphasis on separate interest groups.

2. A calm, deep consideration of the whole instead of a distorted dramatization of various parts.

3. A constant dedication to principle, insuring the continuity between philosophy, purpose, and action.

4. A realistic approach to human problems, achieving a dynamic balance of past perspective and future vision. As Abraham Lincoln wrote: "I hope to stand firm enough not to go backward, and yet not go forward fast enough to wreck the country's cause."

XXIX

THE PROUD RECORD OF THE REPUBLICAN PARTY IN ENFRANCHISING CITIZENS OF THE DISTRICT OF COLUMBIA

(By U.S. Senator FRANCIS CASE, of South Dakota)

The joint resolution (S.J. Res. 39) which was adopted by the Congress during the past session and went into effect, marked a long way down the road toward extending the right of suffrage to the people of the District of Columbia.

In December of 1952, the then President-elect of the United States, Dwight Eisenhower, sent word to me that he would like to have me come to New York in order to discuss some legislative matters affecting the District of Columbia.

The prospect was that I would be chairman of the Committee on the District of Columbia of the Senate. Among subjects discussed was the possibility of getting the right to vote for the people of the District of Columbia. The President spoke very feelingly upon the fact that he believed taxation without representation was contrary to the principle of our country. He said he felt there was something basically wrong if we taxed people and did not give them the right to vote. He thought there was something basically wrong if we drafted their sons for military service and did not give them the right to vote.

During the preceding 2 years I had been a member of the Committee on the District of Columbia and had been accorded the honor by the then chairman of the committee, the late Senator Neely of West Virginia, and the majority leader of that day, Senator McFarland of Arizona, of piloting the so-called home rule bill through its consideration by the Senate in January of 1952.

So I was very glad to accede to the suggestion of the President that we devote some energy to the possibility of getting suffrage for the District of Columbia.

During 1953–54 we passed a home rule bill. We also passed a bill giving the people of the District of Columbia the right to vote for delegates to national conventions. The matter of voting for President and Vice President called for a constitutional amendment. We gave some consideration to it but, of course, that was a proposal which would have to go to the Judiciary Committee.

My interest in the subject has continued throughout the years. The interest of the President has continued throughout the years. On various occasions he has continued to express an interest in this goal.

Early in this Congress Senator GLENN BEALL introduced a constitutional amendment proposing that the citizens of the District of Columbia be given the right to vote in presidential elections. The junior Senator from South Dakota introduced a similar constitutional amendment.

In the amendment which I proposed I suggested that the District of Columbia be given three delegates to the House of Representatives with a like number of electoral votes for President and Vice President, in that way preserving the traditional basis upon which a State has votes in the electoral college.

Early this year, when the District of Columbia Committee reported the so-called home rule bill, I offered that constitutional amendment as an amendment to that home rule bill, in fact as a substitute for the home rule bill. Watching the course of these proposals through the years had convinced me that there was little practical possibility of getting home rule, as such, through both Houses of Congress in the same Congress.

Also I knew that every home rule bill which had been presented in the previous 10 years had included a provision to recognize the basic constitutional provision that Congress is given the exclusive legislative jurisdiction for the District of Columbia.

Believing that the people of the District of Columbia should have an effective voice in the Government which governs them; namely, Congress, plus the appointive power of the President, I came to the conclusion that the practical thing to do was to press for a constitutional amendment which would give them a voice in the electoral college for the election of President and Vice President, and, if possible, delegates in the House of Representatives.

So I introduced the constitutional amendment on the floor as a substitute for the home rule bill on the floor of the Senate. The most important result was the interest which developed. Many Members of the Senate said to me, "We would like to support that kind of measure as an independent proposal."

The most helpful interest developed was the interest that was taken by Senator KENNETH KEATING. Not only did he say he believed that that constitutional amendment should be adopted at that time, but, as a member of the Committee on the Judiciary, he took an earnest and unrelenting interest in the subject.

The outgrowth of that effort was the reporting of a proposed constitutional amendment to the Senate, built upon the language that had been proposed by the Senator from Maryland, Mr. BEALL; the Senator from New York, Mr. KEATING; and myself. That proposal was reported to the full Committee on the Judiciary.

Then there came before the Senate a proposal to deal with the problem of the election of Members of the House of Representatives in case of an emergency which incapacitated a majority of the Members of the House from acting at any time.

The Senator from Florida, Mr. HOLLAND, proposed an addition to that proposed constitutional amendment. His proposal was an amendment for the abolition of the poll tax in Federal or national elections. That was agreed to.

So, then the distinguished Senator from New York, Mr. KEATING, performed the master stroke of presenting the District of Columbia amendment which had been reported by the Kefauver subcommittee to the full Judiciary Committee. It drew wide support and was agreed to by more than the two-thirds required for a constitutional amendment.

I believe that is an accurate reflection of the record, and the course that this matter has taken. As we adopted the amendment in the Senate, it provided for both representation in the House of Representatives and representation in the electoral college for the voters of the District. The three-pronged resolution then passed by the required two-thirds vote for a constitutional amendment, and it went to the House of Representatives.

The Senator from New York, the Senator from Maryland, and I and others testified before the House Judiciary Committee urging action upon this particular proposition to provide suffrage for the voters of the District of Columbia in the election of President and Vice President. We also urged delegate representation in the House of Representatives.

Of course, under the Constitution, the House of Representatives is the judge of its own membership. In its wisdom the Judiciary Committee of the House of Representatives reported a constitutional amendment to the House of Representatives in a form which left only the provision for the election of presidential electors for President and Vice President by the District of Columbia.

I regret the dropping of the other two proposals in the triple-pronged constitutional amendment as it passed the Senate. I regret particularly the dropping of the provision for a delegate in the House of Representatives. However, so far as the Senator from South Dakota is concerned, I recognized that in that particular matter, since the House of Representatives itself was concerned with it, we should respect their wishes in that particular.

I might also observe that it is my personal opinion that the Congress could, by an ordinary act of Congress, without requiring a constitutional amendment, provide for a delegate to the House of Representatives, if the Congress so desired, at any particular time.

I conclude by saying that this action will mark the Eisenhower administration as having sponsored and encouraged the greatest extension of suffrage of taxpayers throughout areas where the United States has jurisdiction. First of all, there was the legislation giving to the people of the District of Columbia the right to vote for delegates to the national political conventions. Second, there was the adoption of Alaskan statehood. Third, there was the adoption of Hawaiian statehood.

With this action, every step will have been taken which could be taken by Congress and by the administration to get before the country a constitutional amendment to give to the people of the District of Columbia the right to have some voice in the Government under which they live. This is a proper step to be taken for the seat of the Government of the United States.

I hope that the consequence of this step will not be lost on the peoples throughout the world. It has been a reproach to our profession of democratic principles that people in the Capital City of the United States can be taxed, and yet have no vote. This amendment can lead to the end of that travesty. I hope it will be ratified by three-fourths of the States before the next year of presidential elections rolls around.

XXX

ACCOMPLISHMENTS OF THE FEDERAL AVIATION AGENCY UNDER THE REPUBLICAN ADMINISTRATION

(A report prepared personally for the chairman of the Senate Republican policy committee, U.S. Senator STYLES BRIDGES, of New Hampshire)

In the years since the close of World War II, air transportation has become a major industry affecting all aspects of our national life. Recognizing the obligation of the Federal Government to foster the orderly development of civil aviation, both commercial and private, the Republican administration provided the leadership which resulted in the enactment of the Federal Aviation Act of 1958 creating the Federal Aviation Agency—the first fully independent Federal body devoted entirely to the regulation and promotion of the aviation industry.

On January 1, 1959, the new agency absorbed the functions and personnel of the Civil Aeronautics Administration and the Airways Modernization Board, as well as certain duties formerly performed by the Civil Aeronautics Board.

The basic intent of the Administration and of Congress was to establish an organization with sufficient power—both of persuasion and by means of appropriate regulations—to restore to air transportation the same degree of public confidence as existed for other forms of travel. A former Air Force general, E. R. Quesada, who had demonstrated an intense interest in measures to advance air safety, was named by President Eisenhower to head the new Federal Aviation Agency.

We recall that the difficulties confronting all segments of the aviation industry were beginning to assume crisis proportions during the early and mid-1950's. Accident rates were on the rise. Burgeoning ownership of aircraft, both commercial and private, thus greatly increasing the use of existing airspace and all types of aviation facilities, created a pressing need for immediate action.

Greatly expanded programs to provide adequate air navigation and air-traffic control facilities were essential. Revised air-traffic rules and procedures were assigned a high priority.

Other regulations, some of which have been adopted as many as 30 years ago, required review in order to meet present and anticipated needs. New aircraft and technical advances brought about the necessity for developing regulations in fields where formal rules hitherto were unneeded.

All such important areas have received attention from FAA and accelerated activity may be expected now that the agency has achieved a state of organization which will permit it to fully discharge its responsibilities. Among the more important regulations adopted since the agency was created are the following:

1. No individual who has reached his 60th birthday shall be utilized or serve as a pilot on any aircraft while engaged in air carrier operations.

2. Improved training and proficiency tests for co-pilots of commercial aircraft.

3. Mandatory weather radar for commercial aircraft.

4. New private and commercial pilots required to demonstrate a knowledge of instruction in instrument flying.

5. Uniform standards of flight instruction established in all flying schools.

6. Medical standards strengthened so as to prohibit from operating aircraft persons with histories of diabetes mellitus requiring insulin, coronary artery disease, psychosis or certain other mental or nervous diseases, chronic alcoholism, drug addition or epilepsy.

7. Private pilots required to receive their medical examinations from FAA-designated medical examiners.

As indicated by the first, sixth and seventh items listed above, the agency has greatly expanded its medical program. Recently, a Bureau of Aviation Medicine was established within the agency in recognition of the new importance of certain medical problems as they relate to the operation of aircraft.

Simultaneous with strengthening the regulatory area of the Agency's functions, Administrator Quesada was determined that enforcement measures should be similarly improved. Quite obviously, good regulations can be ineffective if they are not observed by those to whom they are directed. While insisting upon absolute fairness in enforcement procedures, the Administrator nonetheless seeks to improve upon the rather lax practices which were followed in previous years.

In this connection, the Agency has placed its safety inspectors on a round-the-clock schedule in a concentrated safety inspection of all scheduled air carrier training programs and flight operations. As an example of this increased emphasis on compliance, FAA has ordered its flight inspectors to enforce the requirements that flight crew members remain at their duty stations during flight unless their absence is absolutely necessary.

During 1959, the Agency undertook approximately 3,000 enforcement actions against persons engaged in various aviation pursuits. In many cases, civil penalties, certificate revocations, or suspensions and reprimands were imposed.

The FAA is becoming increasingly active in the field of airport development. In order to improve the effectiveness of the existing Federal-aid airport program, which provides financial assistance on a matching-fund basis to local communities for airport improvement purposes, the Agency has established a revised system of priorities whereby safety items of greatest demonstrated need receive preference in allocating the funds available.

During fiscal year 1959, FAA approved grants for 436 airport projects, involving over $73 million in Federal funds. As of December 31, 1959, a total of 1,050 projects were under firm contract or grant agreement. For fiscal years 1960 and 1961, Federal grants of well over $100 million for about 600 projects have been authorized. Since 1953 over $380 million has been spent, obligated, or programed. Major advances have been realized in improving the Nation's airports.

It is evident that all functions of the Federal Aviation Agency are directly related to the promotion of air safety. In its activities, however, the Agency does not seek to retard the healthy growth of the aviation industry. On the contrary, the Agency is dedicated to fostering the continued development of air transportation—both private and commercial.

As an example of the flexibility which FAA must maintain in order to meet new advances in the aviation industry, we may refer to the advent of the turbojet transport in air commerce. By the end of 1959, the Nation's airlines were operating more than 75 pure jets. During 1960 the carriers will add an additional 150. The introduction of these new high-performance aircraft was accomplished with a minimum of incident and mishap. A total of 28 U.S. airports now handle large jet transports.

The Federal Aviation Agency has sought to align its safety programs to the expansion of jet travel. Last year, for instance, the agency inaugurated a new program of jet flight training for its flight inspectors. This program—conducted by the Air Force at the request of FAA—has provided agency inspectors with the finest jet training available anywhere in the world.

The rapid increase in jet operations has been important in a number of the changes in rules and regulations affecting air carriers which have been adopted in recent months. As aircraft become larger, faster, and more complex, the public interest demands maximum performance standards for all manufacturing, maintenance, and operating personnel.

In still another step to keep pace with the expansion of jet travel, FAA has established 30 new high-altitude jet route segments totaling 25,455 miles. Radar surveillance for these civil jet operations was accomplished when the military permitted FAA to man and utilize 38 Air Defense Command long-range radars.

This arrangement is a typical example of the present close relationship which exists between the agency and the armed services in solving mutual problems. The Federal Aviation Act fully authorizes such close cooperation—particularly in airspace and air traffic control matters.

The coverage provided by the ADC radars supplements FAA's own existing long-range radar to provide nationwide radar advisory service. The combined military-FAA radar system enables agency personnel to track all jet flights from takeoff to touchdown with the exception of a small area in the Rocky Mountain region.

During 1959, the new turbojet aircraft contributed to a 14-percent increase in the revenue passenger-miles flown by the Nation's airlines last year. The total of approximately 35.8 billion was 4½ billion revenue passenger-miles over the comparable figure for 1958.

The expansion of jet service was accompanied by a similar growth in all fields of aviation. For example, the number of student pilot certificates issued by FAA rose from 58,107 for 1958 to 67,714 for 1959—an increase of 17 percent.

The upward trend also is reflected in the increasing volume of air traffic. During 1959, seven FAA towers reported their typical busy hours showed an average of nearly one scheduled airline landing or takeoff per minute. These busy-hour averages do not include nonscheduled operations.

To meet the needs of this expanding volume of air traffic, the Agency expanded its air traffic control system by commissioning a new navigational aid or air traffic management facility at the rate of 1 a day for a total of 365 for the year. These included, in part, 72 approach light systems, 11 new airport traffic control towers, 18 long-range radars, 9 precision approach radars, and 2 airport surveillance radar units. Also during the year, FAA contracted for the construction of six new air route traffic control buildings, and one new traffic control center building was put in service at San Antonio, Tex.

Early in 1959, the Agency set up a new airspace management program which made available over 6,000 miles of new airspace for civil aviation. At the close of the year, more than 100 areas were under FAA review for revocation or reduction in size, height, or hours in use.

Also, during its first year, the Agency installed new electronic computers at six of its busier air traffic control centers. At the same time, FAA scientists and engineers received delivery of the first components of a new fully automated air traffic control system. This giant computer, called Data Processing Central, will handle all the repetitive, nondecisionmaking functions of the air traffic controller. Its most spectacular function, however, is its ability to probe, detect, and predict conflicts or collision courses.

FAA engineers also completed plans for the introduction of automatic landing into the national system of aviation facilities. After final development and thorough testing, all-weather landing is expected to be in operation in 5 years. Planes will be able to land in all types of weather regardless of visibility conditions.

Testing of the automatic landing system is being carried on at FAA's Atlantic City,

N.J., test center—the first such installation to serve civil aviation exclusively. A former naval air station, now known as the National Aviation Facilities Experimental Center, the center is equipped with laboratories, model shops, computer facilities and other types of instrumentation needed to carry out the vital testing and evaluation of new systems and equipment related to air safety. Just recently, as a result of tests at NAFEC, FAA has proposed the adoption on a nationwide basis of a new runway lighting system.

At the present time, the Agency is engaged in building the most modern jet-age airport in the world to serve the Metropolitan Washington area—Dulles International Airport—named in honor of our late Secretary of State. The construction work on the project is proceeding at a rapid pace. Paving of the two north-south runways (each almost 2 miles long) was completed ahead of schedule and other runways are nearing completion.

Bad weather halted operations during the fall of 1959 and has necessitated a postponement of the scheduled opening date from early 1961 until the summer of that year. Dulles International and Washington National Airports—both operated by FAA—are the only major civil airports owned by the Federal Government.

In concluding this summary of FAA accomplishments, it should be mentioned that FAA is making an important contribution in the field of foreign relations. Representatives of the Agency have been invited by the appropriate authorities of numerous free world nations to advise them on various matters relating to civil aviation. In addition, representatives of many foreign countries have come to the United States for the purpose of studying FAA facilities and programs. Further, the Agency is very active in several international aviation organizations.

As a result of these contacts, U.S. civil aviation policies, techniques, and equipment have become almost standard throughout the non-Communist world. In the process much good will has been generated, thereby strengthening our ties with other peoples.

XXXI

THE NATIONAL PURPOSE

(By U.S. Senator LEVERETT SALTONSTALL, of Massachusetts)

The American people are considering their collective determination, direction, and destiny in a self-appraisal which is popularly referred to as the debate on the national purpose.

Our national purpose is bound up dynamically with our social and political heritage, the threat inherent in an affluent society, the vitality of the individual, and above all the international challenge to all freemen.

The debate is being conducted in national periodicals and leading newspapers, in letters to the editors columns, in the speeches of the leading candidates for the presidential nomination, and so on.

Some people talk about leadership, others religious strength, others public awareness of traditional ideals. We read about false optimism, the crisis of understanding, the search for a new frontier. And we hear that America will stumble unless she better defines her objectives; that a major danger is the softness and slackness of our modern society.

At the root of the entire discussion there seems to be a persistent awareness that worldwide demands on this country are greater than ever before and a persistent urgency to shape a national resolve which can meet them. We are concerned that our response be equal to the challenge.

In thinking about our national purpose, there are a half-dozen points which I specially like to keep in mind.

First, I feel that the principal issue before the United States in the latter half of the 20th century is whether a society which is characterized by a huge and unprecedented wealth can sustain the strength and stamina of her great ideals—intellectually, spiritually, and physically. America of the 1960's is, in the words of the song, mighty "comfy-cozy," and her greatest danger in overindulgence.

Today we have the highest standard of living in the world. With our new growth in material strength have come new strains on our moral fabric, a new responsibility to our ideological and spiritual foundation.

As Walter Lippmann wrote in his treatment of the debate: "Our ability to meet that challenge depends upon our success in learning to use our growing wealth for something more than just private satisfaction. * * * We have to be able and willing to pay for what is, to put it briefly, civilization itself."

Second, the individual's energy in accepting his own responsibilities must be stimulated. Purpose is intimately related to vitality. Our survival depends upon a populace concerned about the great challenges of the age and dedicated to their solution, each contributing his own individual abilities.

Recently we have become more conditioned to looking at Government as the source of initiative for getting things done. We forget that under our system of government it rests on us to start things off. Our large, complex society is dominated by a powerful Central Government capable, if we let it, of endangering local and individual incentive.

Each citizen must himself take up the task with vigor and conviction—in the way he works at his job, treats his fellow beings, in the way he conducts his life.

Third, I believe that today's Americans must distinguish between the concept of automatic equality and the principle of equality of opportunity. The latter is the ideal so brightly fought for in the early pages of our history. The former is a more recent tendency toward the feeling that everyone should get exactly the same "deal," that society owes the same rewards to all, regardless of effort or ability.

We believe that all men are created equal and should have an equal chance at life's benefits; that all men must receive equal treatment under the law. But we must be willing to encourage and recognize unusual accomplishment and performance.

Fourth, the United States must have an overriding national interest in order to fulfill its national purpose. Selfish group interests will frustrate any national sense of unity and direction. We must emphasize the whole rather than divisive and often contradictory separate purposes; we must resist the temptation of special appeals. Our citizens must be joined together in a common bond for the common good.

Fifth, any national purpose must be identified with the international purpose. Never before has it been so clear that the destiny of the various peoples of the world was one and the same. Never before has the survival of the values of our own society been so dependent on their survival across the globe.

America's record for assistance to friendly nations is unprecedented. But the issue before us is not so much what we have done but what we must do. The battle for men's minds and the struggle for peace is focused at the source of conflict, where man's plight is worst. The need is compellingly clear.

Sixth, our response to the call of purpose must be aggressive and imaginative, not neutral or standpattish. We must sustain a national purposefulness through the generation of new ideas, intellectual energy, the capacity for ingenuity and innovation.

Our national purpose is perhaps best defined as the collective will of our citizens. Free men have repeatedly proved their ability to survive. A resurgence of our dedication to the proud ideals of democracy can, more than anything else, inspire our Nation to meet the grave challenges of today's troubled world.

There is no time for a leisurely adaptation of our national convention. Our unique physical, spiritual and institutional resources must be marshaled to the task immediately.

XXXII

ACCOMPLISHMENTS OF THE U.S. INFORMATION AGENCY (USIA) DURING THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator HUGH SCOTT, of Pennsylvania)

After the Republican administration took office, a special Senate Foreign Relations Subcommittee, headed by Senator BOURKE B. HICKENLOOPER, Republican, of Iowa, reported in 1953, after a year-long review of American overseas information programs, that it had found—

Ineffective coordination of psychological policy.

Duplication and competition in informational activities of U.S. agencies operating abroad.

Ineffective administration, personnel management and evaluation.

Maladjustment of responsibility between Washington and the field.

Failure to secure foreign cooperation in propagating common concepts (anticommunism, need for mutual security pacts, etc.).

Failure to bring about public participation in promoting a better understanding of the United States and in developing mutually beneficial relations with other countries.

Lack of a common understanding of the fundamental objectives of an American overseas information program.

Since its establishment late in 1953 by the Republican administration as an agency independent of the Department of State, the U.S. Information Agency has brought the overseas information program to a position of acknowledged maturity, credibility and effectiveness.

Last year, for example, the American Public Relations Association was so impressed with the Agency's work in furthering "mutual understanding and trust between the people of Thailand and the people of the United States" that it gave to USIS Thailand its 1959 Silver Anvil Award, symbolic of an "outstanding performance in the field of international public relations originating outside the United States."

Clear evidence that English-language broadcasts by the Voice of America have a wide and enthusiastic audience was manifested late in 1959 when more than 65,000 letters poured in from abroad in response to a series of announcements of a VOA survey of the age, location, and program preferences of its listeners. (North Korea, north Vietnam and Albania were the only countries in the world not heard from.)

Conversely, USIA has been the constant object of Soviet vituperation, which is often the criterion for judging the effectiveness of those attacked. In a Radio Moscow broadcast in German on May 27, 1960, USIA was identified as a "dirty factory for the manufacture of lies and slander * * * headed by a theoretician of U.S. imperialism, George Allen."

Here is a partial chronicle of the many steps which have been taken since 1953 to overcome the deficiences in the oversea information program cited by Senator HICKENLOOPER and his colleagues—

Coordination of policy

The Director of USIA has been made a permanent voting member of the Operations

Coordinating Board, and is a regular attendant at meetings of the Secretary of State, National Security Council and Cabinet. According to a Brookings Institution report submitted to the Senate Foreign Relations Committee in January 1960:

"At meetings in the (State Department) and in ad hoc interdepartmental groups set up to deal with particular problems, the Information Agency has achieved effective representation. By the presence of its Director in meetings of the National Security Council and in private discussions with the President, the Agency has been able to carry the views and requirements of the information program to the highest levels."

Overseas, USIS officers have become integral members of Ambassadors' country teams throughout the world, in a position to call attention to the public relations aspects of local problems.

The U.S. Advisory Commission on Information, which on many occasions has commended USIA on "its progress and on its ability to develop avenues of cooperation with the Department of State on all levels of policy and administration," recently stated:

"USIA has obtained more coordinated foreign policy guidance as an independent agency than when it was in the Department. Many Ambassadors have also attested to the improvements that have been made."

Information program duplication eliminated

Under the terms of a Presidential directive issued in 1954, ICA ceased operating a separate information program of its own abroad. USIA and ICA have had a basic agreement since then covering the support which U.S. mutual security activities receive within the oversea information program. Close policy and media liaison exist between USIA and ICA in Washington, while at the field level the director of the ICA mission staff and the USIA public affairs officer are key members of the ambassador's country team. This assures continuous joint assessment of ways to achieve maximum political, economic, and psychological support from U.S. aid in each country.

Administration—evaluation

Administration: Close administrative cooperation with the Department of State is evidenced by such steps as scheduling of USIA oversea inspections and audits to coincide with those of the Department and the naming of senior Department officers to USIA employment and promotion panels.

Executive officers have been assigned to several large USIS posts for the purpose of improving budget and accounting procedures, administrative support funds, contracting and procurement, and general post management.

To achieve greater administrative flexibility, the Agency has set aside a contingency fund which can be used by the Director for emergencies and unexpected events on the international scene.

In 1954, the Voice of America was moved from New York to specially designed studios in Washington without an instant's interruption in its worldwide broadcasts. The move has promoted integration with other Agency elements as well as faster and easier coordination with other elements of the Government. (VOAH is currently implementing a comprehensive, long-range program for construction of new radio facilities in five different oversea locations, and is also building new transmitters in North Carolina to provide a more reliable and higher quality signal to its relay bases.)

The Agency has alertly modified its media and geographic structure to meet new program challenges and opportunities. In 1958, for example, in line with an explosive expansion of TV internationally, USIA established a separate Television Service headed by a television executive with heavy international experience. This year the mass emergence of African nations from a colonial or protectorate status has been recognized through the establishment of an African area office under an area assistant director.

Evaluation: An inspection staff of first-rank USIA officers has been set up to carry on a continuous, country-by-country examination of the program, with responsibility for inspection of USIS operations and personnel and evaluation of USIS programing.

The Agency's Office of Research and Analysis, organized in 1954, has also provided measurement of reactions to individual Agency campaigns as a program evaluation device, in addition to making continuing assessments of world opinion and analyzing Communist propaganda trends and techniques.

Personnel management

Today, USIA employs slightly more than 11,000 persons worldwide, as compared with 12,877 in its first year (fiscal year 1954). [In recent years, USIA has placed less emphasis in its foreign service recruitment upon the technical mass-media skills. (Many of these skills are available to the Agency abroad and are in fact performed ably and more economically by about 7,100 foreign national employees under the guidance of American officers.) Recruitment emphasis today is more on broader education and training and the ability to communicate effectively with foreign audiences on a direct personal basis.]

In its 15th annual report, the U.S. Advisory Commission on Information acknowledged that the Agency has had "singular success * * * with its junior officer training program in Washington (which has) both recognized the importance of personnel who are substantially knowledgeable and who can communicate and develop personal contacts.

The Director of USIA has approved the establishment of a career arm of the foreign service reserve corps by appropriate administrative rules and regulations. This is designed to give the Agency a career officer system as nearly like the Foreign Service Officer corps as can reasonably be achieved without legislation. Career legislation has been sought consistently by the Agency since mid-1954, with the President recommending its enactment to the Congress in 1956, 1957, and 1959.

Because the Agency is obviously one which the Communists would like to infiltrate, USIA employment security standards are among the most stringent in the Federal Government. By law, every USIA employee must undergo a full-field investigation by the U.S. Civil Service Commission before he can be hired. Even though employees transferred to its rolls when USIA was created in 1953 had been security cleared, to protect the public interest they were reinvestigated in the light of security rules stricter than those in effect when they were originally employed.

Since satisfactory personal adjustment of the individual officer and his family to foreign duty is so important, the Agency is experimenting with a psychiatric and psychological testing program designed to weed out new recruits who give indication that they would probably experience maladjustments and even failure if stationed abroad. In the opinion of the U.S. Advisory Commission on Information, "This is a new and promising service which, if administered carefully, fairly, and humanely, will go a long way toward developing a healthy foreign service officer corps."

For several years the Agency has given priority to training in languages spoken and read by millions in Asia, Africa, and the Near East. All USIA foreign service officers will be required to have a specified high level of proficiency in a Western European language or a satisfactory level in one of the languages of the Far East, South Asia, Near East, or Africa by June 1962.

Training of new employees assigned to work overseas has been intensified in recent years to include a more thorough study of Communist theory and strategy than was formerly required, a more thorough review of American civilization, and more hours of work on effective use of communications techniques. With the cooperation of American sponsors in the communications media, civic, industrial, educational, and cultural fields, a highly effective orientation program has also been worked out whereby unusually capable foreign nationals employed by the Agency abroad are brought to the United States to get firsthand knowledge of our country and a picture of American life and democratic institutions through personal observation.

Adjustment of Washington-field responsibility

Field officers have been given more discretion and greater responsibility for the development and execution of country plans and programs, the production of materials locally, and the definition and selection of target groups to be reached. USIS staffs abroad therefore have a high degree of flexibility to meet complex problems and critical situations as they arise and to support country team decisions made on the scene. The Agency provides "overall creative plans and guidance" to the field and monitors field operations through country plans, inspections and visits of area assistant directors to assure that posts operate in accordance with such plans and guidance.

Foreign cooperation in propagating free world concepts

The Agency has also aided in training personnel of friendly foreign governments—teachers, information specialists, etc.—who in turn instruct their people in democratic processes and conduct programs which bring about awareness of and effective opposition to Communist activity.

USIA has supported development with NATO, Cento, and SEATO countries of programs which will increase public confidence in such treaty organizations as indispensable elements of an effective free world security system and as the framework within which the member nations can most advantageously exercise their partnership in free world affairs.

The binational center concept—so popular and long established in Latin America—has been extended successfully to other parts of the world, institutionalizing the efforts of foreign nationals and Americans living abroad to improve relations between our countries. Binational organizations (110 in 31 nations) now exist in such farflung countries as Spain, Italy, Greece, Turkey, Iran, Burma, Thailand, and the Philippines.

The Agency has placed emphasis on the teaching of English to foreign nationals (150,000 a year at present), an activity which now lies at the heart of binational center and USIA cultural center programing. Annual seminars are being conducted for about 5,000 teachers of English in local schools (their pupils numbering about a million), who are not only acquainted with modern teaching techniques but also receive a basic orientation in American life and culture. USIA initiative and encouragement have also led to the establishment of many chairs and departments of American studies in foreign universities.

A high proportion of the films produced or acquired by USIA are now shown abroad by agencies of national and local governments and by civic, religious and educational groups. Many USIA films are used in the educational systems of foreign countries. In West Germany more than 2 million persons a month see USIA films exhibited by about 500 all-German community film com-

mittees. This committee network is the Agency's chief means of noncommercial motion picture distribution there. In Greece groups known as Community Information Councils exhibit USIA films on regular schedules.

In administering the Educational Exchange Program abroad for the Department of State, the Agency has taken special pains to follow up with foreign students upon their return from the United States, encouraging them to give lectures and write articles about their impressions of American life and culture, furnishing them with current information about American progress and achievements in their study specialties, etc. Foreign student "alumni associations" have been established with the help of USIS posts, as indigenous vehicles for making American objectives, policies and actions better known and understood.

Many foreign publishers have been encouraged, along with American firms, to produce inexpensive foreign language editions of basic American textbooks, the "Classics of Democracy," and other literature promoting understanding of American life and democratic institutions. Last year alone USIA efforts in this area accounted for the publication of 653 foreign editions in nearly 6.6 million copies in 34 languages, and of 1,815,000 copies of low-priced books, including 40 editions in 10 foreign languages and 46 English editions.

Public participation in foreign relations

USIA laid the groundwork for the launching of the people-to-people program by President Eisenhower in 1956. Hundreds of organizations—business, social, professional, representing millions of Americans—have since rallied to the support of the idea. Offering ways for every American to help build friendship and understanding with peoples of other nations, people-to-people projects include exchanges of people and professional know-how, school and town affiliations, letterwriting campaigns, magazine and book collections, hospitality for foreign visitors, and helpful advice for Americans who want to represent their country effectively when they travel abroad. Several large cities have even established umbrellalike people-to-people councils to enlist and coordinate the services of local civic groups and private industry in building international relationships.

The Agency's Office of Private Cooperation furnishes facilitative assistance, as necessary, to the many communities and groups engaged in this massive grassroots diplomacy effort. A 1958 survey of USIA "seed money" grants to help people-to-people committees to launch highly desirable new projects revealed that every USIA dollar granted generated at least $5 of private spending to achieve people-to-people objectives.

In another important area, the Agency has been able to get objective, expert advice on its overseas programing problems from the 16 top American public relations practitioners who comprise its Panel on Public Relations Policies and Techniques.

Information program objectives

President Eisenhower succinctly stated in his 1953 directive establishing USIA that the Agency's purpose shall be "to submit evidence to people of other nations by means of communication techniques that the objectives and policies of the United States are in harmony with and will advance their legitimate aspirations for freedom, progress, and peace."

Consistent with this mission, the Agency has concentrated on increasing the reliability of USIA as a source of factual information about the United States. Without in any way cutting down programs that depict American progress and advances in many fields, USIA deliberately omits any suggestion of boasting or bragging which frequently alienate and annoy foreign audiences.

There is "an already general acceptance abroad of the USIA as the reliable and truthful voice of the United States in the exposition of our foreign policies," the U.S. Advisory Commission has said, and "the achievement of this reputation is the best insurance against belief in Communist propaganda and their view of world events."

The Commission notes as evidence of this recognition a May 1959 statement by British historian Arnold J. Toynbee that "after a period of trial and error, the present day Americans seem to me to have learned that the best way of instilling confidence in the foreign policy of the United States is to give people in other countries the factual information that will make them form their own judgments about the United States and its citizens. In this field, frankness, sincerity, and objectivity always prove to be the best policy."

In line with its overall effort to make the best possible use of Agency recources, USIA has in recent years developed detailed basic planning and guidance papers devoted to major themes (American life and culture, science, atomic energy, disarmament, anticommunism, American economy, minority affairs, women's activities, etc.) on which media should concentrate in their worldwide output. At the same time field staffs have been required to pinpoint their objectives and themes in their country programs in order to achieve greater concentration of effort and greater impact.

This sharpening of Agency targets and themes has been accompanied by increasingly closer cooperation among Agency policy, area, and media elements. As a result theme possibilities are analyzed in terms of their exploitation potential and, in concert, the media are able to "zero in" on a theme and assure that it reaches the widest possible audience in a variety of ways. This multimedia approach has been successfully employed in many instances. To name a few:

1. "Atoms for Peace"—one of the Agency's major themes since President Eisenhower's memorable speech before the U.N. General Assembly in 1953—has been so successful that the Soviet Union, which originally scorned the concept, has had to reverse itself and adopt it, too.

2. "Peoples Capitalism"—emphasizing the opportunities and accomplishments of millions of ordinary Americans under our free economy—has been so well received abroad as a result of effective USIA media cross play that the Communists have attacked the theme frequently and violently, and continue to pour upon it some of their choicest invective.

3. America's broad-based scientific and technological stature has also been stressed as a major USIA theme, in such activities as comprehensive exhibits on space exploration; timely films like *"Nautilus* Crosses the Top of the World," prints of which were dispatched abroad within hours of the announcement of the American submarine's historic feat; development of a highly popular portable library of paperback books on scientific subjects; work with oversea science clubs, and assistance with techniques of teaching science, American-style, in the schools of other countries.

4. One of the Agency's foremost long-range programs centers around the culture of America—stressing that America's art is worth seeing, its music worth hearing, its books worth reading; and that the American people place a high value on the spiritual and cultural aspects of life. The U.S. Advisory Commission on Information has also applauded the development in recent years of a more coordinated cultural program permeating all media and has noted considerable improvement in the quality of USIA cultural materials especially during the past 2 years.

The Lincoln Sesquicentennial Celebration in 1959 provided the Agency with a unique opportunity to build a comprehensive yearlong, multimedia campaign around the Great Emancipator, whose life and deeds are of interest to peoples in the most remote areas of the world. Thus the Lincoln saga was unfolded in books and other publications (even "comic books"), exhibits, original and acquired films, radio and TV broadcasts, seminars and lectures, well-publicized ceremonies at which Lincoln busts or other memorabilia were presented to foreign dignitaries, etc.

"Atoms for Peace," the American economy, science and technology, culture and many other themes were forcefully packaged last summer in the American National Exhibition in Moscow which attracted nearly 3 million visitors. In effect, the exhibition placed 10 acres of the United States in the heart of the Soviet capital for 6 weeks. In addition to coordinating the event, USIA mounted many of the exhibits, including the astonishingly successful "Family of Man" photo exhibit by Edward Steichen, depicting the hopes, fears, joys, drives and other human denominators common to all the peoples of the earth. It arranged for the spectacular "Circarama" and "Septorama" film presentations; outfitted the "electronic brain" which instantaneously answered in Russian thousands of questions about American life, and trained and supervised the 75 bilingual guides who scored such a personal triumph in their contacts with exhibition visitors.

That an exhibition of this magnitude was mounted within 6 months in the face of seemingly insurmountable logistic (to say nothing of political) obstacles is a testimonial to the ingenuity, resourcefulness and effectiveness of USIA and the other governmental and private organizations which also participated. Despite the demands of this massive "crash" project, the Agency's normal level of worldwide programing was maintained.

XXXIII

THE ACCOMPLISHMENTS OF THE POST OFFICE DEPARTMENT DURING THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator J. GLENN BEALL, of Maryland)

The U.S. Post Office Department handles more mail than all the rest of the world combined. That makes it one of the world's largest enterprises.

During the 7½ years of the Republican administration, the introduction of modern business management and financial practices has enabled the Department to:

1. Reduce the postal deficit through operating economies and a more equitable postal rate structure. But for these steps the annual postal deficit of $700 million inherited in 1952 would have more than doubled by 1959. Instead, the deficit was substantially reduced despite increases in operating costs and a 20.2 percent increase in mail volume.

2. Bring about next-day delivery of letter mail within metropolitan areas serving 160 million American citizens.

3. Substantially reduce mail handling costs.

4. Bring closer to realization the next-day delivery of cross-country mail.

5. Provide city delivery service for the first time to 9 million families and 700,000 business firms and an additional 1,005 municipalities.

6. Extend rural delivery service to over 1.2 million farm families.

7. Establish a modern and efficient postal transportation system, using all forms of transportation to speed the movement of mail between all communities of the United States.

In addition, the Department has:

1. Continued to seek postal rates sufficient to cover all postal costs to the end that these costs would be borne by those who use the service rather than by the taxpayers.

2. Built more than 4,000 new post offices and embarked upon a 5-year program for completely modernizing the postal plant.

3. Successfully sought ways of mechanizing the postal operations to the end that service has been vastly improved, the productive effort of employees increased, and the efficient handling of future mail volumes assured.

4. Greatly strengthened the career service for postal employees and vigorously promoted salary increases and fringe benefits for postal employees wherever and to the extent justified in relation to living costs and industrial pay scales.

5. Initiated an intensified crusade to clean the mails of obscenity and filth.

6. Revitalized the philatelic program to make greater use of postage stamps to advertise American traditions and ideals at home and abroad.

These activities are described in more detail as follows:

Service improvements

The mail service to our people is being constantly improved. Mailers and postal patrons now benefit from more than 80 improvements in procedures.

1. Eighty-three metropolitan area plans have now been activated, directly benefiting 160 million people and covering 1,850,000 square miles. These plans provide means for next-business-day delivery of mail between post offices within each area.

2. The Department has developed a nationwide integrated postal service plan which links the metropolitan areas and assigned peripheral areas throughout the country with each other through coordination of mail-handling procedures and transportation schedules. This will provide the guidelines for future development of facilities, transportation, and other postal planning.

3. Establishment of regional offices has decentralized and simplified administration and speeded service to the public.

4. Postal transportation terminals, air mail fields, and transfer offices have been consolidated with post offices, resulting in more efficient and economical operations.

5. Post offices in most major cities are open longer, and mail is collected later.

6. Careful surveys of window service at post offices and stations showed that consolidations could be effected during slack periods, without impairing necessary service, and service extended in busy periods. Significant manpower savings were made.

7. A program was initiated and expanded to many cities throughout the country to improve city delivery service through use of light, functional vehicles (Mailsters).

8. Extension of rural delivery services benefited 1,211,000 American farm families.

9. City delivery service was established in over 900 additional cities.

10. The increase in carrier service during the last 7 years has added the equivalent of 31,000 carriers to serve 9,011,000 more American families and upward of 700,000 business concerns. The post office has kept pace with our growing cities and our expanding economy.

11. During the 7 years, 5,659 independent post offices were discontinued or converted to other type postal facilities, and delivery service was provided by rural or city carriers, resulting in an annual saving of over $8,400,000.

12. Combination mail service was established (November 28, 1955) permitting the mailing of a letter inside a parcel.

13. Certified mail was introduced (June 6, 1955) providing important benefits of registered mail, including proof of delivery, at lower cost.

14. More equitable "surcharge" rates for high-value registered mail, and elimination of "nuisance" surcharges, have reduced mailing costs on exceptionally high-value shipments, and more effective internal safeguarding procedures have been established.

15. The filing and settlement of claims for lost or damaged insured and c.o.d. mail have been greatly simplified and expedited.

16. A simplified money order procedure was instituted, reducing patron time and effort in buying money orders.

17. Use of mail meters was simplified and made more convenient to the mailer.

18. Standard directories for the 106 cities where the postal delivery zone system is now in use have been made available to business firms and the general public. This permits speedier delivery with less handling.

19. New and simplified information pamphlets help the public help themselves to better mail service through promoting readable addresses, better packaging, the use of zone numbers, separated and bundled mail for local and out-of-town delivery, and early and frequent mailing during the business day.

20. Seventy-two easy-to-use parcel post zone guides have been prepared for free distribution to mailers. These guides permit mailers at 2,200 post offices, where 70 percent of our parcel volume originates, to quickly compute and affix postage to their own parcels prior to mailing.

21. Establishment of 55 postal services centers at as many large post offices has served to improve management and communication procedures in mail classification and customer relations. Each of these centers is now able to give mail classification and related information to the smaller post offices in their area. This speeds information to the public.

22. Provision was made for installing 4,500 automatic stamp-vending machines in lobbies of post offices to augment window service during regular business hours and to make it possible for mailers to purchase stamps when service windows are closed.

23. A revised work measurement system was established for post offices which combines, with the Department's historic systems, a new concept of individual measurement introduced in early 1960. This permits each man to pace himself and results in faster and less costly service.

Transportation

Transportation policies and practices have been geared to today's commercial transportation system and to the rapid changes taking place. Expenditures for transportation have been reduced substantially in per unit cost of service performed since 1953. Some of the major areas of advancement include:

1. A nationwide postal transportation study, the first of its kind since 1921, resulted in a nationwide integrated postal service plan (also referred to under Service Improvements). This plan is being used by the Department to weld the various transportation media, distribution centers, and post offices into the most up-to-date postal service system.

2. Combination highway-rail-highway service has been developed with large vans serving alternately on rail or highway. "Rail-van," "flexivan," and standard "piggyback" operations are being conducted on four railway systems operating in Illinois, Iowa, Wisconsin, Michigan, Minnesota, and South Dakota. Other types of containers for use on planes, trains, trucks, and steamers are being developed.

3. Since 1953, 300 truck routes have been added to meet compelling needs where rail service is no longer adequate.

4. Airlift of approximately 1.6 billion pieces annually of regular first-class mail over major trunk air routes provides improved service. Postal patrons in all 50 States and the District of Columbia are benefiting.

5. A system of paying only for space used on trains has eliminated the prior practice of paying for a substantial amount of space ordered but not used.

6. Special trains exclusively for mail and express have been established by seven railroads, at the Department's request, on schedules advantageous to the postal service, thus improving mail transportation for several metropolitan centers, including Chicago, Detroit, St. Paul, Boston, Albany, New York, and Washington.

Financial improvements

Postal rates have been raised and procedures have been streamlined and modernized for handling the flow of cash, and for budgeting, accounting and financial reporting.

1. The Congress enacted Public Law 85–426, sponsored by the Department. In Title I: Postal Policy, the Congress stated for the first time an overall postal rate policy. In Title II: Postal Rate Increases, the first general increase in rates in more than two decades was achieved.

2. Accounting functions have been centralized and mechanized in 15 regional controller offices at substantial overall financial savings. This has relieved postmasters of accounting, payrolls, and other fiscal duties and permits them to devote much more time to the operational demands of their post offices.

3. A direct-to-bank deposit plan was designed and installed nationwide, resulting in significant cost reductions. All post offices now deposit their surplus cash directly with Federal Reserve banks.

4. An improved cost accounting system permits better utilization of the 35,000 motor vehicle fleet.

5. Advance partial payments to railroads and air carriers were discontinued, which, with other procedural changes, have made current the submission and settlement of carriers' claims. Previously, the lag in full settlement for some cases was 2 years.

6. Money order forms and issuance procedures have been simplified resulting in stantial reduction in issuing and subsequently handling the 300 million orders annually. Print-punch machines will shortly be supplied to all points of issue, thus eliminating human error in processing, reducing possibilities of fraudulent altering and applying latest processing techniques to accounting.

Improving postal facilities

The introduction of modern, businesslike real estate practices and practical engineering concepts is changing the appearance of the Nation's postal facilities along with patrons' service and the postal workroom areas.

1. During this administration, private industry constructed or will have contracted to construct more than 4,300 new postal facilities, through employment of $185 million in private capital, for lease to the Department. These facilities remain under private ownership and the owner pays local real estate taxes.

2. In addition to new facilities, the Post Office Department's program of modernization and improvement is reflected in interior changes in many facilities throughout the Nation. Workroom space is being redesigned to accommodate new equipment for mechanizing mail processing, a standard feature of all new major mail handling facilities, thus assuring greatly improved mail service to patrons and more pleasant and healthful working conditions for postal employees. New counterlines, mechanical salesmen for postage stamps, postal cards, and airmail sheets, service areas available to the public 24 hours a day for the purchase of stamps, and elimination of old Victorian-type, floor-to-ceiling screenlines, are making

the lobby of today and tomorrow a pleasant place to do business.

3. Mechanical mail handling systems have been installed in 15 major mail handling facilities and bids are being considered for the installation of mechanical mail handling equipment in 14 others to expedite the flow of mail from receipt to dispatch. Through mechanization much of the tedious manual labor of mail handling is eliminated.

4. All vehicles procured since 1953 have been of standard commercial design at a large cost saving. At the present time, 85 percent of the fleet is composed of lightweight, highly maneuverable vehicles. More than 8,300 older, expensive-to-operate vehicles have been retired from the fleet.

5. The fleet of three-wheel, gasoline-powered Mailsters, now a familiar carrier conveyance throughout the Nation, will soon be supplemented by the addition of a limited number of newly developed electric Mailsters and parcel post delivery trucks.

6. The adoption of the red, white, and blue color scheme easily distinguishes collection boxes from carrier relay boxes; on vehicles, the white top decreases heat, the blue lower portion reduces cleaning costs, and the red reflective strip increases visibility to other drivers, thus reducing accidents.

7. From January 1953 through June 1959, hours of vehicle service increased 55 percent, miles of service 80 percent, and the number of post offices served by these vehicles doubled, with a fleet which has increased by only 60 percent.

8. A postal modernization fund was authorized by the Congress for the necessary improvements and extensions to our physical plant. The Department plans to make these extensions capable of handling the mail 20 years from now.

Personnel improvements

1. The Department actively participated in developing a modern postal pay system and has consistently supported wage increases whenever and to the extent justified. Culminating months of work, Public Law 68 was enacted June 10, 1955, providing the more than 500,000 postal field employees with fair wages, incentive to advance in the career service, and compensation directly related to the duties performed, based on sound salary structure. During the ensuing 5 years, the flexibility of this system has been demonstrated frequently, most recently in the transition from manual to machine mail processing at several large post offices, by permitting the establishment and ranking of many new positions without disruption of the basic pay structure.

2. Active support also has been given to worthwhile fringe benefits such as Federal employees' life insurance, more liberal retirement annuities, uniform allowances, and the new health benefits now being installed. Nearly 500,000 postal employees participate in the life insurance program, and almost as many are expected to take advantage of the new health benefits.

3. The nationwide safety program, initiated in 1954, has consistently reduced motor vehicle accidents and has been recognized by the National Safety Council in citation awards for outstanding contribution to traffic safety in each of the past 5 years. Industrial accident and fire prevention programs have also been developed with a substantial reduction in disabling injuries and fire losses.

4. A comprehensive training program has been utilized to develop employee capabilities in mail processing, safe work practices, and specialized technical subjects such as equipment maintenance and operation of new mechanized mail processing equipment. Postmasters and supervisors have been instructed in improved supervisory practices to assure better utilization of manpower resources.

5. The employee suggestion system was decentralized and procedures streamlined to assure effective, prompt consideration of employee ideas. During this administration, more than 200,000 employee ideas have been received and more than 20,000 have been adopted. In addition, over 5,000 employees have been recognized for their outstanding accomplishments through cash and honorary awards.

6. Efforts to attract and retain well qualified employees have succeeded. Ninety-six Civil Service Boards of Examiners, staffed with postal personnel at strategic locations throughout the Nation, have improved the quality of applicants selected and provided a reservoir of eligibles for appointment as the need arises. During fiscal 1960, almost 1 million applications for postal employment have been received. Modern testing techniques are being employed to determine employees' skills and to facilitate selection and promotion. An executive development program was inaugurated in December 1959 to meet long-range executive personnel requirements and to improve opportunities for career development and advancement among postal personnel.

7. Improved employee-management relations have been developed through the establishment of an Office of Special Assistant for Employee Relations in the Bureau of Personnel. Procedures and policies established have contributed materially to improved relations with national and local representatives of employee organizations. Effective employee grievance and appeals procedures assure prompt attention to employee problems.

Legal services

1. New rules have been promulgated for the administrative handling of fraud and obscenity cases, permitting speedier determination of issues while conforming to recent judicial interpretations of the Administrative Procedure Act.

2. A Board of Contract Appeals was established which has final administrative authority to resolve disputes concerning appeals by contractors from decisions by contracting officers.

3. Commercial insurance-type office procedures have been instituted for adjudicating and settling claims filed by private citizens, drastically reducing the time required to settle such claims.

4. Substantial success has been achieved in securing enactment of legislation to revise the maze of archaic and confusing laws which prevented the Postmaster General from operating effectively and economically.

Inspection service

1. The Department has stepped up its campaign to control the alarming increase in mail fraud schemes and in the volume of pornography in the mails. An all-out offensive has been instituted against these nefarious multimillion-dollar businesses under nationally coordinated programs which provide for close coordination with the Department of Justice and the United States Attorneys throughout the country. So far during this administration, arrests dealing with the fraud and obscenity statutes have increased 84 percent. Indications are that the previous record high of 8,859 arrests for all offenses, achieved in 1959, will be exceeded this year. Convictions of offenders brought to trial continue at a rate exceeding 98 percent.

2. During fiscal 1959, the Department completed 111,079 miscellaneous investigations and 52,387 audit inspections. This has meant 10 percent more miscellaneous investigations and 27 percent more audit inspections than were accomplished in fiscal 1953. Investigations during 1959 under the Tort Claims Procedures developed evidence in 178 major suits against the Government, which permitted settlement for $5,749,215 less than the aggregate amounts demanded by plaintiffs.

3. A broadened and more comprehensive internal audit program continued to produce improved benefits, combining continuous interchange of information between postal inspectors and internal auditors and joint consideration and evaluation of particular operating problems.

Mechanization, research, and engineering

A coordinated, broad-gage research and engineering program for mechanizing mail handling was inaugurated for the postal service. Highlights of advances made in this program include:

1. Construction of the world's first completely mechanized post office began at Providence, R.I., with site-dedication ceremonies on April 2, 1959. This multimillion dollar post office will make possible for the first time in the United States the complete mechanization of a "working" post office in a metropolitan area, handling all the functions of a conventional post office, while serving as a laboratory for advanced experimentation in mail handling methods and systems. A second facility of similar general character, contemplating even more advanced techniques in mechanization, is under planning at Oakland, Calif.

2. The transmission of letter mail by electronic means has been successfully tried and will be given a full-scale demonstration early this fall between Washington and Chicago.

3. Letter sorting machines have been developed and installed in several post offices.

4. Work is well advanced in developing address coding through the use of phosphorescent inks and magnetic materials, which will eventually enable letters to be coded and subsequently sorted by machines more speedily than by hand.

5. A machine to read addresses without aid of human eyes and to sort letters electronically without aid of human hands is in an advanced stage of development.

6. Machines have been developed which will automatically face letter mail and cancel stamps.

7. Systems have been developed to move mail by electrically driven conveyors and to eliminate wheeled and castered tables, trucks, and trays on the workroom floor.

8. Four types of semiautomatic parcel sorting machines have been developed and are being tested at post offices.

9. Postage vending equipment has been developed and installed in large post offices. Work is also being completed on an automatic postal substation which will vend not only stamps of several denominations but envelopes, post cards, writing paper, and booked stamps. This will make change not only for coins but also for paper money.

Public relations

1. No efforts have been spared to help the public make more effective use of postal services. Improvements in the mail service and new services have been continuously publicized in the press, in magazines, by radio and television, films and informational pamphlets, and by departmental representatives in speeches and public appearances.

2. A seven-member Citizens' Stamp Advisory Committee, comprising prominent artists, philatelists, and a representative of the U.S. Information Agency, has functioned efficiently in advising the Department on the selection and design of postage stamps. Every effort has been and is being made to issue commemorative postage stamps possessing genuine cultural and educational worth which will promote American ideals at home and abroad.

3. The Department has conducted during the past year an intensive nationwide crusade against obscenity in the mails, particularly that directed toward children. Most

national civic, parental, teacher, and religious groups have endorsed this crusade and are giving it their active support. Congressional support is also widespread, and more effective legislation assuring mandatory prison terms for dealers in obscenity is expected from the present Congress.

4. The need for increased postal rates has been emphasized through press, radio, and TV outlets.

BUSINESS MANAGEMENT IN DEFENSE PROCUREMENT BRINGS PROGRESS DURING THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator CARL T. CURTIS, of Nebraska)

Defense supply and logistics management includes a wide range of activities in support of our military national defense effort.

The defense support job requires the maintenance of an inventory range of over 3 million items, representing, at purchase price, $45 billion. This inventory consists of repair parts, components, and assemblies to support major equipments, such as tanks, ships, aircraft and missiles; food and clothing for men and women who compose our first line defense force; and the many thousands of other items necessary to support the military force. The original value of the tanks, ships, aircraft, missiles and other combat vehicles which this inventory must support totals $70 billion, a total combined inventory of $115 billion.

Purchases of material and services average about $25 billion each year. These purchases replenish inventories, provide new weapons and machinery, repair and maintain weapons and facilities, and provide research and development for continued improvement of the Nation's defense.

Supply and logistics functions of our defense efforts represent a volume and variety of activities which dwarf any group of the largest commercial enterprises.

During the past few years Defense has given renewed direction to the application of sound business management practices in this field.

Great support in this effort has been supplied by the Congress, the military departments, and numerous public-minded citizens and groups who have taken the time to understand this huge operation and its complexities, and have provided enlightened constructive criticism.

I would like to review for you a few of the accomplishments which are a part of the effort to have defense procurement and supply functions operate effectively.

Single managers

During the past year, four new commodity areas have been identified for application of the single manager concept.

This concept of supply management has proven itself through analysis and evaluation of its earlier application to subsistence, medical supplies, clothing and textiles, and petroleum commodity areas.

Significant economies have been achieved under these single manager agencies by the elimination of concurrent buying and selling:

Reduction of crosshauls and backhauls.

Integrated distribution operations.

Payroll deductions.

More economical procurement operations.

Stimulation of item reduction and standardization programs.

Analysis indicates current annual savings from these operating agencies amount to $14 million per year and a one-time identifiable savings to date of $339 million.

The four new single manager agencies, extending the use of this business management concept, encompass military general supplies, military industrial supplies, construction supplies, and automotive supplies.

Utilization of stocks in long supply

Utilization of defense long supply stocks within the Government, in lieu of new procurement, has reached new all-time levels through improved business management. For fiscal year 1960, it is expected that final tabulation will show a direct saving of 2 billion procurement dollars. This amount represents the cost of 10 Polaris submarines plus 2 conventional *Forrestal* aircraft carriers, or 200 B–52 aircraft. It is an interesting fact that in fiscal year 1958, $720 million worth of material was utilized from long supply stock. The utilization rate currently is nearly three times greater.

Surplus sales

Currently 350 surplus sales offices are operated by the military departments. These sales outlets are in the process of being consolidated to 35 interservice offices which will handle the surplus sales of all military departments within specified geographic areas.

In this same field a single Bidders' Registration and Sales Registration Office is being established to perform on a consolidated basis many functions which had previously been duplicated in the 350 surplus sales offices. Also a single joint disposal training program was initiated during July to bring further unity among the military departments in their management of surplus sales activities.

Reduction in inventory

During fiscal year 1958 a reduction of $3.7 billion in on-hand inventory was accomplished; in fiscal year 1959 this reduction amounted to an additional $3.6 billion; and when final reports are completed for fiscal year 1960 it is expected that a further reduction of about $3 billion will be achieved. This 3-year reduction in supplies held in warehouses would be equal to more than 15 times the total value of the inventory carried by Sears, Roebuck & Co.

The Defense Department has been able to improve its support capability with these reduced inventories even though at the same time more complicated and expensive major combat equipments have been introduced for operational use. This has been accomplished through refinements in inventory management techniques and buying practices introduced under sound business management concepts.

Procurement practices

The Armed Services Procurement Regulations put into operational effect laws governing the buying practices of the Defense Department and provide specific guidance for the varied conditions under which goods and services are purchased. Significant progress has been made in refinement of the defense procurement practices.

New cost principles have been promulgated which provide detailed and precise policy guidance for the treatment of allowable costs under contracts. These principles apply to all types of contracting and contract settlement situations. Application of these new principles is directed to more effective procurement and savings in contract costs.

Regulations have been revised to require contracting officers, prime contractors, and subcontractors to obtain and utilize the most current, accurate, and complete cost data. As evidence that this has been done, significant contractors must present a certificate to this effect and must secure a similar certificate from their subcontractors.

The military departments are now taking an active part in contractor "make-or-buy" decisions. By reviewing such decisions assurance is made that the military departments get the advantage of the most efficient production methods and that well equipped subcontractors have an opportunity to compete for this segment of defense business.

Stronger regulations have been in force to effect review of subcontracting and pricing systems of major contractors to assure that adequate competition is used, cost and price analysis are employed, and that small business and other procurement policies are followed. Such reviews have also been made applicable to individual contracts of significant size.

A complete revision to the procurement regulations pertaining to the use of formal advertising has been published. The revision reflects experience of the military departments and decisions of the Comptroller General in recent years.

Elimination of the need for the maintenance of hundreds of thousands of property record cards has recently been effected. Previously Government property under a contractor's control valued over $100 required maintenance of individual records. New techniques have been applied to provide proper accounting controls for the periodic review of the total value of such equipment. Record keeping has been confined to items valued at over $500, thus resulting in a one-third reduction in the volume of records maintained.

Communications

Recently a new Defense Communications Agency and system were inaugurated which have been recognized as a major forward step in this important element of defense logistics. The Agency will have operational control and supervision over the vast communications facilities of the three military departments. It will provide for a single centralized long-line system responsive to the total needs of the Department of Defense similar in concept and operation to that employed by the American Telephone & Telegraph Co. Total communications requirements will be reviewed by the Agency to eliminate duplication of facilities and to provide compatibility of equipment and service among the military departments to permit greater joint utilization of the system.

Great service effort

I have only portrayed to you a few segments of the supply and logistics effort to effect sound business management practices. There are many, many more covering the numerous defense support activities. This effort is being exerted on a regular and continuing basis. It is being applied to every phase of the defense supply and logistics activities. The results of these efforts in the improvement and more effective use of procurement funds and inventory assets is readily recognized by those who take the time to realize and understand this great support effort which serves to assure our national defense.

XXXV

CIVIL RIGHTS AND THE REPUBLICAN ADMINISTRATION

(By U.S. Senator CLIFFORD P. CASE, of New Jersey)

This Republican administration has been successful in its progressive sponsorship of the Civil Rights Acts of 1957 and 1960, the first major civil rights legislation in 82 years. These, and the following items, are a matter of record, not just hopeful promises, and they represent accomplishments in all fields of civil rights: Education, employment, housing, and the local administration of justice as well as the most important area of voting rights.

Summary of record in areas other than voting rights:

1. Created first U.S. Commisison on Civil Rights.

2. Created new Assistant Attorney General and Civil Rights Division of Department of Justice.

3. Made hate bombings and bomb scares a Federal crime.

4. Provided free public schooling for Armed Forces children when local schools closed due to segregation.

5. Created President's Committee on Government Contracts headed by Vice President NIXON to obtain compliance of Federal contractors to administration policy of free job opportunities.

6. Successfully advocated abolition of segregation in the District of Columbia.

7. Vigorously completed desegregation of Armed Forces and abolition of segregation in schools on military reservations in 1954.

8. Commenced litigation by Attorney General to eliminate segregation on public beaches in Biloxi, Miss., where Federal contract existed; participated in school desegregation cases; prosecuted local police abuses of the administration of justice.

9. Implemented administration's desegregation policy in federally assisted housing.

10. Desegregated interstate transportation.

11. Implemented desegregation and free job opportunity policies in assisting airport development and improvement.

The civil rights record of the Eisenhower administration represents a more progressive series of accomplishments, as opposed to promises, than in any previous Democratic administration, and certainly is not limited only to the important field of voting rights. In the past 3 years alone, the first two Civil Rights Acts in more than 80 years have become law under the sponsorship of the Republican administration. Aside from securing the important right to vote for all qualified citizens regardless of race or color, the Civil Rights Acts of 1957 and 1960 have:

1. Created in 1958 the first U.S. Commission on Civil Rights for the investigation of complaints of discrimination at elections and the study of the denial of equal protection of the law in areas of discrimination. The Commission's report in 1959 and its recommendations was one of the primary causes for the enactment of the Civil Rights Act of 1960.

2. Created a new Assistant Attorney General to head a new division of the Department of Justice for civil rights. The number of Federal attorneys carrying the administration's progressive civil rights policies into the courts has trebled over those earmarked for this purpose under Democratic administrations.

3. Made it a Federal crime to threaten "hate" bombings or execute them or even possess explosives with knowledge or intent that they may be used for such a purpose.

4. Provided for free public schooling for children of members of the Armed Forces, regardless of race or color, where local schools are closed to them.

In addition to these provisions of the 1957 and 1960 Civil Rights Acts which go beyond securing the right to vote, the following achievements of this Republican administration further demonstrates that the Republican Party is the party of progressive action instead of belated progressive talk in the field of civil rights:

5. On August 13, 1953, President Eisenhower established by Executive Order 10479, the President's Committee on Government Contracts, with Vice President NIXON as chairman. This order established a standard antidiscrimination clause for all Government contracts and authorized the Committee to follow all Federal funds going to private employers under Government contracts in order to obtain compliance with the administration policy of free job opportunity. This Committee has investigated almost 1,000 complaints of job discrimination by Government contractors and, on its own initiative, has surveyed several primary employment areas and through its action many employers have increased job opportunities for minorities. The effectiveness of this President's Committee would be far greater if it were not for a Democratic-sponsored amendment to permanent legislation which forces the Committee to work through Government agencies rather than directly in its own name.[1] The Republican Party platform for 1960 would remedy this, however, by giving the Committee a statutory basis for its program of nondiscrimination in private employment under Federal contracts.

6. On January 18, 1955, President Eisenhower ordered (Executive Order 10590) the creation of the President's Committee on Employment Policy, which is the first Committee created for the enforcement of nondiscrimination in Federal employment which reports directly to the President. The administration's policy of free job opportunity is stated clearly in this Executive order. Surveys conducted in 1956 indicated that approximately one-fourth of our Federal employees were Negroes and preliminary figures in a resurvey being concluded now indicate improvements in the upgrading of Negro Federal employees as well.

7. When the administration took office on January 20, 1953, in the capital of the world's greatest democracy, a Negro could not be served in white restaurants; he could not sleep in white hotels; and he could not sit with whites in many motion picture theaters. Action by the administration helped bring this disgrace to an end.

8. Vigorous executive action brought to completion the elimination of segregation in the Armed Forces and abolished segregation which remained untouched among civilian employees of navy yards and in veterans' hospitals.

9. The Republican administration has provided the Justice Department with a progressive Attorney General in the field of civil rights. Confirmation of the appointment of the Assistant Attorney General for the Civil Rights Division has been held up for approximately 6 months by the Democratically controlled Constitutional Rights Subcommittee of the Senate Judiciary Committee to which all civil rights matters go, which is headed by Senator EASTLAND, Democrat of Mississippi, the most outspoken segregationist in the Senate. Nevertheless, the Attorney General has been vigorous in his support of all litigation to safeguard individual equal protection of the laws as well as voting rights. Federal court action, for instance, has been instituted to stop segregation of the public beaches in Biloxi, Miss., on the basis of a Federal contract under which the beach was constructed, and the Attorney General participated in many school desegregation cases as a friend of the court. Since 1957, 23 State police officers have been prosecuted by the Justice Department for violations of the constitutional rights of prisoners, and 14 are presently on trial for such abuses in a Federal court in Florida.

10. The Housing and Home Finance Agency, which is responsible for the principal housing programs and functions of the administration, such as urban renewal, slum clearance, public housing, and home mortgage loan insurance, has refused since 1957 to approve or insure projects of builders who have been found to have violated local housing antidiscrimination laws. On August 14, 1959, HHFA Administrator Norman Mason announced that certification of future insurance of mortgages on low-cost homes for families from urban renewal areas would disregard the racial quota system used in the past. This enables all eligible displaced families to purchase or rent section 221 housing, irrespective of their race, and without allocation or quotas by color. The HHFA has also established a new requirement for an intergroup relations officer for urban renewal in each regional office of HHFA and in February 1960 announced that, before any locality can qualify for urban renewal benefits, it must establish a Citizens Advisory Committee to deal fairly with racial minority problems.

11. The Interstate Commerce Commission, in accordance with the progressive civil rights policy of the Republican administration, outlawed segregated passenger coaches and terminal facilities for Negro interstate passengers on November 7, 1955, in a historic ruling ending the separate but equal principle in interstate transportation subject to the Commission's jurisdiction. They also have received and investigated about 100 complaints of discrimination in interstate commerce in the last 8 years, 60 of which were handled in the last 2½ years.

12. The Federal Aviation Agency has issued a regulation, under its grant-in-aid program for airport development and improvement, that no Federal funds shall be available for participation in the development of terminals if such facilities are designated for use now, or in the future, on a segregated basis. The FAA has most recently begun to require localities contracting for airport development with Federal grant money to insert a nondiscrimination clause covering all jobs created by such contracts.

[1] Russell amendment to section 213 of 58 Stat. 337.

XXXVI

THE NATION'S ECONOMIC WELFARE UNDER THE REPUBLICAN ADMINISTRATION

(By U.S. Senator THRUSTON B. MORTON, of Kentucky)

The Republican administration has brought the Nation to the highest prosperity in history. More people are earning more and saving more and spending more; they are living better, eating better, getting a better education, and receiving better health protection, enjoying more leisure and more culture—enjoying, in short, a higher and happier standard of living than ever before.

Cold statistics tell the tale.

National wealth is up:

Gross national product: 1952, $347 billion; 1960, $505 billion.

Personal income: 1952, $301 billion; 1960, $406 billion.

Average personal income (all families and unattached individuals): 1952, $5,630; 1960, $6,600.

Financial assets of individuals: 1952, $373 billion; 1960, $956 billion.

Total investment in plant and equipment (nonfarm residential structures, mining (underground) structures, producers' durable equipment, private nonfarm inventories): 1952, $345 billion; $1960, $562 billion.

Ten million more families have moved into income brackets of more than $4,000.

Labor is far better off:

Total employment: 1952, 61.0 million; 1960, 68.7 million.

Compensation of employees: 1952, $195 billion; 1960, $295 billion.

Man-days idle through strikes: 1952, 59.1 million; 1960, 2.75 million.

Average weekly wage: 1952, $67.97; 1960, $91.20.

People are better prepared for a rainy day:

Savings deposits in banks, credit unions, postal savings, building and loan associations (yearend): 1952, $85 billion; 1960, $157.6 billion (1959).

Life insurance, average per family (yearend): 1952, $5,300; 1960, $9,500 (1959).

Number of persons with hospital insurance: 1952, 92 million; 1960, 128 million.

Number of persons covered under social security has gone up nearly 12 million.

People are living better:

Per capita consumer spending: 1952, $1,400; 1960, $1,760.

Percent owner-occupied homes: 1952, 56.8 percent; 1960, 64.0 percent.

Percent of homes that are substandard (either dilapidated or lacking inside hot and cold running water, flush toilet and bath for unit's exclusive use): 1952, 32.5 percent; 1960, 14.9 percent.

People have more leisure and travel more:

Average weekly hours of work in manufacturing industries: 1952, 41 hours; 1960, 40 hours.

Average length of vacation in private, nonagricultural sector: 1952, 2 weeks; 1960, 2.5 weeks.

Number of vacations away from home: 1952, 145 million; 1960, 185 million.

Attendance at national parks: 1952, 42,300,000; 1960, 71,045,000.

Motor vehicle registration: 1952, 53 million; 1960, 73 million.

New mileage of highways (in dollars) at all levels of government: 1952, $4,871 million; 1960, $9,977 million.

Dollars spent in travel abroad: 1952, $1,188 million; 1960, $2,550 million.

Education has moved forward:

Number of elementary and secondary schoolrooms constructed: 1952, 48,000; 1960, 69,600.

(Total: 1949–53 178,000; 1955–59 272,300).

Expenditure for equipment, per pupil enrolled: 1952, $6.04; 1960, $9.15.

Expenditures for public elementary and secondary schools in 48 States and the District of Columbia as percent of GNP: 1952, 2.23 percent; 1960, 3.28 percent.

Percent of population 15 years and up who completed high school: 1952, 35 percent; 1960, 41.7 percent.

Percent of population 20 years and up who completed college: 1952, 6 percent; 1960, 7.3 percent.

Enrollment in adult education: 1952, 2,564,870; 1960, 3,428,000 (1959).

Expenditures on church construction in the last 7 years have averaged close to $800 million a year; average in 6 previous years was $330 million. Even in constant dollars, up 60–70 percent.

All this has been achieved at the same time that inflation has been slowed down—from 48 percent in the Truman years to 11 percent in the last 7½. As the President said in Chicago, "There are more Americans employed at higher wages and with more take-home pay than ever before in our history. And today they have more confidence in the stability of their money than they have enjoyed in three decades."

XXXVII

PROGRESS REPORT OF FEDERAL HOME LOAN BANK BOARD DURING THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator HENRY DWORSHAK, of Idaho)

The basic responsibilities of the Federal Home Loan Bank Board are to establish policies, issue regulations, supervise and examine the operations of the Federal Home Loan Bank System, the Federal Savings and Loan System, and the Federal Savings and Loan Insurance Corporation. The Board was established by the Congress on July 22, 1932. Since August 11, 1955, the Board has been an independent agency.

Federal Home Loan Bank System

At the close of 1952, the Bank System was serving 4,028 savings and loan associations, or 67 percent of all operating associations. Their $21,258 million of assets represented 94 percent of all savings and loan assets. At yearend 1959, 4,599 members representing 74 percent of the Nation's associations, had assets of nearly $62 billion, or 97 percent of all savings and loan assets.

In 1952, these institutions made loans of $6,303 million. By the close of that year, they held savings of $18,075 million for some 12 million savers. In 1959, member institutions made loans totaling $15,058,988,000, or 40 percent of all loans made. At the end of that year, they held savings of $53 billion for over 25 million savers.

During the 7-year span between December 31, 1952, and the end of 1959, combined assets of the 11 district Federal Home Loan Banks went from $1,225,227,471 to $3,342,525,183; net income climbed from $8,625,076 to $28,099,490; and total paid-in and earned capital advanced from $349,900,757 to $937,066,221.

Since their establishment, the banks have loaned $12,631,306,155 to member institutions without a single loss; some $8,005,047,489 of this total was loaned to members between 1952 and 1959.

An aggregate of $11,300 million of consolidated Federal Home Loan Bank obligations has been marketed since the first issue in 1937. Of this total, $7,312,500,000 were sold during the 7-year span between 1952 and 1959. Consolidated obligations outstanding at the end of 1959 were $1,773,660,000, compared to $48,550,000 on December 31, 1952.

Federal Savings and Loan Insurance Corporation

Since the Insurance Corporation was created in 1934, no saver has ever lost a penny of the insured portion of his account.

The following comparative figures for 1952 and 1959 indicate the growth of the corporation's responsibilities:

December 31, 1952:	
Total assets	$213,691,312
Reserves and unallocated income	$120,484,832
Number of insured institutions	3,172
Assets of insured institutions	$19,656,012,000
Savings held by insured institutions	$16,732,018,000
December 31, 1959:	
Total assets	$348,650,270
Reserves and unallocated income	$328,339,191
Number of insured institutions	3,979
Assets of insured institutions	$59,549,987,000
Savings held by insured institutions	$51,160,057,000

Credit restrictions

The Federal Home Loan Bank System was designed to allow for expansion or contraction to business cycles and overall financial policies of the administration. The system went through a test of its flexibility in the fall of 1955. In September of that year, the Board, because of excessive demands for credit, imposed credit restrictions to curb borrowings from the Federal home loan banks for expansion purposes.

The Board's action was based on the conviction that the capital for mortgage loans must come primarily from new savings and monthly repayments of mortgages outstanding. While the credit facilities of the district banks are available to augment the ordinary flow of savings and mortgage repayments when necessary, advances for expansion purposes continue to be limited substantially in line with the restrictions of 1955.

Board regulations

1. Participation loan program: To encourage capital mobility and a flow of funds through association channels from areas of surplus into areas deficient in home mortgage funds, the Board, on March 29, 1957, adopted a regulation which permits insured savings and loan associations to acquire up to 50 percent participation in home mortgage loans originated and held by any other insured association. From the inception of the program through March 31, 1960, insured associations sold over $427 million of participating interests. By the close of the first quarter of 1960, 587 insured institutions had bought or sold interests in mortgages under this program.

2. Higher percentage loans: On October 23, 1958, the Board granted permission to Federal savings and loan associations to make conventional loans up to 90 percent of the appraised value on single-family homes, subject to certain limitations. This exceeds by 10 percent the previous maximum conventional loans that Federal associations could make. As of December 31, 1959, Federal associations had made 7,772 conventional home loans for a total of almost $107 million under this liberalized regulation.

3. Limitations on brokers: On November 27, 1959, the Board adopted a regulation limiting sales commissions paid to brokers by FSLIC-insured institutions. This regulation became effective January 4, 1960. The Board felt that an undue concentration of savings obtained by insured institutions through the use of brokers or similar intermediaries was potentially dangerous to their safety and soundness.

4. Regulations relating to dividend rates: During the opening months of 1960 the Board took three anti-inflationary steps to curb the rising trend of dividend rates:

(a) The Board proposed, on March 24, 1960, an amendment to increase the liquidity requirement for Federal associations and members of the bank system from 6 to 7 percent, effective March 1, 1961. The Board has the authority, under a law passed in 1950, to set the minimum liquidity requirement from 4 to 8 percent of shareholders' withdrawable funds.

(b) On March 29, 1960, the Board adopted an amendment which takes effect January 1, 1961, requiring that fees, discounts, and similar charges on loans be deferred and credited to income over a period of time and not be taken immediately into current income. Recognizing that the application of this regulation may present problems to some newly organized associations, the Board concurrently modified the "allocation to reserve" requirements of new associations.

(c) On April 18, 1960, the Board proposed an amendment which would prohibit the advance advertising of dividend rates by insured institutions more than 30 days before the beginning of any period for which the announced rate would apply. It would also require, prior to such advertising, a determination by an institution's board of directors of its ability to pay the new rate. If an association increased its rate, 15 days' advance notice would have to be given.

Examinations and supervision

Among the Board's responsibilities are the examination and supervision of all Federal savings and loan associations. It also examines, either independently or jointly with State authorities, all State-chartered institutions insured by the Federal Savings and Loan Insurance Corporation. The time period between examinations has been steadily reduced and is now approximately 12 months. In 1952, examinations of Federal associations were made about every 18 months, and of insured State associations about every 14 months on the average.

In its efforts to reduce the cost of examinations, the Board in 1953 and 1954 made seven distinct reductions in the examining procedures. The average man-days of examination time for each million dollars of assets have been declining each year. In the fiscal year ended June 30, 1952, the average man-days per million dollars of assets were 3.86, compared with 2.45 in 1959.

XXXVIII

SUMMARY OF MAJOR ACCOMPLISHMENTS IN THE COOPERATIVE FARM CREDIT SYSTEM DURING THE REPUBLICAN ADMINISTRATION, 1953–60

(By U.S. Senator HOMER E. CAPEHART, of Indiana)

I. Legislative accomplishments

Beginning with the Farm Credit Act of 1953, a series of laws have constituted major steps in increasing farmer participation in ownership, improving credit service, reducing Federal Government investment and subsidies in the system, and strengthening the system in other ways. Important features of each law are summarized below.

A. Farm Credit Act of 1953 (Public Law 202, 83d Cong.):

1. Established congressional policy of increasing borrower participation in ownership of the Federal Farm Credit System.

2. Again made the Farm Credit Administration an independent agency in the executive branch of the Government.

3. Improved coordination through changing the basic organization of the Governor's staff.

4. Increased farmer participation in the management and control of the Farm Credit System through establishment of the Federal Farm Credit Board and through an increase in the elected members of the district farm credit boards.

5. Provided for increased decentralization and for delegation by the Farm Credit Administration to the Federal land banks and the production credit corporations (FICB's after January 1, 1957) of certain powers and duties of the administration over the Federal land bank associations (formerly national farm loan associations) and the production credit associations.

The 1953 act was the foundation for the subsequent laws. It restated the objectives of the cooperative system, and directed the Federal Farm Credit Board to make recommendations of means for carrying out these objectives. The following acts were based on recommendations made by the Federal Farm Credit Board.

B. Farm Credit Act of 1955 (Public Law 347, 84th Cong.):

1. Federal land banks:

(a) Loan service of land banks to part-time farmers was expanded; more than 30,000 loans amounting to about $160 million were made to part-time farmers through 1959.

(b) Permitted land bank loans to be closed on the basis of appraisals by land bank designees.

(c) Eliminated the restriction that loans to farming corporations be limited to livestock operations so that land banks may make loans to closely held or family type farming corporations. Loans totaling about $24 million were made to 387 such corporations through 1959.

(d) Increased the land bank loan limit from $100,000 to $200,000. Since the 1955 act, about 777 loans were made for amounts exceeding $100,000.

2. Production credit associations:

(a) Authorized the production credit associations to pay dividends on class A (investment) stock without requiring like dividends to be paid on class B (voting) stock.

(b) Removed restrictions on guaranty funds of production credit associations, thereby giving the associations more freedom in the use of their capital funds to meet the credit needs of their members.

3. Banks for cooperatives:

(a) Provided a plan under which the borrowers from the banks for cooperatives will gradually acquire ownership of the banks and retire all Government-owned stock in the banks.

(b) Provided for retirement of Government-owned stock in the banks through quarterly stock purchases by borrowers and from net savings of the banks.

(c) Reorganized the Central Bank for Cooperatives and provided for election by its borrowers and by district banks for cooperatives of three members of the seven-member board of directors. Directors not so elected are appointed by the Governor.

C. Farm Credit Act of 1956 (Public Law 809, 84th Cong.):

1. Merged the production credit corporation in the Federal intermediate credit bank in each farm credit district, thereby simplifying the district organization and effecting a saving in operating costs.

2. Provided a plan under which production credit associations will gradually acquire ownership of the credit banks and retire all Government-owned stock in the banks.

3. Authorized the distribution of credit bank earnings on a patronage basis to the production credit associations and other financing institutions (OFI's). Patronage dividends must be paid in stock (to production credit associations) or participation certificates (to OFI's) as long as there is Government capital in the banks, but thereafter such dividends may be paid in cash.

4. Authorized each district bank to borrow from and lend to each of the other district banks.

5. Authorized the credit banks to discount or purchase loans with maturities up to 5 years.

6. Broadened the purposes for which production credit association loans may be made.

7. Removed the credit banks from budget control under the Government Corporation Control Act, effective January 1, 1959. This gave the credit banks the same authority as the land banks and the banks for cooperatives to expend corporate funds without regard to certain restrictive statutes.

D. Farm Credit Act of 1959 (Public Law 86–168, 86th Cong.):

1. It transferred from the Farm Credit Administration to the Federal land banks responsibility for making appraisals in connection with Federal land bank loans. The designee program was retained but the requirement of a second appraisal was repealed. It transferred land bank appraisers from the Farm Credit Administration to the land banks, except that certain appraisers were retained by the Farm Credit Administration on the staffs of the Chief Reviewing Appraisers, to be known as farm credit appraisers.

The 5-percent interest rate limitation on farm loan bonds was repealed.

3. The $200,000 maximum loan limit applicable to land bank loans was repealed but loans exceeding $100,000 continue to require Farm Credit Administration approval.

4. The face amount of a land bank loan may exceed 65 percent of the appraised normal value of the farm by the amount of stock which is paid for out of the loan.

5. The names of the national farm loan associations and the secretary-treasurers of such associations were changed to "Federal land bank associations" and "managers" respectively.

6. The Federal land banks were authorized to make unamortized or partially amortized loans under rules and regulations issued by the Farm Credit Administration.

7. The status of employees of the Farm Credit banks was clarified and employees of the district banks are exempt from the provisions of civil service laws and rules and regulations and various other laws relating to Federal employees.

E. Other legislation:

1. Banks for cooperatives: (a) Authorized the Central Bank for Cooperatives and regional banks for cooperatives to issue consolidated debentures.

(b) Enlarged the Board of Directors of the Central Bank for Cooperatives to 13 members.

2. Federal land banks (Public Law 55, 84th Cong.): (a) Authorized Federal land banks to purchase certain remaining assets of the Federal Farm Mortgage Corporation.

3. Developments and improvements in loan service: Many improvements in credit service resulted from the foregoing legislation. The developments and improvements listed below are partly the result of and partly in addition to the authorities and changes provided in the legislation.

(a) Credit extended reached peak levels. Total amount loaned by all banks and associations, excluding interagency loans and discounts, increased from $2.2 billion in 1953 to $4 billion in 1959. Loans outstanding December 31 increased from $2.2 billion to $4.4 billion during the same period. The enclosed report, "Loans and Discounts of Farm Credit Banks and Associations," gives these data by years from 1932 to 1959.

(b) The total volume of bonds and debentures issued, the principal source of funds used in making loans, reached peak levels, increasing from $1.4 billion in 1953 to $3.3 billion in 1959. This period provided a good test of the ability of the banks to market their securities under varying conditions ranging from recession and credit ease to high levels of business activity and credit restraint. No applicants were denied loans because of a lack of funds during this period.

(c) The making and discounting of intermediate-term loans for capital purposes such as machinery, farm improvement, and foundation livestock were tried out experimentally in 1954 and approved on a permanent basis in 1956. By June 30, 1959, such loans had grown to a total which constituted about 12 percent of all loans held by the Federal intermediate credit banks.

(d) In 1956 production credit associations, on an experimental basis, began entering into agreements with purchasing cooperatives to help finance their members when buying supplies. Such arrangements have now been made with hundreds of supply cooperatives and a number of independent supply dealers in several Farm Credit districts.

4. General operating improvements: As in the case of developments in loan service, improvements in other phases of operations have resulted partly from the legislative changes and partly from administrative action.

(a) In accordance with the 1953 act, numerous delegations of authority have been made by the Farm Credit Administration to the Federal land banks and to the production credit corporations (and Federal intermediate credit banks since they were merged under the 1956 act). These delegations have had the effects of streamlining operations and reducing the personnel required in supervision of the system.

(b) Although the work has increased, indicated by a doubling of the total loan volume outstanding, substantial reductions in personnel employed have been made in both the Farm Credit Administration, the supervisory organization, and the banks and associations supervised. The changes in both the number of employees and in the workload from December 31, 1953, to December 31, 1959, are shown in an enclosed table. The table shows further that the budget for the Farm Credit Administration appropriated by the Congress (but assessed against the Farm Credit banks) likewise decreased during this period of doubled loan volume.

(c) Major adjustments of standards used in appraising farms for land bank loans, in order to adapt loan policy better to changing agricultural conditions, were made in 1954 and 1958.

(d) Although substantial amounts of Government capital in the banks and associations were repaid to the Treasury, their total net worth was increased:

[In millions]

	Dec. 31, 1953	Dec. 31, 1959	Change
Government capital	$277.2	$219.2	−$58.0
Farmer capital	185.4	336.4	+151.0
Surplus and reserves	531.9	650.2	+118.3
Total net worth	994.5	1,205.8	+211.3

XXXIX

CIVIL RIGHTS—AT HOME AND ABROAD

(By U.S. Senator HIRAM FONG, of Hawaii)

Ethnically, Hawaii is composed of many nationalities. The early settlers were the Polynesians. Caucasian sailors, adventurers, whalers, traders, and missionaries were second comers. Then followed Chinese contract laborers recruited to work the sugar plantations as the Hawaiians were not inclined to hard labor.

With the annexation of the islands to the United States in 1898, Chinese labor immigration was completely prohibited as the laws, which were then in force excluding Chinese laborers to the United States, were made applicable to Hawaii.

Japanese contract laborers in great numbers were also imported from 1885 until their exclusion in 1924.

Portuguese, Swedes, Germans, Koreans, South Sea Islanders, Puerto Ricans, and Filipinos also comprised immigrant groups brought in for the cultivation and the processing of sugar.

From these heterogeneous and diverse ethnic groups has evolved a homogeneous community—a community which has been termed by students of sociology as a "Twenty-first Century Society," where racial harmony and cooperation are normal and accepted conditions of life. This spirit of working together pervades civic, business, political, and cultural endeavors. There is sincere respect for, rather than mere toleration of, each other's nationality, traits, characteristics, and cultures.

Living in an island paradise, tropical and balmy, with high standards of health and livelihood; with a good, free educational system; a stable, democratic government; where no group constitutes a racial majority; with peoples on one hand steeped in Christian Puritan outlook and justice, and on the other, imbued with Buddhist and Confucian philosophies stressing human and moral conduct; cemented together and mellowed by the generous openheartedness and carefree aloha spirit of its native Hawaiian people, we in Hawaii would like to believe that we are giving life to a community approaching the ideal of a world at peace and in concord.

Hawaii: A showcase of brotherhood

President Eisenhower said to the people of India during his recent trip, "Hawaii cries insistently to a divided world that all our differences of race and origin are less than the grand and indestructible unity of our common brotherhood. The world should take time to listen with attentive ear to Hawaii."

Hawaii is indeed a showcase for true brotherhood. Elsewhere, even as in ancient days, massive discrimination continues to blight human relationships. Our news media carry daily evidence of man's inhumanity to man, evidenced by oppression, fear, hatred, bias, and discrimination in all quarters of our globe.

Behind the Iron and Bamboo Curtains, religious and political persecution persist. In Tibet, the Red Chinese regime continues mass genocide of the civilian population. Large numbers of people still flee East Germany and Red China, at risk of life and limb, to seek sanctuary in more tolerant oases. Anti-Semitism and anti-Christianity erupt as atheistic communism seeks to wipe out religious worship.

Belligerent nationalism is more the rule than not in modern struggles to throw off the yoke of colonialism. Too often such nationalism provokes wholesale bloodletting, with guns replacing ballots as the means of attaining parity and settling disputes.

Unmindful of man's growing yearning for equal status, many cling to senseless caste systems of the discredited past. As in South Africa, the ruling race shocked the world with its brutal methods to enforce apartheid.

There is something barbaric in today's repression of man's natural passion for equity.

We face up to civil rights

Here in the United States we are not yet purged of intolerance and prejudice. Denial of voting rights; desecration of churches, schools, and public buildings; discrimination in employment and in public accommodations point up the urgent need for further progress in learning to live peaceably together. In connection with recent sit-down demonstrations at lunch counters, it is significant to note that many whites who object to Negroes sitting as customers on one side of the counter do not object to Negroes on the other side of the counter cooking and serving the food they eat. Irrational from a standpoint of logic, this attitude is bewildering from a standpoint of emotion as well.

In our glass house that is America, our discrimination and bigotry are in full view of a critical world. We receive considerable adverse comment for our shortcomings—and perhaps not enough recognition for the undeniable progress we are making. Unlike some of our critics, we are not sweeping our problems of civil rights under the rug. We are facing up to them.

Vote on civil rights represents majority

This year, in the Senate of the United States, 100 representatives of 179 million Americans aired our civil rights disagreements in public over a period of 8 weeks. If ever opinions were thoroughly ventilated, these were. And when all the smog had lifted, what was the outcome?

Of the 100 Senators, 82 supported passage of corrective and progressive civil rights legislation. Only 18 voted for the status quo.

In school, we usually consider 70 a passing grade. While 82 may not elevate us to honor roll, it certainly is a very respectable score.

In terms of public sentiment, the 82 percent of the Senate favoring this year's civil rights bill represents a sizable majority of American people. Without such widespread approval, this civil rights milestone would not have been achieved. Although the bill does not go far enough to suit some people and goes too far to suit others, it does denote real progress.

To those who are impatient with our speed in achieving true brotherhood, let me point out that, until 1957, more than 80 years elapsed without passage of a single significant civil rights law. Now, just 3 years later, we have enacted a second major civil rights statute. Unquestionably, this reflects significant transformation in American attitudes.

In many areas of the United States, of course, we still have not matched the tolerance found in Hawaii where acceptance, without regard to race, color, or creed, and based on individual merit and standing, is the general rule—the unwritten rule. Acceptance comes from the heart. It is not superimposed by such means as legislation, judicial process, or promotional campaigns.

XL

OUR DEFENSE POSITION—PRESENT AND FUTURE

(By U.S. Senator LEVERETT SALTONSTALL, of Massachusetts)

Before we return once again to our homes, it may be helpful to submit to you, to the Congress, and to the people, a review of the state of the Nation's defenses.

Since Congress completed action on the fiscal year 1961 appropriations bill there has been continued discussion at home about our defense adequacy and continued tensions abroad as the cold war has entered a new phase of Communist arrogance.

Congress adjourned for a brief 4 weeks, dominated by the national conventions of both parties. Trouble in the Belgian Congo quickly reached serious dimensions, and Premier Castro's government heightened its animosity toward the United States and its identification with the Communist bloc. The Soviet Union blatantly charged our Government with aggressive invasion of its air space, and now fans the world's fears and suspicions with its dramatization of the trial of American pilot Francis Gary Powers.

We returned to Washington with the hope of taking earnest and constructive action on needed legislation. Shortly we shall finally adjourn the 86th Congress and return home for the rigors of a nationwide election campaign.

I believe that it would be particularly appropriate and helpful at this time, to review briefly our defense position, present and future. A concise, balanced analysis of our defense preparedness is called for, not only by the nature of the current international situation, but also by the inevitable commentary of the political campaign ahead of us.

With respect to our present defense position, I think it is generally agreed among informed observers that this country's military strength is clearly superior to that of any potential aggressor. We believe our forces to be capable of deterring thermonuclear general war and of coping successfully with so-called limited conflicts, emphasizing the use of conventional forces, should they break out. In fact, it was with some interest that I noticed that Mr. Robert Sprague and Dr. James Baxter, when they appeared before Senator JACKSON's Subcommittee on National Policy Machinery, testified that they felt our present military strength was not only awesomely great in an absolute sense, but that it probably represented an alltime high relative to the military strength of the Soviet Union.

This conclusion is inescapable to anyone who considers objectively the size and high state of readiness of our forces, the effectiveness and diversity of the weapons systems with which they are equipped, and the experience and dedication of our soldiers, sailors, and airmen.

Our strategic retaliatory forces now consist of 12 wings of B–52 intercontinental attack bombers and 25 wings of B–47 jet bombers, widely dispersed and well supported by a large fleet of refueling tankers. The planes and men of the Strategic Air Command represent a force unmatched in world history in experience, training, and combat power. SAC's already great effectiveness is being considerably enhanced at this very moment as the first units of the B–52 force are equipped with the Hound Dog air-to-surface missile. Supplementing the almost unimaginable destructive power carried by these bombers of the Strategic Air Command are operationally ready Atlas intercontinental ballistic missiles.

Also, within the next few months the first two Polaris-firing nuclear-powered submarines will be combat ready—at sea with missiles aboard. This schedule was assured by

the recent dramatic and highly successful underwater test firings of the U.S.S. *George Washington*. The Polaris system, of course, has brought a wholly new dimension to our strategic retaliatory power in terms of mobility, concealment, and near invulnerability to enemy missile attack.

Basic to the projection of our military power overseas in situations of limited conflict, as well as important to our general war strength, are the Navy's four great fleets built around modern attack carriers and the tactical fighters and missiles of the Air Force deployed in forward areas. These, together with the 870,000 men in the Army and 175,000 men in the Marine Corps, either deployed overseas or in reserve in this country, constitute a balanced and highly effective force capable of rapidly containing or of defeating local aggression in distant parts of the world.

Our present military strength is not only well known to the members of the free world it is dedicated to defend, but also appreciated by those nations whose aggressive impulsiveness it is intended to deter. But, present strength is not enough; the real question we must address ourselves to is not present but future proficiency—"Will we be strong enough in the years ahead?"

By way of providing some needed perspective, let me cite a brief historical case study. A few years ago, it was charged our defense programs were not adequate to provide the military strength we would need in 1958–60. But the predicted "bomber gap" never materialized. The same dire predictions were made over the superior development of Russian nuclear-powered submarines. But, on the contrary, our own B–52 fleet has increased from less than 1 fully equipped wing then to 12 at the present time. They now represent a force several times larger than the estimated Soviet long-range heavy bomber force and possess capabilities far superior to those of the B–36 bomber force upon which our strategic air strength depended in those days.

Similarly, our present continental air defense system against manned bomber attack is the best in the world. We have many more true all-weather fighters than the Soviet Union—contrary to the popular predictions of 4 years ago—and a highly sophisticated electronic control and warning system. Our present surface-to-air missile defenses are constantly improving. It is doubtful that the Soviet Union has any nuclear-powered submarines. We have 10 nuclear-powered submarines in the active fleet, and well over 30 other nuclear-powered warships are now authorized or under construction.

The fears expressed in 1956 that America would not be prepared in 1960 were unfounded. Now there is general agreement that our Defense Establishment is the best in the world today.

But today persistent viewers-with-alarm tell us that we will not be prepared 3 or 4 years from now. The fact is that we are moving ahead on many programs—land, sea, and air, atomic and conventional power, nuclear weapons, and conventional weapons, missiles, and aircraft, ships, and land vehicles. We are strengthening simultaneously our Army, Navy, Marine Corps, and Air Force. The totality of power must impress any fairminded and responsible citizen.

Naturally, in improving these defenses, we have had to recognize a system of priorities of programs. First things have had to come first. And top priority ratings have produced such miracles as the nuclear submarines and their Polaris armament.

The Soviet Union, too, has been forced to allocate limited resources among many competing demands. All nations have to live with the program of allocating limited material and manpower resources.

Some voices have been raised in our land for a feast-or-famine approach to the Nation's defenses. The President has chosen to ignore that siren song in favor of a policy of building strength for the long haul, of maintaining a steady level of effort while continually adjusting its programs to the rapid changes which are taking place constantly in military technology.

We have worked continually to modernize our forces and at the same time have pressed vigorously for the development of the weapons of the future. The President has steered wisely between complacency and weakness on the one hand, and wasteful crash programs on the other.

We can never be complacent about past experience in successfully evolving one's programs to provide a continuing military superiority, when the question before us is still the future. The situation in the summer of 1960 obviously is not the same as it was in 1956. There are great new dangers as well as new opportunities in our position relative to that of the Soviet Union. It is only natural, in view of the collapse of the summit conference in May, more recently the abandonment by the Soviet Union of its participation in the general disarmament conference, and the "increased truculence" of the Communist bloc generally which the President has mentioned, that the question should be raised whether our present programs and funds are adequate to insure our safety in the coming years. In order to serve the national security, it is not only natural, it is necessary to examine these questions.

There has been in recent weeks much discussion as to (1) whether Congress appropriated sufficient funds to maintain our security and to make it clear to the world that we were so strong that no nation would dare to attack us for fear of our ability to retaliate devastatingly, (2) whether the funds appropriated by Congress are being wisely obligated and expended; and (3) whether there is more money needed to be appropriated to make certain that our defenses are adequate and that the research and development of new weapons is sufficiently provided for. These are important questions.

In general, I believe that the defense policies which have served us so well in the immediate past are equally applicable to the coming years. We still need a relatively stable level of effort on a high enough plateau to maintain adequate protection until some less precarious and more permanent understanding is reached with the Soviet Union.

More specifically, we will have continually to adjust our forces and programs to the rapid progress in military technology and to take the steps necessary to maintain a mixed force of retaliatory weapons systems safe from surprise attack, as well as versatile and mobile forces capable of dealing rapidly with situations of limited conflict. The 1961 budget provides funds dedicated to meet these objectives.

What kind of Armed Forces does this fiscal year 1961 defense appropriations legislation provide: For our strategic retaliatory forces, additional B–52H heavy jet bombers will be purchased to permit equipping of the 14th wing. Enough B–58 supersonic medium bombers will be procured to complete the equipping of three wings. More KC–135 jet tankers are also provided to modernize further our airborne refueling capability. Additional Hound Dog air-to-surface missiles are being ordered for our B–52 force, as well as Quail decoy missiles.

In active development is the Sky Bolt air-launched ballistic missile. This will have about double the range and many times the speed of the present Hound Dog missile. Its successful development would strengthen greatly the capabilities of the heavy bomber force and would considerably extend its useful life. In fact, the B–52 carrying Sky Bolt missiles represents a powerful combination of the advantages of the manned bomber—flexibility and weight of attack, with the advantages of the ballistic missile—speed and inflight invulnerability.

The 1961 Defense Appropriation Act also contains about $260 million to continue the development of the B–70 intercontinental heavy bomber, designed to fly at three times the speed of sound.

With respect to our strategic missile strength, this year's budget provides for an increase of more than one-third in the number of Atlas and Titan ICBM squadrons and, in addition, for the substantial augmentation of the last six of the Atlas squadrons.

Development effort on Minuteman will also be increased. This missile, because of its reduced cost, short reaction time, and mobility, is expected to become an important part of our nuclear retaliatory forces by the mid-1960's. Deployed in large numbers in hardened, well-dispersed underground sites and on moving railway cars, Minuteman will be a nuclear strike force of tremendous power and speed.

Funds are also provided this year toward the procurement of 12 more Polaris submarines. These submarines, because of their ability to utilize the ocean depths of the world for mobility and concealment, represent a near-invulnerable weapon system, and one which presents any aggressor with the virtual certainty of a deadly counterblow. I would like to point out, contrary to the impression in some quarters, that the Polaris program has not been held back. In fact, this program is now about 3 years ahead of its original schedule.

But the significant increase in our offensive aircraft and missile strength is only part of the story. As Secretary Gates stated to the Senate Committee on Appropriations when he came before us this past February:

"Our first concern is how best to assure our continued capability to retaliate effectively to surprise attack, at a time when the U.S.S.R. could have in its possession a large number of intercontinental ballistic missiles, in addition to a significant number of manned bombers.

* * * * *

"The solution lies in a whole complex of related measures, each of which in various degrees contributes to the establishment and maintenance of an assured retaliatory capability. These are: improved warning against both missile and aircraft attack, reduction of reaction time, dispersal, protective hardening, concealment, and mobility for our weapon systems; and, as soon as practicable, an effective active defense against ballistic missiles as well as aircraft."

A number of these objectives are met by the 1961 aircraft and missile programs which I have just described. The 1961 defense budget also makes provisions for the other necessary measures.

As General Power, head of the Strategic Air Command, testified, it is not now necessary actually to fly a continuous airborne alert. Funds are provided, however, for the Strategic Air Command to acquire the capability for such an alert, if and when needed. This precaution will serve to reduce significantly the vulnerability of SAC during periods of heightened international tension.

The first Ballistic Missile Early Warning Station is expected to be in operation within just a few months. Funds are provided this year to accelerate the completion of the two other stations in the system. When this system is operational, that portion of the Strategic Air Command on ground alert will have 15 minutes of warning which will give

them time to get into the air and to avoid destruction on the ground from a surprise enemy missile attack.

Development of our military satellite systems is also being accelerated with funds provided this year. The Midas infrared warning satellite will provide even earlier warning of an enemy missile attack than BMEWS, and Samos will do much to supply needed military reconnaissance information and to detect signs of an impending attack.

Research and development on the Nike-Zeus antimissile missile will also go forward at a higher level than ever before in an effort to perfect an active defense against ballistic missile attack.

The Navy will construct another new, large, modern attack aircraft carrier with 1961 funds. This will provide a highly valuable addition to our ability to cope with limited aggression in the distant areas of the world.

A large number of vessels for antisubmarine warfare have been funded in this year's Navy shipbuilding program and funds for research in this field have also been increased.

The Army's ability to meet its responsibilities likewise will be considerably enhanced by the funds made available in the 1961 budget. The procurement of F–105 tactical fighters by the Air Force for close support of Army ground forces in the field, of airlift aircraft to enhance their long-range mobility, and Army procurement of modern rifles, machineguns, tanks, trucks, missiles, and self-propelled artillery, all received sharply increased funding this year.

For military functions of the Department of Defense, Congress, on June 30, approved a total of $39,996,608,000. This was $661,608,000 in excess of the amount submitted in January by President Eisenhower. For military construction in the Department of Defense, Congress, on July 1, approved a total of $994,855,000. This was $193,145,000 less than the President requested in his January budget.

As President Eisenhower pointed out in his press conference on Wednesday, August 10, 1960, funds requested in the budget amounting to approximately $1,100 million for certain purposes were not appropriated and on the other hand approximately $1,750 million were appropriated for purposes that the Defense Department had not originally planned.

As Secretary Gates has assured Congress in recent letters to the Senate majority leader, Senator JOHNSON, and the chairman of the Appropriations Subcommittee on Defense, Senator CHAVEZ, the Department of Defense plans to utilize the great part of the funds provided by Congress immediately.

Adequate time is required for making new plans in order to see that additional funds provided by Congress above the budget request are properly and effectively obligated for spending. Therefore, certain funds are reserved until these programs can be worked out and put to use for urgent future requirements as they develop. As the President has emphasized, this does not mean that the money has been impounded. It does mean that careful plans must be made before the millions involved can be expended thoughtfully.

Among the programs to which additional funding will be applied are: Strengthening of the SAC airborne alert capacity, Army modernization, the B–70 supersonic bomber, the Samos reconnaissance satellite, the Polaris program, and modernization of the airlift fleet. Some of these actions had been indicated in funds appropriated by Congress and others had not.

As Secretary Gates explained in his letter to Senator JOHNSON dated August 9, 1960:

"With respect to the funds not yet apportioned and the items 'apportioned but undergoing review,' I am sure you appreciate that not all service programs are ready to go forward at the time the bill is enacted into law. For many reasons—technical difficulties, changes in concepts, lack of definitive plans—additional time is frequently required in order to assure the development of valid programs. ' As a matter of good business practice, we must assure that the requirement is still valid in the light of present circumstances, and that all significant aspects of the program have been properly worked out before the funds are released."

In addition, as President Eisenhower announced in his special message to Congress of August 8, numerous "practical" actions had already been ordered toward improving "the readiness and posture of our military commands." These included the deployment of additional aircraft carriers to the 6th and 7th Fleets, the retention of a number of B–47 medium bombers and tankers and an increase in the number and scope of ground forces' strategic and airborne exercises.

In considering the question of whether additional preparedness funds are needed at the present time, it is important to look at the Defense appropriations bill to see what opportunities it provides the Secretary of Defense to enable him—as the chief administrator directly in charge of our ultra-complex Defense Establishment—to continuously assure maximum security according to the changing priorities of our political-military environment.

In order to assure that no weapons program could suffer from lack of funds while Congress was not in session, an emergency fund of $150 million is provided in the legislation for application to any research and development or procurement account of the Army, Navy, Air Force, or Defense Department whenever the Secretary of Defense deems it necessary to speed up that particular program. Congress also provided transfer authority of $150 million through the emergency fund which can be used to accelerate any needy program. Furthermore, the Congress made available in section 535 an additional $150 million transfer authority for the acceleration of missile or satellite programs that the Secretary of Defense deems advantageous to the national defense.

In addition, each year the Department carries forward to the next budget some billions of dollars of unobligated balances. These balances are earmarked for specific projects, but, for various reasons, may not be obligated. In the current budget, it is expected there will be approximately $6.3 billion of balances unobligated during fiscal year 1961. Within certain procurement limitations, these funds can, if it is wise and necessary, be reprogramed with the consent of the Appropriations Committees of the Congress. For instance, if more money is needed for a Polaris submarine and there is an unobligated balance in Navy ship construction accounts, these funds could be transferred for this purpose. Or, if it was considered wise to proceed with more procurement of the Minuteman missile, funds could be reprogramed from other Air Force missile programs. The use of these unobligated balances thus provides a certain amount of additional flexibility to our Defense Establishment for procurement purposes.

Through these allowances permitting transfer of funds for research, for procurement and for acceleration of programs, the Congress has given the Defense Secretary broad authority. Furthermore, Congress has approved section 512A, a provision authorizing the President to permit the Defense Department to obligate appropriated funds at a faster rate than now planned whenever he deems such action to be necessary in the interest of national defense. Section 512B permits the President to provide for all the costs of an airborne alert on an actual deficiency basis if necessary. Although section B is little known and has not yet been used, it is highly important for it is another step that Congress has taken to assure that our defenses will not suffer for lack of funds in those areas where high priorities exist and emergencies can develop.

Aside from programs specifically provided for by congressional appropriations and the further authority of the President and the Secretary of Defense to administer their activities with freedom and flexibility, our Defense Establishment cannot meet the revolutionary challenges of the future unless it can and will move quickly for new funds with which to implement new policies at the time they are needed. I believe the record is clear that the present administration will come to Congress for more funds if and when they are necessary.

As President Eisenhower said in his August 8 message:

"Total resources are adequate, although a modest increase may prove to be necessary to carry out the readiness measures. If such an increase should be required, I shall promptly request the necessary funds.

"Once again I assure the Congress that this Nation's military power is second to none and will be kept that way."

Secretary Gates wrote to Majority Leader JOHNSON on August 9:

"All of our programs, force levels and deployments are kept under constant review. Where technological breakthroughs occur, emphasis will be added; where programs are overtaken by events, terminations will be effected. This is in accord with the long-established policy of the executive branch; no change has been made in this policy."

And in his letter of August 12:

"But, this I can assure you—should we conclude that additional programs are required for the Nation's defense, the necessary funds will be requested regardless of the amounts involved."

In conclusion, I believe that Congress has provided sufficient funds in the fiscal year 1961 appropriations bill to provide the "proficiency mix" of defenses which will keep us secure. The foregoing review of military items which these funds make available impressively documents this conviction, in my opinion.

I feel that the Defense Department has demonstrated its competence to utilize these funds in the most effective manner according to changing conditions and priorities. There will always be minor differences of opinion on financial administration, but the strong, continuing cooperation of the executive branch with the legislative branch to the end of highest security seems clear. Moreover, Congress provides the money with such flexibility that the President, the Secretary of Defense, and their deputies are able to make use of it wisely, prudently and efficiently.

For all these reasons, Congress can have confidence in the multi-dimensional character of the U.S. defense posture, its emphasis on the long haul, and the long-range validity of these basic concepts—and can be satisfied that adequate funds have now been appropriated to guard the Nation's security.

Our prime responsibility, however, is to be vigilant for needed additions and revisions and quick to bring them about with necessary action. We must avoid any aspect of complacency or lethargy, but sustain a critical, imaginative and vigorous attitude which alone can produce that unmistakable margin of military supremacy upon which our national security rests.

XLI

WHAT PRICE SOCIAL WELFARE?

(By U.S. Senator BARRY GOLDWATER, of Arizona)

A candidate for the nomination for President recently startled the country by charging that "17 million Americans go to bed

hungry every night." I say "startled" advisedly because while most of us are aware that some Americans, because of unemployment and other factors, do not enjoy a diet on par with those gainfully employed, the figure "17 million hungry Americans" does sound a bit padded. It is also, of course, a well-worked Soviet propaganda stereotype that most Americans suffer from malnutrition and that thousands drop dead in the streets of America every day of hunger.

I am inclined to be charitable and I attribute this particular exaggeration to youthful exuberance and perhaps a bit of overstriving for political effect. What does disturb me is that the claim of so many millions of Americans as being ill fed, ill housed, and ill clothed is not unique or recent. Ever since the early days of the unlamented New Deal, we have been fed a regular and overfull diet of statistics along the same general line. The Soviets merely pick up and rebroadcast our own lamentations as proof of the truth of their charges.

Then the socialized medicine boys got into the act and we were given a liberal dosage of figures and statistics tending to show that despite the highest income level in the world we still had X number million people or X percent of our population suffering from below par medical care—or what was represented to be absolute par in dental and medical care. Then came the Forand bill to take care of the problems of the elderly and retired, and the President's own medical care for the aged plan which was hastily put together as an answer to the Forand bill—all of which prompted me to do a little bit of research to see if it was possible to arrive at some rough figure of what all forms of social welfare have cost the American taxpayer since 1933 or 1934. In other words, "What price social welfare?"

In 1913 all public expenditures for social welfare amounted to a shadow over 3 percent of the gross national product. By 1929, with mounting relief costs, public welfare expenditures had increased only one percent to a trifle over 4 percent of the gross national product. Six years later, in 1935, or 2 years after the beginning of the New Deal, the percentage of welfare expenditure in relation to our gross national product had jumped or tripled to 12 percent. We were well on the way to the welfare state.

In December 1951 the Chamber of Commerce of the United States released a special report showing that some 300 Federal, State, and local welfare plans had cost $23 billion, or 34.2 percent of money expended by Federal, State, and local agencies. The Federal Security Agency itself was quoted as authority for the figures. This meant a tax burden of $575 in 1950 for every American taxpaying family. The FSA included $6.5 billion spent by State and local authorities on education, so even if we deduct this figure it still leaves a total of over $16 billion, or one-fourth of all tax money spent at all levels by the Federal Government and State and local agencies.

It is admittedly difficult, if not impossible, for even conservatives to agree on just what may properly be defined as "welfare." Communist propaganda, New Deal semantics, and word twisting by the liberals into new shapes and forms have raised hob with old-line, accepted definitions. To those who object that expenditures included in the above totals for education, some veterans' benefits, and other forms of disbursement of questionable "social welfare" classification should not have been added, I repeat that extensive statistical analysis and research, which would take months, would no doubt uncover an equal or even larger sum total definitely classifiable as welfare, but sandwiched in other disbursements, including gray or borderline categories.

It would require an economic Argus with a thousand eyes and the wisdom of Solomon to trace out and unravel such items buried in every Federal, State, and local annual budget.

Three hundred and twenty-two billions for "welfare"

We do have some rough breakdowns since 1939 in the Federal budget for "labor and welfare." Since 1939, the Federal Government has spent a total of $52 billion in 22 fiscal years. The Social Security Bulletin for October 1955 had an extended table showing local and State expenditures on "social welfare" from fiscal 1934 to fiscal 1954 as totaling $170.344 billion. As State and local social welfare payments since 1954 have jumped to well over $20 billion per year, we can add another $100 billion for the past 5 years, making a grand total of at least $322 billion.

If, as it is claimed, we still have 17 million hungry people after spending $322 billion in 25 years, then it is obvious we must do one of two things. One, raise taxes still higher a la the New Deal dictum "tax and tax; spend and spend," boost the national debt still higher, and give the spiral of inflation another whirl. Or, two, try something else. That is, spend less, tax less, give away less abroad, balance the budget, and let people keep more of their earned income to prime the economic pump by old and tried economic laws which seemed to have worked pretty well until we started "monkeying" with them.

A little ancient history

Unfortunately, all too often political success still goes to the demagog who, to paraphrase Gen. Nathan Bedford Forrest, promises "the mostest of everything to the mostest of everybody." Unfortunately, the politician who promises the "mostest" is seldom a student of either history or economics. The demagog promising the "mostest" would probably be greatly surprised to learn that the basic fundamentals of his calling were laid down at least 21 centuries ago by the younger Cicero, Quintus Tullius.

In the latter days of the Roman republic, candidates for certain elective offices found they had to promise more and more to the "plebes" or lowest classes of free men in order to get enough votes to be elected. When the famous classicist, Marcus Tullius Cicero, was running for the consulship, his younger brother, Quintus Tullius, gave him some advice which still stands today as smart coaching in practical politics. He wrote:

"One has great need of a flattering manner which, wrong and discreditable though it may be in other walks of life, is indispensable in seeking office. Human nature being what it is, all men prefer a false promise to a flat refusal. At the worst the man to whom you have lied may be angry. That risk, if you make a promise, is uncertain and deferred, and affects only a few. But if you refuse you are sure to offend many and that at once."

The young Cicero undoubtedly had taken his inspiration from the Gracchii brothers, Gaius and Tiberius, who had been early "agrarian reformers" a hundred years before his time. Tiberius was murdered in an election day tumult, but his younger brother, Gaius Sempronius, carried on his "liberal" ideas. He distributed wheat to the poor at fixed low prices and he became the idol of the poor of Rome.

Gaius, however, was outsmarted by an even greater demagog who made even greater and rosier promises, with the result that Gaius lost the election for a third term as tribune. Whereupon, the granddaddy of all New Dealers committed suicide by ordering one of his slaves to kill him.

I bring up the Gracchii brothers and the sage political advice of Quintus Tullius Cicero because this is an election year and in politics there is seldom anything new under the sun. Modern-day descendants of the Gracchii are once more abroad in the land, painting grim pictures of "one-third" or "one-quarter" of the Nation as "ill housed, ill fed" or suffering desperately from inadequate medical and dental care.

Twenty-five centuries ago the Greeks, who first practiced a rudimentary form of democracy in their public squares, learned that with democracy came demagogs. They learned that demagogery was the price of democracy and that, if stable and responsible self-government was to be maintained, demagogs would have to be accepted but treated for what they were with much resort to the salt cellar.

The basis of all swindles

Nevertheless, it is depressing to reflect that, despite all our marvelous technical and scientific progress and our tremendous record of human achievement, politically we have not matured much since the dim and distant days of Solon and the Gracchii. Far too many of our electorate still refuse to accept the simple lesson of life that you cannot get something for nothing—or that somehow the laws of physics do not operate in economics and that it is somehow possible to take more out of a vessel or the treasury than is put into it. The basic "catch" or hook in all swindles and confidence games is invariably "something for nothing," or what amounts to practically the same thing, a great deal for very little at no risk.

The demagog promising the "mostest to everybody" also knows that behind him stand the superdemagogs—the Socialists and Communists. As a Socialist will always promise more than a liberal, so the Communist can afford to promise even more than the Socialist. So it should be plain to even a child that the demagog making promises he does not intend to or cannot fulfill is playing a dangerous game.

The birth of modern welfarism

While welfarism is as old as the first primitive social organizations lost in the mists of pre-Sumerian culture, the concept certainly was well developed and historically established at least in rudimentary forms in the early Greek and Etruscan city-states.

It remained, however, for the Iron Chancellor, Prince Bismarck, to give the stamp of bureaucratic authority to social welfarism as a state monopoly. Authorities tell us that all present forms of social security and other forms of welfarism can be traced directly to the Prussian Chancellor. We are all familiar with Bismarck's difficulties with the Socialists in control of the German unions and the liberals who were powerful in the Reichstag. In converting the newly created German Empire into a militaristic state Bismarck was faced with enormous difficulties and problems.

German socialism was pacifist to the core and bitterly antimilitarist. German industry and commerce, which were in competition with France, joined Great Britain in looking askance at heavy military budgets. In order, as he said, to "steal the thunder away from the Socialists," Bismarck was forced to adopt "nationalistic socialism to end international socialism." German employers as a class, as well as liberals, were of the same mind that social insurance should properly be a private matter taken care of by the workers themselves through their unions or through religious and other organizations already in existence for that purpose.

Bismarck also had revenue troubles. His universal military training program, a revolutionary innovation in European military history, required enormous sums of money which the Reichstag granted with increasing reluctance. The new German Reich, like our own infant Republic, had almost no important source of revenue other than the excise taxes and import duties. Involved parliamentary bickering produced some revenues as

contributions from the various once-independent states absorbed into the Reich. By setting up a comprehensive social security program under Federal control, Bismarck assured himself of a substantial source of revenue beyond the control of the Reichstag. The German example was quickly followed by neighboring European states and modern-day social security collected and administered by a vast and all-pervasive bureaucracy was on its way. Like the proverbial camel's nose under the tent, it was now merely a matter of gradual and imperceptible extension before the whole camel of paternalistic and bureaucratic state welfarism ousted the libertarian concept of individual freedom and social responsibility.

It is very significant and interesting to note that before Hitler maneuvered himself into power, he was violently opposed to the social insurance system of Germany. He ranted that it weakened and demoralized sturdy German concepts of thrift and self-reliance. His real opposition, of course, was due to the fact that he considered social welfare insurance as a powerful weapon of his main political enemy, the Social Democrats of the Weimar Republic.

Nazi propagandists made a great deal of political capital out of charges that there was considerable corruption and waste of money in the compulsory medical care program. This naturally won them considerable support among doctors, businessmen, and conservative middle class elements. The Bruening government was forced, in 1931, to make a number of reforms tending to eliminate the worst abuses. The Nazis naturally reaped the credit.

However, when Hitler took power in 1933, he soon changed his tune. With its heavy emphasis on racial superiority and physical fitness, the Nazi ideology perforce had to concentrate on social welfare as an important state function. A high birth rate and maximum physical fitness were obviously very important to a totalitarian state planning military aggression against its neighbors. Hitler heavily financed all manner of social welfare programs, not for humanitarian reasons but because German human resources had to be mobilized and strengthened for the enormous strains and sacrifices which Hitler knew he would have to impose upon the German people in order to consummate his grandiose plans.

The Bolsheviks take up social welfare

Lenin was a great admirer of Bismarck. The rigid Prussian bureaucratic system of social control struck the father of bolshevism as just the ticket, with some modifications, for huge and chaotic Russia exhausted by World War I blood losses. It is true that there was a basic philosophical difference between Lenin and Bismarck in their concern with bureaucratic control of social welfare for their subjects. Bismarck professed to be actuated by Christian precepts and morality. Lenin, as an atheistic materialist, was concerned only with insuring the health, docility, and productivity of the Russian masses as the solid underpinning of the Bolshevist form of socialist state which he announced "we shall now proceed to create," in November 1917.

It was years before the last vestiges of private ownership and free enterprise were eradicated in Soviet Russia. Social welfarism, or what passed for it under the iron heel of the Bolshevists, was one of the first monopolies set up by the victorious Bolsheviks in 1917, almost simultaneously with the creation of the Cheka or secret police charged with the extirpation of all opposition and even minor and harmless dissent. It has now been long forgotten with the passage of the years, but the abolition by formal decree of all private social insurance, relief, and charity, whether by the church, trade unions, cooperatives, or other established organizations followed the Bolshevik consolidation of power in a matter of months.

I do not mean to infer from this brief historical analysis of social welfarism under various forms of despotism that totalitarianism and social welfarism go hand in hand, or that one leads inevitably to the other. We have had a few exceptions, notably in smaller countries in northeastern Europe with long histories of limited government, where some degree of individual freedom has been maintained. Note that I say "some degree" advisedly, because nowhere else is the old maxim "Something gained; something lost" more true than in the field of welfarism. The supposed tangible gains and material advantages are usually far outweighed by the longrun, intangible values of human freedom and dignity.

Such examples as I have cited and others, which lack of time prohibit further study and examination, do leave an ineluctable conclusion—social welfarism, in its most advanced form, has always been an inseparable part of all totalitarian systems, ancient and modern, Fascist and Communist, openly brutalitarian or heavily disguised benevolent despotisms.

I have already pointed out that socialism, that is to say, the expropriation of private property for exploitation by the state for the theoretical maximum benefit of all, has been a dead issue in this country for lo these many years. The Socialists were smart enough to disguise themselves as "New Dealers" and have openly boasted of the success of their stratagem. We have learned that socialism can be sneaked over against the wishes of the majority through the simple device of expropriation by taxation and the creation of an all-embracing welfare program which effectively robs the individual of all control over his more basic and fundamental human freedoms—that of regulating his own personal affairs as he may see fit.

Nationalization has acquired a sinister connotation, particularly after Great Britain's disastrous experience with disguised socialism. But welfarism has a disarming universal appeal. Who, except an embittered and confirmed misanthrope, could possibly be opposed to human welfare? Those who fish for the souls and minds of men have learned through long experience to be exceedingly cunning in their weaving of gossamer-fine nets and simply irresistible lures and bait. I have tried time and again to show that no one is opposed to human welfare per se—we conservatives are merely opposed to making a government bureaucratic monopoly out of basic human problems traditionally handled and best solved first, through religious and private organizations and, second, through the lowest form of political organization closest to the individual or individuals concerned.

There is election gold in the hills

In their search for votes in this presidential election year, the Democrats seem to feel that they have staked out a real Klondike strike in our aged. And the Forand bill is the sluiceway which is expected to wash out solid gold nuggets of bloc votes in every State. The estimated cost of the Forand bill is $1.1 billion for the first year, and nearly $6 billion over a 5-year period is to me not the main consideration, bad enough as it is. The Forand bill and all other measures promising "more" or the most to 17 million of our citizens over 65 is merely a continuation of a welfare State trend which has become a matter of increasing concern to the economist, the believer in a free enterprise system, and the constitutionalist.

One of the charges leveled against Marxism is that it envisions and strenuously works for the elimination of the family with many of the family's functions transferred to the State. Communist China, in her fanatic drive toward the commune system, has gone further in this direction than older brother Russia. The Marxists correctly, from their viewpoint, regard the family as a serious hindrance in setting up the Communist utopia. As far back as we have any historical evidence, the family, as a unit, cared for its own elderly people. One of the first steps taken by the Bolsheviks in Russia after they seized power, was to abolish all charitable and welfare work of the Orthodox Church. The Soviet state was to be the sole protector and guardian of the aged, ill, and disabled. The Soviet state was a jealous state and would tolerate no other agency standing between it and its enslaved masses, even in the fields of welfare, social insurance, relief, and charity.

Mankind passed from a state of savagery to one of semicivilization when men began to care for their ill and aged instead of dispatching them as a hindrance, or turning them adrift to starve as a costly nuisance. Many savages, even until recent times, practiced geronticide because the rigors of nature and chronic semistarvation made care for the aged and crippled an intolerable burden on the tribe or social unit.

As men became semicivilized and the influence of religion spread over the world, greater and greater concern was devoted to the aged, the helpless, and the disabled. Hospitals and shelters for the indigent aged were first set up by the church. Each family, rich or poor, took care of its own elderly members. Only those elderly and helpless poor who had no living relatives found their way to the poorhouse or a religious-supported home or shelter. Every family from Japan to England, and this country, regardless of religion or race, took care of its own elderly people. It was a matter of fierce pride that even the very poorest took care of their own.

A moral retrogression

All this has now changed, at least in this country, thanks to social security. It is now considered shameful for older people to be taken care of in their declining years by their children whom they nourished and spent small fortunes on "bringing up." Sending one's parents to the poorhouse so that one can buy a new house or a new and flashier auto would, of course, be considered a bit raw; but the same individual sees nothing shameful in turning his parents adrift to shift for themselves on a meager social security pittance. They earned this social security themselves, and whatever deficits have to be made up come out of the public treasury—i.e., somebody else's pocket.

The impersonal arm of a vast bureaucracy centered in Washington can never transmit to the individual recipient the warmth and personal feeling of a family sheltering and protecting its own. Even religious, charitable, or fraternal assistance at local level, because it has been and remains in direct personal contact with the recipient, is bound to be a warmer and more sympathetic bond than that of a mere statistical figure in a bureaucratic budget. And I believe it has been amply demonstrated that Federal collection, administration, and distribution of welfare funds is bound to cost more because of higher administrative overhead than the same process carried on within the community and administered by the community or by private organizations.

We went through all this years ago, and I am sorry to bring it up again, but I still do not understand why it is shameful and humiliating to expect support from one's children but ruggedly independent and dignified to accept a thinly disguised dole from the public exchequer in the form of a monthly security check.

Nor has anyone pointed out the fundamental immorality of taxing those who already take care of their own aged relatives in addition to helping support others whose

children pass their own obligations on to the state. Then there are many spinsters and bachelors who devoted their lives to caring for their parents until they died, and never married as a result of discharging such an obligation. They are now taxed at the higher rates for single persons to help pay the enormous annual cost of caring for those whose own children refuse to do so. One of the most shameful situations presently plaguing welfare agencies in this country is the subsidization by the state of wholesale bastardy practiced by women who have made illegitimacy a "profession," or at least a source of easy and steady income. It should have been plain years ago to even the most obtuse that once we open the Pandora's box of the welfare state, we cannot stop at any particular point or draw the line against any particular segment of the population. Bismarck tried it in Germany 80 years ago, only to learn that the Socialists would invariably raise the ante every time he threw in a new concession.

All of us, left, right, and center, make numerous speeches and declamations against the evils of communism. We affect great horror and deep moral indignation over the brutal methods used by the Chinese Reds in setting up the commune system and their calculated destruction of the ages-old Chinese family system. We lose sight of the fact that it is just as easy to slip unintentionally into a hole on a dark night as it is to jump down into it deliberately in the daytime.

The gradual and imperceptible erosion of the family through ill-advised and misguided welfare schemes over a period of years may bring us in the not too distant future to a commune system of social organization with cradle-to-grave welfarism. Goldsmith's often quoted couplet might well be paraphrased and brought up to date:

"Ill fares the land to hastening ills a prey,
Where welfarism is accelerated and the family is permitted to decay."

XLII

AGRICULTURAL ACCOMPLISHMENTS AT A GLANCE, 1953–60

Total agricultural assets are at an alltime high of $208.2 billion as of January 1, 1960.

Owner equities on January 1, 1960, were $37 billion above January 1, 1953, and hit a new peak of $184.2 billion.

Farm ownership is at a record high, and there is a smaller proportion of tenants than ever before.

Farm foreclosures are near an alltime record low.

Total financial assets of farmers, including farmer cooperatives, have risen from $16.7 billion in January of 1953 to $19.4 billion, January 1, 1960.

Farm debt amounts to only 11½ percent of the value of farm assets.

The standard of living on farms is the highest in history, measured in terms of electrical appliances, automobiles and other conveniences owned by farm families.

Repeal of Federal taxes on gasoline used in tractors and other machinery saves farmers $60 million a year.

Farmers in 1954 were benefited by the largest tax reduction in history.

Per capita farm income rose from $838 in 1950 to $960 in 1959.

Well administered emergency livestock feed programs have helped farmers and ranchers overcome effects of drought, floods, and other natural disasters.

Approximately $600 million a year has been extended in disaster and drought aid since 1953. Such aid enabled families to stay on the land.

The Water Facilities Act was amended to provide for direct and insured loans for certain soil and water conservation activities in all States. Prior to this amendment, the act had applied to the westernmost States only.

Legislation has been achieved which has held down the accumulation of surpluses by the Government by an amount estimated to total $14 billion through adjustment in price supports, Public Law 480 and the soil bank.

A major reorganization of the Department of Agriculture was effected in 1953 to improve the quantity and quality of its services to the farmer.

The bipartisan National Agricultural Advisory Commission was established in 1953 to review agricultural policies and work with the administration in developing and administering farm programs.

Social security coverage was extended to farmers in 1954, ending 19 years of discrimination.

The Rural Electrification Administration continues to meet the growing demand for electric and telephone service in rural areas, including the expanding needs of rural industry. More than one-third of all REA electricfication loans have been made since January 1953. During this 7½-year period, about 925,000 new consumers have been added to the lines of REA-financed electric systems. In calendar year 1959, five out of six of these were nonfarm consumers. An estimated 1 million subscribers have received new or improved telephone service since January 1953 as a result of the REA telephone loan program. Electric loans in fiscal 1960 amounted to more than $200 million; telephone loans exceeded $100 million.

The rural development program is raising living standards of those on the lowest rung of the economic ladder through the cooperation of the Federal Government and local authorities, and private leadership. Work is progressing in 30 States and Puerto Rico.

Stabilization

The payment-in-kind export program for grain and cotton came into being in 1956 and 1958. This program resulted in higher prices to producers. This also resulted in less commodities coming to CCC—a saving to the Government.

The new uniform grain storage agreement rates in effect July 1, 1960, will mean a saving of between $85 and $100 million annually. The 19 percent lower storage rates generally represent a net saving to farmers who use commercial facilities.

More than $20 billion worth of food and fiber was moved out of storage and into use at home and abroad in less than 7 years through aggressive disposal efforts.

More than 28 million acres of farmland have been taken out of production by the conservation reserve program of the soil bank. These acres would have otherwise added to surpluses. In addition, participating farmers—while adding to their income—are making unprecedented strides in the conservation of soil, water, forests, and wildlife resources.

Credit

Total credit extended farmers by the Farmers Home Administration during fiscal 1960 is estimated at $310 million, compared with $228.7 million in 1953. Arrangements were made in 1959 for FHA credit to more fully meet the needs of part-time farmers. Loans totaling $12 million will be made in rural development counties in 1960; the 1959 total was $10.2 million.

The agricultural credit system was made more responsive to farmers' needs. The Farm Credit Administration was made an independent agency.

Exports

The Food for Peace program was set in motion by President Eisenhower and is enabling the United States and other food exporting nations to better share their abundance with people in the free world. It is helping to feed hungry people, is supporting economic development of friendly countries, is providing additional outlets for U.S. farm production, and is helping to develop future markets.

Exports grew from $2.8 billion in 1953 to an alltime high of $4.7 billion in fiscal 1957 and for the past 3 years has averaged about $4 billion per year. Exports in fiscal 1960 are estimated at $4.5 billion, the second highest total on record.

The agricultural attaché system was returned to USDA from the State Department to make more effective efforts to expand foreign markets for farmers.

Forest Service

Operation Outdoors was set up to expand family recreational facilities in the national forests. In 1953, 35.4 million people visited the national forests; in 1959 the number was 81,521,000. The Forest Service has built 7,036 new family units for camping and picnicking and rehabilitated 8,973. It has also built 23 new intersports areas, 38 new swimming places, and 10 new organization campsites.

A new milestone was reached by the Forest Service in 1959 when for the first time 2 billion trees were planted, double the 1958 record.

Timber cut in national forests is at the rate of 8.3 billion board-feet, the highest on record. The income from these sales largely offsets the cost of running the national forests.

National forest receipts passed the billion dollar mark in 1958. It took 50 years to collect this amount from use fees and the sale of forest resources. In 1959 receipts hit $142.7 million. At this rate it will take less than 10 years to collect the second billion dollars.

Progress has been made in reducing forest fire losses and in 1957 were reduced to an all-time low.

Marketing

The special milk program was inaugurated in 1954. The program in 1960 operated in 83,000 schools and child care institutions where nearly 2.4 billion half pints of milk helped improve diets of our children.

The school lunch program absorbs large quantities of plentiful foods and improves diets of 13 million participating children. Fiscal 1960 purchases totaled $540 million. Complete meals in 1960 were increased more than one billion over the one billion served in 1951.

About 60 million people in 82 foreign countries have been receiving food and fiber donated by the United States. Over 4 million American people are sharing in our abundance through donations of surplus foods.

In periods of oversupply, 906 million pounds of meat products, poultry, and eggs worth $388 million were bought for the school lunch program, welfare institutions and needy people. Cattle, hog, poultry and egg prices were thus bolstered without the Government getting into the meat business.

Producers of dairy products, one of the mainstays of agriculture, will receive estimated cash receipts of $4.7 billion in 1960, an alltime high.

A major consumer health protection measure, the Poultry Products Inspection Act, went into effect January 1, 1959. During the first year nearly 5 billion pounds of poultry were examined and certified as wholesome.

Research

Appropriations for agricultural research have been increased by 117 percent since 1953. Much of this has gone into successful research to find new uses for our farm abundance, and to develop new crops for current needs.

Research workers in 1959 discovered the mechanism of plant growth. In a major

breakthrough they isolated a pigment that controls germination, flowering, and seed formation.

Important new facilities were established to insure future agricultural progress and livestock health. Among these is the Plum Island Animal Disease Laboratory in Long Island Sound, where diseases foreign to our country are being studied for control purposes. Native diseases will be studied at the new National Animal Disease Laboratory at Ames, Iowa. Victories have been registered in the battle against two serious livestock diseases—screwworm infestation in cattle in the Southeastern United States and vesicular exanthema in hogs.

New concepts in eradication of insect pests have resulted from the successful use of radiation in the sterile-male method against screwworm in Florida.

Success was achieved in the campaign to help wipe out an outbreak of foot-and-mouth disease in Mexico, which, had it spread, would have meant incalculable losses for U.S. stockmen.

The drive to eradicate brucellosis from the United States passed a milestone in June 1960 when New Hampshire became the first State completely free of the disease. Twenty-four other States have almost eliminated the disease. (Brucellosis is a primary threat to the Nation's cattle; in man it is known as undulant fever.)

Soil conservation

The Great Plains conservation program was established in 1956 and is operating in 351 counties. A total of 12 million acres was covered by cost-sharing contracts as of May 1, 1960. The long-range purpose is to minimize drought, flood, and wind-erosion damage in the Western States once embraced in the Dust Bowl.

The number of soil conservation districts assisted in 1959 totaled 2,865, compared to 2,493 in 1952. The land of 21 States, Puerto Rico and the Virgin Islands, is covered by soil conservation districts.

In recognition of the Nation's mounting need for water conservation, this Department has stressed protection of watersheds. As of June 1, 1960, 236 local watershed projects in 45 States were receiving assistance. Authorizations for planning assistance had been extended to 549 projects in 48 States.

The importance of water to farm and city people has been stressed by this administration. The first Soil and Water Conservation Advisory Committee was established and meets regularly to plan for the future.

The internal revenue law was amended to permit farmers and ranchers to deduct from their taxes expenditures made for installing certain soil- and water-conservation practices.

XLIII

THE USE OF INTELLIGENCE AGENTS AND RUSSIAN ESPIONAGE IN THE UNITED STATES

(By U.S. Senator ROMAN L. HRUSKA, of Nebraska)

There is a great uproar around the world at the discovery that the Armed Forces defending the free world against the onslaught of Communist tyranny employ espionage as part of this defense.

The Red dictator, Nikita S. Khrushchev, expresses a great moral distress at this discovery. Some of our allies profess to be dismayed that we use intelligence agents to gather intelligence regarding the plans of an enemy who has brayed out that he intends to "bury us."

It is not for me at this time to dwell on what is presently occurring in this area, but I should like to explore what the headwaters of this problem really are, and to relate some of the disclosures and reports of the Internal Security Subcommittee which have been recorded through the years, and which are well documented.

Where are the headwaters of this problem, Mr. President? The answer to that question has been overflowing into the record all over the world for the past 43 years. Let me give a few summaries from that record.

I quote first from the Second Report of the Subcommittee on Internal Security of March 22, 1954, on "Activities of U.S. Citizens Employed by the United Nations":

"On December 13, 1917, Lenin's handful of Bolsheviks, who had just seized the government of Russia, appropriated 2 million rubles for the needs of the revolutionary internationalist movement. Here is the language of the official ordinance as published in the Gazette of the Temporary Workers and Peasants Government, December 13, 1917, and furnished to the Senate Foreign Relations Committee by Secretary of State Charles Evans Hughes:

" 'The Soviet of Peoples Commissars considers it necessary to come forth with all aid, including financial aid, to the assistance of the left, international wing of the workers movement of all countries, entirely regardless whether those countries are at war with Russia, or in an alliance, or whether they retain their neutrality.'

"This was the original declaration of revolution against the civilized governments of the world. It was an official statement. It was implemented also by Moscow-inspired revolutionary activity on every continent of the globe.

"In 1920, Woodrow Wilson's Secretary of State, Bainbridge Colby, looked at the plain facts of Communist activity, which were visible everywhere then, as they are now, and arrived at this conclusion:

" 'The existing regime in Russia is based upon the negation of every principle of honor and good faith. * * * The responsible leaders of the regime have frequently and openly boasted that they are willing to sign agreements and undertakings with foreign powers while not having the slightest intention of observing such undertakings or carrying out such agreements.

" 'They have made it quite plain that they intend to use every means, including, of course, diplomatic agencies, to promote such revolutionary movements in other countries.

" 'Inevitably, therefore, the diplomatic service of the Bolshevist Government would become a channel for intrigues and the propaganda of revolt against the institutions and laws of countries, with which it was at peace.'

"In 1921, the British Government granted de facto recognition to the Soviet Government by means of a trade agreement. The agreement provided for the prohibition of Bolshevik propaganda in Great Britain. Only 2 short years later, Britain threatened to terminate that agreement because Soviet agents were spreading anti-British propaganda in Afghanistan, Persia, and India.

"In 1924, regardless of what had already happened, Britain granted the U.S.S.R. de jure recognition. Three years later it terminated both the trade agreement and recognition because the Soviet diplomatic service in Great Britain was acting as a "channel for intrigues and the propaganda of revolt," precisely as our American Secretary of State had predicted 7 years before. ("Trends in Russian Foreign Policy," pp. 5, 7, 8, 10.)

"In 1924, China and the U.S.S.R. established 'normal' diplomatic relations. Under the treaty each country was to refrain from spreading propaganda against the institutions of the other. Three years later China broke off relations because the Soviet diplomatic service, once more was acting as a channel for intrigues and the propaganda of revolt (ibid., pp. 8, 10, 11).

"In 1924, Mexico recognized the U.S.S.R. In 1930, Mexico withdrew that recognition (ibid., pp. 9, 11).

"In 1926 Uruguay recognized the U.S.S.R. In 1935, Uruguay withdrew that recognition, charging Communist activity in Uruguay and elsewhere in South America (ibid., pp. 9, 15)."

Despite this record of Soviet perfidy, the United States extended diplomatic recognition to the Soviet Government in 1933 after an exchange of letters between President Roosevelt and Maxim Litvinov, Soviet Foreign Minister, in which Litvinov pledged that the Soviet Union would:

"(1) respect the United States and refrain from interference in the internal affairs of the United States or its territories or possessions.

"(2) refrain from any propaganda, or acts to disturb the tranquility, prosperity, order or security of the United States.

"(3) prevent the formation of any group on Soviet soil, which has the aim of overthrowing the political or social order of the whole or any part of the United States."

This was the first agreement the Soviet Union ever signed with the United States. It was violating the agreement at the very moment that Litivinov was putting his signature to it, it has never ceased to violate this agreement, and it is still violating this agreement today, 27 years after it was signed.

Now I will continue with excerpts from the Internal Security Subcommittee document on "Soviet Political Agreements and Results."

"In 1945 the Soviet Government was still our ally, in the war to establish the principles of the Atlantic Charter. In September of that year, Igor Gousenko, a Soviet diplomat, went to the Canadian Government with documents which caused an immediate investigation by a specially appointed Canadian Royal Commission. When that investigation was concluded, the Royal Commission found:

" 'There exists in Canada a fifth column organized and directed by Russian agents in Canada and in Russia' (the report of the Royal Commission, p. 685).

" 'Members of the staff of the Russian Embassy at Ottawa were actively engaged in inadmissible espionage activities' (ibid., p. 686).

"The Royal Commission also stated:

" 'So far as the evidence discloses, the first head of the Military Intelligence espionage system in Canada after the arrival of the Soviet Minister was Sergei N. Koudriavtzev, whose official title was First Secretary of the Legation [later Embassy]' (ibid., p. 15).

" 'Major Sokolov, on his arrival in Ottawa in 1942, began to reform the previous organization, and was directed by Molier, who has been identified as one Mikhailev, an official of the Soviet consulate in New York who came to Canada for that purpose' (ibid., p. 15)."

On October 28, 1953, Ismail Ege, former chief of the Fourth Section of Soviet Military Intelligence, appeared before the subcommittee. He testified that the General Staff Intelligence Department of the Soviet Union used international bodies to coduct espionage. He proved his point by showing that Sergei Koudriavtzev, who had been head of the Red spy apparatus in Canada, later joined the Soviet delegation to the United Nations.

Let us also remember, Mr. President, that Judith Coplon's espionage partner, Valentin Gubitchev, was attached to the Soviet delegation to the United Nations. He was caught redhanded, in company with Coplon herself, and found guilty, but the U.S. Government returned him to the Soviet Union instead of sending him to prison.

On May 12, 1949, Kirill Mikhailovich Alexsev, who had been attached to the Soviet Embassy in Mexico, told the subcommittee that "all responsible workers of a Soviet Embassy are members of the secret intelligence service of the Soviet Government."

In 1951 the Special Committee on Un-Filipino Activities of the Philippine Government found that "the Communist Party is the vanguard of the Soviet Union here; its border patrol on Filipino shores."

In 1955, an Australian Royal Commission found that there had been operating, out of the Soviet Embassy in Canberra, a Soviet spy apparatus of the same kind that was discovered in Canada. Vladimir Petrov, the defector from the Embassy who uncovered this apparatus, made a memorable statement about his country's espionage activities. Here is what he said—as quoted in the Internal Security Subcommittee Annual Report for 1957:

"Espionage is a distinct and principal Soviet industry. This must be so; because the Soviet Union, alone of all the great powers, regards itself as being in a continuous and chronic state of covert warfare with the whole world outside the borders of the Communist empire. And conspiratorial techniques are natural to a regime that seized power and maintains power by conspiratorial methods. Soviet espionage has reaped a rich harvest by such methods, especially against friendly and unsuspecting countries."

I read now from the Internal Security Subcommittee publication, "Soviet Political Agreements and Results," a staff study published in 1959:

"May 10, 1948: Costa Rica broke relations with the U.S.S.R., because the Costa Rican Communist Party with the help of international communism had taken control of the Government, which provoked a civil war."

The same document tells us, Mr. President, that Brazil, Chile, Cuba, Venezuela, Israel, Australia, Guatemala, and Iraq have all suspended diplomatic relations with the U.S.S.R. since World War II. The same document tells us that:

"The Canadian Government ordered home G. F. Popov, Second Secretary of the Soviet Embassy, because he was engaged in espionage.

"The United Nations ordered home Viktor Ivanovich Petrov, a Russian employee of its Secretariat, because he was engaged in espionage."

Last summer, Alexander Urevitch Kaznachoev fled from his post in the Soviet Embassy in Rangoon and took refuge in the U.S. Embassy. He told the Associated Press that the main occupation of all the Soviet Embassy staff—in Rangoon—is to spy.

Kaznachoev appeared before the subcommittee on December 14, 1959, to tell of his espionage activities under the orders of the Kremlin. He told us that his espionage chief in Rangoon was Ivan Vozsiy, who masqueraded as First Secretary of the Soviet Embassy.

J. Edgar Hoover, who knows more about this subject than any man in the United States, summarized the story in a speech made before the United American Mechanics in Charleston, W. Va., on June 16, 1959, as follows:

"As the No. 1 target of worldwide communism, the United States is the prime objective of Soviet espionage. Soviet defectors are unanimous in stating that between 70 and 80 percent of Russian officials in the United States are members of the Red intelligence Services. The importance that the U.S.S.R. is currently attaching to the value of these intelligence agents is vividly borne out by the sharp increase in the number of Soviet diplomatic personnel assigned to the United States. In May 1954 there were 212 Soviet officials in the United States. Five years later that number has increased to 313, or an increase of almost 50 percent.

"Soviet espionage activities in this country expose the fallacy of so-called peaceful coexistence in recent years; pseudo appeals for peace by Communists have been more than matched by intensified Communist espionage efforts in the United States. Using blackmail, bribery, and similar techniques, Communist agents, many with diplomatic immunity, are stepping up their efforts to obtain our military, scientific, and industrial secrets for use against us."

Mr. Hoover intently analyzed the 17th National Convention of the Communist Party, U.S.A., which was held in December 1959. The Subcommittee on Internal Security published his findings. Here is a part of what he said:

"The party will remain in the future—as it has been in the past—an obedient slave of Moscow. No new personalities were brought into the party's top leadership. Rather, leadership is today exercised by the same corps of hardened, disciplined, veteran Communists who feel that Moscow represents the final goal of all of mankind's hopes. So-called rightwing Communists are not represented. They have either voluntarily resigned in complete disillusionment or been coldbloodedly purged.

"The Communist conspiracy in America today is led by a man who has openly boasted that he was willing to take up arms and fight to overthrow our form of government. Hall was convicted in Minneapolis, Minn., in 1934, in connection with a riot there when he was a member of the Young Communist League. During his trial he testified as follows:

"'Question. But you would prefer the Russian—you would prefer to be in Russia?

"'Answer. I prefer America with a Soviet Government.

"'Question. And you are willing to fight and overthrow this Government?

"'Answer. Absolutely.

"'Question. And you are willing to take up arms and overthrow the constituted authorities?

"'Answer. When the time comes, Yes'."

Only a few weeks ago, the Subcommittee on Internal Security summoned Hall to the witness stand and read him the words I have just quoted to you and gave him opportunity to disavow them. He refused it.

Mr. President, it is my suggestion that we not lose our heads at the revelation that the free world uses espionage to defend itself.

Let us look at the headwaters of the stream.

Let us remember the words of the Communist manifesto:

"The Communists disdain to conceal their views and aims. They openly declare that their ends can be attained only by the forcible overthrow of all existing social conditions."

XLIV

THE WORK OF THE SENATE IN 1960

(By Senator JACOB K. JAVITS, of New York)

(This is a summary of the activities of the U.S. Senate in the 2d sess. of the 86th Cong.)

Peace and free world leadership

In spite of a strong Communist offensive, the United States strengthened its position of peace leadership by its policies respecting the newly emerging nations of Africa in the explosive Congo situation, by our partnership with the South and Central American countries in the Organization of American States with reference to the Dominican Republic and Cuba; and by our calm handling of the Far East crises in Korea and Laos.

Communist pressure on Japan is clear evidence of the strength of the forces with which the United States and the free world have had to contend.

The series of Soviet "cold war" thrusts over the U–2 incident, the collapse of the Paris summit conference, cancellation of the President's trip to Japan after his triumphant visit to Taiwan, the Philippines, and Korea, and the Cuban crisis have been climaxed by the Moscow spy trial of U–2 pilot, Francis Powers and the Kremlin's attempt through it to indict U.S. foreign policy. But these moves appear to have failed to realize their objective.

Ratification of the United States-Japan Mutual Security Pact strengthens Japan in preserving freedom and democracy. The Communists know that Japan is the most industrialized nation in the Far East, and their designs on it form part of their whole effort to divide the free world by weakening it economically. Let any businessman think for a moment what competition would be like if Japan were in the hands of the Communists who could direct its economy to the disadvantage of the free world.

Cuba must respect human rights and liberties

There has been great concern over the deterioration of relations between the United States and Cuba. The President has made it clear that the United States will adhere to a policy of nonintervention in the domestic affairs of other countries and will scrupulously observe our treaty commitments as a member of the Organization of American States. We will insist that Cuba has to respect its obligations under international law, and human rights and liberties under the OAS and U.N. Charters. Our country has shown great forbearance and skill in handling a very trying situation in a new historic partnership policy succeeding the good neighbor policy with the other American Republics; also our sugar legislation sharply reduced Cuban and Dominican sugar imports into the United States.

The decisive struggle with communism in the 1960's will be economic, but survival is primary to winning such a struggle. Therefore we must always be able to lead in the quest for world peace from a position of adequate military posture to carry out our worldwide responsibilities considering modern rocket and missile and conventional weapons and defenses against them.

Fighting the economic cold war

On the economic front of competitive coexistence, the United States and the industrialized countries of the free world are seeking to coordinate their aid efforts to underdeveloped countries and to work out solutions of trade and other economic problems.

The national economic growth of the United States and the free world can be stimulated to a remarkable degree by an upsurge in the export-import trade of all the non-Communist nations. During 1958 and 1959 the United States experienced a $7 billion balance of payments deficit in large part attributable to lack of exports. This trend was reversed during the first quarter of 1960 when U.S. exports exceeded imports at the annual rate of $3 billion; this year our balance of payments position will be substantially improved.

In order to assure continued increase and adequate economic expansion to meet our world peace responsibilities and the Soviet challenge: On March 17 the President proclaimed a program of export promotion including the extension of short-term credit guarantees by the Export-Import Bank along with vastly increased informational and other activities by the Department of Commerce.

Economic cooperation with other nations

The spirit of cooperation is necessary to launch a joint effort among the nations of the free world, particularly those in Western Europe, to aid underdeveloped regions. There are excellent prospects that Western Europe will join a partnership program to raise aid and investment to the less developed nations now estimated at about $4 billion annually to 50 percent above the present effort. A new treaty nation organization, the Organization for Economic Cooperation and Development (OECD), is now in formation of which the United States,

Canada, and 18 Western European nations will be members to effectuate this objective. The removal of trade barriers in Western Europe without discrimination against the United States would not only encourage U.S. sales abroad but would also stimulate third countries to produce what they can most economically.

Another problem is that of reconciling the interests of two present European trade blocs: The six nations in the European Economic Community—France, Germany, Italy, Belgium, Holland, and Luxembourg; and the seven nations in the European Free Trade Area—United Kingdom, Norway, Sweden, Denmark, Switzerland, Austria, and Portugal.

Legislation was enacted authorizing the appointment of a U.S. Citizens Commission on NATO to participate with similar commissions from other NATO countries in exploring means of cooperation and unity of purpose among the NATO nations to develop democratic freedom by economic and political means.

The Antarctic Treaty

Ratification of the Antarctic Treaty which seeks to keep the Antarctic region open to international cooperation, scientific exploration, and peaceful nonmilitary uses; while inaugurating a system of inspection by observers which may prove most useful in disarmament negotiation with the Soviets.

Mutual security

Strengthening the economies of free world nations and affording a satisfactory rate of development to less developed nations constitute a prime objective of the mutual security program.

Congress appropriated $3,787,350,000 for mutual security as against the mutual security authorization of $4,086,300,000 and $4,175 million requested by the President. Of the amount appropriated, $1.8 billion was voted for military aid funds, $675 million for defense support, $230 million for economic aid, $150 million for technical assistance, $550 million for the Development Loan Fund and $250 million for use in the President's contingency fund in the Congo and other emergencies. Also included in the new Mutual Security Act is a provision establishing an East-West cultural center in Hawaii and a plan for a North-South cultural center in Puerto Rico.

The International Development Association

The Senate approved American participation in the International Development Association.

The IDA makes it possible to expand use of soft nonconvertible local currencies available for loans for development purposes.

It will be an arm of the World Bank with membership of 68 countries and a total initial subscription of $1 billion of which the Senate authorized a $320,290,000 5-year subscription.

National defense and space

Congress has approved a national defense budget for fiscal 1961 of $39,996,608,000, approximately half of the Nation's total budget, and $661,608,000 more than the President's request. Of this amount $4,177,773,000 is for research and development.

The defense appropriations contain sizable increases in funds for construction of Polaris and nuclear attack submarines; continue the Army modernization program and expand our airborne alert capability. Congress also voted $293 million for construction of an aircraft carrier.

At the President's request, Congress voted substantial increases in funds for nonmilitary space projects under the National Aeronautics and Space Administration. These funds will further our plans to keep moving ahead vigorously with an intensive program of scientific exploration and with the development of the large rockets essential to the conquest of outer space. The launching of Echo I and the successful recovery of the Discoverer capsule are exciting portents of what is to come in this exploration of space and shows that we are making material progress closing the gap between ourselves and the U.S.S.R.

Budget and taxes

In his budget message, the President estimated spending at $79,800 million and revenues at $84 billion leaving a surplus of $4,200 million. The total of the appropriations bills enacted by the Congress is $82,816 million.

It is always essential to eliminate wasteful and unnecessary items from the Federal budget, but at a time when the cold war with the Communist world is phasing into a decisive struggle in economic competition, we have to be cautious about any relaxation of our defense and security needs and the requirement of our developing economy. In this connection the President recommended closing certain tax loopholes and the elimination of special tax privileges so that the anticipated surplus may be applied to the reduction of the national debt now about $290 billion.

Depressed areas legislation

The Congress passed a bill to assist chronically depressed areas in our Nation by creating new employment opportunities through grants, loans, and technical assistance, but failed to override the President's veto, which was based upon the high cost of this program.

Labor and minimum wage

The Senate passed the Fair Labor Standards Act of 1960, increasing the Federal minimum wage to $1.10 per hour in 1961, $1.20 in 1962, and $1.25 in 1963, and extending wage and hour protection under the act to approximately 4 million workers not previously covered, principally employees in larger retail and retail-service industries. The House bill called for $1.15 per hour and, as compromise proved impossible, the legislation will have to be acted on again next year. It is important that certain retail, service, and other enterprises, by reason of size, volume, geographical, or seasonal considerations, should not suffer under the new act, and in such cases exemptions must be obtained to prevent competitive disadvantage or injustice to particular groups.

Housing

The Senate passed a housing bill which extended the FHA home improvement program 1 year, increased urban renewal—slum clearance—funds by $350 million, provided $500 million for loans for college housing, and extended and improved the FHA mortgage insurance program. The bill contained a number of provisions, including permission to FHA to lower premium rates from one-half to one-quarter percent, removal of the ceiling on relocation payments for individuals, families, and businesses whose housing is being demolished in the urban renewal program, and increases in the limit which New York colleges could borrow under the college housing program.

The House failed to act on this measure, and there was enacted during the closing hours of the session legislation to extend for 1 year the title I home improvement program, provide $500 million in college housing loan funds, and $50 million in loans for public facilities in small communities.

Education and health

The Federal Government needs to aid the State and local governments in meeting their education needs. This is essential in our national interest under present conditions at home and abroad. The bill to provide Federal matching grants for school construction and to help the State to raise teachers salaries was defeated in the Senate which then passed a bill totaling $1.8 billion over a 2-year period. A similar measure providing $1.3 billion for construction only over a 4-year period was passed by the House of Representatives. There was no opportunity for a House-Senate conference and the bill will have to be acted on again next year.

The objective of Federal aid for adequate health care insurance for our older citizens 65 years of age and over must and will be attained. Enactment of the social security bill, H.R. 12580, assures adequate medical health care for citizens over 65 who are indigent due to medical bills or are receiving old-age assistance. These number over 3 million persons. It is most regrettable that in addition, a plan could not be evolved now for the many people of moderate income estimated at 10 to 11 million who are in need of such health care insurance. There was just no chance to work it out as is normally done here under the conditions of the brief congressional session.

Civil rights and civil liberties

After 8 weeks of debate, the Senate passed the Civil Rights Act of 1960, and it was signed into law by the President. The bill helps further to protect the rights of all Americans to vote by including power for the Attorney General to inspect registration records and for the Federal courts to appoint voting referees where there is a pattern of local voting discrimination, who could register persons who have been denied the right to vote. It also includes provisions to put the FBI on finding and bringing to justice those guilty of hate bombings like those of schools, homes, churches, and synagogues; made unlawful interference with court orders, such as these requiring desegregation of public schools; and provided for the education of armed services personnel's children when local schools are closed to avoid desegregation.

Immigration

Action in the Congress on immigration this year was limited to passage of House Joint Resolution 397 which would admit approximately 5,000 refugees from Europe, and to legislation continuing the alien orphan program for another year.

Post office and social security

A 7½-percent pay raise bill to provide higher salaries for postal workers and other Federal employees was enacted.

The Federal Government has a clear responsibility to be a fair employer itself and to give enlightened leadership to private enterprise throughout the Nation in the treatment of its own personnel.

The Social Security Amendment of 1960 liberalized the provisions which allow beneficiaries to increase their earnings above $1,200 a year.

Agriculture

Our farm problem is not one of shortages, but rather one of surplus and plenty.

The present surplus of wheat has become a major national problem in terms of public investment immobilized and high storage costs as well as in its serious effects upon the future welfare of our farmers.

The President has repeatedly asked for new farm legislation but such has not been forthcoming. Apparently some find it easier to deal with this problem as a political issue than to deal with it in actuality.

Veterans

Public Law 86–211 revising the pension program for the benefit of veterans, widows of veterans, and their children was enacted in the first session of this Congress.

At this session, several bills applying to limited groups of veterans were passed, in keeping with our policy of taking care of those who sacrificed so much to guard our freedoms.

Conclusion

The citizens of the United States of America have responded in ever increasing numbers to express their views on matters of

national interest, as well as on problems in which they have a personal interest.

It is always heartening to know that our constituents feel free to write about their problems or about any issues on which they have decided opinions.

XLV

THE GOLDEN ANNIVERSARY OF WHITE HOUSE CONFERENCE ON CHILDREN AND YOUTH

(By Senator FRANK CARLSON, of Kansas)

On March 27, 1960, 7,000 people assembled in Washington for a conference.

It was an event of great significance for the future of the Nation because those 7,000 people came from all over the country and some from abroad to talk about our children. They were taking part in the 1960 White House Conference on Children and Youth.

The President of the United States addressed the conference at its first meeting. During the following week the delegates discussed the problems and needs of American youngsters and made proposals for meeting their needs.

The White House Conference on Children and Youth is a citizens' conference. It is organized and run by the people of the United States, acting through local, State, and National organizations under the direction of a committee of 92 representative citizens who were appointed by President Eisenhower. Congress provided some funds for basic organization in the budget of the Children's Bureau, but most of the cost of the conference has been met by foundations, organizations, industry, and individuals.

President Theodore Roosevelt authorized first conference

It has become a good American tradition to take stock every 10 years of conditions for our children. The 1960 White House Conference was the sixth such national gathering. The first such conference brought 200 child welfare leaders together in Washington early in 1909, on the invitation of President Theodore Roosevelt. Each one of the conferences stressed a different aspect of child welfare. Each conference has had important influences on legislation and services for children.

The 1909 conference dealt with just one subject—dependent children. Its chief aim was to stimulate nationwide interest in getting homeless and neglected children out of old-fashioned orphan asylums and into good adoptive or foster homes. This first conference produced a historic statement on the value of home life for children, which laid the foundation for the widows' pension movement and aid to dependent children program. Other recommendations led to the establishment of the Children's Bureau and the organization of the Child Welfare League of America, and encouraged the growth of adoption agencies.

The second White House Conference on Children, in 1919, drafted minimum standards for child employment, child protection, and maternal and child health. These standards formed the basis for many State child labor laws, for the Sheppard-Towner Act, and for the maternal and child health program under the Social Security Act. The recommendations of the 1930 Conference were summarized in a Children's Charter which proclaimed the right of every American child, "regardless of race, or color, or situation," to health, education, decent housing, an adequate standard of living, and a home. These recommendations, too, are reflected in provisions of the Social Security Act.

Ten years later, the 1940 Conference outlined a program for State and local action to improve conditions and services for children in all sections of the country, in the cities, and on the farms. World War II interfered with carrying out most of this program. But it was a program for the decades. The 1960 White House Conference could well come up with many of the same recommendations, and we would be working on them for years to come.

Fortunately, one of the achievements of the 1950 Conference was the creation of machinery for citizen action. Lay and professional groups interested in children banded together in a Council of National Organizations on Children and Youth. Committees formed in many States to plan for the welfare of young people coordinated their activities through a National Council of State Committees. These bodies, which functioned through the 1950's, have been preparing for the 1960 Conference. After the Conference is over, they will go to work to carry out its recommendations. In the executive branch of the Federal Government, an Interdepartmental Committee on Children and Youth has been cooperating with these citizen organizations.

Careful preparation for 1960 conference

People all over the country worked for more than a year to get ready for the 1960 conference. In every State and territory, there was a White House Conference committee, appointed by the Governor. County committees were organized in more than half the counties of the United States. Doctors, social workers, clergymen, teachers, lawyers, college professors, businessmen, labor leaders, farmers, and housewives worked on these committees. Public opinion polls, factfinding surveys and studies, town meetings and local, regional, and State conferences are some of the ways the local and State committees used to collect information for the reports they prepared for the White House Conference. Some of these reports were quite voluminous, and they formed the most detailed body of information yet compiled on State and local services for young people.

It is estimated that nearly 5 million people had some part in this tremendous preliminary activity. Many of them were teenagers, high school and college students. These youngsters worked actively with local and State committees; they participated in conferences with their elders. They held youth conferences of their own, and came up with very good and serious recommendations.

Nearly 1,000 of these young people attended this year's Conference as full-fledged delegates. The Conference not only talked about youth, it listened to what youth had to say.

Affect on children of the sweeping changes of the 1960's

Fifty years after the first White House Conference on Children, this Golden Anniversary Conference met at the end of a decade which witnessed breathtaking changes in our country and in the world. The next decade is likely to bring even more sweeping changes.

This conference considered the impact of these changes on the lives of our children today and tomorrow. It was concerned with the strain which our exploding population has placed on all services for children.

It considered such problems as broken homes, working mothers, children with mental or emotional handicaps, children with physical handicaps, delinquent youngsters, and young people without skills needed in order to get jobs in this age of automation.

The delegates had to try to anticipate the problems of the 1960's. They proposed ways of meeting the shortages of schoolteachers and classrooms, of qualified social workers, health workers, and vocational counselors. As President Eisenhower wrote in his letter calling the 1960 White House Conference:

"The rapidly changing times in which we live * * * make it incumbent upon us to do everything we can to plan ahead and to see that we prepare today's children well for life in tomorrow's world."

And plan ahead they did. The 1960 conference represented not the end of a stock-taking process as might have been expected in view of the precise preparation, but a beginning. The delegates learned much from each other and what they learned they took home to their States, their communities, their churches, schools, and civic organizations.

They learned from their factfinding and studies about services that are lacking. They made inventories of unmet needs.

With the impetus of the 1960 White House Conference they will be able to go ahead with the most important part of their work, for the most important part of this Golden Anniversary Conference on Children and Youth will be the action taken after it by American citizens, to carry out the programs which they themselves proposed.

It will be up to them to see that all American children have an equal opportunity to grow in freedom in the world of today and tomorrow.

ORDER OF BUSINESS

Mr. KEATING. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield to the Senator from New York.

Mr. KEATING. First, I want to thank the distinguished majority leader for the courteous and dignified way in which he has presided as majority leader, and the helpful way in which he has extended assistance to many of us. Secondly, I ask this question of the distinguished minority leader: We adopted a resolution which instructed the majority leader and the minority leader to notify the President that we were about to adjourn. I wanted to ask them whether the Senate could be privileged to hear a report as to what the President had said to them at the time when he was notified that we were about to adjourn.

Mr. JOHNSON of Texas. Mr. President, we will make that statement at the proper time.

Mr. KEATING. Later?

Mr. JOHNSON of Texas. Yes. I understand the other body has already performed its mission, and we plan to carry ours out.

Mr. KEATING. I was very much interested in what the President might have said.

Mr. BENNETT. Mr. President, has consent been obtained to keep the RECORD open for a brief period of time after adjournment?

Mr. JOHNSON of Texas. I am informed that the senior Senator from Arizona [Mr. HAYDEN] has already obtained that permission.

Mr. BENNETT. For how many days?

Mr. JOHNSON of Texas. Until Wednesday, September 21.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield to the Senator from Delaware.

Mr. WILLIAMS of Delaware. Did I correctly understand the Senator from Texas to say he wished to have a vote on the Yarborough resolution tonight?

Mr. JOHNSON of Texas. I would hope we could vote on the pending proposal and other proposals before the Senate. The question of whether we do so is entirely up to the Senate.

I appreciate the Senator's letting me get these matters out of the way, because the minority leader and I have some chores.

Mr. WILLIAMS of Delaware. I am perfectly willing to vote, but I would like to have the yeas and nays ordered, in order that Senators may know that there will be a yea and nay vote on the Yarborough amendment.

Mr. JOHNSON of Texas. That is a matter for the Senate to decide, but I hope the Senator from Delaware will withhold that request.

Mr. WILLIAMS of Delaware. I withhold it.

Mr. JOHNSON of Texas. If the Senator wants the yeas and nays ordered at a later time on any of these proposals, the majority leader will be cooperative and will help him try to have them ordered.

Mr. WILLIAMS of Delaware. I understand.

AREA REDEVELOPMENT

Mr. DIRKSEN. Mr. President, I ask unanimous consent to have printed in the RECORD as a part of my remarks a letter from the Department of Commerce on the matter of area redevelopment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, D.C., September 1, 1960.

Hon. PAUL DOUGLAS,
U.S. Senate, Washington, D.C.

DEAR SENATOR DOUGLAS: Because I believe the public should be informed as to exactly why new legislation to aid those few areas with chronic unemployment failed to pass in this resumed session of the Congress—despite the urgent request of the administration and the desire of Members of the Congress for such action—I am responding to your recent press release by correcting some of its errors and by setting the record straight.

This is not a case of quiddities and quillets over some language in a bill, as some imply. Nor is the crux of the matter whether—as you insist—the administration has or has not assumed a no compromise posture. Plainly, it has not. The issue is far more basic. It is a fundamental difference of principle. This is the difference between those who prefer an economy controlled and regulated by an all powerful centralized government as contrasted with those who place chief reliance on private initiative and local resources to establish free private jobs in a free society. As the record shows, the administration has repeatedly agreed to compromise and has compromised on a multitude of features affecting distressed area legislation while making it plain that these fundamental American principles must remain inviolate.

The basic features of the bill to which you adhere suggest a purpose to achieve centralized government control over the sources of production in the United States. One major objective of current distressed area legislation has been to give a preference to particular localities in their efforts to attract new industry—new enterprises which, as all must agree, do not spring Minerva-like from the forehead of Government but from the confidence in free initiative inspired by our kind of society. It is one thing to espouse this objective but it is quite another thing to insist, as opponents of the administration bill do, that this must be accomplished by and only by—

Financing, including outright grants, so preponderantly Federal as to amount to virtual Federal control of the establishment and location of plants, Federal control of production and supply, Federal control of jobs;

Dilution of this preference so widely as to make it meaningless to particular communities in genuine distress—thus fruitlessly expanding bureaucratic authority over American industry;

Setting the stage for what amounts to Federal piracy of plants from healthy economic regions of the country, unfair competition, displacement of settled jobs, introduction of controls, restrictions and confusion and the inevitable destruction of personal freedoms. In my opinion, no statutory language could protect Peter from Paul under your bill.

Ironically, the bill you sponsor would do less for the areas of chronic unemployment in your own State than would the bill sponsored by the President these past 5 years. Illinois, which has no major depressed areas, has four minor areas under the tests of the administration bill and five such areas within the terms of your proposal. However, the allocation of funds, prorated on the basis of numbers of unemployed, would be as follows:

Name	Number unemployed, March 1960	Administration bill	Douglas bill
Harrisburg	4,600	$682,500	$322,500
Herrin-Murphysboro, West Frankfort	12,050	1,785,000	840,000
Mount Carmel-Olney	1,375	----------	97,500
Mount Vernon	2,850	427,500	195,000

It is not in accord with the facts to allege that the administration is not interested in low income rural areas, in loans to small business in rural areas, in increased loans for public facilities with preference for areas of chronic and persistent unemployment. The truth is that:

1. The administration bill originated the idea of preference money for public facility loans and, through the Housing and Home Finance Agency, would make available to areas of chronic labor surplus twice as much money for such purposes as does your bill. Parenthetically, I do not wish to adopt any numbers game with regard to depressed area legislation. Obviously the important thing is how the funds are used rather than the total amount, since the funds initially appropriated can always be adjusted from year to year in the discretion of Congress if the need is present.

2. The countrywide rural development program to assist low income rural areas is strong and successful despite the dampers placed upon it by restrictive legislation. Nevertheless, aided by a speeded-up rural development program, off-farm income of farm families is increasing more rapidly than ever and has now reached a rate of $6.8 billion per year.

3. The Small Business Administration loan program with regard to rural areas is producing new jobs in these areas at the fastest rate ever, $95 million loaned to small business under this program.

Attempts by anyone to describe the administration as uncompromising are refuted by the fact that the new features of the administration bill, long buried in your committee, include an increased business loan fund, expanded criteria for eligibility, enhanced vocational training funds and vastly increased loan funds for public facilities including—contrary to the assertion of some critics—funds for bringing public facilities to industrial parks and other like developments.

The administration has made statesmanlike compromises and so have others who at first wanted certain details. The pity is the attitude of those few in positions of legislative power who insist upon "all or nothing." For insistence on "nothing" has blocked the passage of a jobmaking bill that would have had the overwhelming support of the Congress and the administration and that attitude has left distressed areas in the lurch—with an issue but without the jobs they could have had.

The public will sense that behind the current issue is a more fundamental question: the basic choice between those who seem to want to place the jobs and production of this country under the thumb of Federal bureaucracy versus the aim of this administration and those who believe in our free society to establish a sound private, local, State, and Federal partnership to provide private jobs in private plants in areas of truly chronic and persistent unemployment.

Sincerely yours,

PHILIP A. RAY,
Under Secretary of Commerce.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of executive business, and take up the nominations on the calendar starting with New Reports.

The motion was agreed to; and the Senate proceeded to consider executive business.

Mr. JOHNSON of Texas. Mr. President, I ask that consideration of executive nominations begin with "New Reports." There are objections to the present consideration of the nomination on the first page.

The PRESIDING OFFICER. Without objection, it is so ordered.

COAST AND GEODETIC SURVEY

The Chief Clerk proceeded to read sundry nominations in the Coast and Geodetic Survey.

Mr. JOHNSON of Texas. Mr. President, I ask that those nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations will be considered en bloc; and, without objection, they are confirmed.

Mr. YARBOROUGH. Mr. President, may I ask if action has been taken on the nomination in the Interstate Commerce Commission?

Mr. JOHNSON of Texas. No; action on that nomination has been withheld. Several Senators have asked that they be notified.

U.S. COAST GUARD

The Chief Clerk proceeded to read sundry nominations in the U.S. Coast Guard.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the nominations in the U.S. Coast Guard be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations in the Coast Guard will be considered en bloc; and, without objection, they are confirmed.

U.S. CIRCUIT JUDGE

The Chief Clerk read the nomination of J. Joseph Smith, of Connecticut, to be a U.S. circuit judge for the second circuit.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. JOHNSON of Texas. Mr. President, the Senators from Connecticut have been consulted. We have reviewed the matter very carefully. I believe there are other nominations at the desk, to which there is no objection.

U.S. ATTORNEYS

The Chief Clerk read the nomination of Cornelius W. Wickersham, Jr., to be U.S. attorney for the eastern district of New York.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of George M. Yeager, to be U.S. attorney for the district of Alaska.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

U.S. DISTRICT JUDGE

The Chief Clerk read the nomination of William H. Timbers to be U.S. district judge for the district of Connecticut.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. JOHNSON of Texas. Mr. President, I ask that the President be immediately notified of the nominations today confirmed.

The PRESIDING OFFICER. Without objection, the President will be so notified.

LEGISLATIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

TRIBUTE TO SENATOR RANDOLPH

Mr. BYRD of West Virginia. Mr. President, I rise at this time to pay tribute to my colleague, Senator JENNINGS RANDOLPH. I consider it an honor to serve in this distinguished body with him.

There are many compliments which could be paid to Senator RANDOLPH. His activities in the Congress have been numerous. His awareness of his responsibilities is unfaltering. At all times Senator RANDOLPH has had the interests of West Virginians at heart, but his thoughts are not limited to his own State. He is a servant of all Americans. At all times he has thought of and voted for legislation which, he believes, will best serve the interests of every citizen of the United States.

As a representative of the people of West Virginia, Senator RANDOLPH has been most effective.

The passage of the coal research bill, so important to West Virginia, was expedited through the combined efforts of many Senators. Senator RANDOLPH was one of the leaders in the fight to secure this much needed legislation.

The Senator was also very helpful in having the depressed areas bill passed by the Senate. When I conducted hearings on unemployment in West Virginia during January 1959, Senator RANDOLPH's aid was very worthy of commendation. As a member of the Senate Committee on Labor and Public Welfare, he possesses an invaluable knowledge which has been of great help to the committee.

His work on the committee has been lauded by many. Senator RANDOLPH's deep concern regarding the problem of unemployment has been shown many times over in his constant striving for the solution which is needed.

Senator RANDOLPH's work for a Youth Conservation Corps has been outstanding. He succeeded in proving the double benefit to be derived from such legislation—the provision of employment opportunities for our young men and the utilization of their work to preserve the forests of our land.

Many have been the times when Senator RANDOLPH and I have met with officials in the departments in an attempt to improve and to enlarge the surplus agricultural commodities program for needy families. We have had meetings, too, with officials in an effort to curb the ever-increasing tide of residual oil imports, which have been so detrimental to the coal industry.

Senator RANDOLPH's activities in connection with the minimum wage legislation during this session of Congress have been extensive.

These are but a few of the activities in which the senior Senator from West Virginia [Mr. RANDOLPH] has engaged.

Senator RANDOLPH's voting attendance record is excellent. His participation and interest in legislation debated on the floor of the Senate have been witnessed by all. His cogent observations and objective questioning have often added to the debate on a wide range of topics.

Senator JENNINGS RANDOLPH is a man who has much personal appeal. He has a warm personality, which generates graciousness and good naturedness. He is liked by all who serve with him.

His record of service shows the wide range of subjects which have contributed to his personality. Senator RANDOLPH is a journalist, an educator, and a businessman. In all of these endeavors, history has recorded his successes, but, notwithstanding these accomplishments, his record as a public servant stands at the pinnacle.

Mr. President, I have known JENNINGS RANDOLPH for quite a long time. I have come to know him better, of course, in my service with him in the Senate of the United States. His conscientious approach and sincerity of purpose have been devoid of selfishness, and to me it seems have been motivated by his profound desire to serve his country and his fellow men.

Perhaps my thoughts could be better expressed by those lines written by a poet whose name I do not recall but who I think had in mind someone like JENNINGS RANDOLPH when he penned them:

"How far away is the temple of fame?"
Said a youth at the dawn of the day.
He toiled and strove for a deathless name;
The hours went by and the evening came,
Leaving him old and feeble and lame,
To plod on his cheerless way.

"How far away is the temple of good?"
Said another youth at the dawn of the day.
He toiled in the spirit of brotherhood,
To help and succor as best he could
The poor and unfortunate multitude,
In its hard and cheerless way.

He was careless alike of praise or blame,
But after his work was done,
An angel of glory from heaven came
To write on high his immortal name,
And to proclaim the truth that the temple of fame
And the temple of good are one.

For this is the lesson that history
Has taught since the world began;
That those whose memories never die,
But shine like stars in the human sky,
And brighter glow as the years go by,
Are the men who live for man.

Mr. President, I believe that Senator RANDOLPH is a public servant, a dedicated representative, a great Senator who endeavors to live for his fellow man.

Mr. McNAMARA and Mr. HOLLAND addressed the Chair.

Mr. BYRD of West Virginia. Mr. President, I yield first to the Senator from Michigan, and then I shall yield to the Senator from Florida.

Mr. McNAMARA. Mr. President, I thank the Senator for yielding.

Very little could be added to the high praise the Senator has heaped upon his colleague today.

I have had the pleasure of working rather closely with Senator RANDOLPH, and I wish to say "Amen" to the fine things said about him. The recitation of the very fine poem I think is quite apropos, because he is a "propeople Senator." I have found him to be exactly that.

Reference has been made to his work on the Committee on Labor and Public Welfare. I have the honor of being the chairman of the Subcommittee on the Problems of the Aged and the Aging. Senator RANDOLPH has been a tireless worker on the subcommittee. Not only did he attend all of the hearings in Washington, but he traveled throughout the country. He was a great help in the building of a very fine record, which will stand, I am sure, as a monument to the subcommittee of which I have the honor of being chairman.

There are many other things in the Committee on Labor and Public Welfare we could relate, but time is too valuable at this point.

The Senator did not make reference to the work of Senator RANDOLPH on the Public Works Committee. His long experience on the Public Works Committee of the House has proved to be of tremendous value to the Public Works Committee of the Senate. He not only has knowledge of the field but also contact with Members of the other body who, time and time again, have proved themselves to be of value to us in accomplishing that which is necessary.

There is a necessity for human, personal contact between the two Houses.

His long service in the House is really of very great value not only because of his seniority but also because of the personal contacts his personality has brought about over a period of years.

These are two very important and very hard-working committees. Most Senators serve on only two committees, but Senator RANDOLPH serves on a third committee, the Committee on Post Office and Civil Service.

It has been a very active committee at this session. We all know that your colleague is running for reelection, but because of the work that he has had to do here and to which he has been so dedicated in his service to the people, he has neglected his own personal opportunities to return home and campaign. I think that it has been pointed out that he is most unselfish, and I think that devotion to duty demonstrates his unselfishness very well. I am happy to join in expressing my appreciation of the colleague of the junior Senator from West Virginia.

Mr. BYRD of West Virginia. Mr. President, I am very appreciative of the words which have been spoken by my delightful friend from Michigan. I am especially grateful for his having referred to Senator RANDOLPH'S service in the House of Representatives. Senator RANDOLPH served 14 years in the House of Representatives, and he served there with distinction. His experience in the House of Representatives equipped him admirably for his continuing in service in this great body.

Mr. HOLLAND. Mr. President, I wish to join in saying a word or two about my good friend of so many years, JENNINGS RANDOLPH, the senior Senator from the State which was my mother's home before she came to Florida. I have had the pleasure not only of a delightful acquaintance with JENNINGS RANDOLPH, but also of being his guest in West Virginia. I believe I know something of the deep affection which the people of West Virginia feel toward him.

He is a graduate of the West Virginia schools. He has served continuously for a long time as trustee of two of the old colleges of West Virginia, Davis and Elkins, and Salem.

He has engaged in so many civic and educational activities in that State that I could not begin to list them. He has peculiar experience which has fitted him particularly to do a great job here in the Senate, growing out of his 14 years in the House, his chairmanship of the House of Representatives Post Office and Civil Service Committee, and his intimate familiarity with the public works field, in which, I may say, he and his distinguished colleague, the junior Senator from West Virginia, have been so assiduous that every time they appear before the Appropriations Committee we know that it is in support of some project that has been authorized which they want to get started immediately.

I commend both of those Senators for having so actively and aggressively pressed for the initiation of important projects in their State, probably to a greater degree than they would have normally, but because of the serious unemployment in their good State and their work on the initiation of those programs. Several important projects have been begun under their insistence, because of their urging. They have successfully urged that work started there would be a practical way of beginning to take up the slack in employment.

The distinguished junior Senator from West Virginia, and the distinguished senior Senator from Michigan have said so many things that are entirely truthful about the fine service of JENNINGS RANDOLPH that I shall not repeat them, but I simply wish to say that I think the span covered by the assignments of the two Senators from West Virginia has enabled them to jump into the breach in a remarkable way to help solve the problems which are bearing so hard upon that good State. I have felt frequently that they were both entitled to great commendation.

As to the senior Senator from West Virginia, I know of no one who is more articulate or able to speak more persuasively and appealingly or in more perfect language than he. I believe he was a professor of speech at college before he came to the House of Representatives. His entire experience has been so well rounded as to enable him to render exceedingly good service indeed, unusual service to his State. He has proceeded to do so through the exercise of unusual industry and aggressiveness.

Mr. BYRD of West Virginia. Mr. President, I am very grateful to the Senator from Florida for his comments concerning the service of my distinguished colleague. I am appreciative, too, for his kind words in my behalf. I think it should be said that the Senator from Florida has always been very conscious of the needs of West Virginia, a State that is very close to him, and he has never ceased to be helpful to my colleague and me in whatever we have tried to do for our people. I should not want to pass up this opportunity without expressing my gratitude, and, of course, that of my colleague, to the senior Senator from Florida.

Mr. GORE. Mr. President, it was my great fortune to serve in the House of Representatives with the then Congressman and now Senator JENNINGS RANDOLPH. I say great pleasure.

I should add great profit, because I learned from the industry, from the devotion to duty, from the steadfastness of purpose that one can accomplish a great deal as a Congressman, even though he be but 1 of 435.

JENNINGS RANDOLPH was more than merely 1 of 435, a great deal more. He was a force in and of himself. Well do I recall the leadership he took in highway improvement in the House of Representatives. I think it is fortunate for the Senate and for the country that he is now a member of the Highway Subcommittee in the U.S. Senate. In that capacity he has contributed greatly to the prosecution, to the building, to the carrying on of the program of highway improvement, not only in the State of West Virginia, but in Tennessee, Texas, Alaska, and in all of our States.

The concept which Senator RANDOLPH has of highway transportation is a national one, a broad one. He has always demonstrated the capacity, however, to understand the local problems of transportation.

We have witnessed his interest in many fields where recently, as the able Senator knows, he took a most active, forceful, and effective part in the passage of the bill to provide medical care, hospitalization, and other medical benefits for those of our citizens who have advanced in years beyond their income-producing years. For the people who are in want and pain, who are lonely and need the helping hand of our Government, Senator RANDOLPH was ready to fight.

He is an outstanding man. My personal relations with him make it difficult for me to find terminal facilities. We lived only one house apart here in Washington. I know him not only as a fellow Senator but as a neighbor.

He is the kind of man one likes to have for a neighbor, and the kind of a man and gentleman one likes to have for a colleague in the Senate. I daresay he is the kind of man that the overwhelming number of people in West Virginia will want as their U.S. Senator.

Mr. BYRD of West Virginia. My colleague will cherish the words which have been spoken so sincerely by our friend from Tennessee. I thank him for his contribution.

Mr. BARTLETT. Mr. President, will the Senator yield?

Mr. BYRD of West Virginia. I yield to the senior Senator from Alaska.

Mr. BARTLETT. Mr. President, I subscribe to every sentiment concerning Senator RANDOLPH that has been uttered here. He is a good Senator. He is an able Senator. My acquaintance with the senior Senator from West Virginia dates back over a period of 16 years. A moment ago the Senator from Tennessee commented on the interest that Senator RANDOLPH has had both as a Member of the House of Representatives and as a U.S. Senator in the highway program through the United States. I can attest to that from personal knowledge. I served with him for a good many years in the House when he was a voting Representative from West Virginia and I was a Delegate from the then Territory of Alaska. I first came to know him well when he traveled to Alaska as a member of the Roads Committee. He expressed and maintained a tremendous interest in the roads of Alaska. That interest extended to the borders of every State.

He is, as the Senator from Florida has noted, a first rate speaker, one of the very best in the land. He is a man of driving energy, and he directs that energy into constructive channels. All of us who have been associated with him in the Senate have observed the expression of that energy, even in the cloakroom, where we have noted it, without any intention of eavesdropping. When he is not on the floor or his office he is in the cloakroom constantly making calls in behalf of his beloved people in West Virginia, working for them, and working for the people of the entire land.

He has been an adornment and an ornament of this body, as he was of the House of Representatives. I am happy on a personal basis that our association has been renewed in the Senate. It is well and appropriate and altogether beneficial that the junior Senator from West Virginia should call our attention this afternoon to the constructive work of his colleague from the great State of West Virginia.

Mr. BYRD of West Virginia. I find it difficult adequately to express my gratitude to the Senator from Alaska. It is best to say to him, "Thank you very much for your kind words in behalf of my colleague." I yield now to the Senator from Texas.

Mr. YARBOROUGH. Mr. President, I commend the distinguished Senator from West Virginia, who entertains all of us with his poetry and remembers our birthdays, and is one of the most faithful men I have ever seen in this or any other body, for his thoughtfulness in remembering his colleague, the distinguished Senator JENNINGS RANDOLPH, who had to be away and could not be here this evening.

I serve on two committees with JENNINGS RANDOLPH, the Committee on Labor and Public Welfare, and the Committee on Post Office and Civil Service. He is diligent in business. He is constant in attendance. He is fruitful of ideas. He is able in the advocacy of those ideas.

It is a privilege to serve with a man of his drive and ability. That is noted particularly by me in the field of veterans' affairs and in the field of education. He is a member of the Veterans' Affairs Subcommittee, of which I have the privilege to be chairman. Only last year we pushed through the GI bill of rights bill for GI's of the cold war, and in that drive JENNINGS RANDOLPH was in the forefront, in the subcommittee, in the full committee, and on the floor of the Senate.

He has shown his interest in the need for higher education by the fact that he is at the present time on the governing board of two colleges. That shows his interest in higher education and his knowledge of the subject.

In all our projects for higher education, JENNINGS RANDOLPH has been a stalwart fighter. He is one of the most thoughtful men in the Senate. I believe him to be one of the most knowledgeable men in the Senate, particularly in the field of higher education. To me, higher education is one of the greatest governmental lags that we have in our country today.

It is a privilege to serve with a man of JENNINGS RANDOLPH'S knowledge, drive, and his ability.

I again commend the distinguished Senator from West Virginia for his thoughtfulness in bringing this matter before the Senate this evening.

Mr. JOHNSON of Texas. Mr. President, I would like to take this opportunity to extend my warm congratulations to a colleague who has been particularly helpful and who has demonstrated in this session his effectiveness in serving his State and his Nation.

I am referring to the Senator from West Virginia, JENNINGS RANDOLPH.

It is always a joy to be with JENNINGS RANDOLPH. An inner sense of breeding and good manners have made him the "Lord Chesterfield" of the Senate—a man whose courtesy is exceeded only by his good judgment.

I would also like to congratulate him upon his keen perception of the problems that face his people and the instinct that always leads him to the most effective solution to those problems. I look upon him as a friend, as an outstanding public servant, and as a legislator of great distinction, and I want to say publicly what I have said privately so many times, that West Virginia and the Nation are both well served by his presence in this body.

Mr. BYRD of West Virginia. I thank the Senators from Texas. I know that my colleague, Senator RANDOLPH, will be grateful to the Senators who have said these many fine things in his behalf. I personally appreciate everything that has been said concerning my colleague.

DISSEMINATION OF POLITICAL OPINIONS

The Senate resumed the consideration of the resolution (S. Res. 374) amending Senate Resolution 305, authorizing the Committee on Interstate and Foreign Commerce to undertake a study of the uses of Government-licensed media for the dissemination of political opinions, news, and so forth.

Mr. YARBOROUGH. I ask that the Senate approve Senate Resolution 374.

Mr. WILLIAMS of Delaware. Has the Senator from Texas concluded his presentation?

Mr. YARBOROUGH. I am ready to vote on the resolution. However, I do not believe that all Senators who desire to be heard on it have been heard. If no one else wishes to be heard, I ask that the Senate adopt the resolution.

Mr. WILLIAMS of Delaware. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KUCHEL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. THURMOND. I object.

The legislative clerk resumed the call of the roll.

Mr. KUCHEL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF MARKETING ORDER QUALITY STANDARDS TO IMPORTED WALNUTS AND DATES

Mr. KUCHEL. Mr. President, 2 days ago the House of Representatives passed and sent to the Senate H.R. 12341. It deals with agriculture. Thus the jurisdiction of the Committee on Agriculture and Forestry attached to the bill, and it was with the members of that committee that its fate lay.

I regret that the chairman of the Committee on Agriculture and Forestry, who has evinced no objection to the bill, nevertheless felt constrained, together with the members of his committee, not to have any further meetings. Thus, a bill which has the approval of the House of Representatives and of the Department of Agriculture remains here unable to receive what, had it come here earlier, I think would have been the approval of the Committee on Agriculture and Forestry and thereafter the approval of the Senate.

The bill deals with dates and walnuts. It is of extreme importance to many of the people whom I have the honor, in part, to represent. I refer to the report by the Committee on Agriculture in the House of Representatives, and I read a part of it:

> Domestic producers of both walnuts and dates have established marketing orders for their commodities under which those walnuts and dates which do not come up to standards of quality, grade, size, or maturity stipulated by the order are kept off of the market in their natural form and may be used only for processing. In the case of each of these commodities, a substantial portion of the harvest does not meet the standards established and is diverted to secondary uses.
>
> At the same time, both the domestic walnut producers and domestic date producers have undertaken programs to acquaint consumers with the high quality of their products and to increase consumer use and acceptance of them. Spokesmen for both groups of producers stated that these programs had had a substantial effect and had increased consumption in the United States of both walnuts and dates.
>
> Unless this legislation is enacted, there is nothing to prevent imported dates and walnuts which do not come up to the high standards set for these products by American producers being brought into this country for sale in unlimited quantities. This would have a serious effect on American producers and their marketing programs in two respects: (1) By selling a product of inferior quality on a generally quality-regulated market, a misleading and unfair price advantage may be obtained, and (2) consumer disappointment at receiving a product of inferior quality can seriously impair the efforts and expenditures of domestic producers to increase consumer acceptance and total sales of these products.

Mr. President, the House committee believed, and the House concurred, that legislation was necessary by which the Government of the United States might require that dates and walnuts which were imported into America have the same standards of quality as are required today by citizens of America who harvest and then attempt to sell dates and walnuts in this country.

Last night two attempts were made to attach this bill to pending measures by way of amendment. In each instance, failure resulted. I recognize that in the next few hours the 86th Congress will have concluded its labors and will have adjourned, pursuant to the resolution, sine die. My only purpose in detaining the Senate for these few minutes is to say that I very much hope that this legislation, now under study in the Committee on Agriculture and Forestry, may be made the first order of business and may be enacted in the next Congress.

I believe in reciprocal trade. I believe in reciprocal trade which is mutually profitable. I believe no one should apologize for standing in the U.S. Senate and urging that those who raise agricultural products in this country—and I speak now of the date grower and the walnut grower—should not be subjected competitively to an imported product whose quality is inferior to that to which he himself is subjected in this country.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a letter dated November 6, 1959, from Acting Secretary of Agriculture True D. Morse to Hon. HAROLD D. COOLEY, chairman of the House Committee on Agriculture.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., November 6, 1959.

Hon. HAROLD D. COOLEY,
Chairman, Committee on Agriculture,
House of Representatives.

DEAR CONGRESSMAN COOLEY: This is in reply to your request of January 14, 1959, for a report on H.R. 1018, a bill to amend section 8e of the Agricultural Marketing Agreement Act of 1937, as amended, to include lemons, mandarins, all types of oranges including temples, tangerines, murcotts, tangelos, dried figs, fig paste, sliced dried figs, shelled walnuts, dates with pits, dates with pits removed, and products made entirely of dates in the list of commodities for which imports thereof must be regulated by grade, size, quality, and maturity in the same manner as the handling of part or all of the domestic commodity is regulated.

We do not object to the passage of this bill. The principle of equivalent quality regulations on the domestic and imported items we believe to be basically sound.

The principal citrus fruits added by this bill are oranges and lemons. We now have marketing orders in operation which regulate the quality of fresh oranges; consequently, imports thereof would come under regulation if this bill were to become law. U.S. imports of fresh oranges as well as fresh lemons are very small in relation to domestic production.

The proposal to add dried figs, fig paste, and sliced dried figs as well as dates and date products would result in the first semiperishable and semimanufactured items being added to the commodities for which imports are subject to regulation under section 8e of the said act. The marketing of dates and figs domestically is covered by marketing orders, and the imports thereof would come under equivalent quality regulation if this proposal were enacted into law. U.S. imports of figs and dates are very substantial. Most domestic figs are marketed in the form of fig paste, and most of the imported figs are imported in the form of fig paste.

It is suggested that the term "products made entirely of dates" as used in this bill be further clarified. We know of no date product (except those with moisture content below 5 percent) which consists 100 percent of date material. Date pieces are coated with rice flour or other material to produce a free-flowing product. Other products, such as date butter, contain preservatives or flavor intensifiers. Under our interpretation of the language contained in this bill, none of these products would be included. Moreover, it would be necessary at times to have the date product analyzed to determine whether in fact it was made entirely of dates. This would cause delays and accompanying difficulties in administration.

Imported figs, fig paste, shelled walnuts, dates, and date products are now subject to inspection by the Food and Drug Administration; however, we are advised that such inspections are made on a selective basis and some lots may enter the country uninspected. Although both the Food and Drug Administration and the Department of Agriculture inspections are directed at wholesomeness, the quality requirements of the Department of Agriculture under marketing orders may be different and apply to items of fruit quality not of direct concern to the Food and Drug Administration.

All commodities and products included under section 8e of the aforementioned act are required to be inspected and meet specified requirements at the port of entry. This means that every lot requires inspection by the Department of Agriculture, and the cost of such inspection is borne by the importer.

The cost of administering this amendment is estimated at $25,000 per year.

The Departments of State, Commerce, and Health, Education, and Welfare do not concur with the position taken by this Department on the proposed legislation. Enclosed are copies of letters from the above-mentioned Departments in which their views are set forth.

The Bureau of the Budget advises that there is no objection to the submission of this report.

Sincerely yours,

TRUE D. MORSE,
Acting Secretary.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senator from California may yield to me, without losing the floor, so that I may make a brief statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORT OF COMMITTEE TO COMMUNICATE WITH THE PRESIDENT

Mr. JOHNSON of Texas. Mr. President, the committee appointed to communicate with the President, to see whether he has any communications to make to the Congress, has performed its duty.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of executive business, to consider certain nominations which were overlooked, and which are at the desk.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to the consideration of executive business.

THE REGULAR AIR FORCE

The Chief Clerk proceeded to read sundry nominations in the Regular Air Force.

Mr. JOHNSON of Texas. I understand that an objection on the other side has been withdrawn.

Mr. DIRKSEN. That is correct.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that these nominations be considered en bloc.

The PRESIDING OFFICER. Is there objection?

There being no objection, the nominations were considered and agreed to en bloc.

Mr. JOHNSON of Texas. Mr. President, I ask that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER (Mr. MCCARTHY in the chair). Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I ask that the Senate resume the consideration of legislative business.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate resumed the consideration of legislative business.

SURVEY ON FEDERAL AID FOR INSTITUTIONS OF HIGHER LEARNING

Mr. JOHNSON of Texas. Mr. President, my colleague [Mr. YARBOROUGH] has Senate Resolution 388. I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 388.

The PRESIDING OFFICER. The resolution will be stated, for the information of the Senate.

The LEGISLATIVE CLERK. A resolution (S. Res. 388) favoring a survey looking to Federal aid for institutions of higher learning.

Mr. JOHNSON of Texas. I understand that the resolution has been submitted, and is favored by the Commissioner of Education and by the Secretary of Health, Education, and Welfare. The resolution does not propose any appropriation. It provides for a study. My colleague, the junior Senator from Texas [Mr. YARBOROUGH], is very anxious to have the resolution acted upon; and I ask that the Senate give it its consideration.

Mr. DIRKSEN. Mr. President, actually this is a request by the Senate to the Secretary of Health, Education, and Welfare to conduct a survey in this field of higher education and junior colleges, and to make a report. It would be made by those now within the framework of the personnel the Department already has; it appropriates no money.

The Secretary did call me, and expressed the hope that the resolution would be adopted.

For that reason, I am quite agreeable to concurring in the request for the consideration of the resolution at this time, and also the request that it be favorably acted upon.

Mr. LAUSCHE. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. LAUSCHE. Is this the precursor of subsequent action that will require money to carry into effect a program which might be evolved from the proposed study?

Mr. YARBOROUGH. There have been a number of bills; one was introduced by the Senator from New Jersey [Mr. CASE]. The majority leader had a very meritorious bill, which was cosponsored by many other Senators, to guarantee loans to students in institutions of higher learning.

None of those bills was reported, due to the fact that the common situs picketing bill got in the way in the Committee on Labor and Public Welfare.

Some favored the bill of my colleague, the senior Senator from Texas, which called for the making of loans. Some believe that the need for additional classrooms is more urgent.

There will be one million more students, by 1964, in our institutions of higher learning, due to the fact that the children of World War II veterans will then be old enough to go to college.

This resolution directs the Secretary to report and to state what is found to be needed the most—whether funds to enable the students to go to college, and so forth, and also to report as to how the financing shall be done; and the resolution instructs him to make a survey in the whole field.

Mr. LAUSCHE. I notice that the resolution requests the Secretary of Health, Education, and Welfare "to review and survey various forms of potential Federal assistance for encouraging and helping institutions of higher learning, including junior and community colleges, to meet their critical needs, giving particular consideration to the desirability and feasibility of Federal assistance."

Mr. DIRKSEN. Mr. President, let me say to the distinguished Senator from Ohio that one of the real concerns I had when we were considering the aid-to-education bill was the inadequacy of the data with which we had to work. I believe the time has come when we should have better data in regard to this field, as a predicate and a foundation from which to proceed and to operate.

Mr. JOHNSON of Texas. Mr. President, I hope the resolution will be agreed to, so the information can be collected. I do not want the resolution in any way to prejudice the bill I have; and I hope the Secretary of Health, Education, and Welfare will study my bill, because we have already made a fairly good study of it and have gotten the colleges and the student bodies of the country to give us their opinions. I hope we can obtain action on it early in the next session. It will not cost the Federal Government any money; it will establish an FHA for college students.

But I think it essential that we get up-to-date information in the field of education, because I believe it is the Nation's No. 1 problem; and I commend my colleague [Mr. YARBOROUGH] for his very active interest in this field and for the very great contributions he has made to it.

Mr. THURMOND. Mr. President, will the Senator from Texas yield?

The PRESIDING OFFICER (Mr. Moss in the chair). Does the Senator from Texas yield to the Senator from South Carolina?

Mr. JOHNSON of Texas. I yield.

Mr. THURMOND. I am opposed to this resolution. It is clearly an avenue by which to obtain more Federal funds for education, which is a violation of the Constitution of the United States.

The resolution provides that a study will be made, "giving particular consideration to the desirability and feasibility of Federal assistance." That is the object; and the entire study is to determine how much Federal assistance should be given to the States, with regard to certain plans for education.

Not only is that unconstitutional; but, furthermore, we do not have the money to give to the States for education. Furthermore, there is not a State in the Nation that is not in better shape to meet its educational responsibilities than is the Federal Government.

Mr. President, I am opposed to the resolution; and I object.

The PRESIDING OFFICER. Objection is heard.

Mr. LAUSCHE. Mr. President, if objection is made, is the resolution properly before the Senate?

Mr. JOHNSON of Texas. No; it can be objected to.

The PRESIDING OFFICER. It is not before the Senate.

Mr. JOHNSON of Texas. I will say it has not been reported by the committee.

Mr. LAUSCHE. The Senator from South Carolina objected.

Mr. JOHNSON of Texas. Did the Senator from South Carolina object?

Mr. THURMOND. Yes, I objected.

Mr. JOHNSON of Texas. Mr. President, I hope the Secretary of Health, Education, and Welfare will study the resolution, and will set men to the task called for by the resolution. I think the data requested will be valuable, and I hope the study can be made; and I hope it can be done without the resolution. I am sorry the resolution has not been reported by the committee, and I am sorry objection was made.

Mr. THURMOND. Mr. President, I wish to say that I have no objection to the collection of statistics. But when the resolution provides for "giving particular consideration to the desirability and feasibility of Federal assistance," it indicates to me that the purpose is to determine whether Federal assistance is needed; and, if so, how much; and so forth.

I think it is clear that that is the meaning; I think the Senator will agree that is the meaning. If the meaning is to give Federal assistance to education, I am opposed to it.

If the Senator wishes to reword the resolution, so as to call for the making of the study, but without giving Federal assistance, that will be different.

Mr. LAUSCHE. Does the resolution anywhere provide or state that a study of statistics shall be made? Does the word "statistics" appear in the resolution?

Mr. JOHNSON of Texas. I am not sure.

Mr. KUCHEL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KUCHEL. Has objection been made to the resolution?

The PRESIDING OFFICER. Objection was heard.

Mr. KUCHEL. Then I would like to reestablish my right to the floor.

The PRESIDING OFFICER. The Senator has the floor.

ORDER OF BUSINESS

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield so I may ask a question?

Mr. KUCHEL. I yield.

Mr. WILLIAMS of Delaware. I should like to ask the majority leader what further business he is planning to transact before we adjourn tonight.

Mr. JOHNSON of Texas. We have two or three minor bills. It is possible we shall receive some messages from the House.

Mr. WILLIAMS of Delaware. I understand the House has adjourned.

Mr. JOHNSON of Texas. If the House had time to message over any differences, we may have amendments, we have the pending business, and I think that is all.

Mr. WILLIAMS of Delaware. Many of us wish to cooperate with the majority leader and transact business which is essential, but we do not want to go on a merry-go-round and pass a lot of unnecessary bills on the last day. I wonder if we could get a list of the essential ones, act on them, and adjourn.

Mr. JOHNSON of Texas. So far as I know, other than the pending business, there is nothing of an important nature.

Mr. WILLIAMS of Delaware. Many of us think the pending business is not very essential.

Mr. JOHNSON of Texas. We have H.R. 8712, involving leases on Indian lands. There are some objections to that. I do not want to say it is minor legislation. But it would be pretty difficult to get a quorum.

Mr. WILLIAMS of Delaware. Being a realist, I know one will not be suggested.

Mr. JOHNSON of Texas. Then there are H.R. 12574, H.R. 12622, H.R. 12777, and House Concurrent Resolution 693.

I understand the House has adjourned. Does the Senator from Illinois want to do anything about the immigration bill?

Mr. DIRKSEN. Mr. President, the House rejected all the Senate amendments, but in the form in which it has come back, I suppose it ought to be called up.

Mr. WILLIAMS of Delaware. Could we not call it up now?

Mr. KUCHEL. No, Mr. President; I would like to make my speech now.

Mr. JOHNSON of Texas. Other than the pending legislation, I would anticipate bringing up nothing before the Senate that would require a rollcall, or, if the Senator insists on a rollcall, as was mentioned earlier in the evening, and I said I would help him get it on any measure on which he wanted it, I would be forced to move to adjourn.

SURVEY ON FEDERAL AID FOR INSTITUTIONS OF HIGHER LEARNING

Mr. YARBOROUGH. Mr. President, will the Senator from California yield to me briefly?

Mr. KUCHEL. I yield 1 minute to the Senator from Texas.

Mr. YARBOROUGH. I desire to express my thanks to the distinguished majority leader and the distinguished

minority leader for their joint support of Senate resolution 388. This measure has been requested by the American Council on Higher Education and by the Secretary of Health, Education, and Welfare. It is a bipartisan resolution, jointly sponsored by a majority of the Democratic and Republican membership.

I think it is very regrettable that the Senate did not ask the Secretary of Health, Education, and Welfare to make the study, at least to show our interest in higher education, which is lagging far more than is the missile program. I am certain the Secretary of Health, Education, and Welfare, being a former college president himself, will continue his study of this matter.

It seems to me very regrettable that the Senate of the United States should turn its back on the most critical need of the 180 million American people, and that is the need for survival, and education is the No. 1 requirement in the struggle for survival.

It will be recalled that Admiral Rickover said that the lead the Russians had over us in the missile field was nowhere nearly as dangerous as the difference in the comparative educational systems and our failure to build up our educational resources and opportunities.

I thank the leadership on both sides of the aisle for having the wisdom, judgment, and knowledge of what this country needs, and to ask the Secretary of Health, Education, and Welfare to study the matter. The proposal does not appropriate one red cent; it merely asks for a study of this problem, which is a great American problem. I thank the leadership on both sides for their efforts.

Mr. LAUSCHE. Mr. President, will the Senator from California yield to me?

Mr. KUCHEL. For what purpose does the Senator ask me to yield?

Mr. LAUSCHE. For a brief statement.

Mr. KUCHEL. I yield 1 minute to the able Senator from Ohio.

Mr. LAUSCHE. I think no resolution is necessary to obtain statistical information as to what the facilities are in institutions of higher learning, or the number of students desiring to enter those institutions. I think a telephone call to the Secretary of Health, Education, and Welfare will achieve that objective, and I join the Senator from Texas in urging that a statistical study be made. But I cannot agree to go along with a resolution that directs him, in effect, to go through with a finding that Congress should begin financing what has traditionally and historically been a local and State function.

TRIBUTES TO THE LEADERSHIP

Mr. KUCHEL. Mr. President, in these closing moments of the 86th Congress, I have the honor to stand on this side of the aisle as a member of the minority and express what has been expressed earlier—the great feeling and respect and esteem which the minority has for its leader and the respect and esteem which I feel sure is shared by those on the other side of the aisle.

EVERETT DIRKSEN has brought to his position of minority leader a vast and a unique experience, an unquestioned ability, one of the most gifted tongues in public life all across the country, and, beyond that, a perfectly wonderful personality and friendliness, which together have welded Republican Senators into an effective team which has devoted itself, as it has seen the light, to the cause of good government in our country.

I think I recall saying one time that the President of the United States indicated his own high regard not alone for the minority leader, but for the esprit de corps which in the 86th Congress has again and again been demonstrated by members of the minority.

Along with our leader, I pay tribute to the distinguished senior Senator from New Hampshire and the distinguished senior Senator from Massachusetts. Mr. BRIDGES and Mr. SALTONSTALL have worked unceasingly with the minority leader to achieve those goals which generally have been set forth in the repeated communications and utterances of the President and of the administration.

I wish to have my Republican colleagues know that to have been named whip for them during the 86th Congress will be a happy and memorable recollection which I shall cherish all the days of my life.

These words are said for the leadership. I am most proud to salute a gallant American statesman from Illinois as he has again and again achieved high success and unity not simply on this side of the aisle but also in the entire Chamber, for the good of the country. Only last night it was EVERETT DIRKSEN who rose and who demonstrated so convincingly the need for this country to follow the recommendations of our President, as Americans, with respect to the unhappy and ugly situation existing in part of the Western Hemisphere. It was EVERETT DIRKSEN who succeeded in that leadership in achieving an overwhelming vote in favor of the recommendations which our gallant President had made, as I say, not as a Republican, but as an American.

Mr. President, now I reach across the aisle and pay tribute to the majority leader as well, who acted as an American Senator when he joined with our Republican leader. Together most of us in this Chamber refused to be shackled or manacled by the regrettable action of the other body, and we stood together before this country and before the world demonstrating that we believe this administration is correct in what it urges with respect to the legislation in the field of sugar quotas, with all its important overtones of foreign policy.

Lastly, I wish to say to my friend from Montana, MIKE MANSFIELD, I am most grateful for his friendship to me over the years and, equally important, for his friendly counsel and assistance to all the minority. The majority whip is a distinguished American statesman, and I cherish his friendship.

This, Mr. President, is all I have to say, except that as we strive toward the last moments of the 86th Congress I am sure the Democratic leadership and the Republican leadership merit, deserve, and receive a unanimous vote of thanks for the effective manner in which the business of this session of the Congress has been conducted.

DISSEMINATION OF POLITICAL OPINIONS

The Senate resumed the consideration of the resolution (S. Res. 374) amending Senate Resolution 305, authorizing the Committee on Interstate and Foreign Commerce to undertake a study of the uses of Government-licensed media for the dissemination of political opinions, news, and so forth.

The PRESIDING OFFICER. The question is on agreeing to Senate Resolution 374.

Mr. LAUSCHE and Mr. WILLIAMS of Delaware addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. LAUSCHE. Mr. President, I move to table the resolution.

Mr. MAGNUSON and Mr. YARBOROUGH addressed the Chair.

Mr. MAGNUSON. Mr. President, I wonder if my friend from Ohio will permit me to make a unanimous-consent request before he moves to table the resolution.

The PRESIDING OFFICER. Does the Senator from Ohio withhold his motion for that purpose?

Mr. LAUSCHE. Mr. President, I ask unanimous consent that I may yield to the Senator from Washington for that purpose, with the understanding that I shall not lose my right to the floor or my priority as to making the motion.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio? The Chair hears none, and it is so ordered.

AUTHORITY FOR COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO FILE A REPORT ON INTERCOASTAL WATERWAYS AND INTERCOASTAL SHIPPING

Mr. MAGNUSON. Mr. President, I understand there is no general resolution for the purpose of filing reports. I, therefore, ask unanimous consent that the Committee on Interstate and Foreign Commerce be permitted next week—since the Printing Office is so jammed with printing requests—to file a report on a long investigation which has been held on intercoastal waterways and intercoastal shipping.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Washington? The Chair hears none, and it is so ordered.

DISSEMINATION OF POLITICAL OPINIONS

The Senate resumed the consideration of the resolution (S. Res. 374) amending Senate Resolution 305, authorizing the Committee on Interstate and Foreign Commerce to undertake a study of the uses of Government-licensed media for the dissemination of political opinions, news, and so forth.

Mr. LAUSCHE. Mr. President, I move to table the resolution.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Ohio to table the resolution (S. Res. 374).

Mr. THURMOND. Mr. President, will the distinguished Senator from Ohio withhold his motion for not over 5 minutes, so that I may make a few remarks?

Mr. LAUSCHE. Mr. President, I ask unanimous consent that I may yield to the Senator from South Carolina with the same understanding.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio? The Chair hears none, and the Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I rise in opposition to Senate Resolution 374. I wish to say that in the first place a large percentage of the telecasting will be on video tape and can be secured from the broadcasting industry, if a question arises.

In the second place, programs will be seen or heard by congressional Members in the original instance, and therefore their minds will be made up prior to the next session, and they will know what they wish to do.

In the third place, the primary question arising from the suspension of section 315 of the Communications Act will be whether equal time is made available, and this obviously can be determined without monitoring.

In the fourth place, this is an FCC responsibility. What we are attempting to do under the resolution is to set up a subcommittee of a subcommittee of the Interstate and Foreign Commerce Committee to supervise and to monitor the broadcasts this fall in the presidential race. There are seven members of the FCC appointed by the President, whose nominations are confirmed by the Senate for 7-year periods. Four of them come from one party and three from the other party. They perform this function. If we pass the resolution we shall be usurping the rights of the executive branch of the Government, which we do not have authority to do.

It is not the function of the Congress of the United States to conduct operations. Under the Constitution it is our function to legislate. It is the function of the executive branch to enforce the law. Exactly as the Congress makes the law, the executive branch enforces the law.

The executive branch of the Government has the FCC. The FCC is specifically delegated the authority and responsibility to do the very work the resolution embraces.

I think we shall be making a great mistake if the Congress attempts to be a watchdog and to supervise these elections, when the responsibility rests with the FCC. I believe we shall be entering into a dangerous field. If we pass this resolution, we shall be setting a precedent to go into that field in other respects.

Mr. President, I am strongly opposed to the resolution on principle. The amount of money involved is only $150,000. It is that much. We, of course, ought to save every dime we can.

Aside from the money, the principle involved is a dangerous one, because we are asked to encroach on the rights of the executive branch of the Government. If there is a desire to conduct any type of supervision, then the subcommittee can conduct such supervision through the FCC. The FCC itself is a proper and appropriate agency of the Government to do the monitoring and to conduct such operations as should be conducted, and to report to the subcommittee members. The subcommittee members can propound questions, and they can confer with the FCC to obtain any information they desire.

Either the subcommittee has in mind watching the election and taking some steps during the election, or it does not. If it does plan to do so, then it will certainly be conducting operations, which responsibility is reposed in the FCC. If it does not plan to do so, then the FCC after the election can report to the subcommittee of Congress and make such recommendations as it feels would be helpful.

I hope that the Senate will not adopt the resolution. Again I say that we are treading on dangerous ground. We frequently complain about the executive encroaching on the rights of Congress, the legislative branch. We complain about the Supreme Court encroaching on our rights as Members of the legislative branch. The resolution provides that we would do the very thing of which we have complained with respect to the other two branches of Government. We have only three branches of Government. We have the legislative branch that makes the law; the executive branch which enforces the law; and the judicial branch which interprets the law. We have the duty of making the laws. It is not our business to enforce the law. The executive branch enforces the law, and the particular agency that would have the particular responsibility involved here is the Federal Communications Commission. It is my sincere feeling that we should leave that responsibility to the FCC, with the subcommittee conferring and coordinating with that committee and making any suggestions or obtaining any information it desires from the FCC.

Mr. MAGNUSON. Mr. President, I do not like to detain Congress when it is time to adjourn. I did not realize that there would be this much opposition to a resolution appropriating a small sum of money to a subcommittee to do a job which I think we have discussed on many occasions in the Senate Committee on Interstate and Foreign Commerce.

So far as I know, all members of the committee in general agreed to the resolution. Whether the Senator from South Carolina was present at the time we did, I do not know; but surely he has a perfect right to offer his suggestions at this time.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. MAGNUSON. I have only 5 minutes. I will yield when I finish.

The Senator from South Carolina makes the point that there are three branches of Government: The executive, the judiciary, and the legislative, but the Senator from South Carolina knows that the FCC is an arm of Congress.

The FCC was created as an arm of Congress. It reports to Congress. It was created to do the things that Congress itself could not do in detail.

The executive department, through the FCC and these other agencies, enters into the picture only because an appointive power was necessary, and we gave that power to the President. Perhaps we made a mistake, because the members of the agencies sometimes are more concerned with their jobs, and who appoints them, than they are in the responsibility of carrying out the intent of the law.

I agree with the Senator from South Carolina that the resolution contains many implications that could go wrong. I have some faith in the members of our committee—the Senator from Texas [Mr. YARBOROUGH], the Senator from Wyoming, and the distinguished Senator from Pennsylvania—who are in wholehearted agreement on this resolution, and I believe they will do the right thing.

All we propose to do is to see that this great medium of expression, television and radio, is used fairly and equitably.

I know some instances in which it is not. Every Senator knows it.

We do not ask any favors for the Democrats or the Republicans. We simply wish to see that the procedure is correct, and that the best procedure is followed, although some practical problems are involved.

We wish to know that a newscaster, who has only so many minutes of time, will not favor one candidate over another. We want to know that the networks will do the right and fair thing.

Someone said to me, "Well, are they not giving free time to all candidates?"

Surely, they are giving free time. Senators know why. The reason is that we introduced a bill to make them do so, and then they said, "We will do it voluntarily." I think they want to do it. I believe they are going to do a good job.

The resolution simply provides that we shall take a look, and if the stations are doing the right thing, nobody will bother them. There are many places where they are not. The Senator from Arkansas headed a great committee of the Senate which had the same objectives in another field, and took a sort of "look-see" to see what was being done.

I believe that this is the responsibility of the Senate in the issuance of a Government license.

This media of communication is not like a newspaper. A newspaper can editorialize, and we see such editorials in Republican newspapers, Democratic newspapers, and independent newspapers.

A Government license is involved.

The question is not whether we shall appropriate $100,000 or $150,000. The subcommittee now has been allotted $35,000. I think we made it clear in our letter to the Rules Committee exactly what the resolution was intended to call for. We hoped it would work that way.

We stated a modest budget of employment. We would have four employees. We stated exactly what they would do, and if everything is all right in this great medium of communication to the American people, whether it is a political campaign or not, no one will bother the stations.

No person having a license or representing networks appeared in opposition to the resolution, and such people were invited. They agree. They would like to see their industry conducted in as fair and as equitable manner as it can be.

Whether the Senate approves or rejects the resolution makes no difference to me personally, and I am sure it would make no difference to the Senator from Texas [Mr. YARBOROUGH]. All we propose to do is to see that there is fair treatment accorded to everyone in a field in which a Government license is issued, and in a field where there is some responsibility on the part of Congress.

The FCC could take the responsibility. I think perhaps they would like to do it.

However, it is like asking the fox to take care of the henhouse. We have the responsibility; that is all it amounts to.

I shall not be unhappy if the Senate rejects the resolution; I shall not be happy if you do not reject it.

I think it is one of those things that maybe Congress should do at this time in the interest of all American people and the impact of this resolution upon their political lives and the future of the world, so that they can make a fair and decent choice on November 8 or in any other election.

If any Senator wishes to be responsible to say that this committee should not have the wherewithal to try to do a decent and honest "look-see" in carrying out its responsibility, it is all right with me.

Mr. President, I am sure it is all right with the Senator from Texas. I thank the Senator.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I would like to agree with my esteemed friend, the distinguished Senator from Washington, the chairman of my committee, the Committee on Interstate and Foreign Commerce. There are a few things that should be brought out. The Senator from Ohio and the Senator from South Carolina both oppose the resolution. We opposed it in committee. We oppose it now on the floor of the Senate. I wish the RECORD to be clear on that point.

With regard to the FCC being an arm of Congress, it is true that Congress created the FCC. Congress created the ICC. Congress created all the governmental agencies. They are all responsive to Congress in a way. But again I say that under the Constitution Congress can only make the laws; the executive branch must enforce the law.

The legislative branch has no jurisdiction to enforce the law. We have no jurisdiction to enforce the law. The laws must be enforced through the executive branch of the Government. The executive branch of the Government, in this case, the FCC, is responsible to the President. It is up to the President to see that the governmental agencies do a good job. If they do not do a good job, there is a way of removing them. They can be impeached. That is our avenue of approach if they do not do a good job. It is our responsibility to take action if they do not do a good job.

I for one am ready to pursue that course. I say let us not take away from them their responsibility. Let us not usurp their responsibility. Let us not usurp the responsibility placed on the President by the Constitution.

The able and distinguished Senator from Washington [Mr. MAGNUSON] said that the networks are doing the right thing because we passed a law. I do not know whether that is the reason they are doing it. Perhaps they are. We passed a law. That is all we can do. We can only pass a law. The executive branch of the Government must enforce that law. The FCC must enforce the law. The Senator said it is like putting the fox in the henhouse, turning this matter over to the FCC. It is their duty to take care of these matters. It is not at all like putting the fox in the henhouse. It is the duty of the governmental agency to do this job. It is their duty to supervise and regulate industry in this country. I, for one, feel it should be left to them. If they fail to do it, we can take action.

The distinguished Senator from Washington, the chairman of the Committee on Interstate and Foreign Commerce, and the committee can take action, and the President can take action, if the agency does not do a good job. We have that recourse.

Again I say we are treading on dangerous ground when Congress takes into itself the responsibility of monitoring and supervising and watching over these details on what goes on in the campaign. Again I say it is the responsibility of the Federal Communications Commission. That is where the responsibility should rest. If there is a failure there, we can take action.

I hope the Senate will see fit to table the resolution.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent to have printed in the RECORD at this point the resolution being voted on, Senate Resolution 374.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Resolved, That Senate Resolution 305, agreed to June 14, 1960, authorizing the Committee on Interstate and Foreign Commerce to undertake a study of the uses of Government-licensed media for the dissemination of political opinions, news, and advertising, is amended on page 3, line 13, by striking out "$35,000" and inserting in lieu thereof "$185,000".

Mr. LAUSCHE. Mr. President, I move to table the resolution.

The PRESIDING OFFICER. The question is on the motion to table.

Mr. MAGNUSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MAGNUSON. Mr. President, I want to propound a unanimous-consent request.

Mr. KEATING. Mr. President, a point of order.

The PRESIDING OFFICER. The quorum call must be terminated before such a request may be made.

Mr. MAGNUSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. KEATING. I object.

Mr. MAGNUSON. Mr. President, I wanted to make a unanimous-consent request.

The PRESIDING OFFICER. The request is not in order. The rollcall is proceeding. Objection was made to suspending it, so the call must proceed.

Mr. KEATING. I object to the termination of the quorum call.

The PRESIDING OFFICER. The clerk will continue the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. DIRKSEN. Mr. President, I move that further proceedings under the quorum call be rescinded.

Mr. MAGNUSON. I object.

The PRESIDING OFFICER. A motion may not be made to discontinue the quorum call.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. MAGNUSON. I object.

The PRESIDING OFFICER. Objection is heard.

The legislative clerk resumed the call of the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. MAGNUSON. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Senator may not reserve the right to object. Does the Senator object?

Mr. MAGNUSON. I object until I have had a conference with the minority leader. I object.

Mr. President, after a short conference, I do not object. [Laughter.]

The PRESIDING OFFICER. Without objection, the order for the quorum call is rescinded.

The Chair recognizes the Senator from Illinois.

Mr. DIRKSEN. Mr. President, when the resolution was before the Senate in June of this year, we had considerable discussion of the subject. A request was made for a rather substantial amount of money. Finally the proponents of the resolution agreed to accept $35,000.

I was opposed to the resolution, and I stated very frankly on the floor of the Senate that I thought it was political in character.

How can political discussions and political reflections on radio and TV be

objectively monitored by a committee consisting of Senators who are well identified with both parties? I make no exceptions. I do not speak in defense of the minority members of the committee or of the majority members of the committee. We are all steeped in the arena of politics.

It is very clear from the resolution what its purpose is. The purpose is to monitor political broadcasts, to hear what is said, and to determine whether there has been compliance with the revision of section 315.

Mr. President, that is not a function for a political committee; and a senatorial committee is a political committee, whether we like it or not. If I were on it, it would still be a political committee. I have been a candidate for office, and I think politically. This Chamber is, on occasion, a political arena.

One can try as he will, but in this business he does not completely divest himself of a political attitude.

So when there is a committee of Senators and a staff, all of whom think politically in an election year, one is bound to get the political overtones and the overriding political feeling when determining whether or not something that is said on a broadcast is worthy of complaint, and therefore should be reported and thoroughly investigated, and that a sense of fear and apprehension should be inspired on the part of the owners of a network or of a particular radio station. That element cannot be divorced from it.

I might show up on a television program, wearing a 10-gallon hat; and someone might ask me a question entirely nonpolitical, and perhaps the program would not even be a political program. But someone might suggest a question, and my answer to it might have some political overtones, and the result would be that it should be reported. If I were then a candidate for office, would my opponent be entitled to equal time?

I anticipate that a great many interesting and amazing difficulties, as well as political phenomena, could spring from a political witchhunt of that sort.

Mr. President, this is not a new position on my part; when the resolution was here before, I likewise stated the case.

We have a Federal Communications Commission. As I recall, it was created in 1934. At that time I was a Member of the House of Representatives, and I remember how carefully we spelled out the Commission's responsibilities and functions. Even at that time we had a discussion in regard to what its functions should be with respect to censorship and politics. But that is the administrative bureau of the Government which should be charged with this responsibility.

It is said that the Federal Communications Commission's monitoring extends only to engineering and to technical matters. If that is true, then the proponents of a proposal of this kind should ask for more funds for the Federal Communications Commission, so the Commission can properly evaluate its duties and carry out its responsibilities under the law, as written by Congress.

But that is not the kind of thing that should be done here. Here we are, on the 1st of September, within about 9 weeks of election day. I do not want any committee, either roaming around the country or settled here in Washington, to be monitoring every broadcast, to see the color of one's necktie, whether one is wearing a 10-gallon hat, whether one is reflecting upon someone on the other side of the political fence, whether one is talking about the unlighted candidacy of one who sought the Presidency on another occasion, whether one uses a term of endearment or not.

Mr. KEATING. Mr. President, will the Senator from Illinois yield for a parliamentary inquiry?

Mr. DIRKSEN. Yes, if I may do so without losing the floor.

Mr. KEATING. May I ask whether, following the remarks of the Senator from Illinois, debate will be in order on the motion to table?

The PRESIDING OFFICER (Mr. Moss in the chair). No. The Senator from Ohio [Mr. LAUSCHE] withheld his motion, in order that there might be a quorum call, and did not renew the motion after the quorum call was withdrawn.

Mr. LAUSCHE. Mr. President, I did not withdraw my motion to table.

The PRESIDING OFFICER. A motion to table is not debatable. The question in the mind of the Chair was whether the Senator from Ohio withheld the motion to table, as he did on two or three occasions.

Mr. LAUSCHE. No, Mr. President, I did not; and the RECORD will not show any such withholding.

Mr. DIRKSEN. Mr. President, if that is the case, the minority leader is definitely out of order, under the Senate rule, because there can be no debate when a motion to table has been made.

Mr. President, is it now incumbent upon me to apologize to the Senate for trespassing on its time? [Laughter.]

The PRESIDING OFFICER. If the Senator from Ohio did not withhold his motion, in order to permit a quorum call, then there is before the Senate a motion to table; and a motion to table is not debatable.

Mr. DIRKSEN. Mr. President, I have the floor.

Mr. LONG of Louisiana. Mr. President, I call for the regular order.

The PRESIDING OFFICER. A point of order has been raised, and the Chair has ruled on the point of order. The Senator from Ohio has stated that he did not withhold his motion to table. Therefore, the question before the Senate is on agreeing to the motion to table, which motion is not debatable.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry: If the motion to table was pending, as the lawyers say, ab initio, from the beginning, then how did the Senator from Illinois ever get the floor? [Laughter.]

The PRESIDING OFFICER. The Senator from Illinois has no right to the floor when a motion to table is pending before the body.

Mr. DIRKSEN. Mr. President, I most respectfully appeal from the ruling of the Chair, on the ground that it is ex post facto, because I have been talking for 10 minutes, and no Senator has been challenging my right to the floor.

The PRESIDING OFFICER. The motion to table was made and was received before the remarks of the Senator from Illinois were made. The Senator from Ohio has stated that he did not withhold his motion to table.

Therefore, the question now before the Senate is on agreeing to the motion to table, which is not debatable.

Mr. YARBOROUGH. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

Mr. DIRKSEN. Mr. President, I have the floor.

The PRESIDING OFFICER. The Senator from Illinois does not have the floor.

Mr. DIRKSEN. Mr. President, I have the floor unless the Chair rules that the motion to table, previously made by the distinguished Senator from Ohio [Mr. LAUSCHE], is actually the pending business.

The PRESIDING OFFICER. The Chair so rules; it is the pending question.

Mr. DIRKSEN. Then, Mr. President, I propound a further parliamentary inquiry: How did I get the floor in the first instance? [Laughter.]

The PRESIDING OFFICER. As the Chair explained before, it was the understanding of the Chair that the Senator from Ohio had withheld his motion to lay on the table. But the Senator from Ohio now states that he did not withhold his motion to lay on the table.

Mr. DIRKSEN. Mr. President, I must, most respectfully, reject the suggestion——

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table. [Putting the question.]

Mr. YARBOROUGH. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. LONG of Louisiana. I object.

Mr. CASE of South Dakota. I object.

The PRESIDING OFFICER. Objection is heard; and the clerk will continue with the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. WILLIAMS of Delaware. Mr. President, is a quorum present?

The PRESIDING OFFICER. An inquiry is not in order at this time. The clerk is calling the roll.

Mr. WILLIAMS of Delaware. Oh. I did not hear him. [Laughter.]

Mr. LONG of Louisiana. Mr. President, it has been a full hour and 15

minutes since the last name was called. At this rate it will take hours to call the roll.

Mr. MAGNUSON. Mr. President, the Senator is not in order. I call for the regular order.

The PRESIDING OFFICER. The Senator is not in order. The clerk will continue to call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCARTHY. Mr. President, I ask unanimous consent that further proceedings——

Mr. KEATING. Mr. President——

Mr. LONG of Louisiana. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. What is the situation before the Senate?

Mr. KEATING. A point of order, Mr. President. Is a parliamentary inquiry in order?

The PRESIDING OFFICER. Not during a quorum call.

Mr. DIRKSEN. Mr. President, a point of order. Are we in the second call or the first call?

Mr. KEATING. A point of order, Mr. President.

Mr. LONG of Louisiana. The regular order, Mr. President.

The PRESIDING OFFICER. The clerk will continue the call of the roll.

The legislative clerk resumed and concluded the call of the roll, and the following Senators answered to their names:

[No. 325]

Bartlett	Jackson	Monroney
Byrd, W. Va.	Javits	Morton
Cannon	Johnson, Tex.	Moss
Case, N.J.	Johnston, S.C.	Mundt
Case, S. Dak.	Jordan	Muskie
Church	Keating	Proxmire
Curtis	Kennedy	Randolph
Dirksen	Kuchel	Russell
Dworshak	Lausche	Smathers
Ellender	Long, Hawaii	Smith
Engle	Long, La.	Sparkman
Fong	Lusk	Symington
Gore	McCarthy	Thurmond
Green	McClellan	Williams, Del.

Hayden	McNamara	Young, N. Dak.
Holland	Magnuson	
Hruska	Mansfield	

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Nevada [Mr. BIBLE], the Senator from North Dakota [Mr. BURDICK], the Senator from Virginia [Mr. BYRD], the Senator from Colorado [Mr. CARROLL], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Pennsylvania [Mr. CLARK], the Senator from Connecticut [Mr. DODD], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from North Carolina [Mr. ERVIN], the Senator from Delaware [Mr. FREAR], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Alaska [Mr. GRUENING], the Senator from Michigan [Mr. HART], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Oklahoma [Mr. KERR], the Senator from Oregon [Mr. MORSE], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Rhode Island [Mr. PASTORE], the Senator from Virginia [Mr. ROBERTSON], the Senator from Georgia [Mr. TALMADGE], the Senator from New Jersey [Mr. WILLIAMS], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

The Senator from Missouri [Mr. HENNINGS] is absent because of illness.

The Senator from Mississippi [Mr. STENNIS] is absent because of a death in his family.

Mr. KUCHEL. I announce that the Senators from Vermont [Mr. AIKEN and Mr. PROUTY], the Senator from Colorado [Mr. ALLOTT], the Senators from Maryland [Mr. BUTLER and Mr. BEALL], the Senator from Utah [Mr. BENNETT], the Senator from Connecticut [Mr. BUSH], the Senator from Kentucky [Mr. COOPER], the Senators from New Hampshire [Mr. BRIDGES and Mr. COTTON], the Senator from Arizona [Mr. GOLDWATER], the Senator from Iowa [Mr. HICKENLOOPER], the Senators from Kansas [Mr. CARLSON and Mr. SCHOEPPEL], the Senator from Massachusetts [Mr. SALTONSTALL], the Senator from Wisconsin [Mr. WILEY], and the Senator from Pennsylvania [Mr. SCOTT] are necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent on official business.

I further announce that the Senator from Iowa [Mr. MARTIN] is absent by leave of the Senate on official business.

The PRESIDING OFFICER (Mr. Moss in the chair). A quorum is present.

Mr. JOHNSON of Texas. Mr. President, I wonder if my friend from Ohio will agree to withdraw his motion to table, with the understanding that I may make a brief statement, and with the further understanding that, when I yield the floor, I will yield it to him, and in the meantime that I will make no motions unless they are agreeable to the Senator from Ohio.

Mr. LAUSCHE. Mr. President, I yield on that basis, reserving to myself the right to the floor and to suggest the absence of a quorum and to make a motion to table.

The PRESIDING OFFICER. Without objection, the Senator's request to withdraw the motion with that understanding is agreed to.

ACCOMPLISHMENTS OF DEMOCRATIC CONGRESS

Mr. JOHNSON of Texas. Mr. President, we are approaching the closing hours of the 2d session of the 86th Congress.

The close of a Congress is always a matter of great significance. It is a period of summing up; of judgment; of deciding whether the Congress has fulfilled its obligations to the American people.

But the adjournment of this session is of unusual importance in our history. It marks the close of the longest period of divided government this Nation has ever known.

For 6 years, the Congress of the United States has been controlled by one political party and the executive agencies of our Government by another. This is a situation which was not contemplated by the Founding Fathers and which political scientists have regarded with apprehension.

It would not be accurate to say that divided government brought our country to a paralysis or to a halt. This would have resulted had the Democratic majorities sought to use their strength to hamstring and harass the President. This they did not do.

Instead, the Democratic majorities adopted the philosophy that Americans must make the best out of the circumstances which prevail. The result was a remarkable series of achievements that have few—if any—parallels in American history.

The guidelines for the Democratic majorities could be summed up as an effort to seek the best and to attain the possible. It was decided that the best philosophy was to attempt to resolve, rather than create, issues and that some progress was preferable to no progress at all.

As a result, the Democratic Congresses succeeded in facing up to some of the most difficult issues of our times.

Two major civil rights bills were written into law after 82 years of total inactivity in this field.

The Austrian, German, and Japanese peace treaties were ratified.

The United States was authorized to participate in the International Finance Corp. to help solve the problems of the underdeveloped nations of the world.

Our country was committed to the concept of Atoms for Peace by ratification of the statute of the International Atomic Energy Agency.

An Inter-American Development Bank was established to accelerate the economic development of the nations of the Western Hemisphere.

An East-West Center was established in Hawaii to provide a meeting ground for the intellectual and cultural leaders of the East and the West.

The minimum wage was increased from 75 cents to a $1 an hour.

The largest roadbuilding program in history was launched.

The 1958 recession was met by prompt and vigorous Congressional action in the field of housing, public works, reclamation, and roadbuilding, and the beneficial effects of these programs became apparent the following year.

The Small Business Investment Act was approved to provide loans to State and federally chartered small business investment companies.

A program was launched under congressional initiative to bring the United States into the development and exploration of outer space.

Congressional recommendations were made to strengthen the Nation's defenses.

A landmark social security law established the basic principle of disability compensation at age 50 and extended the coverage of the act and lowered the retirement age for women.

The Upper Colorado River Basin project—the dream of conservationists for more than 50 years—finally became a reality.

Alaska and Hawaii were both admitted to the Union as States.

The Niagara River power development program was authorized.

The cloture rules of the Senate were liberalized.

Legislation to curb racketeering that was preying upon honorable working men and women was placed on the statute books.

Broad programs were enacted to provide housing for our people and keep our economy healthy.

The greatest health research programs in all recorded history were launched to give humanity some hope for relief from the killing and crippling diseases.

The controversial Antarctic Treaty was ratified, which holds forth the promise of securing one area of the world from warlike moves.

These are only a few of the achievements of the past 6 years. A more extended list will be placed in the RECORD at the end of this statement, and I ask unanimous consent that I may do so.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. JOHNSON of Texas. Mr. President, I should like to call the attention of all Members of the Senate to a statement I placed in the RECORD yesterday, showing that this year we have appropriated $211 million less than the amount requested by the Executive, and also a table showing that during the term of the present President, Congress has appropriated $12.7 billion less than that requested by the present Executive.

Despite these achievements, however, the strains of divided government were apparent at every turn. These strains became greater as we approached the decisive year of 1960 in which the American people will have the opportunity to bring divided government to an end.

It has not been possible to work out satisfactory legislation to meet the pressing problems of agriculture, primarily because of the difference between the congressional viewpoint and the viewpoint of the Secretary of Agriculture, Mr. Ezra Taft Benson.

Bills to aid the pockets of economic recession which scar the face of our country have been vetoed.

The only legislation attainable to help our senior citizens with their health problems is considered by many to be inadequate to the needs.

A needed boost in the wage floor could not be achieved—nor could extended coverage, even though the Senate by an overwhelming vote passed such a measure.

Legislation to help in the education of our children has become bogged down, although we passed it in the Senate during the month of February.

These are problems which must be submitted to the American people. The 6 years of divided government have worked in many respects, but it is obvious that there are issues whose resolution will be extremely difficult if divided government continues.

I am confident that in the Senate, where tonight sit 66 Democratic Senators, if we should lose each seat we consider doubtful—and I do not think we shall lose a single one of those—we still, I believe, will have 55 Democratic Senators when we return in January. I think, and I predict, the number will be nearer 70 than 55.

Furthermore, divided government—to work at all—demands the utmost in forebearance from all participants. Heated partisanship at any key position can complicate the problems of divided government beyond endurance.

It is obvious that the American people approve of the responsible approach of the Democratic Congress to the Nation's problems.

The record of the congressional Democrats has been submitted to the American people on three separate occasions since 1952. On each test, the American people have returned increasing Democratic majorities to the House and the Senate.

The full achievement of Democratic programs, however, requires close cooperation between the executive and legislative branches under our system of government. This can be determined only by the action of the people themselves.

EXHIBIT 1

MAJOR LEGISLATIVE ACHIEVEMENTS

YEAR 1955

Housing Amendments of 1955: Authorized 45,000 public housing units through July 31, 1956, and increased the authorization for assistance in slum clearance and urban renewal by $200 million annually in fiscal 1956 and 1957 (Public Law 345).

Railroad retirement: Permitted pensioners to receive both social security and railroad retirement benefit payments; and increased a spouse's maximum annuity from $40 a month to $51.80 (Public Law 383).

Defense of Formosa, Pescadores: Authorized the President to use U.S. Armed Forces in defense of Formosa and the Pescadores against Chinese Communists (Public Law 4).

International finance: Authorized U.S. participation in the International Finance Corporation and authorized $35,168,000 as the U.S. subscription to IFC. IFC grew out of demands of underdeveloped countries for credits not readily obtainable from the International Bank for Reconstruction (Public Law 350).

Reciprocal trade: Extended the President's authority to negotiate reciprocal trade agreements through June 30, 1958; amended existing peril point provisions so that the Tariff Commission could recommend action if a business enterprise producing goods in commercial quantities was suffering seriously from import competition (Public Law 86).

Minimum wage increase: Raised hourly minimum wage from 75 cents to $1 effective March 1, 1956 (Public Law 381).

Armed Forces pay increase: Granted to officers with more than 3 years' service and warrant officers and enlisted men with more than 2 years' service pay increases based on rank and length of service—ranging from 6 to 25 percent; provided an increase in special monthly pay for hazardous air and submarine duty; increased retired pay by 6 percent (Public Law 20).

Military reserves strengthened: Established the first comprehensive program aimed exclusively at bolstering U.S. military reserve forces; authorized up to 250,000 men between 17 and 18½ to sign up annually for 3 to 6 months active duty providing they remain in the Ready Reserve until their service time totals 8 years (Public Law 305).

GI education: Granted full educational benefits under the Korean GI bill to members of the Armed Forces who were on active duty on or before January 31, 1955 (Public Law 7).

Oversea voting: Urged States to enact laws permitting servicemen, Federal employees abroad, dependents of both groups, and merchant seamen to register for voting by use of uniform postcard applications and to vote by absentee ballot (Public Law 296).

Federal pay raise: Raised the pay of all but the top level of Government employees by 7.5 percent (Public Law 94).

Security Commission: Established a 12-member bipartisan commission to study the entire Government security program (Public Law 304).

Airport grants: Authorized for allocation to States and territories for airport development, Federal grants totaling $42.5 million in fiscal 1956 and $63 million in each of the 3 subsequent fiscal years, on a matching basis (Public Law 211).

Small business: Extended the life of the Small Business Agency and increased the total revolving fund from $275 million to $550 million (Public Law 268).

YEAR 1956

Farm bills: H.R. 12 to restore rigid supports at 90 percent of parity on basic commodities. (Vetoed.) After the veto the Congress again considered and passed a farm measure retaining mandatory price supports for small feed grains and gave the Secretary of Agriculture discretionary authority to establish a two-price plan for rice; set up an acreage reserve program to compensate producers for reducing their 1956–59 crops of basic commodities below their allotments or base acreage (Public Law 540).

Social security: Liberalized the Social Security Act by reducing the retirement age for women from 65 to 62 and established a disability program at age 50; extended coverage to lawyers, dentists, chiropractors, osteopaths, veterinarians, optometrists, sharecroppers, etc. (Public Law 880).

Thirteen-year highway program: Authorized the largest roadbuilding program in history—$31.5 billion in Federal-State funds over a 13-year period; also provided for new taxes scheduled to yield $14.8 billion over a 16-year period (Public Law 627).

Upper Colorado project: Authorized a $760 million Upper Colorado River Basin water storage and reclamation project (Public Law 485).

Health programs: Enacted Public Law 911 providing traineeships for professional public health personnel; advanced training for professional nurses; practical nurse training; extension of hospital survey and construction programs; and assistance in mental health programs. Public Law 835 providing for a 3-year $90 million construction program for health research facilities.

Flood insurance: An experimental $5 billion to $7.5 billion Federal flood insurance and loan contract program (Public Law 1016).

Surplus disposal: Enacted Public Law 962 increasing from $1.5 billion to $3 billion the limit on surplus sales for foreign currencies.

Customs simplification: Enacted into law a single valuation system, based on the price at which the goods were offered for sale as exports, instead of the old system under which the higher of two values was used, the export price or the price at which the goods would be sold in the foreign market (Public Law 927).

Seventy thousand public housing units: Provided for 35,000 units a year for 2 years but made Federal aid contingent upon a workable slum clearance program in local communities (Public Law 1020).

Atomic merchant ship: Provided for construction of an atomic-powered merchant ship to promote the peacetime application of atomic energy—estimated cost $37 million (Public Law 849).

Mineral stockpile: Authorized a 2½-year subsidy program for mining tungsten fluorspar, asbestos and columbium-tantalum estimated to cost $91.7 million (Public Law 733).

Servicemen's survivors: Increased benefits for survivers of servicemen and brought 2,850,000 military personnel under social security (Public Law 881).

Water pollution: Increased Federal funds available to States for developing water pollution control programs and authorized a maximum of $500 million to assist communities to build sewage treatment works (Public Law 660).

Farm loans: Public Law 878 increased from $15 million to $65 million the amount of money available for emergency loans to farmers and stockmen under the emergency Farm Loan Act.

Great Plains Program: Provided a long-range program to combat soil erosion in the Great Plains area—authorizing a maximum appropriation of $150 million for the entire program and limited the payments for any one year to $25 million (Public Law 1021).

Railroad Retirement: Increased benefits under the Railroad Retirement Act by 10 percent (Public Law 1013).

International Wheat Pact: Ratified a new International Wheat Agreement guaranteeing the U.S. annual sales of 132 million bushels of wheat at prices ranging from $1.50 to $2 a bushel.

YEAR 1957

Civil Rights Act: Enacted into Public Law 315 the first civil rights measure to pass the Senate since 1875—created an executive Commission on Civil Rights; empowered the Attorney General to seek an injunction when an individual was deprived or about to be deprived of the right to vote; and allows the judge to decide whether the defendant in such cases should be tried with or without a jury.

Middle East—Public Law 7: Authorized the President to cooperate with and assist any Middle East nations desiring help in the development of economic strength, and to undertake military assistance programs with them.

Atomic Agency Treaty: Ratified the statute of the International Atomic Energy Agency designed to implement the 1953 atoms-for-peace proposal.

Atomic Insurance—Public Law 256: Permits the Government to provide indemnities of up to $500 million for damages resulting from nuclear accidents in private industry.

Housing—Public Law 104: Liberalized several existing housing programs; lowered the minimum down payment required to buy a a house with an FHA-insured mortgage and gave FNMA additional funds for buying home mortgages from banks and other private lenders to alleviate the tight money market.

Niagara Power—Public Law 159: Authorized power development at Niagara Falls.

Deferred Grazing: Enacted Public Law 25 designed to aid ranchers and farmers in drought disaster areas by paying them to keep their livestock off parched grazing lands until the drought ended and pastures reestablished.

Farm surplus disposal: Extended the Agricultural Trade Development and Assistance Act to June 30, 1958, and increased from $3 billion to $4 billion the value of surplus commodities that could be sold to friendly foreign countries.

Veterans' compensation: Public Law 168 increased compensation payments for service-connected disabilities by 10 percent with more for 100 percent disability.

Immigration laws: Public Law 316 dealing primarily with hardship cases—authorized admittance of approximately 60,000 aliens; authorized unlimited entry, for a 2-year period, of alien orphans adopted by U.S. citizens.

YEAR 1958

Defense reorganization: Public Law 559 provided for a complete reorganization of the Defense Department.

Federal aid highways: As an antirecession measure authorized $3.2 billion in new Federal funds for highway construction and authorized a one-half percent bonus in Federal interstate highway funds to States that agree to regulate billboard advertising along the Interstate Highway System (Public Law 381).

Area redevelopment: Authorized $280 million in Federal aid for distressed areas suffering from chronic unemployment (vetoed).

Unemployment benefits: Public Law 441 extended the duration of the period in which jobless workers could collect unemployment checks.

Social security: Increased OASI benefits by 7 percent.

Civilian space agency: Created a new civilian agency to direct the Nation's scientific activities relating to all nonmilitary aspects of outer space (Public Law 568).

Reciprocal trade: Four-year extension of the Reciprocal Trade Agreement Act (Public Law 686).

Postal rate-pay increases: Provided increases for first-, second-, third-, and fourth-class mail and authorized a permanent 7.5-percent pay increase for all field service employees except those in level 20 (Public Law 426).

Federal pay raise: Public Law 462 provided for an average 10-percent pay increase.

National Defense Education Act: Enacted a 7-year $1 billion program of loans and grants to students and schools to enable needy students to continue their education (Public Law 864).

Emergency housing: Enacted Public Law 364 to encourage and expedite the construction and financing of a substantial number of new housing units, placing primary emphasis on expanding and amending existing programs to provide economic relief.

Aviation agency: Created a Federal Aviation Agency to assume authority over the Nation's airways (Public Law 726).

Military pay raise: Public Law 422 increased the basic pay, by varying percentages, for nearly all military personnel with more than 2 years' service.

Superliner construction: Authorized the Federal Maritime Board to contract for the construction and sale of two superliner passenger vessels (Public Law 521).

Atomic data exchange: Public Law 479 authorized increased exchange of atomic weapons information and materials with U.S. allies.

Small Business Agency: Public Law 536 gave the Small Business Administration permanent status—a decided victory for small business groups.

Capital for small business: Public Law 699—the Small Business Investment Act—provided for loans to State and federally chartered small business investment companies.

Farm surplus disposal: Public Law 931 extended for 18 months, to December 31, 1959, the Agricultural Trade Development and Assistance Act and increased from $4 billion to $6.25 billion the value of surplus commodities that can be sold to friendly foreign countries for local currencies.

Alaska: After a 42-year deadlock Congress enacted Public Law 508 admitting Alaska to the Union as the 49th State.

Minerals exploration: Public Law 701 established an Office of Minerals Exploration as a permanent agency within the Department of Interior to provide Federal assistance for mineral exploration projects.

Construction speed-ups: The Congress adopted two resolutions calling on the administration to accelerate all civil and military construction projects for which funds had been previously appropriated—as one means of checking a recession.

Hospital construction: Public Law 664 extended for 5 years the program of Federal grants for hospital construction.

Presidential pensions: Public Law 745 provided a pension of $25,000 a year for former Presidents, and a pension of $10,000 to widows of former Presidents provided they gave up any other Federal annuity or pension.

YEAR 1959

Agriculture

REA: Restored authority of REA Administrator to approve or disapprove loans without supervision by the Secretary of Agriculture (vetoed). Final passage, 60 to 27.

Wheat supports: Provides price support at 90 percent of parity; reduces acreage allotments by 25 percent below the allotment it would otherwise receive for the 1960 and 1961 crops; and limits wheat price support to $35,000 a year for each producer. Final passage—division vote. Action clearing bill for President adopted by vote of 44 to 40 (vetoed).

Tobacco supports: Stabilizes and protects the level of tobacco price supports by permitting the support price to be either the 1958 level or 90 percent of new parity, whichever is lower, until 90 percent of old parity exceeds either of these levels. Voice vote (vetoed).

Special school milk program: Raised limitation on special school milk program to $80 million for 1960 and 1961. Increased to $78 million for current year. Voice vote.

Civil rights

Cloture: Liberalized the cloture rule by providing that two-thirds of the Senators voting may close debate on any measure, including rule changes; and affirmed the fact that the Senate is a continuing body. Final passage, 72 to 22.

Hawaii: Provided for admission of Hawaii to the Union as the 50th State. Final passage, 76 to 15.

Alaska Omnibus Act: Amends various Federal laws to facilitate orderly transition from territorial to statehood status (voice vote).

Home rule: Provides for an elected mayor, city council, and a nonvoting delegate to the House of Representatives for the District of Columbia (voice vote).

Economy

Economic study: Provided $200,000 for a major study of the Nation's economy by the Joint Congressional Economic Committee (voice vote).

Unemployment problems: Established a Commission on Unemployment Problems of 11 members, 5 to be appointed by the President and 6 by Congress, to make a study of the problems and report in 60 days (voice vote).

Finance

Clayton Act: Amends Clayton Act to expedite procedures for enforcement by Federal Trade Commission (voice vote).

Foreign relations

World Bank and International Monetary Fund: Increased U.S. subscription to the International Monetary Fund by $1.375 billion and the World Bank by $3.175 billion. Final passage 73 to 10.

Health for peace: Authorized a $50 million a year program to improve health conditions through international cooperation in research, training and planning. Final passage 63 to 17.

Mutual security: Authorized a total of $3,543,320,000 for fiscal 1960; authorized an appropriation of $2 billion over the next 2 years for the Development Loan Fund. Established center for cultural and technical interchange between East and West in Hawaii. Final passage 65 to 26.

Inter-American Bank: Provides for U.S. membership in the Inter-American Development Bank to aid in the economic develop-

ment of Latin American countries. Final passage 89 to 3.

International Wheat Agreement: Ratified an extension of the 10-year old International Wheat Agreement for another 3 years, to July 31, 1962 (ratified 92 to 1).

Labor and public welfare

TV education: Authorized grants up to $1 million to each State for purchase of TV facilities and equipment upon their agreement to provide land, building, and operate and maintain an educational channel (voice vote).

Railroad retirement: Provided for a 10-percent increase in benefits under Railroad Retirement and Unemployment Compensation Acts (voice vote).

Labor reform: Labor-Management Reporting and Disclosure Act to curb undemocratic and racketeering practices in labor unions and labor-management relations. Final passage, 90 to 1.

Housing—omnibus bill: Provided for a $1.375 billion housing program emphasizing low-cost housing, college housing, urban renewal, and a more realistic building program for the elderly. Final passage, 60 to 28. Conference report adopted by vote of 56 to 31 (vetoed). Veterans' housing: Provided $100 million for direct Federal housing loans to veterans in rural and small urban areas. Permits the administration to allow lenders to charge 5¼ percent on GI housing loans (voice vote).

Depressed areas: Authorized a new Federal program with an initial authorization of $389,500,000 in loans and grants for industrial redevelopment in economically depressed areas. Final passage, 49 to 46.

Air-pollution: Made permanent the Federal air-pollution control program, authorized funds, and provided for agency cooperation (voice vote).

Health benefits—Federal employees: Provides for a voluntary Federal civilian employees health benefit program comparable to these available to other large employee groups by authorizing payroll deductions and an equal contribution by the Government to meet the costs of the program. Final passage 81 to 4.

National security

AEC: Authorized $165,400,000 for a total of 43 new construction projects; $7 million for the Euratom research and development program; $55,500,000 for the cooperative power reactor demonstration program; and extends for another 5 years the compulsory licensing of atomic energy (voice vote).

Modern Navy: Authorized $110 million construction program of modern naval vessels for 1960 (voice vote).

Airports: Extended for 2 years, until June 30, 1961, the present Airport Act at the same level of annual authorization—$63 million for 1960 and 1961. Substitute adopted 71 to 11.

Natural resources

TVA financing: Authorizes issuance of up to $750 million revenue bonds by TVA to finance additional power facilities subject to congressional and Treasury Department approval.

YEAR 1960

Mutual security: Extended the mutual security program for 1 year and authorized $1.3 billion for economic assistance, technical assistance, and special activities ($2.7 billion for military assistance and development loan funds for 1961 previously authorized).

Conference with Mexico: Authorized U.S. participation in parliamentary conferences with Mexico.

IDA: Provided for U.S. participation in the International Development Association to help provide assistance to underdeveloped countries.

International health program: Authorized the President, Secretary of Health, Education, and Welfare and the Surgeon General to conduct an international cooperative program in health, research, training, and planning.

NATO citizens convention: Authorized appointment of U.S. Citizens Commission to participate in NATO Citizens Convention to explore ways to develop democratic freedom by economic and political means.

Japan: Ratified Treaty of Mutual Cooperation and Security between the United States and Japan.

Antarctic Treaty: Ratified Antarctic Treaty assuring that the Antarctic Continent and surrounding areas will be used exclusively for peaceful purposes, that freedom of scientific investigation will be maintained and freezes existing territorial claims and rights in the Antarctic.

Mutual security appropriations: Appropriated $3.722 million for foreign aid.

Latin-American development: Authorized $500 million for assistance in the development of Latin America and $100 million for aid in the reconstruction of Chile.

Mutual security contingency fund: Provided an increased authorization of $100 million for the President's mutual security contingency fund for fiscal 1961 to meet emergency needs in Africa and other areas of the world—contingency fund total of $250 million in authorizations.

Naval expansion: Authorized construction of four modern naval vessels at cost of $157.9 million as part of 1961 naval expansion program involving 57 vessels.

Highways: Authorized $1 billion a year for fiscal 1962 and 1963 in Federal aid for primary and secondary highway systems and their urban extensions.

Sugar Act extension: Extended for 3 months, to March 31, 1961, the Sugar Act of 1948, fixing quotas of domestic and foreign producers; gave President authority to readjust Cuba's quota.

Depressed areas: Provided Federal loans and grants for industrial redevelopment in economically depressed areas (vetoed).

Water pollution: Established Office of Water Pollution Control and increased to $90 million a year grants to local governments to pay 30 percent of cost of construction of sewage treatment works (vetoed).

Price supports: Stabilized price supports for tobacco.

Coal research: Created an Office of Coal Research to find new uses for coal, encourage production and conservation, and otherwise stimulate the industry.

Lead-zinc mining: Provides for stabilizing the mining of lead and zinc by small producers in the United States.

Helium: Authorized a long-range program for the conservation of helium.

Public works: Provided $3,969 million for public works projects, flood control and resources conservation and development.

Social security—medical care for aged: Provided increased social security coverage under existing programs and authorized a new program of Federal grants to the States for medical care for the aged.

Civil rights: Enacted a civil rights measure which authorized Federal courts, through appointed referees, to safeguard voting rights; fixed penalties for obstruction of court orders and for flight to avoid prosecution for vandalism; required preservation of Federal election records for 22 months; authorized availability of funds for education of servicemen's children in areas where schools are closed by integration disputes.

FCC: Amended Federal Communications Act by fixing penalties for acceptance of "payola" and for other abuses and questionable practices.

Housing: Extended life of home repair and improvement program and lifted the ceiling on FHA insurance; increased the revolving loan for college housing loans by $500 million and increased the revolving fund for community facility loans by $50 million.

RELEASE OF A PORTION OF THE $621 MILLION OF FROZEN DEPARTMENT OF DEFENSE FUNDS

Mr. JOHNSON of Texas. Mr. President, yesterday, the distinguished minority leader inserted a statement in the RECORD which included the following comment:

> You will recall that the $621 million held for future requirements was the amount shown in the Department's financial plan dated August 9. As a matter of interest, I contacted the Defense Department to learn the present status of these funds, and was informed that the Defense Department has released $107 million of the $621 million.

I congratulate the able minority leader for his ability to pick up the telephone and get information of this sort immediately. Upon reading his statement this morning, I asked a member of my staff to check with the Senate Appropriations Committee and with the Department of Defense to find out exactly when and how these funds were released and for what purposes.

Unfortunately, the Appropriations Committee has received no information from the Department of Defense as yet concerning the release of any of the $621 million that had been frozen as of August 9. However, the Deputy Assistant Secretary of Defense (Comptroller) confirmed that only $3 million—for Army reserve construction—has actually been released as of today.

This official stated that a request for release of all the funds provided by the Congress for the Samos reconnaissance satellite is currently pending before the Bureau of the Budget. The Bureau of the Budget has confirmed that these funds have not yet been released. With respect to the other item mentioned by the distinguished minority leader—release of $70 million for the Polaris program—no request for such release has yet been approved by the Pentagon for submission to the Bureau of the Budget.

I make these remarks simply to clarify the record and do not mean to be critical of the minority leader. I know that he has reported in good faith what he has been told by the Department of Defense. However, we have found from past experience that the Bureau of the Budget does not hesitate to substitute its judgment for that of the Department of Defense on military items. Therefore, I would advise the minority leader not to report that these funds have been released until it is actually an accomplished fact.

Even though my friend may have "jumped the gun" in announcing that these funds have been released. I commend him for his interest and efforts along these lines. I invite him to use his great influence with the executive branch to urge the full and prompt use of the additional funds provided by the Congress to increase our military preparedness.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a memorandum dealing with the impact of expenditure ceilings and other fund restrictions on the defense programs in recent years.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

IMPACT OF EXPENDITURE CEILINGS AND OTHER FUND RESTRICTIONS ON THE DEFENSE PROGRAM IN RECENT YEARS

THIRTY-EIGHT BILLION DOLLAR CEILING

In May 1957, Secretary of Defense Wilson issued an order freezing defense expenditures for fiscal year 1958 at $38 billion. At the time this order was issued, defense spending was running at a rate equivalent to $42 billion a year. As part of this expenditure ceiling, the Army, Navy and Air Force were directed to reduce the amounts available for obligation during fiscal year 1957 by $500 million. The directive to make this cutback was issued on May 22 so that all of the cutback had to be made during the month of June.

The sharp and abrupt cutbacks in defense obligations and expenditures resulted in curtailment and elimination of many programs which had been justified to, and approved by, the Congress. Even more disastrous, however, was the fact that these abrupt cutbacks were made at a time when the economy was faltering.

As a result, these defense cutbacks, which were made to "save" $2 billion in defense expenditures, served to trigger the recession of 1958. One byproduct of this recession was the fact that the Government suffered a budget deficit of $12.4 billion in fiscal 1959—the largest peacetime deficit in the history of the Nation.

IMPACT OF SPUTNIK

On October 4, 1957, the Soviet Union placed the first earth satellite into orbit. As a result of Sputnik I, and of hearings held by the Preparedness Investigating Subcommittee, the administration submitted a supplemental appropriation request for fiscal year 1958 to the Congress on January 8, 1958. The rigid defense expenditure ceiling of $38 billion was also adjusted upward.

Ever since sputnik, the Department of Defense has avoided the issuance of any documents formally establishing a Department of Defense budget ceiling. Instead, the emphasis has been placed on expenditure "targets," "objectives," "estimates," etc. Thus, while formal rigid expenditure ceilings no longer exist, the ceiling psychology still exists and serves as a brake against acceleration or expansion of Defense programs.

QUOTATIONS REGARDING BUDGET CEILINGS

The following are representative quotations regarding the existence and impact of budgetary ceilings and similar administrative limitations on Department of Defense programs:

Impounding of Marine Corps funds (hearings before Senate Appropriations Committee, Department of Defense appropriations for 1958, pp. 266–267)

"Senator SYMINGTON. The decision was made to cut heavily the Marine Corps, and the money was appropriated in the amendment to prevent that being done.

"But I see it was done anyway, so apparently there was a difference of opinion.

"Do you know what the $40 million was going to be used for instead of what the Congress requested?

"General PATE. By the Defense Department?

"Senator SYMINGTON. Yes.

"General PATE. I do not.

"Senator SYMINGTON. Do you, General Moore?

"General MOORE. No, sir. It was impounded and $31 million in the appropriation, 'Military personnel,' Marine Corps was placed in reserve, and together with another $20,963,000 reverted to the Treasury. That is $31,853,000 out of the total $41,148,000.

"There was more than one appropriation involved."

Imposition of expenditure ceiling without knowledge of its impact on Defense program (hearing before Senate Appropriations Committee, Department of Defense appropriations for fiscal year 1958, pp. 412, 415–416, 465, 471, 941–942)

"Senator SALTONSTALL. For the fiscal year 1958, which is the appropriation that we are talking about now, the estimated expenditures of the Department of Defense are a little over $38 billion; is that correct?

"Mr. MCNEIL. That is about correct, Senator SALTONSTALL; yes, $38 billion.

"Senator SALTONSTALL. At the rate that they are running, or are estimated to run, as you foresee it now, they will run nearer $42 billion than $38 billion; is that correct?

"Mr. MCNEIL. They are running, at least during the last 2 or 3 months, at a rate of about $42 billion; that is correct.

"Senator SALTONSTALL. The purpose of this directive here is, as contended by the Senator from Missouri—I would agree quite fully with him on that—that the purpose of the directive is to make sure where you are going, as to whether you are going nearer $38 billion, which is the estimate originally that was submitted to the Congress, or are going to run nearer $42 billion; is that not correct?

"Mr. MCNEIL. That is correct.

"Senator SALTONSTALL. As far as the program of procurement is concerned, and contracts, and what it will do to the Air Force, the Navy, or the Army, that has to be worked out, and you can't tell this committee at the present time just what the effect of this directive will be; is that not correct?

"Mr. MCNEIL. That is correct."

* * * * *

"Senator ROBERTSON. At the present rate of expenditure, what would the actual expenditures be for fiscal 1958?

"Mr. MCNEIL. For fiscal 1958, we will try to work that out and get a more precise figure.

"As I mentioned, in response to Senator SALTONSTALL a few minutes ago, in the last few months the rate of expenditures has been at the rate of about $42 billion.

"Senator ROBERTSON. If that rate continued, it would be $42 billion for fiscal 1958; is that correct?

"Mr. MCNEIL. That is right, if it continued at that rate. I do not think it would necessarily do that.

"Senator ROBERTSON. Not necessarily.

"And your May 21 directive, in the part of overall planning, you started curtailing expenditures in fiscal 1957 with a view to keeping fiscal expenditures in 1958 down to $38 billion?

"Mr. MCNEIL. Or very close to that.

"Senator ROBERTSON. That could involve a cut of $4 billion, a cutoff or a cutback, or whatever you call it.

"Mr. MCNEIL. We do not know yet whether this rate of the last 3 or 4 months would continue at this rate during all of next year. It is possible that it would drop off to some extent during the middle of the year, or even in the latter part of the year.

"This may be a mere temporary hump, but it is almost certain that unless the program is extended, and those things which must be carried on are carried on, while those things that can wait or be delayed are sorted out, these expenditures will run above the $38 billion.

"Something will probably have to be done. and I mention that in my statement. As I say, I was trying to bring this to the attention of the committee in my statement this morning.

"Senator ROBERTSON. The distinguished Senator, my great friend from Missouri, said, or rather he intimated, that the first consideration was a fiscal one and the fiscal one indicated that you needed to keep expenditures for 1958 down to $38 billion.

"You discussed that action without knowing definitely to what extent it may delay and impede the development of bombers, missiles, et cetera."

* * * * *

"Senator SYMINGTON. Right.

"Now, Mr. Secretary, you say:

" 'We have been informed that considering the anticipated revenues of the Government and the statutory debt limit, expenditures for the Department of Defense must not substantially exceed the budget estimate of $38 billion during the coming year.'

"Fundamentally, that is what we are really talking about; is it not?

"Mr. MCNEIL. It is one of our real problems.

"Senator SYMINGTON. Would the answer to my question be 'Yes' or 'No'?

"Mr. MCNEIL. There are quite a few problems, but I would say that was one of the prime problems; yes, sir."

* * * * *

"Senator SYMINGTON. You say in your statement that we have been informed that these expenditures 'must not substantially exceed' and so on.

"Mr. MCNEIL. That is for 1958, sir.

"Senator SYMINGTON. I am not much on definition of how rigid a ceiling is or is not—but are you saying that the Bureau of the Budget is saying you must try to live within this figure? Is there a difference in rigidity you are talking about now?

"Mr. MCNEIL. Yes, sir.

"Senator SYMINGTON. So from here out the programs presented by the President to the Congress really do not mean much, do they?

"Mr. MCNEIL. I think they do.

"Senator SYMINGTON. If you feel that the amount of money is as you have already testified, and that expenditures must be held down, and that is the chief reason for these directives, what you are really saying is you are not going to let the Department of Defense have the money necessary to implement the program.

"Mr. MCNEIL. It does not move quite that way, sir. There is no question that the—well, I might call it a ceiling, is much more rigid for 1958 than it was in 1957."

* * * * *

"Senator SYMINGTON. At this point is it not an entirely fair statement to say that the fiscal situation became completely dominant as against the force situation?

"General BOGART. I think so insofar as the directive is concerned.

"Senator SYMINGTON. There could be no other answer, could there?

"General BOGART. I don't think so.

"Senator SYMINGTON. That would seem especially true in that you were not told what part of the forces to cut. It was strictly a matter of dollars as against security; is that not correct?

"General BOGART. That is true, sir."

After-the-fact acknowledgement that there had been a rigid $38 billion expenditure ceiling on Department of Defense expenditures (hearings before House Appropriations Committee, supplemental Defense appropriations for 1958, pp. 239–40 and hearings before the Preparedness Investigating Subcommittee, inquiry into satellite and missile programs, pp. 257–258)

"Senator SYMINGTON. Now, you refer to the $38 billion expenditure ceiling, in the memorandum that the President sent me, as—'not as an arbitrary limit on defense spending but as a step taken by the administration to keep military spending in appropriate balance with the requirements of the Federal Government as a whole.'

"Testimony by top civilian officials of the Department of Defense challenge this statement. As I mentioned the Assistant Secretary (Comptroller) said there had always

been some guidelines and restrictions; but now these were rigid ceilings. That was his statement.

"What would you comment on that?

"Was it an arbitrary limit on defense spending or wasn't it?

"Secretary McElroy. Well, there was a limit for a period but, of course, since then, as I think is well known, there has been a change.

"There has been relief in the spending for the fiscal year, so while there was an attempt to set a limitation it was found that that was not right in relationship to the needs of defense and that it was relaxed to the extent of several hundred million dollars."

* * * * *

"Secretary Gates. I imagine what he is talking about, Mr. Flood, is the fact that everyone knows we were operating under an expenditure ceiling in the early days of this fiscal year and there was a holdup of money by the Bureau of the Budget in apportionments in regard to controlling expenditures. This is a costly thing to do in the long run.

"Mr. Flood. Then if there is, as a fact, a holdup——

"Secretary Gates. There was.

"Mr. Flood. In the allocation of appropriated funds, it was not the fault of the Congress in the development of the nuclear program as of today, it is not the fault of the Navy or the Department of Defense, but the 'Pooh-Bah' at the Budget who substituted his thinking for everybody's and said you could not have this money and you did not get it.

"Is that correct? 'Pooh-Bah' is my word, not yours.

"Secretary Gates. Well, I think——

"Mr. Flood. Well, it is Gilbert and Sullivan's, as a matter of fact, but they were good, too. You go on and tell me something.

"Secretary Gates. Yes, sir. I think that the policy of the administration was for a balanced budget and not an increase in the debt limit. The Bureau of the Budget was carrying out the policy of the President in this respect, and this caused an expenditure target to be placed on the departments of Government, including the Department of Defense. This slowed up apportionment procedures, and in some instances delayed obligation of money and procurement of materiel in various departments, including the Navy and the bureaus of the Navy. I think that is what Admiral Rickover is talking about.

"This has been partially corrected. We now have a change in the expenditure targets we were originally working toward."

Impact on Air Force research and development of Department of Defense Directive of August 17, 1957, withholding 10 percent of research and development funds (hearings before House Appropriations Committee, supplemental defense appropriations for 1958, pp. 345–346)

"Normally in the research and development appropriation early in July the Air Research and Development Command, having had the proposed fiscal year program, is able to immediately start initiating new research and development contracts and continuing previous contracts for effort which is still in the overall research and development program. However, new obligations were frozen as of June 30, 1958, so that no new obligations could be incurred without specific approval from the Office, Secretary of Defense. In addition, an expenditure amount for research and development within the overall Air Force expenditure objective was established, which the research and development program should not exceed during fiscal year 1958. Further, about August 17, 1957, the Office, Secretary of Defense, directed a reduction under research and development programs and the Department of Defense in the amount of 10 percent.

"The effect of the above actions was to immediately halt contractual action pending analysis of the fiscal year 1958 program and to establish actions so that the Air Force could live within the directives as issued. In this respect, the Air Force directed the Air Research and Development Command to reduce all work-effort-type contracts by 5 percent so that under the restrictions the most balanced research and development program could be maintained in fiscal year 1958. The funds for the operation and maintenance of research and development centers and test bases were put on a minimum operating base by reduction of local purchase to the minimum need to maintain mission stock levels; by the reduction of overtime for all programs except the ballistic missile test program, and by the reduction of civilian personnel. These actions served to slow down the operation of the research and development effort for a period. Although certain contracts with universities and nonprofit organizations were terminated upon the expiration of existing contracts, complete cooperation was received from most contractors to the point that the Air Force scientific effort was not deferred. The research and development contractors in effect worked 30–60 days past the expiration time of the contract in order to give Air Force time to evaluate effect of these actions on the research and development program and in order that the scientists and engineers working on Air Force programs would not shift to other projects and be lost for the remainder of the fiscal year.

"Upon review of the overall research and development program, the Air Force made the decision to support the research effort to the utmost allowable under the expenditure ceiling and effect release of enough additional expenditures to bring the research program back into phase so that contracts could be written for new work as well as continuing of work which had been all contracted from fiscal year 1957 funds. The Air Force reduced the fiscal year 1958 program by the approximate 10 percent as directed by the Office of Secretary of Defense. This was done by deferring and deleting many projects which had been planned for implementation in the fiscal year 1958 President's budget estimate. On October 24, however, the Air Force began to take actions to place the research and development effort back on the original planned basis for fiscal year 1958. Additional expenditure allowances were provided in order that obligations and expenditures could be achieved in normal manner for the balance of fiscal year 1958. On November 7, 1957, the Air Force relieved the Research and Development Command from the 5-percent reduction of effort-type contracts.

"The research and development program is now proceeding as expeditiously as possible toward fulfillment of the program during fiscal year 1958."

Army strength was cut by impounding fiscal year 1959 funds (hearings before Preparedness Investigating Subcommittee, major defense matters, pp. 14–16, 59)

"Senator Johnson. Do you have some $200 million for previously approved procurement in 1959 that has been held up?

"General Taylor. $210 million, I am informed.

"Senator Johnson. All right.

"Now, summarizing—and I want to be as brief as possible because I have only 5 minutes—the Congress said they wanted you to have a 900,000-man Army. That has been reduced to 870,000 by impounding funds. Yes or no?

"General Taylor. Yes, that is my understanding, sir.

"Senator Johnson. The Congress said it wanted you to have $210 million more for procurement than you have been authorized to spend, correct? Yes or no?

"General Taylor. Yes, sir.

"Senator Johnson. Has there been any other cutback or reduction in fiscal year 1959 Army funds that you are aware of?

"General Taylor. Yes, the Congress appropriated $37 million for modernization and $6,250,000 for construction which have not been made available to the Army. In addition, there are the funds associated with our increased strength which have been held back.

* * * * *

"Mr. Weisl. General Taylor, do you know why the $210 million fund appropriated by the Congress and recommended by the Defense Department was withheld?

"General Taylor. My understanding was that it involved the considerations of expenditures; that it was desired to spread out the expenditures more into 1960 and 1961.

"Mr. Weisl. Who made that decision?

"General Taylor. I would say that it came down through fiscal channels from the Office of the Secretary of Defense.

"Senator Johnson. Where did he get it?

"General Taylor. Sir?

"Senator Johnson. Where did he get it?

"General Taylor. I would not know, sir.

"Senator Johnson. By the fiscal channel, do you mean the Director of the Bureau of the Budget?

"General Taylor. I would not know, sir."

The Secretary of Defense was not permitted by the Budget Bureau to ask the Senate for any funds for fiscal year 1960 in excess of the Budget request submitted to Congress in January 1959 (hearings before Preparedness Investigating Subcommittee, major defense matters, p. 304)

"Mr. Stans. We did not take issue with the Department of Defense determinations as to the position they should take on the House add-ons and on-the-House cuts. We did make suggestions as to what we thought might be the best way to handle them, but the determination was to be made by the Secretary of Defense, and I am not sure that we have all of the details yet as to how the Secretary is going to make the presentation.

"The only limitation that was imposed upon him was that in the aggregate the Secretary would not ask for a greater budget for the Department of Defense than appeared in the budget document last January."

Fixed budget ceilings failed to reflect changing world conditions (hearings before Preparedness Investigating Subcommittee, missiles, space, and other major defense matters, pp. 190–191)

"Mr. Weisl. We have been told, General Taylor, that while the Department of Defense and the various services have had guidelines on expenditures, there really never was a budgetary ceiling on expenditures. What is your view on that?

"Has there been a budget ceiling on defense expenditures?

"General Taylor. I think that perhaps we are just playing on words, Mr. Weisl. Certainly, for practical purposes there was a finite limit on what we could count upon, and each year that amount was essentially the same.

"I often point out that the split between the services was almost exactly the same for at least 4 years; 23 percent to the Army, 28 percent to the Navy, and 46 percent to the Air Force, giving a suggestion of a frozen pattern, which I don't think corresponded to the changing world conditions.

* * * * *

"Mr. WEISL. In your book you state as follows:

" 'The fact that there is a ceiling of around $40 billion on the defense budget is a reminder to each Chief that all military programs, however disparate in character, are in fact competitors for a fixed number of dollars.

" 'This consideration tends to color the attitude of individual Chiefs toward the program of sister services. It tends to make disinterested judgments more difficult than would be the case if it were possible to form judgments without such regard for fiscal consequences. The fixed defense budget by accentuating the interservice struggle for funds has become the prime cause of the service rivalry which is undermining national confidence in our military programs.'

"Would you like to comment on that?

"General TAYLOR. No; I think, unfortunately, that the statement is accurate. I am sure that each Chief has always tried to sit in judgment honestly and dispassionately, but I know very well that we all think in terms of the effect on the budget of decisions on new weapons, for example. I think that explains to a degree why the Army and the Navy have been very reluctant to support, say Bomarc. I am equally certain that that is one of the reasons why the Navy and the Air Force have been reluctant to support Nike-Zeus; namely, the ultimate effect upon a fixed budget.

"Mr. WEISL. In your judgment, has the fixed ceiling on the military budget kept pace properly with changing world conditions?

"General TAYLOR. Well, I would say, sir, even without any analysis of the defense budget, that it is hard to believe that the world has not changed in the last 4 or 5 years. Yet our military budgets have been virtually the same within a variation of 1 or 2 percent."

Fiscal year 1960 funds provided by Congress for Army modernization were withheld by Bureau of the Budget (hearings before Preparedness Investigating Subcommittee, missiles, space, and other major defense matters, pp. 229, 252, 262)

"Mr. WEISL. Last year Congress added funds to the budget for Army modernization. Are these funds being used fully?

"General LEMNITZER. The answer to your question is 'No.' I would like to tell you how the funds have been used, so that it may be clear as to why I give the answer 'No.' The total amount of money that was appropriated by the Congress over and above that which was in the President's 1960 budget amounted to $382.6 million. Now, $164.2 million of these funds are being used to cover a deficiency in the funding of the fiscal year 1960 direct obligational program for procurement of the Department of the Army, which totaled about $1,372 billion. This deficiency resulted from the Office of Secretary of Defense funding program including assets which failed to materialize, but these assets were beyond the control or influence of the Army.

"I might explain what I mean by that.

"Under the mutual security program, the Army provides some of its equipment right out of its inventory to assist our allies. We are normally reimbursed for that equipment so that we can replenish our inventories. The total amount of reimbursements which the Department of Defense estimated we would get did not materialize, and $164 million of the $382 million were used to cover deficits of this sort; $43.4 million of the total of $382 million will be used for modernization. This amount will be used to increase the Army's fiscal 1960 direct obligational program and it will be used in our so-called PEMA budget, that is, the 'Procurement of equipment and missiles, Army.' Of the $382 million, $175 million has been placed in reserve by the Bureau of the Budget for utilization in financing the fiscal year 1961 program. That gives the complete status of the total amount appropriated by the Congress in the fiscal year 1960 budget.

"Senator STENNIS. What was the last figure?

"General LEMNITZER. $175 million.

"Mr. WEISL. Has this amount been put in reserve?

"General LEMNITZER. It has been placed in reserve by the Bureau of the Budget.

"Mr. WEISL. Why hasn't the Bureau released these funds? It was the clear intent of Congress to use that money to modernize your Army?

"General LEMNITZER. I can't answer that. You will have to ask the Budget.

"Mr. WEISL. Did you protest against reserving that money and not using it for modernization of the Army?

"General LEMNITZER. We have requested apportionment of these funds on a number of occasions.

* * * * *

"Senator CANNON. Thank you Mr. Chairman.

"General, we know you are concerned about modernization of the Army, and, of course, as you know, Congress did earmark certain funds for use in modernization.

"I understand you have testified that the Army protested the decision of the Bureau of the Budget in withholding some of these funds that were earmarked for use in modernization; is that correct?

"General LEMNITZER. I wouldn't use the word 'protest.' We asked for the funds. We made a strong case for them. Our request was not approved, but we didn't protest or complain.

"Senator CANNON. You didn't complain. You just asked for them but didn't get them?

"General LEMNITZER. That's right.

"Senator CANNON. But at the time you asked for them, you felt they were very necessary; is that correct?

"General LEMNITZER. We did.

"Senator CANNON. Do you believe these funds are of such importance to our national security that new, or perhaps stronger, efforts should be made to dislodge these funds?

"General LEMNITZER. Well, of the funds that you referred to, Senator CANNON, only $175 million remain available in reserve. I think that is what you referred to.

"We would like to get those funds. We have asked for them, and we probably will make another attempt to get them.

"Senator CANNON. I don't think that quite answers my question, General. The question was: Do you think that these funds and the use for which they are intended are of such importance to the national security that new or perhaps stronger efforts should be made to dislodge these funds from the Bureau of the Budget reserve? I am thinking not only of your own efforts, but efforts on behalf of the Congress.

"General LEMNITZER. We need these funds for modernization of the Army, and as we have testified before various committees of the Congress, we have made a strong case for our modernization program. We need these funds.

"Senator CANNON. And in your opinion they are very important to our national security.

"General LEMNITZER. Yes, insofar as they will improve the capability of the Army to accomplish its mission."

* * * * *

"General LEMNITZER. We would be better equipped with this $175 million. I wouldn't want to give the impression to this committee that the Army can't carry out certain commitments, because it can and will. We can do it better with more modern equipment, as I have attempted to state here this afternoon.

"Senator STENNIS. I know you would do your best, but it is just unthinkable that you would have to go up against better weapons than you have yourself.

"With all the money that we spend, with all the resources we have, the know-how, the technology and everything, it is just unthinkable that we would have to go up against someone else who had better weapons, better equipment, and therefore someone who would place us at a disadvantage to that extent.

"This money is available and appropriated, yet is withheld. Who is holding it up? Is it the Director of the Budget, Mr. Stans? That is where the funds are locked, is it not?

"General LEMNITZER. I don't know who the individuals are; the best information I can give you is that it has been placed in reserve by the Bureau of the Budget."

* * * * *

Budget limitations prevented Navy from submitting its military requirements for fiscal year 1961 (hearings before Preparedness Investigating Subcommittee, missiles, space and other major defense matters, pp. 280–282, 329)

"Mr. WEISL. In other words, you were given guidelines as to what plateau you must not cross regardless of how much you needed?

"Admiral BURKE. We were given two planning guidelines, sir.

"One was to build a budget based upon our NOA last year less 10 percent of the procurement, military construction, and research and development. That was to be the basic budget.

"The other one was the basic budget plus that 10 percent plus half a billion dollars. We submitted both budgets to the Department of Defense, based on those guidelines, sir.

"Mr. WEISL. Those guidelines were money limitations, isn't that right?

"Admiral BURKE. Yes, sir.

"Mr. WEISL. Not requirements presentations?

"Admiral BURKE. They were money limitations; yes, sir.

"Mr. WEISL. But the fact is that three fleet ballistic missile submarines as recommended were denied; long leadtime requirement for six additional fleet ballistic missile submarines were denied, and seven conversions were denied. Is that correct?

"Admiral BURKE. Yes, sir, I did that in order to——

"Mr. WEISL. You did that?

"Admiral BURKE. Yes, sir.

"Mr. WEISL. But it wasn't because you thought it should be done, but because of the guideline and the money limitation. Is that correct?

"Admiral BURKE. Yes, sir.

* * * * *

"Senator JOHNSON. What you are saying is that you are following the budget judgment instead of the military judgment. The military judgment is one thing, and the budget estimate is another. You made the recommendations based on military judgment. Then you got restrictive budget guidelines and you compromised by following the guidelines.

"Admiral BURKE. We put our most important items in our budget, in the basic budget, and the next most important items in the add-on, sir.

"Senator JOHNSON. And the budget does not contain items that, in your military judgment, you feel you should have.

"Admiral BURKE. It doesn't contain as many items as we originally asked for, no.

"Senator JOHNSON. It eliminated three Polaris submarines, also long leadtime procurement for six additional Polaris submarines. Does that mean you believe the budget provides all the funds that should be provided for the Polaris submarines?

"Admiral BURKE. I might explain that a little bit, sir. I think that people in the Department of Defense should speak for themselves on this—

"Senator JOHNSON. They will. I want you to speak for yourself. Do you think the budget includes all the money it should have for the Polaris submarines and missiles?

"Admiral BURKE. Not now, sir, because we have completed our tests on the Polaris submarine. It is a wonderful machine, sir.

"Senator JOHNSON. The answer is 'No.'

"Admiral BURKE. Yes, sir.

"Senator JOHNSON. And you think the budget ought to include more money for the Polaris submarines?

"Admiral BURKE. Yes, sir.

* * * * *

"Mr. WEISL. You have given us several examples in which the Navy did not ask for funds it required because of budgetary guidelines. Did you ever submit to the Secretary of Defense your military requirements for 1961?

"Admiral BURKE. As I explained before, we had a directive to submit our budgetary request for 1961 in 2 amounts. One was for a basic budget and one was for the basic and add on; and we followed our directive.

"Mr. WEISL. Then you did not submit your requirements?

"Admiral BURKE. Not as it has been conceived heretofore; no, sir."

"Mr. WEISL. I know, but the Congress provided for the use of those funds in 1959, and they were deferred, were they not?

"Admiral BURKE. Yes, sir.

"Mr. WEISL. Is it not also true that the 1960 budget contained no funds for construction of additional Polaris submarines, except for advance components for submarines numbered 10, 11, and 12?

"Admiral BURKE. That is correct, sir.

"Mr. WEISL. Isn't the withholding of the funds appropriated in 1959, and the failure to request additional funds in 1960, resulting in a sharp decrease, or a gap, in the deployment of Polaris submarines after the first nine?

"Admiral BURKE. Not a sharp decrease, sir. What we can do, of course, will be to deploy about three submarines per year, because that is what we are building per year.

"Mr. WEISL. I understand that, but if you had used the money that you asked Congress to give you and for which you pleaded so eloquently, you wouldn't have had that gap, isn't that true?

"Admiral BURKE. Yes, sir; that is correct.

"Mr. WEISL. Obviously you cannot make up for that leadtime now. Once leadtime is lost, it is lost forever, isn't it?

"Admiral BURKE. Yes, sir.

Expenditure limitations prevented Air Force from requesting additional programs for fiscal year 1961 (hearings before House Appropriations Committee, revisions in 1960 and 1961 Air Force programs, pp. 38, 40)

"Mr. MAHON. Let me get this clear: The add ons which you have presented us today are not all the add ons you requested of the Department of Defense in connection with this presentation?

"General WHITE. That is correct, sir.

"Mr. MAHON. What was the stumbling block with these additions and why did you not get the funds and approval, or do you know?

"General WHITE. Yes, sir; I know. It is an expenditure problem. We must abide, by Service, as to the expenditures that can be made in any given fiscal year.

"Mr. MAHON. Is your expenditure limitation for fiscal year 1961 $18.6 billion?

"General FRIEDMAN. $18.6 billion; yes, sir.

"General WHITE. These addenda bring us up to that figure.

"Mr. MAHON. Were you not already up to that point?

"General FRIEDMAN. We were. But, on a comparable basis—although we dropped out some $500 million and we put in $300 million—the space programs and the missile programs spend out at a higher rate than the types of programs which we deleted. Therefore, on an expenditure basis we net out. The point is that we cannot use the additional $140 million without exceeding the $18.6 billion expenditure.

* * * * *

"General FRIEDMAN. For the Minuteman, we asked for an amount of $20.7 million more in our initial discussions than is shown in the addenda here.

"Mr. MAHON. Why was it reduced?

"General FRIEDMAN. It was reduced on the basis which General White discussed, that this appeared to be the maximum funds we could apply and still remain within the expenditures reflected in the President's budget.

"General WHITE. May I put it this way: The list that you have read adds up to the amount of expenditures which we have deleted by our proposed changes.

"Mr. MAHON. I see the point."

ORDER OF BUSINESS

Mr. JOHNSON of Texas. Mr. President, I should like to yield to my colleague from Texas for a question, or to propound an inquiry, or to receive any suggestion he may have at this time, with the understanding that I shall not lose my right to the floor.

Mr. YARBOROUGH. Mr. President, I really desire to direct an inquiry to the distinguished Senator from Ohio.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the junior Senator from Texas may direct an inquiry to the Senator from Ohio without my losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

Mr. LAUSCHE. Mr. President, without challenging the correctness of the Senator's position, does the Senator from Texas or the Senator from Ohio have the floor?

The PRESIDING OFFICER. The Senator from Ohio yielded to the Senator from Texas for the purpose of making a statement.

Mr. LAUSCHE. I thank the Chair.

Mr. YARBOROUGH. I understood the Senator from Ohio had the floor, and he has stated he would make some kind of a request.

Mr. JOHNSON of Texas. Will my colleague make a suggestion, or ask the Senator a question?

Mr. YARBOROUGH. Did the Senator from Ohio say he planned to call for a quorum?

Mr. LAUSCHE. I reserved to myself that right. I did not declare I would do so.

Mr. JOHNSON of Texas. I understood my colleague was probably going to make a suggestion concerning the pending business.

If I yield the floor I shall have no further control of it, and then the Senator may not be able to make any suggestion he desires to make, for the reason that the Senator from Ohio may make a motion to table.

Mr. LAUSCHE. I shall be glad to enable the junior Senator from Texas to make a statement. I shall not preclude him from doing so.

Mr. YARBOROUGH. I understood that before the Senator from Ohio granted time to the senior Senator from Texas he stated he might, upon the completion of the statement of the Senator from Texas, again make a motion to table.

Mr. JOHNSON of Texas. He simply reserved the right to do so.

Mr. YARBOROUGH. Considering the lateness of the hour, it is manifest, since we have only 35 minutes remaining, that action on Senate Resolution 374 cannot be completed before midnight, and the adjournment of the Senate would then be forced under the resolution previously agreed to by both Houses. It is obvious that the opponents of the resolution can, under the existing parliamentary situation, prevent adoption of Senate Resolution 374 at this late hour.

I have no desire to delay the Senate or to hold Senators another half hour without purpose, unless there is a reasonable chance for adoption of the resolution. Therefore, I ask leave of the Senate to withdraw the resolution from consideration in order to pave the way for adjournment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and the resolution is withdrawn.

Mr. JOHNSON of Texas. Mr. President, do any other Senators desire to address the Senate?

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. YARBOROUGH. I wish to state that I have withdrawn the resolution because of the parliamentary situation, but this is in no wise any indication that the resolution is not badly needed and good legislation. The resolution is withdrawn simply because of the lateness of the hour and the impossibility of completing action upon it before 12 o'clock midnight.

Mr. JOHNSON of Texas. Mr. President, I assume that has cleared up the situation.

Mr. LAUSCHE. Mr. President, I yield the floor to the Senator from Texas.

Mr. JOHNSON of Texas. I thank the Senator.

Mr. President, I ask unanimous consent that I may yield to my delightful friend the minority leader, without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

Mr. JOHNSON of Texas. If any other Senators desire to speak before the minority leader speaks, I shall be glad to yield to them.

I yield to the minority leader, with the understanding that I shall not lose my right to the floor.

ADJOURNMENT OBSERVATIONS

Mr. DIRKSEN. Mr. President, it is not my purpose to indulge in any observations of a partisan or political character. If I were impelled to do so, I probably could make an observation or

two on the general subject of divided government. There are divisions other than those which exist between the executive branch and the legislative branch, but somehow we have come to live with them, and to live with them in a satisfactory fashion.

There is another answer, of course, to the question of division in Government, if I may make so bold as to say so, and that would be a very thumping Republican victory all up and down the line. Then we shall have no divided Government. We have had that situation on other occasions, and I have lived through it.

Mr. President, I came to the Congress as a minority Member in 1933. I saw my party diminish in the Congress steadily over a period of several years—in fact, over a period of several sessions. I believe in 1936 we were reduced to only 89 members in the House of Representatives. One of the favorite canards was that we could hold a convention in a telephone booth.

It was in that period we essayed so many new ventures in the social and economic field, so many of which had to be expunged from the statute books that I sometimes wonder whether the type of division we have now, energized by our President of good will, by a cohesive minority, and by a vigorous majority, I will say, has not been beneficial to the country.

We live in terms of equations today. I forget whether I said it last night or at some other place, but we have come to think that one-third plus one, or 66⅔, should wield the stronger power and be the most potent force in Government.

That is for another day, when we get on the hustings. Tonight I simply wish to pay my respects to the loyal opposition, to the members of my own party, to the staff, to the majority leader, to the Vice President, who unfortunately cannot be with us tonight, and to all those who have made this an effective institution.

The moving finger writes, and the fortuities of politics will probably result in change of some faces when we return in January. Who shall say who will be here then?

There is a sweet sorrow about it because here, above all our divergencies, there arises so majestically the enduring peace of friendship. I say "enduring," because one need only read in the face of one who has served here and returns for a visit with pleasant recollections how enduring that friendship has really been.

So I salute all of those who have been here before and in my time. I salute my own colleagues, and I salute our distinguished friends on the other side of the aisle. I count everyone a friend.

One of the amazing things is that notwithstanding all the changes, how interesting is the adjustment that is made. Old faces go and new faces come, but somehow, like Tennyson's brook, the free Republic continues to go on with vitality, vigor, and an energized faith, as it moves to newer heights and newer achievements for its people in the great moral climate of freedom.

As I think of the word "friend," I recall that all the really great things in life and all the great impelling forces are expressed in the simplest words—"God," "love," "child," "friend." Those are words of one syllable, but they are the great words. Those are the great compelling symbols that somehow move us on, and the word "friend" stands out majestically as we think of ourselves in this Chamber dedicated to great and common purposes, and how easily we adjust because the friendship is deeper and it is greater than any other force that we encounter.

Notwithstanding that friendship, in due course I shall go back to the hustings, and in the nature of things I shall have to recite all of the sins of those on the other side of the aisle. I shall recite the sins of omission and the sins of commission. Tomorrow I shall examine the RECORD fervently and earnestly to see what my distinguished friend LYNDON did not say and what he did say. The result of that study must necessarily then become the basis for some of the utterances that I am expected to make on the platform.

But I wish to say to the majority leader and all Senators that whatever our utterances may be, they shall not be tainted with malice. They will be fair. But I assure the Senate they will be vigorous. They will be equitable, but I can assure the Senate they will be aggressive.

I wish our distinguished compatriots who seek higher political estate everything good—up to a point. [Laughter.] I have always been amazed to see what a difference 16 blocks can make.

I extend the Senators who are candidates the warm hand of fellowship. We want to keep them here. I want to keep them here. It would be lonesome without my distinguished friend the majority leader, and my distinguished friend from Massachusetts [Mr. KENNEDY], with whom it has been my honor and pleasure to work on the Senate Labor Committee. My affection is as high as the sky and it is as deep as the sea—and I do not want 16 blocks to intervene. [Laughter.]

We shall be charitable and gracious, there will be no malice; but we will pursue our responsibilities as an opposition party and do our best.

Tonight I wish the 101st Senator were here. I refer to the distinguished Chaplain of the Senate. I doubt whether I was ever so lifted as I was this morning, as fatigued as I was, by what he knew would be his farewell prayer for the 86th Congress. There was at once something lifting and refreshing about it.

What a great inspiration it is that each day, for the most part, a man of God can be with us to reenergize and to renew the faith, and make us realize that, after all, we are here to be helpful, notwithstanding the divergencies of opinion and the disagreements we may have, because that is the great wellspring and it is the great motive power that sends us forward.

To my distinguished friend, the majority leader, I say it has been a great pleasure to serve with him. When it has become my disagreeable duty to take him to task, I have always warned him in advance. I would go to his office and drink Sanka with him. [Laughter.] Certainly I do not intend a TV plug, but even at the risk of being commercial, I must say I have never found too much inspiration in Sanka. On those occasions I would tell him that it had become my duty and responsibility to take him to task, and even though the voice might reach an upper register, and I might brandish my arms and make it appear that I was fairly suffused with ire and anger, he knew better.

Then if, peradventure, the scene appeared on the front page of a newspaper and his beloved wife, Lady Bird, would say, "I thought EVERETT DIRKSEN was your friend," he always had the right answer. He said, "Oh, that was prearranged." [Laughter.]

Yet always the point could be made, and it could be made emphatically, but never to the point where it transgressed that fine line where friendship holds up the torch and says, "Thus far and no farther."

I wish my distinguished friend from Massachusetts [Mr. KENNEDY] were here. I said goodby to him a little while ago as he left to rejoin his wife and family and to get a day or two of rest to prepare for the ardor of campaigning that lies before him.

We have had many divergencies of spirit, and I must tell the Senate that in the Labor Committee early last week my heart was broken to have to propose an amendment I was going to offer, then to read it and then to explain it. If I had offered the amendment, my distinguished friend from Michigan [Mr. MCNAMARA] said he was prepared to table it. So, having had some experience in the art of the motion to table, I merely proposed what I was going to do. Then I read the amendment, and proceeded to explain it. I was terribly distressed when, after an hour of explanation, in the very middle of the explanation, one of my colleagues would rise and say, "The bells have sounded, and the committee has no authority to meet any longer."

I said, "Shame on you. You spoiled everything." So there I am. There is my amendment in the committee room. There also languishes the secondary boycott bill. If the majority leader has included that in his speech tonight, I will find it in the RECORD tomorrow. Then I will make note of it, and somewhere along the line I shall probably have to allude to it.

So it breaks my heart when I have to do these things. These are the disagreeable things, but at the same time they are what I call the negative brakes on progress. The danger is that often we can make progress too hastily.

I believe it is in Deuteronomy it is written: "Follow not the multitude to evil."

I guess I have never been a part of the multitude. I have always been in the minority. [Laughter.] There must be a negative brake somewhere. I presume I will gather no encomiums, and there will be no poems or apostrophes written to me for legislation I introduced. Perhaps my principal function has been the one that once was mentioned by the celebrated historian, Edward Gibbon, when he wrote in his "The

Decline and Fall of the Roman Empire" that progress is made not by what goes on the statute books but by what comes off or what is kept off. So I am a "keeper offer." That has been one of my functions, to stop these brain children from finding their way to the durable parchments of the statute books.

People do not build monuments to one like me, I suppose. At least it is a function, a conservative function. While it breaks my heart, yet I find comfort and durable satisfaction in the fact that that, too, can constitute a great contribution to the advance and progress of our country.

So as I look back, as I look around, as I look forward, as I evaluate the work of this Congress—and, of course, I shall evaluate it a little more leisurely and a little more precisely when in quiet moments I can look at a wall and pour a little oil on my portable typewriter and then proceed to catalog all your sins—it will be so much easier for me, and it will be so much more durable then, when I have it before me, and what a record it will be. But I assure everyone it will not be touched by malice. It will not be touched by anything except compassion and charity.

So we will be looking forward now, God willing—and I always add that. Who shall say which of us shall be here? So I try always to live every day to the full. I once heard William Jennings Bryan say in my hometown that his wife told him to plan as if he were to live forever, and to live as if he were to die tomorrow. It is a good rule.

So I plan to be on hand. I suppose when I expend too much energy, as I did last night, and got a little jittery and had the majority leader scold me—because he will be here in January—it will be like old familiar faces in old familiar places, and I shall get that song from the library and sing it to him.

But I must pay one testimony to our distinguished friend the senior Senator from Rhode Island [Mr. GREEN]. I believe I once went up there to campaign against him; I am not sure. But I remember I was in Providence on a Sunday. I believe it was a clambake. I was never much of a hand at clambakes, but I know I made a good speech. The only trouble was, it did not score and it did not get any votes, as I got them last night on the substitute. But I learned the affection and esteem that his people have so long cherished for him. So I salute him as a friend, as a durable friend, who has contributed so much to the country.

I would pay my testimony tonight to the Vice President. He is not here. I trust that we can arrange tomorrow morning to pay a visit to him in the hospital. I notice that it is a rather interesting malady that supposedly afflicts him. It is called hemolytic staphylococcus aureus. That is just a little loss of synovial fluid—if that makes it any better—even though I am not an M.D. So we will go up to see him tomorrow and hold his hand, and I hope his energies will be quickly restored, so that as a great crusader and gladiator he can get back to the hustings.

Our visit will be a testimony and a tribute to how we do things in this country. The majority leader and I will go to see the Vice President. I suppose in other countries the people cannot understand that. They can hardly understand, I suppose, that in this body—and it may never happen again in a century—there can be two candidates on opposite tickets for the Presidency, and a candidate for the Vice Presidency, and that a former Member of this body can be a candidate for the Vice Presidency. Other people would think that we were so beset with selfishness and venality and political aggression that we would be ready to tear each other to shreds. But we live together. We disagree together. But somehow or other the Republic goes forward. When the issue has been resolved and the water smoothed over, then we make a new effort, take another hitch in the belt, and once more this Republic goes on to higher ground.

What a privilege it is to be a citizen of this country, and what a rare privilege it is to have the confidence and the trust of the people, to the point where they make one the spokesman in this body for millions.

I never forget it, and I am never tired of making the confession, that my father and mother came from the old country. Sometimes I wish they could be alive. I wish they could sit in the gallery tonight and look down. I wish that they could say in whispered tones, "That is our son down there." And then say that in no other place in this whole wide world could it happen than in the United States of America, a Republic dedicated to the proposition that all men are created equal. It is a blessed place, attended by these enduring friendships. What more can anyone ask?

I salute the staff of the Senate. I do not know what we would do without you. I especially salute my friend, Mark Trice, whose birthday we recently observed. He came here as a page, and has spent 44 years here looking after us. I salute my distinguished friend, his assistant, Bill Brownrigg.

I salute them one and all. Without them, without the staff, without their sense of mission, without their spirit of dedication, this institution could not function with the expedition and the dispatch with which it does function.

So, as we prepare to adjourn sine die, I salute you all. I shall see some of you in your respective States. When I come, I shall be kind. I shall call you up on the telephone when I arrive. I shall say, "I am in town."

You will say, "Yes; I saw it in the newspapers."

I shall say, "I am delighted to see you, and I hope we can have a chance to visit."

You will say, "I wish you well in everything except the mission that brings you here." [Laughter.]

That is another part of the greatness of this country.

So, au revoir. We shall see you on the home diamond somewhere; and when it is all over, on the morning of November 9, all the healing waters will somehow close over our dissidence, and we shall go forward as a solid phalanx once more. (Applause, Senators rising.)

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H.R. 8712. An act to amend the act of August 9, 1955, to authorize longer term leases of Indian lands on the Agua Caliente (Palm Springs), Navajo, Torres-Martinez, and Dania Indian Reservations; to the Committee on Interior and Insular Affairs.

H.R. 12777. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, as amended, to provide increased benefits in case of disabling injuries, and for other purposes; to the Committee on Labor and Public Welfare.

HOUSE CONCURRENT RESOLUTION REFERRED

The concurrent resolution (H. Con. Res. 693) authorizing the printing of additional copies of House Document No. 198 of the 84th Congress, entitled "The Commission on Intergovernmental Relations," was referred to the Committee on Rules and Administration, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed four thousand six hundred additional copies of House Document Numbered 198 of the Eighty-fourth Congress, first session, entitled "The Commission on Intergovernmental Relations", of which four thousand shall be for the use of the House Committee on Government Operations, three hundred copies for the House document room, and three hundred copies for the Senate document room.

ADJOURNMENT SINE DIE

Mr. JOHNSON of Texas. Mr. President, I move that the Senate adjourn.

The motion was agreed to; and (at 11 o'clock and 52 minutes p.m.), in accordance with the concurrent resolution (H. Con. Res. 745) previously agreed to, the Senate adjourned sine die.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED AFTER SINE DIE ADJOURNMENT

Pursuant to House Concurrent Resolution 746, agreed to September 2, 1960, the President pro tempore, on September 6, 1960, signed the following enrolled bills and joint resolutions, which had previously been signed by the Speaker of the House of Representatives:

S. 882. An act for the relief of the heirs of J. B. White;

S. 1092. An act to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes;

S. 1545. An act to amend the Federal Aviation Act of 1958 so as to authorize elimination of a hearing in certain cases under section 408;

S. 1663. An act directing the Secretary of the Interior to convey certain property in the State of North Dakota to the city of Bismarck, N. Dak.;

S. 1670. An act to provide for the granting of mineral rights in certain homestead lands in the State of Alaska;

S. 1740. An act to amend section 202(b) of the Communications Act of 1934 in order to expand the Federal Communications Commission's regulatory authority under such section;

S. 1764. An act to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard;

S. 1898. An act to promote the public interest by amending the Communications Act of 1934, to provide a pregrant procedure in case of certain applications; to impose limitations on payoffs between applicants; to require disclosure of payments made for broadcasting of certain matter; to grant authority to impose forfeitures in the broadcast service; and to prohibit deceptive practices in contests of intellectual knowledge, skill, or chance; and for other purposes;

S. 1964. An act to amend the act requiring certain common carriers by railroads to make reports to the Interstate Commerce Commission with respect to certain accidents in order to clarify the requirements of such act;

S. 2195. An act to authorize the Secretary of the Interior to construct, operate, and maintain the western division of the Dalles Federal reclamation project, Oregon, and for other purposes;

S. 2353. An act for the relief of Col. John A. Ryan, Jr.;

S. 2757. An act to supplement the act of June 14, 1926, as amended, to permit any State to acquire certain public lands for recreation use;

S. 2761. An act to invalidate payments made for certain emergency conservation measures under the program authorized by the Third Supplemental Appropriation Act, 1957;

S. 2770. An act for the relief of Borinquen Home Corp.;

S. 2917. An act to establish a price support level for milk and butterfat;

S. 2959. An act to clarify the right of States to select certain public lands subject to any outstanding mineral lease or permit;

S. 3146. An act to authorize the Commodity Credit Corporation to donate dairy products and other agricultural commodities for use in home economics courses;

S. 3212. An act to direct the Secretary of the Interior and the Administrator of General Services to convey certain public and acquired lands in the State of Nevada to the county of Mineral, Nev.;

S. 3267. An act to amend the act of October 17, 1940, relating to the disposition of certain public lands in Alaska;

S. 3399. An act to authorize the exchange of certain property within Shenandoah National Park, in the State of Virginia, and for other purposes;

S. 3439. An act authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet;

S. 3533. An act to protect farm and ranch operators making certain land use changes under the Great Plains conservation program against loss of acreage allotments;

S. 3619. An act to make permanent law the provisions of section 408 of the National Housing Act regulating savings and loan holding companies;

S. 3623. An act to designate and establish that portion of the Hawaii National Park on the island of Maui, in the State of Hawaii, as the Haleakala National Park, and for other purposes;

S. 3665. An act to authorize the Secretary of Agriculture to grant an easement over certain lands to the trustees of the Cincinnati Southern Railway, their successors and assigns;

S. 3681. An act authorizing the Rhode Island Turnpike and Bridge Authority to combine for financing purposes the bridge across the West Passage of Narragansett Bay with the Newport Bridge and any other project acquired or constructed by said authority;

S. 3688. An act to amend the act of December 20, 1944, with respect to certain powers of the Board of Commissioners of the District of Columbia;

S. 3759. An act authorizing the Secretary of Agriculture to convey certain lands to Auburn University, Auburn, Ala.;

S. 3771. An act to amend certain provisions of the Trust Indenture Act of 1939, as amended;

S. 3773. An act to amend certain provisions of the Investment Advisers Act of 1940, as amended;

H.R. 383. An act to authorize the annexation of certain real property of the United States by the city of Wyandotte, Mich.;

H.R. 816. An act to convey certain lands in Oklahoma to the Cheyenne and Arapaho Indians, and for other purposes;

H.R. 1526. An act for the relief of F. P. Tower, Lillie B. Lewis, the estate of Manuel Branco, John Santos Carinhas, Joaquin Gomez Carinhas, and Manuel Jesus Carinhas;

H.R. 2565. An act to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations;

H.R. 3536. An act for the relief of Guadalupe Villarreal, Jr.;

H.R. 7810. An act to credit periods of internment during World War II to certain Federal employees of Japanese ancestry for purposes of the Civil Service Retirement Act and the Annual and Sick Leave Act of 1951;

H.R. 7990. An act to provide for the conveyance of certain lands of the United States to the Citizen Band of Potawatomi Indians of Oklahoma;

H.R. 8156. An act for the relief of Jack Kent Cooke;

H.R. 8166. An act for the relief of the Crum-McKinnon Building Co., Billings, Mont.;

H.R. 8424. An act to amend section 505 of the Classification Act of 1949 with respect to positions in the Library of Congress;

H.R. 8665. An act to amend the act entitled "An act to establish a memorial to Theodore Roosevelt in the National Capital" to provide for the construction of such memorial by the Secretary of the Interior;

H.R. 9715. An act for the relief of Otis Drinkard;

H.R. 10087. An act to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit;

H.R. 10311. An act providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724), shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas;

H.R. 10341. An act to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health;

H.R. 10548. An act to amend the Helium Act of March 3, 1925, as amended, for the defense, security, and the general welfare of the United States;

H.R. 10586. An act to enable the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corporation of the Church of Jesus Christ of Latterday Saints;

H.R. 10841. An act to amend the Tariff Act of 1930 to place bamboo pipestems on the free list;

H.R. 10960. An act to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, and for other purposes;

H.R. 11322. An act for the relief of Col. Joseph A. Nichols;

H.R. 11380. An act for the relief of Mr. Joe J. Farmer;

H.R. 12043. An act to amend sections 22, 23, and 24, title 13, United States Code, and for other purposes;

H.R. 12383. An act to amend the Federal Employees' Compensation Act to make benefits more realistic in terms of present wage rates, and for other purposes;

H.R. 12458. An act to increase the amount authorized to be appropriated for the work of the President's Committee on Employment for the Physically Handicapped;

H.R. 12536. An act relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price;

H.R. 12574. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician; and for other purposes;

H.R. 12580. An Act to improve coverage under the Federal old-age, survivors, and disability insurance system and to remove hardships and inequities, improve the financing of the trust funds, and provide disability benefits to additional individuals under such system; to provide grants to States for medical care for aged individuals of low income; to amend the public assistance and maternal and child welfare provisions of the Social Security Act; to improve the employment compensation provisions of such act; and for other purposes;

H.R. 12659. An act to suspend for a temporary period the import duty on heptanoic acid, and for other purposes;

H.R. 12699. An act to cancel a deed of trust to the United States from the predecessor in the name of Gallaudet College and any evidence of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other purposes;

H.R. 12759. An act to amend title V of the Agricultural Act of 1949, as amended, and for other purposes;

H.R. 13021. An act to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes;

H.R. 13053. An act to increase the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia, the U.S. Park Police, the White House Police, and for other purposes;

H.R. 13066. An act to amend section 4(a) of the Securities Exchange Act of 1934, as amended;

H.R. 13161. An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes;

S.J. Res. 9. Joint resolution to provide for the removal of a reservation of timber rights from a patent issued to Ivan H. McCormack;

S.J. Res. 176. Joint resolution authorizing the preparation and printing of a revised edition of the Constitution of the United States of America—Analysis and Interpretation, published in 1953 as Senate Document No. 170 of the 82d Congress;

S.J. Res. 209. Joint resolution providing for the establishment of an annual National Forest Products Week;

H.J. Res. 311. Joint resolution authorizing the erection of a statue of Taras Shevchenko on public grounds in the District of Columbia;

H.J. Res. 402. Joint resolution granting the consent and approval of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, District of Columbia, metropolitan area, and for other purposes;

H.J. Res. 704. Joint resolution to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag," and for other purposes;

H.J. Res. 723. Joint resolution extending an invitation to the Féderation Aéronautique Internationale to hold the 1962 world sport parachuting championships at Orange, Mass.; and

H.J. Res. 784. Joint resolution amending the act of July 14, 1960, to extend the time

within which the United States Constitution 175th Anniversary Commission shall report to Congress and including certain amendments relating to housing.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED AFTER SINE DIE ADJOURNMENT

The Secretary of the Senate, on September 6, 1960, presented to the President of the United States the following enrolled bills and joint resolutions:

S. 882. An act for the relief of the heirs of J. B. White;

S. 1092. An act to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes;

S. 1545. An act to amend the Federal Aviation Act of 1958 so as to authorize elimination of a hearing in certain cases under section 408;

S. 1663. An act directing the Secretary of the Interior to convey certain property in the State of North Dakota to the city of Bismarck, N. Dak.;

S. 1670. An act to provide for the granting of mineral rights in certain homestead lands in the State of Alaska;

S. 1740. An act to amend section 202(b) of the Communications Act of 1934 in order to to expand the Federal Communications Commission's regulatory authority under such section;

S. 1764. An act to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard;

S. 1898. An act to promote the public interest by amending the Communications Act of 1934, to provide a pregrant procedure in case of certain applications; to impose limitations on payoffs between applicants; to require disclosure of payments made for broadcasting of certain matter; to grant authority to impose forfeitures in the broadcast service; and to prohibit deceptive practices in contests of intellectual knowledge, skill, or chance; and for other purposes;

S. 1964. An act to amend the act requiring certain common carriers by railroad to make reports to the Interstate Commerce Commission with respect to certain accidents in order to clarify the requirements of such act;

S. 2195. An act to authorize the Secretary of the Interior to construct, operate, and maintain the western division of the Dalles Federal reclamation project, Oregon, and for other purposes;

S. 2353. An act for the relief of Col. John A. Ryan, Jr.;

S. 2757. An act to supplement the act of June 14, 1926, as amended, to permit any State to acquire certain public lands for recreation use;

S. 2761. An act to invalidate payments made for certain emergency conservation measures under the program authorized by the Third Supplemental Appropriation Act, 1957;

S. 2770. An act for the relief of Borinquen Home Corp.;

S. 2917. An act to establish a price-support level for milk and butterfat;

S. 2959. An act to clarify the right of States to select certain public lands subject to any outstanding mineral lease or permit;

S. 3146. An act to authorize the Commodity Credit Corporation to donate dairy products and other agricultural commodities for use in home economics courses;

S. 3212. An act to direct the Secretary of the Interior and the Administrator of General Services to convey certain public and acquired lands in the State of Nevada to the county of Mineral, Nev.;

S. 3267. An act to amend the act of October 17, 1940, relating to the disposition of certain public lands in Alaska;

S. 3399. An act to authorize the exchange of certain property within Shenandoah National Park, in the State of Virginia, and for other purposes;

S. 3439. An act authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet;

S. 3533. An act to protect farm and ranch operators making certain land use changes under the Great Plains conservation program against loss of acreage allotments;

S. 3619. An act to make permanent law the provisions of section 408 of the National Housing Act regulating savings and loan holding companies;

S. 3623. An act to designate and establish that portion of the Hawaii National Park on the island of Maui, in the State of Hawaii, as the Haleakala National Park, and for other purposes;

S. 3665. An act to authorize the Secretary of Agriculture to grant an easement over certain lands to the trustees of the Cincinnati Southern Railway, their successors and assigns;

S. 3681. An act authorizing the Rhode Island Turnpike and Bridge Authority to combine for financing purposes the bridge across the West Passage of Narragansett Bay with the Newport Bridge and any other project acquired or constructed by said authority;

S. 3688. An act to amend the act of December 20, 1944, with respect to certain powers of the Board of Commissioners of the District of Columbia;

S. 3759. An act authorizing the Secretary of Agriculture to convey certain lands to Auburn University, Auburn, Ala.

S. 3771. An act to amend certain provisions of the Trust Indenture Act of 1939, as amended;

S. 3773. An act to amend certain provisions of the Investment Advisers Act of 1940, as amended;

S.J. Res. 9. Joint resolution to provide for the removal of a reservation of timber rights from a patent issued to Ivan H. McCormack;

S.J. Res. 176. Joint resolution authorizing the preparation and printing of a revised edition of the Constitution of the United States of America—Analysis and Interpretation, published in 1953 as Senate Document No. 170 of the 82d Congress; and

S.J. Res. 209. Joint resolution providing for the establishment of an annual National Forest Products Week.

REPORT OF A COMMITTEE SUBMITTED AFTER SINE DIE ADJOURNMENT ENTITLED "CASE STUDY IN SUBCONTRACTING BY WEAPON-SYSTEM CONTRACTOR" (S. REPT. NO. 1947)

Under authority of the order of the Senate of August 30, 1960, on September 16, 1960, Mr. WILLIAMS of New Jersey, from the Select Committee on Small Business, submitted a report entitled "Case Study in Subcontracting by Weapon-System Contractor," which was printed.

APPOINTMENTS BY THE VICE PRESIDENT AFTER SINE DIE ADJOURNMENT

JOINT COMMITTEE ON INAUGURAL CEREMONIES FOR 1961

On September 14, 1960, the Vice President appointed Senator CARL HAYDEN, of Arizona, to the Joint Committee on Inaugural Ceremonies for 1961, vice the late Senator THOMAS C. HENNINGS, JR., of Missouri.

APPOINTMENTS TO NATO PARLIAMENTARY CONFERENCE

On November 15, 1960, under the authority of Senate Resolution 392, the Vice President, subsequent to the sine die adjournment of the Senate, appointed as members of the U.S. group on the part of the Senate to the NATO Parliamentary Conference, to be held in Paris, France, during November 1960, the Senator from Texas [Mr. JOHNSON], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Delaware [Mr. FREAR], the Senator from Oregon [Mrs. NEUBERGER], the Senator from California [Mr. KUCHEL], the Senator from Nebraska [Mr. HRUSKA], the Senator from Kentucky [Mr. COOPER], and the Senator from New York [Mr. JAVITS].

APPROVAL OF SENATE BILLS AND JOINT RESOLUTIONS AFTER SINE DIE ADJOURNMENT

The President of the United States, subsequent to sine die adjournment of the Senate, notified the Secretary of the Senate that on the following dates he had approved and signed the following bills and joint resolutions:

On September 2, 1960:

S. 68. An act to provide for continued delivery of water under the Federal reclamation laws to lands held by husband and wife upon the death of either;

S. 107. An act to amend title XI of the Merchant Marine Act, 1936, relating to Federal ship-mortgage insurance in order to include floating drydocks under the definition of the term "vessel" in such title;

S. 1781. An act to facilitate cooperation between the Federal Government, colleges and universities, the States, and private organizations for cooperative unit programs of research and education relating to fish and wildlife, and for other purposes;

S. 1857. An act to promote the foreign trade of the United States in grapes and plums, to protect the reputation of American-grown grapes and plums in foreign markets, to prevent deception or misrepresentation as to the quality of such products moving in foreign commerce, to provide for the commercial inspection of such products entering such commerce, and for other purposes;

S. 2369. An act for the relief of Sachiko Kato;

S. 2388. An act relating to the separation and retirement of John R. Barker;

S. 2576. An act to authorize the addition of certain donated lands to the Everglades National Park;

S. 2669. An act to extend the period of exemption from inspection under the provisions of section 4426 of the Revised Statutes granted certain small vessels carrying freight to and from places on the inland waters of southeastern Alaska;

S. 2711. An act to quiet title to certain lands within the Nez Perce Indian Reservation, Idaho, and for other purposes;

S. 2772. An act to authorize the Secretary of Agriculture to convey land in the town of Cascade, El Paso County, Colo.;

S. 2806. An act to revise the boundaries of the Coronado National Memorial and to authorize the repair and maintenance of an access road thereto in the State of Arizona, and for other purposes;

S. 2932. An act to provide for credit for service of sentence for time spent in custody

for want of bail prior to the imposition of sentence by the sentencing court where the statute requires the imposition of a minimum mandatory sentence;

S. 3030. An act for the relief of Michiko (Hiral) Christopher;

S. 3053. An act for the relief of the State of Connecticut;

S. 3070. An act to provide for the removal of the restriction on use with respect to certain lands in Morton County, N. Dak., conveyed to the State of North Dakota on July 20, 1955;

S. 3160. An act to provide for the striking of medals in commemoration of the 100th anniversary of the founding of the State of Idaho as a Territory;

S. 3264. An act to abolish the Arlington Memorial Amphitheater Commission;

S. 3487. An act to amend the "Anti-Kickback Statute" to extend it to all negotiated contracts;

S. 3532. An act to provide for the striking of medal in commemoration of Century 21 Exposition to be held in Seattle, Wash.; and

S.J. Res. 68. Joint resolution providing for the establishment of the New Jersey Tercentenary Celebration Commission to formulate and implement plans to commemorate the 300th anniversary of the State of New Jersey, and for other purposes.

On September 6, 1960:

S. 285. An act for the relief of the estate of John A. Skenandore;

S. 1321. An act to authorize the Attorney General to consent, on behalf of the Library of Congress Trust Fund Board, to a modification of the terms of a trust instrument executed by James B. Wilbur;

S. 1806. An act to revise title 18, chapter 39, of the United States Code, entitled "Explosives and Combustibles";

S. 1870. An act to provide for examination, licensing, and for regulation of practical nurses, and for practical nursing education in the District of Columbia, and for other purposes;

S. 2306. An act to exempt from taxation certain property of the National Woman's Party, Inc., in the District of Columbia;

S. 3415. An act to exempt from taxation certain property of the American Association of University Women, Educational Foundation, Inc., in the District of Columbia;

S. 3727. An act to authorize the bonding of persons engaging in the home improvement business, and for other purposes; and

S. 3834. An act to increase the maximum amount which may be borrowed by the District of Columbia for use in the construction and improvement of its sanitary and combined sewer systems, and for other purposes.

On September 7, 1960:

S.J. Res. 170. Joint resolution to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of U.S. delegates to such convention, and for other purposes.

On September 8, 1960:

S. 1066. An act to revise the boundaries and change the name of Fort Donelson National Military Park, and for other purposes;

S. 1214. An act to amend the act of March 11, 1948 (62 Stat. 78), relating to the establishment of the De Soto National Memorial, in the State of Florida;

S. 2131. An act to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia approved May 25, 1954, as amended;

S. 2575. An act to provide a health benefits program for certain retired employees of the Government;

S. 2633. An act to amend the Foreign Service Act of 1946, as amended, and for other purposes;

S. 3416. An act to provide for the restoration to the United States of amounts expended in the District of Columbia in carrying out the Temporary Unemployment Compensation Act of 1958;

S. 3648. An act to authorize the Commissioners of the District of Columbia on behalf of the United States to transfer from the United States to the District of Columbia Redevelopment Land Agency title to certain real property in said District;

S. 3835. An act to authorize the District of Columbia Civil War Centennial Commission to plan and carry out in the District of Columbia civic programs in commemoration of the 100th anniversary of the Civil War; to authorize the Commissioners of the District of Columbia, the Secretary of the Interior, and the Secretary of Defense to make certain property of the District and of the United States available for the use of such Commission; to authorize the said Commissioners to make certain regulations and permit certain uses to be made of public space, and for other purposes; and

S. 3867. An act to exempt from taxation certain property of the National Guard Association of the United States in the District of Columbia.

On September 13, 1960:

S. 1545. An act to amend the Federal Aviation Act of 1958 so as to authorize elimination of a hearing in certain cases under section 408;

S. 1663. An act directing the Secretary of the Interior to convey certain property in the State of North Dakota to the city of Bismarck, N. Dak.;

S. 1740. An act to amend section 202(b) of the Communications Act of 1934 in order to expand the Federal Communications Commission's regulatory authority under such section;

S. 1764. An act to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard;

S. 1898. An act to promote the public interest by amending the Communications Act of 1934, to provide a pregrant procedure in cases of certain applications; to impose limitations on payoffs between applicants; to require disclosure of payments made for the broadcasting of certain matter; to grant authority to impose forfeitures in the broadcast service; and to prohibit deceptive practices in contests of intellectual knowledge, skill, or chance; and for other purposes;

S. 1964. An act to amend the act requiring certain common carriers by railroads to make reports to the Interstate Commerce Commission with respect to certain accidents in order to clarify the requirements of such act;

S. 2195. An act to authorize the Secretary of the Interior to construct, operate, and maintain the western division of the Dalles Federal reclamation project, Oregon, and for other purposes;

S. 2757. An act to supplement the act of June 14, 1926, as amended, to permit any State to acquire certain public lands for recreational use;

S. 3146. An act to authorize the Commodity Credit Corporation to donate dairy products and other agricultural commodities for use in home economics courses;

S. 3212. An act to direct the Secretary of the Interior and the Administrator of General Services to convey certain public and acquired lands in the State of Nevada to the county of Mineral, Nev.;

S. 3399. An act to authorize the exchange of certain property within Shenandoah National Park, in the State of Virginia, and for other purposes;

S. 3439. An act authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet;

S. 3619. An act to make permanent law the provisions of section 408 of the National Housing Act regulating savings and loan holding companies;

S. 3623. An act to designate and establish that portion of the Hawaii National Park on the island of Maui, in the State of Hawaii, as the Haleakala National Park, and for other purposes;

S. 3665. An act to authorize the Secretary of Agriculture to grant an easement over certain lands to the trustees of the Cincinnati Southern Railway, their successors and assigns;

S. 3681. An act authorizing the Rhode Island Turnpike and Bridge Authority to combine for financing purposes the bridge across the West Passage of Narragansett Bay with the Newport Bridge and any other project acquired or constructed by said authority;

S. 3688. An act to amend the act of December 20, 1944, with respect to certain powers of the Board of Commissioners of the District of Columbia;

S. 3759. An act authorizing the Secretary of Agriculture to convey certain lands to Auburn University, Auburn, Ala.;

S. 3771. An act to amend certain provisions of the Trust Indenture Act of 1939, as amended;

S. 3773. An act to amend certain provisions of the Investment Advisers Act of 1940, as amended;

S.J. Res. 176. Joint resolution authorizing the preparation and printing of a revised edition of the Constitution of the United States of America—Analysis and Interpretation, published in 1953 as Senate Document No. 170 of the 82d Congress; and

S.J. Res. 209. Joint resolution providing for the establishment of an annual National Forest Products Week.

On September 14, 1960:

S. 1092. An act to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes;

S. 1670. An act to provide for the granting of mineral rights in certain homestead lands in the State of Alaska;

S. 2761. An act to validate payments made for certain emergency conservation measures under the program authorized by the Third Supplemental Appropriation Act, 1957;

S. 2770. An act for the relief of Borinquen Home Corp.;

S. 2959. An act to clarify the right of States to select certain public lands subject to any outstanding mineral lease or permit;

S. 3267. An act to amend the act of October 17, 1940, relating to the disposition of certain public lands in Alaska;

S. 3533. An act to protect farm and ranch operators making certain land use changes under the Great Plains conservation program against loss of acreage allotments;

S.J. Res. 9. Joint resolution to provide for the removal of a reservation of timber rights from a patent issued to Ivan H. McCormack.

On September 15, 1960:

S. 882. An act for the relief of the heirs of J. B. White; and

S. 2353. An act for the relief of Col. John A. Ryan, Jr.

PRICE SUPPORT LEVEL FOR MILK AND BUTTERFAT

The President also notified the Secretary of the Senate that he had, on September 16, 1960, approved and signed the act (S. 2917) to establish a price support level for milk and butterfat, and transmitted his reasons therefor, as follows:

STATEMENT BY THE PRESIDENT

I have today signed S. 2917, setting minimum price supports until March 31, 1961, for butterfat and milk for manufacturing purposes. The price of fluid milk, not subject to price support legislation, is not dealt with in the bill.

In 1954 the Congress turned away from rigid price supports and authorized the administrative determination of price support levels, within a stated range, so that agricultural production could be brought into line with demand. S. 2917 elevates minimum support prices for butterfat and manufacturing milk above present support levels and, if continued in effect beyond its termination date, could pose the threat of a return to the disastrous dairy surplus situation of only a few years ago.

The bill would have little practical effect, however, for present prices in the marketplace for butterfat and manufacturing milk are, depending on the item, above, at, or only slightly below the minimum prices that S. 2917 would establish. Moreover, the bill by its own terms will expire on March 31 of the new year.

The bill, therefore, can do little, if anything, to benefit the dairy farmer and, even more important, will do him little harm. Nor should it add materially to the cost of the Federal Government's dairy product price support programs or have a significant effect, if any at all, on the prices of dairy products to consumers.

For these reasons, and because I am mindful that the Congress—which passed the bill overwhelmingly—has by its adjournment no opportunity to attempt to override a veto, I concluded that the bill could and should be signed. These reasons seem to me the more compelling because this is an election year. Had the bill been presented to me under different circumstances, however, I doubtless would have withheld my approval because the bill on its face violates long established and well-known policies of this administration. But because its practical effects are negligible—and hence the violations more theoretical than real—I believe it my duty this year to avoid so far as possible any action on my part that would only serve to engender partisan political charges and countercharges in the dairy regions.

Early next year the new administration will be confronted with this problem, but it will then be very real, for any extension of S. 2917 would pose the serious threat I have described. At that time, however, the matter can be discussed and resolved in an atmosphere free of election year politics. In that regard, I wish it to be perfectly clear that for my part I shall continue to support the policy that agricultural production must eventually be controlled by economic law rather than by political maneuvering. Until this has happened, there can be no settlement of the so-called farm problem and no sound prosperity for the family-size farm.

CONFIRMATIONS

Executive nominations confirmed by the Senate September 1 (legislative day of August 31), 1960:

COAST AND GEODETIC SURVEY

Subject to qualifications provided by law, the following for permanent appointments to the grades indicated in the Coast and Geodetic Survey:

To be captains

Arthur L. Wardwell
Chester J. Beyma
Emmett H. Sheridan
Joseph E. Waugh
Raymond H. Tryon, Jr.

To be commanders

Robert C. Darling
Allen L. Powell
Miller J. Tonkel
Norman E. Taylor
William E. Randall

To be ensign

Harry W. Floyd.

U.S. COAST GUARD

The following-named persons to the grades indicated in the U.S. Coast Guard:

To be chief warrant officer, W–3

John A. Packard.
Don R. Moss.
Leslie A. Mears.

The following-named persons to the grades indicated in the U.S. Coast Guard:

To be chief warrant officer, W–2

Franklin E. Thrall
Daniel F. Kennedy
William H. Dotson
Albert D. Grantham
Robert J. Ross
George T. Kulick
Galen B. Nielsen
James J. Truesdale
Thomas L. Wedgewood
Edward J. Swenson
Roland D. Moriarty
Russell E. Sawyer
John J. Janda, Jr.
Richard N. Westcott
George P. Asche
Richard J. Briggs
James W. Brawley, Jr.
Claud W. Ashcraft
John V. A. Thompson
Vern R. Potter
Frank E. Braman
Joseph B. Cowart, Jr.
John F. Dunn
William E. Ellingsworth
George L. Gordon
Donn W. Repper
Earl E. Martin
Albert J. Lyne
William F. Queen
James G. Lang
Robert R. Noble
Aaron W. Rogers
Warren J. Frederick
James J. Leftwich
Fred P. England
Robert S. Cutler
Weymound Davis
Ronald G. Eastman
Dale H. Huff
Robert O. Slade
Gordon D. Crandall
Herbert D. McQuarrie, Jr.
Jack P. Morgan
Noel G. Ballinger
Maurice V. Goodroe
Mark W. Byrd
John F. Olsen
Norman W. Smith
Bruno A. Forsterer
Robert H. Elkins
Milton J. Thompson
Donald P. Nachtwey
Frederick H. Elings
Theottis Wood
Carlton D. Leonard
Duane P. Gatto
Robert G. Keim
Luther "L" Barr
Frederick M. Beall
John B. Bosk
Walter H. Riddle, Jr.
Alfred H. F. Marchant
Harry P. Miller, Jr.
Robert E. Hynds
Edward V. Dempsey, Jr.
Edwin L. Brusstar, Jr.
Charles H. Denmark
Arnold I. Cousins
Charles B. Morrison
Dorwin W. Newman
James A. Blake
James D. Lombard
Russell D. Edens
John J. Muldoon, Jr.
Benjamin S. Beach, Jr.
James J. Gaugan

U.S. CIRCUIT JUDGE

J. Joseph Smith, of Connecticut, to be U.S. circuit judge for the second circuit, vice Carroll C. Hincks, retired.

U.S. DISTRICT JUDGE

William H. Timbers, of Connecticut, to be U.S. district judge for the district of Connecticut, vice J. Joseph Smith, elevated.

U.S. ATTORNEYS

Cornelius W. Wickersham, Jr., of New York, to be U.S. attorney for the eastern district of New York for the term of 4 years, vice Leonard P. Moore, resigned.

George M. Yeager, of Alaska, to be U.S. attorney for the district of Alaska for the term of 4 years. (New position.)

IN THE ARMY

The nominations beginning John J. Pelosi, to be colonel, and ending Bernice Mary Hill, to be major, said nominations having been received by the Senate on August 25, 1960.

IN THE NAVY AND MARINE CORPS

The nominations beginning Francis J. Vincent, to be an ensign in the Navy, and ending Bruce P. Wood, to be first lieutenant in the Marine Corps, said nominations having been received by the Senate on August 23, 1960.

IN THE MARINE CORPS

The nominations beginning Douglas E. Wade, to be major, and ending James W. Wilson, to be major, said nominations having been received by the Senate on August 23, 1960.

IN THE AIR FORCE

The nominations beginning with George L. Abel, to be colonel, and ending with Alphonse B. Slivinski, to be colonel, said nominations having been received by the Senate on August 11, 1960.

HOUSE OF REPRESENTATIVES

THURSDAY, SEPTEMBER 1, 1960

(Legislative day of Wednesday, August 31, 1960)

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 12 o'clock noon.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make a point of order that a quorum is not present.

The SPEAKER. Evidently no quorum is present.

Mr. WILLIS. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 205]

Anderson, Mont.	Grant	Multer
Anfuso	Gray	Murray
Auchincloss	Green, Oreg.	O'Konski
Ayres	Griffiths	Patman
Barden	Hagen	Pilcher
Baring	Hays	Powell
Baumhart	Healey	Preston
Bennett, Mich.	Hébert	Rains
Bolling	Henderson	Rogers, Mass.
Bolton	Hess	Rostenkowski
Bowles	Hosmer	Scherer
Brooks, La.	Kelly	Shelley
Buckley	Keogh	Shipley
Celler	Kilburn	Sikes
Curtis, Mass.	Lafore	Siler
Davis, Tenn.	Landrum	Smith, Kans.
Diggs	Lane	Taylor, N.Y.
Dingell	Lankford	Teague, Tex.
Dowdy	Lesinski	Thompson, La.
Doyle	Loser	Thompson, N.J.
Durham	McDowell	Vanik
Evins	McSween	Van Pelt
Fallon	Macdonald	Vinson
Farbstein	Magnuson	Wainwright
Flynn	Miller, George P.	Withrow
Fogarty	Mitchell	Yates
Forrester	Morrison	Zelenko

The SPEAKER pro tempore (Mr. ALBERT). On this rollcall 344 Members have answered to their names; a quorum is present.

By unanimous consent, further proceedings under the call were dispensed with.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 10311. An act providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724), shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas; and

H.R. 13066. An act to amend section 4(a) of the Securities Exchange Act of 1934, as amended.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 4384. An act to amend paragraph 1774 of the Tariff Act of 1930 with respect to the importation of certain articles for religious purposes.

The message also announced that the Senate agrees to the amendments of the House to bills of the Senate of the following titles:

S. 1092. An act to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes;

S. 1670. An act to provide for the granting of mineral rights in certain homestead lands in the State of Alaska;

S. 2195. An act to authorize the Secretary of the Interior to construct, operate, and maintain the western division of The Dalles Federal reclamation project, Oregon, and for other purposes;

S. 2757. An act to supplement the act of June 14, 1926, as amended, to permit any State to acquire certain public lands for recreational use;

S. 3212. An act to direct the Secretary of the Interior and the Administrator of General Services to convey certain public and acquired lands in the State of Nevada to the county of Mineral, Nev.;

S. 3267. An act to amend the act of October 17, 1940, relating to the disposition of certain public lands in Alaska; and

S. 3688. An act to amend the District of Columbia Redevelopment Act of 1945, as amended, and the act approved December 20, 1944, as amended, and for other purposes.

REV. BERNARD BRASKAMP, D.D., CHAPLAIN OF THE HOUSE OF REPRESENTATIVES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, the strength of the American form of government is that it has moral origin, starting with a strong belief, on the part of our people, in God and His law and His word, and emphasized by two great commandments, without excluding the others, love of God, and love of neighbor.

We have in the House of Representatives a great Chaplain, a man who has enriched the life of each and every one of us, particularly along spiritual lines.

I admire and respect our Chaplain very much. He is a gentleman of deep faith. We need that at all times, and particularly in the world today, without regard to what our religious convictions may be, the possession of deep faith and the public manifestation of deep faith, because that is the reservoir which could be the difference between victory and defeat.

We are fortunate in having in the House of Representatives this man of deep faith and of understanding mind. I have benefited from his prayers. He speaks to me when he offers the prayers he does so eloquently and effectively. I am sure when I say that about myself I speak the thoughts and the sentiments of every other of my colleagues.

Today is the 35th wedding anniversary of Chaplain and Mrs. Braskamp. The public manifestation on the part of the Members of the House, with all the Members spontaneously rising and applauding, that has just occurred out of our deep respect for him, constitutes the most powerful remarks that I or any other could make. I know I speak the thoughts and sentiments of all of my colleagues when I extend to our beloved Chaplain and Mrs. Braskamp our hearty congratulations and the wish that God may bestow upon both of them for countless years to come an abundance of His choicest blessings.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the distinguished minority whip.

Mr. ARENDS. Along with my colleague from Massachusetts, the majority leader, I offer my congratulations to Chaplain and Mrs. Braskamp on their 35th anniversary and wish them many, many happy anniversaries to come.

It is not possible for all of us to be present on the floor each day at 12 o'clock to hear the opening prayer, but I try to make it my business to be here, the purpose being to listen to Dr. Braskamp's prayers. He has evolved a pattern that I like, namely, citing some real pointed quotation from the Bible, some paragraph from Holy Script that carries a deep message. It recalls to us some of the words we learned in years past. Such quotation is then followed by an eloquent prayer. What a fitting way to start the day, in this House with words of inspiration and purpose. I wish it might be the privilege of every Member of the House to each day listen to these prayers. They carry with them the eternal hopes of us all, and bring to us a feeling of contentment and peace as we enter the tasks of the day. Such inspiration is not only needed by us all, but deeply appreciated I am sure by each and every Member. We are grateful to Dr. Braskamp for his sincere concern for our spiritual well being.

Again I extend to Dr. Braskamp and his wife my appreciation of their friendship and thank him for his sincere and untiring efforts for this great body.

Mr. HOEVEN. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the distinguished gentleman from Iowa.

Mr. HOEVEN. Mr. Speaker, I join with the distinguished majority leader and the Republican whip in extending heartiest congratulations to Dr. Braskamp and his wife on their 35th wedding anniversary.

I think perhaps I know Dr. Braskamp better than any one in this Chamber. Dr. Braskamp was born in my hometown of Alton, Iowa. I knew his parents who were pioneers in our area. I also claim a bit of relationship, because Dr. Braskamp's eldest brother is marride to one of my father's sisters. So we have had a very happy association together, especially since we first met here in the Halls of Congress some years ago.

Dr. Braskamp is truly a Christian gentleman, a man who is revered and loved by all the Members of this House. His daily prayers are inspiring and his compassion for others has become a part of our daily association in this Chamber.

Heartiest congratulations to Dr. and Mrs. Braskamp. May they live long and happy and may God bless them in the days that lie ahead.

Mr. MOELLER. Mr. Speaker, I rise to join the distinguished gentleman from Massachusetts [Mr. McCORMACK] to congratulate Dr. and Mrs. Braskamp on the occasion of their 35th wedding anniversary. It is my earnest hope and prayer, that the bountiful blessings attending their 35 years of wedded life be increased even more abundantly in the future and that a gracious God will sustain them and keep them in the bond of wedlock for many years to come. In addition, I, too, want to express my deep appreciation to the devout Chaplain for his spiritual ministry in this Chamber and call the attention of my colleagues to the importance of this daily ritual. When our Founding Fathers were wrestling with serious problems at the time of the drafting of our Constitution, when nothing but chaos seemed to be the lot of earnest men, it was shaggy-haired Ben Franklin who asked for the floor and reminded his colleagues of the need of divine guidance. A prayer was offered and each succeeding session of that Continental Congress up to this very day was opened with prayer, beseeching Almighty God for guidance in the midst of serious problems; forgiveness in the knowledge of guilt, and hope and solace in the dark hours of world affairs. Let us never forget the importance of this intercession. Let us ever remember: "Except the Lord build the house, they labor in vain that build it." Psalms 127:1. This truth is especially important for the trying times in world affairs today. And we reverence our esteemed Chaplain for bringing truths such as these to our attention in his daily devotions.

Mr. HALLECK. Mr. Speaker, certainly I want to join with my colleagues in wishing our good Chaplain and his wife many, many more years of happiness on the occasion of their 35th wedding anniversary.

For me it has been a real pleasure to know the Reverend Bernard Braskamp.

His daily messages have been an inspiration to all of us, thoughtful and timely words of faith that help immeasurably to sustain us in the burdens we all face.

Always friendly, always gracious and always helpful, Reverend Braskamp, by his very example among us as a man of God, has contributed mightily to the atmosphere of good will that has characterized our deliberations here in this Chamber.

May the blessings of the Lord he has served so faithfully be upon Reverend and Mrs. Braskamp throughout a long and wonderful life together.

Mr. CANNON. Mr. Speaker, I wish to be associated with the distinguished majority leader and the distinguished minority leader in their felicitations to our beloved Chaplain on this significant milestone in his and Mrs. Braskamp's life. I join with them in expressions of

appreciation of the daily prayer and fellowship and inspiration which Dr. Braskamp has bestowed so generously throughout the years of his service here.

You know, Mr. Speaker, it is a rather impressing thought that from the day the American Congress first met in 1789 down to this time we have never had a session of the Congress that was not opened by prayer.

We have placed upon our coinage from the beginning the national motto "In God We Trust." We have indicated by our daily reverence and supplication for divine guidance through our Chaplain our complete faith and devotion to the Creator of all good and perfect gifts.

I recall in this connection a notable decision made by Speaker Gillette. The question had never been decided up to that time, but one day Mr. Thomas L. Blanton, of Texas, when the House convened rose and made the point of order that a quorum was not present and, therefore, the Chaplain could not offer prayer until a quorum could be secured. Speaker Gillette, passing upon the question for the first time, and for the last time, held that the prayer of the Chaplain was not a part of the business of the House and, therefore, did not require a quorum.

From time immemorial the Speaker has always presented the Chaplain each morning with the announcement "The Chaplain will offer prayer." Speaker Clark alone always said, "The Chaplain will lead in prayer." Let us hope that Dr. Braskamp will continue to lead us in prayer for many years to come.

THE HONORABLE A. S. J. CARNAHAN

Mr. CANNON. Mr. Speaker, we always approach the end of a session, the end of a Congress, with more or less poignant regret. The Congress is made up of many men of many minds. It is a cross section of the Nation. Its membership includes men and women of every creed and temperament. They are descended from every nation and people upon the face of the globe. And necessarily—from the method of their selection—they are in the main personages of accomplishments and attainments, charged by great constituencies with vast responsibilities. The plaza of the Capitol is in effect an international highway and we legislate here not only for the United States but in many respects we legislate for the world.

It is a great privilege to have served in the American Congress, the greatest legislative body in history. Here we develop inevitably cherished associations and treasured friendships. And when at the end of the 2 years—with all differences forgotten and only the best remembered, we bid each other goodby with regret. That is especially true when there are those who will not be back.

Among those who will not return are many outstanding men including our colleague, Congressman CARNAHAN of Missouri, who has been a Member of the House for 14 years.

Congressman CARNAHAN has participated in some of the most important proceeding of the Congress in a particularly critical period in American history. He has been a member of one of the important committees of the House—if not the most important—the great Committee on Foreign Affairs.

These later years, the safety and preservation of the Nation threatened by foreign and international enemies has been a primary issue in our national life and Congressman CARNAHAN as one of the national authorities on the subject has risen steadily through the years until he is today the ranking majority member of the committee, second only to the chairman.

We cannot protect the Nation and preserve world peace by arms alone. Too often we have won on the battlefield and lost at the conference table. It was on such issues as these that Congressman CARNAHAN rendered his most invaluable service.

The 14 years he has served in the House and on the committee constitute an investment which his district and his State and the Nation can ill afford to lose. As is apparent on a cursory glance around the House there are States which have long followed a policy of electing able men to Congress and keeping them there. Each year they become with added seniority more valuable and more influential and in better position to render service to their constituencies and their States. As result of this policy these States hold most of the chairmanships and a great perponderance of the influential men of the House and the Congress.

Mr. Speaker, along with Congressman CARNAHAN's sterling worth and his leadership in his field here in Washington, he bears a name that has always had a strong bearing on our relations. Others may not have thought of it—or perhaps few who know him as A. S. J. CARNAHAN understand the significance of those initials. I doubt whether many of his closest associates know that his name is ALBERT SIDNEY JOHNSON CARNAHAN.

Men of my family—like those of many another southern family—marched with Lee and rode with Stonewall Jackson and died at Shiloh. Gen. Albert Sidney Johnson in the first day of the battle drove Grant's disorganized army back into the river bend under the protection of the gunboats but at the moment of victory was shot from his horse and carried down across the ravine where he died—and victory and the Confederacy died with him.

We appreciate having had the opportunity during these years to be with SID CARNAHAN. He has contributed materially to the probity and the dignity and to the wisdom of House proceedings. We regret to see him leave us although we feel satisfied that in the coming administration the Department of State will find it impossible to continue its work without his services in some other even more important capacity.

So, after our happy associations of these successful and eventful years, we join his district, his State and the Nation in wishing him well, and in bidding him Godspeed.

Mrs. SULLIVAN. Mr. Speaker, will the gentleman yield?

Mr. CANNON. I yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. Mr. Speaker, I want to join with my colleagues in this tribute to Congressman CARNAHAN. He will be missed in the next session; there is no doubt of it. And his charming and gracious wife, who has been such a tremendous help to the Congressman in serving his constituents and who has found the time and energy to run their home so delightfully, will also be missed from the congressional scene. I think we all recognize here that a pleasant and comfortable home environment is a great assist to a Member of Congress because of the erratic hours our jobs require and the continuous uncertainty of the schedule under which we have to perform our work. Mrs. Carnahan has been a great asset to the residents of the Eighth Congressional District of Missouri, in helping in so many ways in making her husband's service so effective over the years, and I certainly want to extend to both Congressman and Mrs. Carnahan my warm best wishes for a long life ahead and much happiness.

Mr. JONES of Missouri. Mr. Speaker, will the gentleman yield?

Mr. CANNON. I yield to the gentleman from Missouri.

Mr. JONES of Missouri. Mr. Speaker, I know that many of you hold the same affection for our colleague, Congressman CARNAHAN, that we of the Missouri delegation do. It so happens that in the geographical makeup of our districts, the district that I represent is entirely cut off from the rest of the State by the district represented by Mr. CARNAHAN. It so happens that one of the counties that make up the district that I represent was formerly in the district represented by Mr. CARNAHAN. For that reason I have probably had a better opportunity than any of you to come in contact with the constituents who have seen fit over the years to send Mr. CARNAHAN to Congress as their Representative. On many occasions in all of the counties in my district where he is well known and in the adjoining counties of the Eighth District I have heard expressed the high esteem in which this gentleman is held.

Throughout all my association with Mr. CARNAHAN, and even before I knew him personally, I knew of his reputation because he was serving in Congress before I came to this body. He has impressed not only me but the people of his district as being a man of sterling character, a man of strong conviction, in every sense of the word a dedicated servant of his people not only in the official representation here in the Halls of Congress but as a neighbor and as a friend.

During his many years in the teaching profession he has established a reputation for integrity, honesty, and a sincere desire to be helpful to humanity. I think possibly his dedication to the humanity of this world was responsible at least in a measure for his not being able to survive a very strong primary campaign.

We who live in rural districts appreciate, I think, more than those who come from metropolitan centers, the fact that

foreign aid is not always the most popular issue upon which to make a campaign.

I think we all know also that because of Mr. CARNAHAN'S long and dedicated service on the Committee on Foreign Affairs, where he was next to the chairman in point of service, he was recognized as an authority in this field and was called upon by many organizations to go about the country selling our mutual security program, to which he was dedicated, and on which he is probably one of the best informed persons. That is not too popular an issue in the rural sections, and the district that Mr. CARNAHAN represents is primarily a rural, agricultural section.

Mr. CARNAHAN was not defeated by just an ordinary person in this campaign. His opponent in the recent campaign was a young, intelligent individual whose ability had been recognized by his being selected as Speaker of the House of Representatives in the Missouri Legislature. I think all of us appreciate that in politics the contacts that one is able to make in offices of that character enable one to extend that influence and do things the ordinary opponent could not do. So I do not consider Mr. CARNAHAN'S defeat in the primary as any reflection upon his ability, but rather it was because he was dedicated to a cause that perhaps was not quite so popular in his district as it might be in other places. But since his opponent was a young, aggressive, intelligent man of great ability and wide influence, there was certainly no reflection upon our colleague for his inability to survive that campaign.

Mr. Speaker, as Mr. CARNAHAN leaves this body at the close of his term of office, I know he will continue to be of service to his district and to his people throughout the remainder of his term, just as he has returned here now to render service. I also know that in a public expression he has indicated to his probable successor, the Democratic nominee, his willingness to cooperate in his campaign by making available the facilities of his office. That is characteristic of Mr. CARNAHAN.

I know that all of us will regret to see him leave. We wish for him and Mrs. Carnahan, who has been a most helpful helpmate in his life as well as in his office, the greatest measure of happiness and success.

Mr. CANNON. Mr. Speaker, I yield to the gentleman from Minnesota [Mr. JUDD].

Mr. JUDD. Mr. Speaker, for many years it has been my privilege to sit across the Foreign Affairs Committee table several days a week from our distinguished friend and colleague, the gentleman from Missouri [Mr. CARNAHAN]. It is in committee work that you best learn the measure of a man. As Members bat things back and forth, each stating his convictions and the thinking behind them, you discover the real quality of a man, his intelligence, his ability, his sportsmanship, his attitudes.

In the 18 years I have served in the House of Representatives, I have met no finer gentleman and no more conscientious legislator than SID CARNAHAN; no man with a better mind, no man with more diligent dedication to duty. Again and again when we get into a hassle in our committee, he is the one who comes up with a suggestion—makes a motion or offers an amendment, which points the way to a resolution of the difficulty. He has been a most valuable Member of the Congress. I have seen his devotion to his State and his service to the people of his district. He has never been a self-advertiser. He has never sought recognition or credit for himself. He has done his duty quietly and conscientiously as the fine American patriot that he is. He is a man of clear vision, a man who knows that the United States cannot live by itself alone in the kind of world in which we live, a man who has seen that the greatest and most important service he could render to the people of his district, the State of Missouri, and to the whole Nation was to work for a world of justice, order, and peace that would allow the people of his district and ours to use our resources and devote our time and talents to solving our domestic problems, as we cannot do as long as the whole world is torn and threatened with subjugation by a force dedicated to the destruction of all free peoples. His constituents will recognize the superior quality of his service to them more clearly as time goes by.

Mr. Speaker, I salute the gentleman from Missouri, as a good friend, one whom we shall miss sorely. I cannot find words high enough to praise him. I would like to add one comment. Three years ago the gentleman from Missouri and I were appointed by the President to serve as two of our United States delegates at the 12th General Assembly of the United Nations. Mr. CARNAHAN was assigned by the chief of our mission there, Ambassador Henry Cabot Lodge, to the Fifth Committee which deals with the housekeeping of the United Nations; its budgets, the share that the United States should be assessed or should contribute, along with the amounts that others should contribute to the cost of carrying on the activities of all the various organs of the United Nations including its specialized agencies like World Health Organization, Food and Agriculture Organization, UNESCO, ILO, and so on. Mr. CARNAHAN'S contributions to the internal workings of the United Nations and its budgets, I think I can say without fear of contradiction, have been greater than those of any Member from either body of the Congress who has been sent to the United Nations as a delegate since its formation. All the members of our Embassy in New York will testify to that. With great patience and skill he was able to convince other countries that it is to their advantage not to have the UN too dependent on American contributions, and that they should agree to reducing our share of the overall budgets of these agencies to a smaller percentage—not just to save money for the United States but to build self-reliance and genuine cooperation by all countries in order to make the agencies more effective.

I am sorry indeed to have Mr. CARNAHAN take his leave from the House, and particularly from the Committee on Foreign Affairs. But I feel sure that this administration or the next administration of whichever party, will certainly have the good judgment to use this man in further service to his country in one or another of the many important posts which he is so well qualified to fill.

Mr. BROWN of Missouri. Mr. Speaker, will the gentleman yield?

Mr. CANNON. I yield.

Mr. BROWN of Missouri. I want to join in these tributes to our distinguished Member, the lovable Professor CARNAHAN, because anyone who knows him and who has watched him work can say without question that his 14 years of service have been good for his district, good for the State of Missouri, and good for the country. He is a very dedicated man. He came here with high ideals and every day he has been here he has worked for those ideals with a dedication that everyone admires.

One of the greatest tributes that can be said about any Member, in my opinion, can truly be paid to SID CARNAHAN. He never voted against the best interests of his people. Whatever comes or goes, no one can ever erase that record. And the world has ben enriched by SID CARNAHAN'S service in the Congress.

Mr. RANDALL. Mr. Speaker, will the gentleman yield?

Mr. CANNON. I yield.

Mr. RANDALL. I wish to associate myself with the remarks of the gentleman from Missouri, the dean of our delegation, and simply say that, as a newcomer last March, all orientation courses for first-termers had been adjourned and no one seemed to want to take the time to offer any advice and counsel until one day in the Chamber I sat down by SID CARNAHAN. We quickly became good friends, and in the ensuing days our colleague gave me counsel which was most valuable and most helpful. I never knew until today what the initials "A. S. J." stood for. He was just "SID" to all of us. He is a man of great ability, and a man of high integrity. The gentleman from Minnesota [Mr. JUDD] spoke something about the valuable service he has given to this country on the Committee on Foreign Affairs. I observe that his chairman, the gentleman from Pennsylvania, Dr. MORGAN, is present and will doubtless make comment on that valuable service.

In order to make this brief, I shall conclude and simply say "To you, SID, good luck and good fortune in all you do."

Mr. MORGAN. Mr. Speaker, will the gentleman yield?

Mr. CANNON. I yield.

Mr. MORGAN. Mr. Speaker, I rise at this time to extend my best wishes to my dear friend and colleague, A. S. J. CARNAHAN, who is retiring at the end of this session after having served the 8th District of Missouri ably and with great distinction since the 79th Congress.

SID CARNAHAN and I came to the Congress at the same time, and we both began our service together on the Committee on Foreign Affairs in 1946 where, except for the 80th Congress, SID CARNAHAN has served continuously and with

ever-increasing skill and ability as an expert in the field of foreign affairs.

I am indeed sorry to see SID CARNAHAN leave the Congress. We can ill spare so able a legislator. He has rendered great service to the Committee on Foreign Affairs, to the House of Representatives and to our country. He has distinguished himself in many capacities and has fulfilled difficult assignments with great credit to himself and to our country, including the chairmanship of the Foreign Affairs Subcommittee on International Organizations, his service as U.S. delegate to the United Nations General Assembly, and during his service as a congressional adviser to the Second International Conference on Peaceful Uses of Atomic Energy.

SID CARNAHAN possesses a unique and deep knowledge of foreign affairs problems gained not only by his service on the Foreign Affairs Committee but through the study missions abroad which he has undertaken for the committee. These have taken him to nearly all parts of the world, and the factual information and the keen observations he has been able to make as a result of these missions has been of invaluable help to me and his other colleagues on the Committee on Foreign Affairs.

I know that I speak for his host of friends in the Congress as well as throughout the country when I wish him well and express the hope that he will still be able to find time occasionally to give us the benefit of his sound thinking, his vast wisdom, and his deep knowledge of the problems of foreign affairs. It has been a great pleasure and honor to serve with SID CARNAHAN, and I shall always treasure with fond recollections the memory of the many tasks and the work which we have shared together on the Foreign Affairs Committee.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. CANNON. I yield.

Mr. FULTON. Mr. Speaker, I am one of those who admire SID CARNAHAN. Through many years of service with him upon the Foreign Affairs Committee certainly both sides have come to know him well, to appreciate his great abilities and to know his worth as a public servant. The committee, and I am sure the whole Congress, suffers a loss in the fact that he will not be with us next year.

I want to make a public statement of the fine service he has rendered and extend best wishes to him in whatever he may undertake.

It has been a pleasure to watch SID CARNAHAN and how he has done his work, and his ability to unite people across all lines and get a common opinion. I repeat, it has been a pleasure to serve with him, and we are sorry to lose him.

Mr. SAUND. Mr. Speaker, will the gentleman yield?

Mr. CANNON. I yield to the gentleman from California.

Mr. SAUND. Mr. Speaker, I am a new Member and I have had the pleasure and distinct privilege of serving with Mr. CARNAHAN on the Foreign Affairs Committee for 4 years. I found in him a beloved friend and a very keen student of foreign affairs. I think I can say without any reservation that Mr. CARNAHAN today is perhaps the best informed man on international relations. I have sat with him and worked under him on the Committee on International Organization, of which he is chairman.

I join in the tributes that have been paid to him and I wholeheartedly endorse everything that has been said in honoring Mr. CARNAHAN. More than that, Mr. Speaker, I may say that in Mr. CARNAHAN I have found one of the kindliest and most gracious gentlemen I have known in life. I think he represents the loftiest kind of American gentleman. It has been a great privilege to serve with him. We shall miss his counsel as well as his sweet and rewarding companionship keenly.

Mr. CANNON. Mr. Speaker, I yield to the gentleman from Illinois [Mr. O'HARA].

Mr. O'HARA of Illinois. Mr. Speaker, among all the members of the Committee on Foreign Affairs is a very deep regret and a keen sense of the tremendous loss to our country in the retirement of Congressman CARNAHAN. We who worked with him week after week, month after month, year after year knew the qualities of this truly outstanding legislator. When these trying and perilous times have passed, when our security in a happy world of freedom and of peace has been attained, his neighbors in his district in Missouri will be proud indeed that it was their votes that had sent to Washington a man destined for leadership in the long, long struggle for world understanding and the contentment that is possible only in the climate of peace and good will. No man in public office has worked with more dedication, more effectively, and may I say more unselfishly to this end than the distinguished gentleman from Missouri, our beloved colleague, Mr. CARNAHAN. He is truly a great American, and so he will be written in the history of these times.

Whether the next administration be Democratic or Republican, I predict it will reach into Missouri and give a high post as ambassador to our friend and beloved colleague, Mr. CARNAHAN. Our country cannot afford to lose the service of one so preeminently qualified, so richly experienced, so dedicated.

Mr. CANNON. Mr. Speaker, in closing, may I call attention to one remarkable feature of Mr. CARNAHAN'S service here in the House. That is the general appreciation and support he received from Members on both sides of the aisle.

Mr. Speaker, there is no partisanship in national defense. Politics stops at the water. Both parties and the leaders of both parties express warm appreciation of the service of Congressman CARNAHAN and deep regret that he is leaving the House.

I include as a part of my remarks an excerpt from a letter by Speaker RAYBURN on one side, and on the other I include a letter from President Eisenhower.

Speaker RAYBURN said: "He is popular with all Members of the House on both sides of the aisle and is, therefore, in a position to be of even greater service to all of us."

President Eisenhower wrote:

THE WHITE HOUSE,
Washington, August 15, 1960.

The Honorable A. S. J. CARNAHAN,
House of Representatives,
Washington, D.C.

DEAR MR. CARNAHAN: I send you this letter with personal regret, for in it I must take cognizance of your failure of reelection. For these past several years I have watched with growing admiration your dedicated support of the Nation's security interests, particularly your unhesitating determination to put America's primary needs before petty considerations where peace, the advancement of freedom, and the Nation's safety have been concerned.

As you retire from public life, therefore, you carry with you the greatest reward achievable to the dedicated public servant—the knowledge that in the matters of greatest moment to our Nation you have kept faith with the American people. Sustained by this knowledge, one can never, in his heart, be defeated.

With personal good wishes,

Sincerely,

DWIGHT D. EISENHOWER.

Mr. CANNON. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include certain letters.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

GENERAL LEAVE TO EXTEND REMARKS

Mr. CANNON. Mr. Speaker, I ask unanimous consent that Members may have 5 legislative days in which to extend remarks on the service of the gentleman from Missouri [Mr. CARNAHAN].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. TRIMBLE. Mr. Speaker, Congress will not be the same without SID CARNAHAN. He is one of God's noblemen. To him and Mrs. Carnahan go all our good wishes. May all their years be happy years.

Mr. ZABLOCKI. Mr. Speaker, the House of Representatives has had many distinguished Members who have made an indelible mark on the course of history. To this group we can proudly add the names of our colleagues, Hon. A. S. J. CARNAHAN and Hon. FRANK M. COFFIN.

The closing of this session of the Congress terminates the remarkable careers of these two outstanding Members in the House of Representatives. I deeply regret that our colleagues will not be with us in the 87th Congress. Both are members of the Committee on Foreign Affairs and both will be sorely missed in the next session.

Congressman CARNAHAN was elected to the 79th Congress and to each Congress since except the 80th. He was appointed to the Committee on Foreign Affairs in the 79th Congress and has served with distinction in that assignment. In 1957 he served as U.S. delegate to the 12th General Assembly of the United Nations.

He has served the Eighth District of Missouri and his country ably during the 14 years that he has been a Member of Congress. His distinguished record transcends local interests, and he made

his tremendous ability and statesmanship felt on the national level. We value his friendship, wise counsel, and considerate regard for others.

It was my privilege to serve with SID CARNAHAN on the Committee on Foreign Affairs for many years. As a Member of the House of Representatives and a member of the Committee on Foreign Affairs, he established himself as an outstanding legislator, giving his time and efforts in discharging his duties for the welfare of the Nation.

My wife joins me in wishing SID and his dear wife the best of everything in life, and we hope he will not lose contact with his many friends here on Capitol Hill.

In Representative FRANK M. COFFIN the House of Representatives is losing one of the youngest and ablest Members who has served with distinction during the past 4 years. His keen mind and legislative ability have served our country well. The Committee on Foreign Affairs will miss his understanding of the challenge facing our Nation today and how that challenge must be met. His intense loyalty, his always warm and friendly personality, and his evident sincerity contribute richly to those who are associated with him.

FRANK COFFIN is the type of citizen who is so greatly needed in our country today—a real American and a living example of what can be accomplished by hard work and individual initiative. He is a lawyer with a keen and discerning knowledge and perception, but above all, he is a warm human being who thinks in terms of the welfare of people. Perhaps the greatest measure of the esteem and admiration in which he is held by his constituents was documented when FRANK COFFIN was elected in 1956 despite the Republican victory in the executive branch in that year.

All our very best wishes go with our distinguished colleague, FRANK COFFIN, in his bid for the governorship of the State of Maine. As the next Governor of that great State, we wish him continued success.

Mr. HULL. Mr. Speaker, when I first came to Congress in 1954 one of my earliest friendships was established with the able and effective Congressman from Missouri's great Eighth District, SID CARNAHAN.

Mr. SID was by that time already a veteran practitioner of the complex art of being a responsible representative of his people and he was unselfish in his assistance to more recent additions to the Missouri congressional delegation to the Congress.

As the second-ranking Democratic member of the House Committee on Foreign Affairs, he has participated in policy deliberations of epic importance. His wisdom and foresight in these deliberations are recognized by his many friends on both sides of the aisle.

SID CARNAHAN has ably served his country, his party and his people and he enters his coming retirement from Congress with the affection and respect of his colleagues.

To SID and his lovely wife go my warmest wishes for many future years of good luck, good health, and all happiness.

AUTHORIZING COMMITTEE ON UN-AMERICAN ACTIVITIES TO CONDUCT A FULL AND COMPLETE STUDY OF EACH INTELLIGENCE AGENCY OF THE UNITED STATES

Mr. WALTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, I have today introduced a resolution calling for a full and complete study of each intelligence agency of the United States.

I have long felt that the Congress of the United States should be more fully informed respecting the several intelligence agencies of the Government which are vital in the life-and-death struggle in which we are engaged with the international Communist conspiracy.

While I believe that the Committee on Un-American Activities presently has jurisdiction and the authority to conduct the study which I propose, because of the nature of the subject matter and also to avoid any questions of possible partial overlapping in jurisdiction with other committees, I feel that it is sound practice for me to submit a resolution to the House in which the Committee on Un-American Activities is specifically directed to make this study.

I want to point out that the resolution requires that extreme caution be taken in order to avoid any possible disclosure of confidential information or of techniques employed by our intelligence agencies.

Is there duplication or conflict in the powers, jurisdictions, and functioning of our intelligence agencies? Are there areas in which there should be either an extended activity or a withdrawal of activity by these agencies? How can their efficiency be improved? Is the information acquired adequately safeguarded from unauthorized disclosures? Is this information made available for maximum practicable utilization by policymaking agencies of the Government?

These and other questions ought to be carefully and judiciously explored by the representatives of the people. In my judgment, the Committee on Un-American Activities is specially equipped to make this study and I accordingly expect to press for early approval by the House of my resolution.

REPORT TO THE PEOPLE OF THE EIGHTH CONGRESSIONAL DISTRICT OF WISCONSIN—XIV

Mr. BYRNES of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include a table and extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. BYRNES of Wisconsin. Mr. Speaker, under leave to extend my remarks, I include a report to the people of the Eighth Congressional District of Wisconsin on my voting and attendance record for the 2d session of the 86th Congress.

The report includes all rollcall votes and all quorum calls. Its purpose is to collect in one place and in concise form information which is scattered through some 18,000 pages of the CONGRESSIONAL RECORD.

The descriptions of the bills and the amendments or motions in the report are for purposes of identification only; no attempt is made to describe the legislation completely or to elaborate upon the issues involved. This word of caution is advisable in view of the fact that the descriptions used are, for the most part, taken from the official titles of the bills which, unfortunately, do not always reflect the nature or true purpose of the legislation. Upon request, I will be pleased to furnish more complete information concerning any particular bill, as well as a summary of the issues involved and the reasons for my vote.

The furnishing of this report continues a service I began in the 1st session of the 80th Congress. This is the 14th report of my voting and attendance record. These 14 reports show how I voted on 1,805 questions in the House of Representatives. Based on quorum calls and the record votes, they also show an attendance record of 95 percent.

Roll-call No.	Date 1960	Measure, question, and result	Vote
1	Jan. 6	Quorum call	Present.
2	Feb. 2	H.R. 1217, providing for the free importation of amorphous graphite: On motion to suspend rules and pass bill. (Passed 278 to 116.)	Yea.
3	Feb. 2	H. Con. Res. 459, expressing the sense of Congress that any new interpretation of treaties with Panama receive approval of Senate: On motion to suspend rules and adopt resolution. (Passed 380 to 12.)	Yea.
4	Feb. 2	H. Con. Res. 465, expressing indignation of Congress at recent desecrations of houses of worship and other sacred sites: On motion to suspend rules and adopt resolution. (Passed 393 to 0.)	Yea.
5	Feb. 17	H.R. 3151, permitting cities to withhold income tax on the compensation of Federal employees: On passage. (Passed 222 to 160.)	Yea.
6	Feb. 25	H.R. 3610, establishing Office of Water Pollution Control and increasing from present $50,000,000 to $90,000,000 a year grants for construction of sewage treatment works: On motion to pass bill over veto of President. (Rejected 249 to 157, a two-thirds vote being required.)	Nay.

Roll-call No.	Date 1960	Measure, question, and result	Vote
		H.R. 10743, making supplemental appropriations for fiscal year 1960:	
7	Feb. 29	On amendment providing $50,000,000 for additional grants for urban renewal and slum clearance. (Rejected 158 to 187.)	Not voting.[1]
8	Mar. 1	Quorum call	Absent.
9	Mar. 7	Quorum call	Present.
10	Mar. 7	Quorum call	Present.
		H. Res. 467, providing for the consideration of H.R. 10777, authorizing certain construction at military installations:	
11	Mar. 7	On adoption of resolution. (Adopted 313 to 1.)	Yea.
12	Mar. 8	Quorum call	Present.
		H. Res. 468, providing for the consideration of H.R. 5, encouraging private investment abroad:	
13	Mar. 8	On adoption of resolution. (Adopted 236 to 127.)	Yea.
14	Mar. 8	Quorum call	Present.
15	Mar. 8	Quorum call	Present.
16	Mar. 8	Quorum call	Present.
		H.R. 10809, authorizing $970,000,000 for National Aeronautics and Space Administration for fiscal 1961:	
17	Mar. 9	On motion to suspend rules and pass bill. (Passed 398 to 11.)	Yea.
		H.R. 10777, authorizing certain construction at military installations:	
18	Mar. 9	On passage. (Passed 407 to 4.)	Yea.
19	Mar. 10	Quorum call	Present.
		H. Res. 359, providing for the consideration of H.R. 8601, enforcing constitutional rights (civil rights bill):	
20	Mar. 10	On adoption of resolution. (Adopted 314 to 93.)	Yea.
21	Mar. 11	Quorum call	Present.
22	Mar. 11	Quorum call	Present.
23	Mar. 14	Quorum call	Present.
24	Mar. 15	Quorum call	Present.
25	Mar. 16	Quorum call	Present.
26	Mar. 17	Quorum call	Present.
27	Mar. 18	Quorum call	Present.
28	Mar. 21	Quorum call	Present.
		H.R. 7279, authorizing establishment of Hubbell Trading Post National Historical Site, Arizona:	
29	Mar. 21	On motion to suspend rules and pass bill. (Rejected 171 to 208, a two-thirds majority being required.)	Nay.
30	Mar. 22	Quorum call	Present.
31	Mar. 23	Quorum call	Present.
		H.R. 8601, enforcing constitutional rights (civil rights bill):	
32	Mar. 23	On amendment providing for appointment of U.S. voting referees. (Adopted 295 to 124.)	Yea.
33	Mar. 24	Quorum call	Present.
		H.R. 8601, enforcing constitutional rights (civil rights bill):	
34	Mar. 24	On motion to recommit with instructions to omit threatening letters or communications from penalties for obstruction of court orders. (Rejected 118 to 304.)	Nay.
35	Mar. 24	On passage. (Passed 311 to 109.)	Yea.
36	Mar. 28	Quorum call	Present.
37	Mar. 29	Quorum call	Present.
		H.R. 11390, making appropriations for Departments of Labor, and Health, Education, and Welfare, and related agencies for fiscal year 1961:

CALL OF THE HOUSE

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 206]

Alexander	Auchincloss	Bass, Tenn.
Anderson, Mont.	Ayres	Bates
Anfuso	Barden	Baumhart
	Bass, N.H.	Beckworth
Bolling	Forrester	Lesinski
Bolton	Garmatz	Loser
Bowles	Glenn	McDowell
Brooks, La.	Grant	McSween
Buckley	Green, Oreg.	Macdonald
Canfield	Griffiths	Magnuson
Celler	Gubser	Miller, N.Y.
Cohelan	Hays	Mitchell
Conte	Healey	Multer
Curtis, Mass.	Hébert	Murray
Davis, Tenn.	Henderson	Norrell
Dawson	Hess	Patman
Diggs	Hosmer	Pilcher
Dingell	Jones, Ala.	Powell
Dowdy	Kearns	Preston
Doyle	Kelly	Rabaut
Durham	Keogh	Rains
Evins	Kilburn	Reece, Tenn.
Fallon	Kluczynski	Rogers, Mass.
Farbstein	Lafore	Rooney
Flynn	Landrum	Rostenkowski
Fogarty	Lane	Scherer
Shelley	Smith, Miss.	Vinson
Shipley	Taylor, N.Y.	Williams
Sikes	Teague, Calif.	Withrow
Siler	Thompson, La.	Yates
Smith, Calif.	Thompson, N.J.	Zelenko
Smith, Kans.	Van Pelt	

The SPEAKER. On this rollcall 337 Members have answered to their names; a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

RECESS

The SPEAKER. The House will stand in recess subject to the call of the Chair.

Thereupon, at 1:46 p.m., the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 2 o'clock and 57 minutes p.m.

COMMITTEE TO NOTIFY THE PRESIDENT

The SPEAKER. The Chair recognizes the gentleman from Massachusetts [Mr. McCORMACK].

Mr. McCORMACK. Mr. Speaker, I offer a preferential resolution (H. Res. 643).

The SPEAKER. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

Resolved, That a committee of two Members be appointed by the House to join a similar committee appointed by the Senate, to wait upon the President of the United States and inform him that the two Houses have completed their business of the session and are ready to adjourn, unless the President has some other communication to make to them.

The resolution was agreed to.

The SPEAKER. The Chair appoints the gentleman from Massachusetts [Mr. McCORMACK] and the gentleman from Indiana [Mr. HALLECK] to wait on the President.

GENERALISSIMO RAFAEL L. TRUJILLO

Mr. DORN of South Carolina. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN of South Carolina. Mr. Speaker, the President and the State Department are following a policy in the Dominican Republic that will lead to the destruction of North and South America. By aiding the Communists in their desperate desire to overthrow Generalissimo Rafael L. Trujillo, our State Department is contributing directly to Communist conquest of the Western Hemisphere. If the Trujillo government falls, every schoolboy in America knows that it will be followed by a pro-Communist or neutral government. The blueprint and pattern is a familiar one. The most classic example of it was the overthrow and undermining of a government in Cuba, friendly to the United States, so that a pro-Communist, anti-United States government could follow headed by Fidel Castro.

Mr. Speaker, it seems to me that the order of the day for this administration is to undermine every real friend we have throughout the free world. Our State Department encouraged the overthrow of Syngman Rhee in Korea. They stood by while the friendly government of Turkey was overthrown and now they are working night and day to replace the friendly government of Trujillo.

Mr. Speaker, this policy is a long-standing one and has not followed party lines. The liberals, eggheads, and their State Department flunkies attempted by every means to overthrow Franco of Spain, the only government to defeat communism in war. They opposed De Gaulle's rise in France and ridiculed him. If this policy of the State Department, as exemplified in Cuba and now in the Dominican Republic, is permitted to continue, every government in South and Central America will topple one at a time to be replaced by pro-Communist governments. These dictator governments with Russian military advisory teams and missile bases will be used to threaten and eventually overthrow the United States. Cuba and the Dominican Republic are as important to the defense of the Western Hemisphere as Formosa, Japan, Singapore, and the Philippines are to the defense of the Pacific. Russian bases in Cuba and in the Dominican Republic would control the Panama Canal. They would dominate the Atlantic and even the eastern Pacific, dividing North America from South America and putting both North America and South America under the Communist gun simultaneously. Already the great industrial heart of the United States can be reached by Russian air and missile power over the North Pole. Now the expanding industrial southern part of the United States, Mexico, and progressing South America are under atomic threat.

Mr. Speaker, I might point out at this point that the Dominican Republic under Generalissimo Trujillo, regardless of what he might do in the future, has been friendly to the United States. He made a great contribution to the allied and free world during World War II and the Korean war. He cooperated with us in the important Caribbean when the German and Japanese menace reached to our very shores. Every GI, sailor, and airman is aware of the important role played by Trujillo in the defense of the Western Hemisphere. The Dominican Republic, under Generalissimo Trujillo, is one of the most truly democratic nations in South America, Central America, Asia, or Africa. General Trujillo has responded always to the desires of his people. His country has been vastly improved during his regime. They have made fantastic progress in education, health, roads, standard of living, cleanliness, and love for freedom.

Mr. Speaker, this Congress cannot shirk its responsibility in the field of foreign affairs. In view of State Department failure in the Congo, in Cuba, in Korea, in Turkey, in Laos, in India, in Indonesia, and throughout the world Congress must move to the front and give to the American people a sound foreign policy. The present policy will flatly and unequivocally lead to Communist domination of the world. The fantastic advance of communism in this hemisphere and in Africa will not and cannot be stopped by bipartisan policies of appeasement, Russian goodwill tours, summit conferences, coexistence, and vacillation. Neither platform of the national parties offers much hope for the American people in foreign affairs, but, Mr. Speaker, I do predict that this fall the American people, already alarmed, are going to elect a Congress which will reverse this trend, stand by the Monroe Doctrine, and offer to the world a positive foreign policy.

Mr. Speaker, the real issue during this sugar debate is simply a choice between Trujillo in the Dominican Republic and the Red Communist with atomic missiles aimed at the heart and vitals of the United States. On proven past friendship I will take Trujillo. He has been one of the greatest men of our time.

THE "MUST" MINIMUM WAGE BILL

Mr. PELLY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. PELLY. Mr. Speaker, I believe it is customary after the ball game is over to compile some sort of box score.

As this session ends, I am certain the leaders of the majority party who called it are thankful that it is grinding to a merciful close.

The President, as Commander in Chief of the Armed Forces, as the Executive leader of our Nation, submitted early in the session a 22-point program which the Nation needed and which the President believed was reasonable and within the capabilities of a working Congress to enact.

Obviously very little of this program has been enacted and as for the rest of the "must" bills we came back to pass, the session is a flop. One of the major fiascos was the picayunish rejection of a compromise minimum wage plan. I can only liken the actions of the Senate committee leader, the junior Senator from Massachusetts, on this particular "must" bill, to that of a small boy who breaks up the ball game by taking his ball and going home when he cannot be quarterback. It is ironic that the compromise which was rejected on the minimum wage bill conformed in nearly every major point to the Senator's own bill for the first effective year of its operation. The lower income American worker will suffer for at least a year because of this legislative tantrum.

I want to defend and pay my respects to the sincere, hard-working House conferees who had a good bill, one that would have benefited millions of American workers. I regret they were the subjects of much unfounded abuse and criticism as the smokescreen of misdirected statements poured out from the Democratic presidential camp. I deplore the irresponsible actions of the other body's "Peck's bad boy."

I shall not at this point go into detail about the failures of this rump session. The enormity of its shortcomings will

soon become apparent to the American people.

I am reminded of an audacious slogan being bandied about by the leaders who presided over this ill-starred session. As we go back to our districts I believe all of us realize that we have seen nothing demonstrated here that would lead us to believe the slogan has been carried out. Mr. Speaker, to use the words of the leaderless legion "It is still time for greatness."

HARMFUL EFFECT OF GOVERNMENT TRADE POLICIES

The SPEAKER. Under the previous order of the House the gentleman from Indiana [Mr. BRAY] is recognized for 15 minutes.

Mr. BRAY. Mr. Speaker, the present trade policies of our Government are doing great harm to labor, farmers, and to business.

Mr. Speaker, it is becoming increasingly apparent that our present foreign trade policies are wrecking industries in America that are vital to the communities in which they are located and to the employees in these industries, and are eliminating from the American scene industries and skilled workmen so essential to our economy, security, and well-being.

I want to relate some of the circumstances which have led to our unfavorable trade policies and point out certain industries in southern Indiana with which I am especially familiar that are being seriously damaged by our import policies.

BACKGROUND OF PRESENT TRADE POLICIES

Through the centuries, international trade has been a system of exporting those articles which a country or area produces in surplus and importing those which other countries produce in surplus quantities. Countries normally sell what they have in abundance and buy those items which are scarce. In the natural course of international trade one would not expect Brazil to import coffee; Ceylon, tea; Iceland, fish; Japan, silk; Honduras, bananas; or Malaya, rubber. Yet, that in a sense is just what we are doing today in our zeal to help various countries improve their economic status. The American people have been motivated by a spirit of altruism to help their neighbors around the world. The question arises as to just how long and to what extent you can materially help your neighbor and still remain strong yourself. The predicament in which we find ourselves today is not the fault of one political party; both parties have assisted in forging trade policies that benefit friendly countries or countries we erroneously expected to be friendly.

Reciprocal trade agreements which were begun in 1934 were intended to work for the mutual benefit of ourselves and other countries. I would be the last to say that no good has been accomplished by reciprocal trade agreements, and I also would be the last to desire to stifle legitimate trade. However, for reasons which I will not attempt to discuss at this time, trade agreements are geared more and more to encourage the importation of foreign-made goods and, in many cases, to discourage the exportation of American products. I have supported amendments which would have made our trade agreements truly reciprocal and not one-sided against American trade. I spoke against the reciprocal trade bill on June 10, 1958, and at that time pointed out the growing problems of unemployment caused by unfair foreign competition. The developments in the last 2 years have shown that I was accurate in my estimate, as imports have cut deeper and deeper into the markets for domestic production.

I have spoken on the floor of the House and have appeared before appropriate committees many times, pointing out specific instances of industries which were being unfairly damaged or even destroyed by these trade practices. Those of us who saw these approaching dangers attempted in 1958 to limit the extension of the Reciprocal Trade Act to 2 years instead of 4. Today I believe the Congress is alerted and would not extend the act without more adequate protection for American industry.

CHEAP FOREIGN LABOR CREATES TRADE INEQUITIES

The difference between labor standards in the United States and those in other countries creates a trade barrier for which even the superiority of American know-how and machinery cannot compensate in all cases. The wages paid to the men who mine the coal, who produce the raw materials and who operate the machines in the factories abroad are often less than one-tenth of the wages paid the man who performs the same type of labor in America. This labor cost factor, both direct and indirect, allows foreign products to be imported into the United States at prices which domestic producers cannot meet and still maintain our high standard of living.

AMERICAN TAX DOLLARS AND KNOW-HOW USED TO DEFEAT AMERICA

This condition was made doubly unfair after World War II when the American taxpayers began to send billions of their dollars abroad to rebuild damaged industry and install more modern machinery than American industry enjoyed at that time. We also sent abroad the best in know-how—our experts in the fields of farming, engineering, production, and other technical assistance. Industry was even called upon to surrender to foreign countries trade secrets that they had previously kept from their competition here. Although I have mentioned all of this on the floor many times, in the closing of this session I again want to point out a few specific inequities I have found which affect southern Indiana.

STONE, GLASS, TILE, AND WOOD PRODUCTS

Veneers, plywood, and fabricated wood products such as furniture and doors are moving from European and Asiatic markets to the United States at accelerated rates.

As indicative of a trend, a $140 million Lincoln Cultural Center in New York City, partially being paid for by Federal funds, is being built entirely out of Italian stone, carved by stone masons in Italy.

The American glass industry will be destroyed completely within a few years unless remedial action is taken. Last year 8.5 million boxes of window glass were imported into the United States—one-third of the normal U.S. production. That represents a gain of more than 100 percent in less than 2 years.

Structural tile from Spain threatens to replace the domestic product within a few years. Clay sewer pipe faces the same fate from foreign imports. Foreign workmen are held to wage rates of only a fraction of those paid to their American counterparts.

RUBBER GOODS, GARMENTS, SHOES, AND BRUSHES

Those industries in America manufacturing rubber products such as clothing, raincoats, and the like, are facing competition from Japanese manufacturers that is impossible to meet under present Government trade policies. Japanese labor that receives less than one-tenth of what American labor receives will completely eliminate our producers unless our country does something about it.

Imports from Japan and Hong Kong are cutting heavily into the garment industry of the United States.

Shoes from Italy and other countries are replacing those made in the United States. Advertisements even attempt to make foreign-made shoes the style today as opposed to our own domestic-made shoes.

The brush industry is also threatened by imports.

TV-RADIO PARTS, BATTERIES, AND VARIOUS ELECTRONIC ITEMS

The great American electronic industry is facing rapidly increasing competition from Japan. Although the United States has pioneered in this field, once the engineering and tests are completed, then cheaply paid Japanese labor is able to produce it at far less cost than can our own workers who enjoy our high standard of living.

COAL AND OIL

The importation of residual fuel oil, principally from Venezuela, has caused a cutback in domestic oil production and has replaced 43 million tons of coal which would have come from American mines and provided jobs for 20,000 miners. I have heard it stated that we were purchasing this residual fuel oil from Venezuela to help them and to build friendship, yet when Vice President NIXON visited Venezuela mobs attempted to murder him.

AGRICULTURE

The importation of 800 million pounds of meat in 1959 adversely affected the market for livestock raised on American farms. This was an increase of 100 percent over 1957 imports.

A greater damage to U.S. agriculture, however, results from the importation of products that take the place of American-grown products. A good example of

this is the increasing importation of casein, a milk product. Last year more than 100 million pounds of casein were imported. In hearings on this matter, Mr. W. E. Huge, vice president of Central Soya Co., stated:

> Duty-free imports of casein directly displace a potential market for industrial isolated soybean protein approximating the equivalent of 6½ million bushels of U.S. soybeans annually.

Importing products which are also raised on American farms depresses our farm markets.

AMERICAN INDUSTRY MOVING ABROAD

When American industries found that they were failing to compete with the cheap labor abroad, they began to build factories abroad to utilize cheap foreign labor and power and ship their goods back to the American market. Over 3,000 of the leading American manufacturers have spent a total of more than $27 billion in establishing plants abroad.

On August 17, 1959, on the floor of the House, I discussed this trend in detail, emphasizing the effect it ultimately would have on American industry. Not only does this trend injure business today, but it also takes away from American business the research which develops business and industry for the future.

THERE IS A SOLUTION FOR THIS PROBLEM

There are sensible solutions to our trade problems—solutions which would not stifle legitimate trade and which would return us to the principles that were intended in the original reciprocal trade legislation. Several of us in Congress attempted to accomplish this through amendments to the bill in 1958. We attempted to give the Tariff Commission rather than the State Department the authority to furnish the list of articles to be negotiated under reciprocal trade agreements. We also attempted to allow agriculture and labor to be heard by the Commission before harmful negotiations were undertaken. We attempted to include provisions which would allow farmers, farm organizations and related agricultural interests to appeal directly to the Tariff Commission. We lost in those attempts, but I believe that we are all becoming sufficiently aware of the injury to American labor, business and farmers so that when the renewal of this legislation comes up again, such amendments certainly will be adopted.

Another solution to our present trade difficulties has been offered which appears to have real merit. It is suggested that the United States base its tariff in an inverse ratio to the wages paid in the exporting country. This would cause an importer of cheap-labor products to pay a higher tariff, which would prevent the present gross unfairness to American producers and should tend to raise the wages in exporting countries.

REASONS BEHIND CONTINUED INEQUITIES IN TRADE POLICIES

There are several reasons for the resistance to a trade policy that would be fair and equitable to American producers. Many fail to realize that the reciprocal trade agreements are operating in total disregard of the meaning of the phrase "reciprocal trade."

Another reason is that it is human nature to like to sell high and buy low. If we could draw 1960 wages and buy at 1932 prices, it would be wonderful. However, the workman who loses his job to the Japanese workman cannot pay his landlord, his doctor, his grocer, and he cannot pay taxes that pay the teacher. When enough Americans lose their jobs in this manner, the national economy will tumble.

There is also a very powerful lobby which encourages imports into the United States. Billions of dollars are made by those who import products into the States, and their public relations directors are doing a most effective job.

Most foreign countries do not receive imports from America in the same altruistic spirit as we receive theirs. In fields where American know-how and capabilities are so great that we can overcome the obstacles of the low wage rates of other countries, many artificial barriers are placed against American products, such as excessive tariffs, quotas, blocked currencies, and absolute prohibition.

These increased imports from abroad are the principal cause of our diminishing gold reserve.

As I have pointed out for the last 4 years, the American standard of living is the highest in the world, and it is still improving. However, the inequities against American business are increasing. Many industries have as yet been unaffected by our trade policies, but each year more and more American industries are being injured and some are folding up or moving out of the United States.

In the coming session of Congress something must be done to remedy this situation. The responsibility of trade and tariffs belongs to Congress according to the Constitution. We must again assume our direct responsibility and act in the best interest of America.

FEDERAL BUILDING SITE AT DALLAS, TEX.

The SPEAKER. Under previous order of the House, the gentleman from Texas [Mr. ALGER] is recognized for 15 minutes.

Mr. ALGER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include a GAO report and other material.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. ALGER. Mr. Speaker, I feel compelled to take the floor today inasmuch as there have been certain developments concerning my district relative to site acquisition for a Federal building, and even more importantly, before I get into the subject, as to its merits or demerits, the action of one of the committees of this House.

I have here a release listed as coming from the Brooks subcommittee of the Committee on Government Operations. This release has gone out across the country. It lists the various subcommittee members at the bottom. I am not sure whether they had anything to do with this or not. I have spoken to several who have not even seen this release.

Let me call your attention to specific statements in the release. By the way, I invited the gentleman from Texas [Mr. BROOKS] to be present, as well as the gentleman from Alabama [Mr. JONES] in case we get further into his field, the matter of the Federal building itself.

The release goes on to say:

> For several months we have had under investigation the method utilized by the GSA in acquiring a site in downtown Dallas.

I understand there has been only one meeting in this so-called investigation.

Then the release goes on to speak of "an acquisition procedure with peculiar moral and ethical overtones." Later in the statement he mentions "justifiable complaints of property owners"; and he uses the words "in collusion with their own government" of certain people in Dallas in collusion with their own government. Then later in the release he speaks of it being "very questionable procedure." It seems to me the questionable procedure is found in the language here used.

Further, I want to ask my colleagues what correct procedure is when a Member of Congress, in this case the gentleman from Texas addressing you, goes to a committee of Congress, in this case the Government Operations Subcommittee, asks for certain information, and finds it is refused to him? That occurred to me yesterday. Mr. Ed Brooks, a brother, and employee of the committee, said, "No" when I asked the question. "We haven't authorization to let anyone see it."

I call this to your attention because I believe it is contrary to the rules of the House. I read from Public Law 601—79th Congress, chapter 753, 2d session, page 27, subsection (d) of section 202 of the Reorganization Act:

> All committee's hearings, records, data, charts, and files shall be kept separate and distinct from the congressional office records of the Member serving as chairman of the subcommittee, and such record shall be the property of the Congress, and all members of the committee and of the respective Houses shall have access to such records.

Furthermore, I then spoke to the Comptroller General and I think I can safely say to you that he was somewhat troubled over this, because in the past these GAO reports have been sent simultaneously to the Congressman in whose district the project was located. In this case he sent it to the committee for them to release through its chairman. I think this is irregular; I think it contrary to good procedure.

As to procedure in the release of the subcommittee statement, here in hand, I am not sure whether it was given out by the Brooks subcommittee as a subcommittee or whether by Mr. BROOKS himself, alone. I have spoken to several members of the subcommittee and they are not acquainted with this release.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield?

Mr. ALGER. I yield.

Mr. CURTIS of Missouri. Would it not be easy to find out at this time just what it was? The gentleman from Texas, I believe, is on the floor. The gentleman could ask him as to whether it was issued by the subcommittee or himself.

Mr. ALGER. I will be glad to yield to the gentleman from Texas [Mr. BROOKS] to enlighten me.

Mr. BROOKS of Texas. It was in reply to numerous requests apparently brought about by very keen interest in the expenditure of $43 million by the Federal Government in Dallas, in the gentleman's district. The statement was issued to clarify the situation.

If the gentleman will read the entire report he will realize that the Committee on Government Operations, as such, is wholly without authority to build any buildings or to disapprove any construction, or to authorize anything.

Mr. ALGER. I do not yield further, Mr. Speaker. The gentleman is encroaching on my time. He is not answering the question, which was: Is this a statement by him or is it a statement by the subcommittee membership?

Mr. BROOKS of Texas. To be more specific, did I write the statement? The answer is "Yes." Does it reflect what the subcommittee has done over several months of intensive study of letters from people in the gentleman's district who are concerned that their property is being taken away from them for the benefit of the nearby and adjacent landowners? The answer is "Yes."

Mr. CURTIS of Missouri. The gentleman is still not answering the question, Did the subcommittee authorize the chairman to issue this statement, or was this done on the gentleman's own authority?

Mr. BROOKS of Texas. As chairman of the subcommittee, as the chairmen of most all subcommittees, when they are continually asked about studies and about legislation or a study, it seems only fair to me to give them an answer and tell them, as chairman of the subcommittee, what the report reflects. The report that I gave to the press indicated clearly further study is to be made before any official subcommittee action would be taken. I wrote a letter to that effect to the Administrator of GSA.

Mr. ALGER. The gentleman is not answering the question, which is a very simple question.

Mr. CURTIS of Missouri. I think it is obvious the answer is that the gentleman issued the press release on his own authority. I read the press release, and I notice the names of five members of the subcommittee at the bottom. I think one point has already been established. It was issued by an individual.

Mr. ALGER. Let the gentleman direct his answer to that question.

Mr. BROOKS of Texas. When people ask you for something you try to give them a substantial statement. I did that. At the bottom of the news release, as is customary on every statement made by a subcommittee, you point out for the benefit of people who are interested, the public and members of the press and Members of Congress; yes, the gentleman himself was interested in each instance, in the names of the subcommittee members.

Mr. ALGER. I thank the gentleman for his statement.

We have the answer finally and specifically; namely, that it is Mr. BROOKS' own statement. Of course, he is entitled to his own opinion. He is not speaking for the subcommittee members, although the release with members' names added makes this appear a subcommittee report. This is irregular and unfair procedure.

I learned with some surprise that the GAO made a report last April 4. This is the one I could not get. That report so far as I understand it, and I've studied it, gave a clean bill of health to the site acquisition. Let me quote briefly from it, because, you see, 14 businessmen in Dallas right now are under attack by Mr. BROOKS through the statement released by the gentleman from Texas, wherein he alludes to peculiar moral and ethical overtones in the land acquisition.

Here are the questions that Mr. BROOKS asked the GAO and also the answers.

(1) First, an opinion on whether or not the alleged bid by the syndicate was a proper responsive one, inasmuch as the syndicate was neither owner nor agent for the property it was offering to the Government.

Here is the answer, only part of which someone underlined in this particular copy:

> Presumably, as you suggest, the guarantee offered was not made without some motive on the part of the guarantors, such as enhancement of the value of their own properties. However, there is nothing in the record to indicate that they would personally benefit in any manner different in nature from the benefits which would normally be expected to accrue to any owners of property in the vicinity of the site selected.

Further on is:

> Accordingly, in answer to your first question, it is our opinion that the proposal of the syndicate was not illegal from that standpoint.

And so on.

(2) The second question was: "An opinion on the legality of this condemnation policy in which a private, profitmaking group offered the Government property it did not even own and agreed to share the condemnation costs with the Government."

Here is part of the answer by the GAO:

> As we pointed out in the answer to the first question, in view of the provisions of 40 U.S.C. 298, such a guarantee would not appear to be legally objectionable in the absence of other considerations even though the syndicate might profit from selection by GSA of one of the suggested parcels.

Mr. BROOKS of Texas. Would you read the sentence ahead of that?

Mr. ALGER. I will be glad to have the gentleman do that.

Mr. BROOKS of Texas. Starting with:

> Because of the particular and unusual circumstances leading up to the selection of the site, it is understandable that the former owners of the property taken might question the propriety of the action taken.

Mr. ALGER. It was of interest to me that the gentleman underlined or someone else underlined this copy I have, which is no doubt the part that they wanted to be read. I had tried to read the entire thing in context, and therefore I have asked permission to put in the entire statement so that every Member can take a look at it.

Now, Mr. Speaker, I had nothing to do with the site selection; that is not a Congressman's province. I know nothing firsthand about the transaction. I was not a party to it, and I was not on this committee studying the acquisition. What disturbs me is that the release put out today by the gentleman from Texas [Mr. BROOKS] as the head of this subcommittee apparently relates not at all to the statement made by the GAO. Perhaps it is possible to lift out a sentence of the GAO report and twist it a little bit and then come out with this kind of a statement, but I think that is a very inaccurate way to put it before this body. It is possible that an investigation might show there was something improper, and I am not here to criticize or say that this was right or it was wrong. I am simply calling to the attention of the House the facts as stated in this GAO report, and I hope you will read the GAO report which I will put into the RECORD.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield?

Mr. ALGER. I yield to the gentleman from Missouri.

Mr. CURTIS of Missouri. I think it might be well to ask the gentleman who issued this statement why he waited from April 4 until the end of August to issue any statement and why his committee did not act on this thing instead of his acting as an individual.

Mr. BROOKS of Texas. Would the gentleman yield for a unanimous consent request before answering his question?

Mr. ALGER. I would like to have the gentleman answer the question.

Mr. BROOKS of Texas. May I make a unanimous consent request first so that I am sure I will have adequate time to answer the gentleman? I ask him to yield for that purpose.

Mr. ALGER. I yield.

Mr. BROOKS of Texas. Mr. Speaker, I ask unanimous consent that the special order I received today follow the gentleman from Texas [Mr. ALGER].

Mr. ALGER. Why not add it onto my time and we can share it?

Mr. BROOKS of Texas. I would not want to impose.

Mr. ALGER. It would be no imposition. Mr. Speaker, reserving the right to object, does the gentleman agree that we might share the time? I certainly would be willing to split it equally as I have tried to split it up to this point.

Mr. BROOKS of Texas. I will yield when I complete my statement.

Mr. ALGER. Is that agreeable to the gentleman?

Mr. BROOKS of Texas. I will handle the time.

Mr. ALGER. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. BROOKS]?

There was no objection.

Mr. BROOKS of Texas. Would the gentleman mind repeating the question?

Mr. CURTIS of Missouri. With the report coming to your subcommittee on April 4, your subcommittee took no action until the end of August, when you issued a personal statement. Why the delay and why the personal statement?

Mr. BROOKS of Texas. Of course, you know that the Committee on Government Operations has rather wide jurisdiction. We have been occupied with a lot of matters which we have been working on pretty steadily both in the subcommittee and in our personal capacity as Members of Congress. The report from the GAO was not received for some time after the study had been inaugurated. As a matter of fact, I did not look over the report until one of my Republican colleagues, whom we hold in high regard, called it to my attention.

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. ALGER. Mr. Speaker, here are the two documents in question. First, the unilateral release by Mr. BROOKS, as chairman of the subcommittee, which purports to be a committee release:

PRIVATE SYNDICATE PAID $310,600 TO INDUCE GOVERNMENT TO CONDEMN LAND, BROOKS REVEALS

WASHINGTON, D.C.—A private syndicate, which stands to profit in the deal, paid $310,600 to induce the Government to condemn property the syndicate didn't own as a site for a proposed new Federal building in Dallas, Tex., Congressman JACK BROOKS, Democrat of Texas, said here today.

"For several months we have had under investigation the method utilized by the GSA in acquiring a site in downtown Dallas for a new Federal building and our study has revealed an acquisition procedure with peculiar moral and ethical overtones," said BROOKS, chairman of the House Government Activities Subcommittee.

"Back in January 1957, the General Services Administration solicited proposals for the sale or donation to the United States, within a specified area, alternate ground areas of 40,000 square feet (minimum required for extending the Government-owned Santa Fe Building), or 75,000 square feet (minimum required for a separate new site).

"The GSA received 21 proposals, including one from the syndicate, guaranteeing that if the Government took any of three tracts it outlined, each adjoining the Santa Fe site, it would reimburse the Government, up to $200,000, any cost over amounts it specified. The reimbursement sum later was adjusted upward. The owners of the three tracts mentioned did not submit proposals in response to GSA's invitation," Brooks continued.

"Three sites offered were ruled outside the specified area and 15 others also were eliminated. This left 3 of the 21, one of which comprised the several tracts stipulated in the guarantee offer. In late December 1957, GSA publicly announced that one of the syndicate-suggested tracts was the final choice."

GSA Administrator Franklin Floete, in a letter to BROOKS, said "This site was selected only after an understanding had been reached with the 14 local businessmen who had submitted the above-mentioned offer whereunder they agreed to pay so much of the purchase price of the selected site as exceeded $1 million."

"The GSA couldn't negotiate satisfactorily with eight of the nine owners to purchase the property the syndicate had offered, without the owners' permission," BROOKS said, "so they proceeded with condemnation. The guarantors, according to latest figures available to the subcommittee, have paid to GSA the sum of $310,600, representing the difference between the estimated cost ($1,130,600) deposited in court, plus $180,000 paid to the owner of one lot, and the Government's maximum obligation of $1 million under the final guarantee agreement."

"We became interested in this matter because of the justifiable complaints this spring of several property owners whose rights to ownership were bargained away by other people in collusion with their own Government," Congressman BROOKS said.

"The GSA and GAO, in reports to the subcommittee, confirm what was done—the individual property rights of eight taxpaying citizens virtually were sold to the high bidder, against their will, for that $310,600. An outside group paid the difference which enabled the Federal Government to take somebody else's property and thereby lucratively enhance the value of their own property.

"These guarantors were the 14 men who signed the guarantee proposal which begins 'in order to induce the United States of America to select and acquire' property they didn't own. These 14 formed the syndicate which Karl Wallace, then GSA Regional Commissioner in Dallas, told us acquired about $14 million worth of property in the 'blighted area' around the Santa Fe Building '2 or 3 years' before the site was chosen. Wallace is now Public Buildings Commissioner for the entire GSA.

"The Government wouldn't have seized this property if the guarantee offer hadn't been made—because it limited its expenditure to $1 million for the site."

The GAO, he said, described the circumstances as "particular and unusual" and Mr. Wallace didn't recall any similar circumstances in his long career. The GAO said it was not illegal but "the syndicate did, in effect, indirectly agree to share the condemnation costs with the Government."

"The whole thing appears to me to be a very questionable procedure," BROOKS said. "The right of eminent domain is a touchy one to exercise, at best, and abuse of it is unpardonable.

"We have expressed our views on the matter to Mr. Floete in the hope that this unusual action does not spawn an official policy which would seem a mighty poor way to maintain the confidence and respect of the people for their Government," BROOKS said.

"This subcommittee does not authorize buildings, so we haven't criticized plans to spend $43 million to join a new structure to the Santa Fe Building that was built in 1924 and converted from a warehouse to an office building during World War II. They'll have enough problems doing that."

Other members of the Brooks subcommittee are: Democrats, ROBERT E. JONES, Alabama; JOHN E. MOSS, California; and HENRY S. REUSS, Wisconsin; and Republicans, GEORGE M. WALLHAUSER, New Jersey; and JESSICA MCC. WEIS, New York. Chairman WILLIAM L. DAWSON, Democrat, of Illinois, heads the parent House Committee on Government Operations.

Second, here is the GAO report which details the site acquisition for the Federal building and which appears to clear the syndicate of any wrongdoing. This is the report so little considered by Mr. BROOKS that he admits he would not have even looked at the report if a Republican colleague had not called his attention to it. This is the report Mr. BROOKS decided could not be seen by Members of Congress, at least this Member:

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, April 4, 1960.

HON. JACK BROOKS,
Chairman, Subcommittee on Government Activities, Committee on Government Operations, House of Representatives.

DEAR MR. CHAIRMAN: Your letter of March 8, 1960, acknowledged March 9, requests our cooperation in clarifying several points concerning the propriety of the action taken by General Services Administration incident to the selection and acquisition of the site for a new courthouse and Federal office building in Dallas, Tex.

The record shows that this project was originated as a lease-purchase project under title I of Public Law 519, approved July 22, 1954, as amended (40 U.S.C. 356), and that the formal prospectus for the proposed building was approved on July 20, 1956, by the Senate and House Committees on Public Works. The project as then approved contemplated the erection of the building on a site to be acquired. The justification for the project contained the following statement concerning the Government-owned building at 1114 Commerce Street:

"5. This proposal is based on the disposal of the Government-owned building at 1114 Commerce Street. This building, built in 1924, was acquired by the Army in 1942 and transferred to GSA in 1949 without reimbursement. The building was designed basically as a warehouse and merchandise mart type of structure; does not lend itself to economical and efficient office space type of operation; has considerable obsolescence in building service facilities; and is on the fringe of an economically blighted area. It is estimated that an expenditure of $870,000 will be required during the next 5 years for deferred items of repairs, replacements, and improvements."

The site finally approved and acquired adjoins the building above referred to, and the project now contemplated consists of the remodeling of that building and construction of a new extension thereon.

From the letter of February 24, 1960, from the Administrator of General Services to you, it appears that following approval of the project by the Public Works Committees it was deemed in the public interest to give further consideration to the retention of the building at 1114 Commerce Street, in which event a smaller site area would be required. Pursuant to normal policy and site selection procedure an area was delineated bounded by Ross Avenue, Lamar Street, Pacific Avenue, Houston Street, Young Street, Preston Street, and Central Expressway as appropriate for the location of the new building, and during the period January 1 through January 20, 1957, proposals were solicited for the sale or donation to the United States of alternate ground areas of 40,000 square feet (minimum area required for extending 1114 Commerce Street building), or 75,000 square feet (minimum area required for a separate new site). In response to this invitation 21 proposals were received, including one dated January 23, 1957 (submitted by W. W. Overton, Jr.) et al., guaranteeing that the costs to the United States of three tracts offered, each adjoining the 1114 Commerce Street building site and comprising areas of (1) 43,500, (2) 79,500, and (3) 89,500 square feet, would not exceed the amounts of $885,000, $1,655,000, and $2 million, respectively, and undertaking, if the Government selected one of those sites, to reimburse the Government for any acquisition cost in excess of the specified amounts, up to $200,000. The owners of the three sites mentioned did not submit proposals in response to the invitation.

It is stated that, following an inspection of the sites offered in response to the invitation for bids and other sites considered suitable but not offered, 3 sites were found to be outside the specified area and 15 were eliminated because of size, undesirability or unsuitability. This left four sites for further consideration, one of which was comprised of the several tracts stipulated in the guaranty offer; two more were alternote locations in one block, one of 75,000 square feet offered for $1,500,000 and the other of 173,541 square feet offered in exchange for the 1114 Commerce Street Building; and the fourth site, which was not offered, contained 73,250 square feet valued at $1,406,560. It is stated further that an analysis of the available sites and evaluation of all factors involved led to the conclusion that the most practical solution for resolving the matter of site selection was to erect the new building in the vicinity of 1114 Commerce Street, which would enhance the value of existing Government-owned building at 1114 Commerce Street and would provide a convenient location for Government employees and the public. The intention to so locate the building was first announced on October 3, 1957, at which time it was stated that the site would be selected in the near future on the basis of relative cost and desirability. Following further inspection of the competing locations, in the latter part of December 1957, there was selected as the site for the new building the tract of land immediately west of the 1114 Commerce Street Building, between Commerce and Jackson Streets and containing an area of approximately 58,000 square feet, and this selection was publicly announced in Dallas and reported in the local newspapers. It is explained, however, that this site—which was within the boundaries of the tracts designated in the guaranty offer received—was selected only after an understanding had been reached with the 14 local businessmen who had submitted the original guaranty proposal, whereby they agreed to pay all of the purchase price of the selected site in excess of $1 million.

It is reported that appraisals of the selected site totaling $1,334,100 and $1,527,500 were obtained by GSA; that thereafter purchase negotiations with the individual owners of the selected site on the basis of amounts not in excess of the appraised fair market values resulted in acquisition of lot 7, block 63, for the sum of $180,000; that since satisfactory proposals could not be obtained from the owners of the remaining eight lots the Attorney General, on October 31, 1958, was requested to institute condemnation proceedings; that on December 1, 1958, a declaration of taking was filed, at which time there was deposited with the court $1,130,600 as the estimated award. The guarantors have paid to GSA the sum of $310,000, representing the difference between the estimated cost deposited in court, plus the $180,000 paid for lot 7, and the Government's maximum obligation of $1 million under the guarantee agreement.

On the basis of the foregoing you ask us to furnish the following:

First. An opinion on whether or not the alleged bid by the syndicate was a proper responsive one, inasmuch as the syndicate was neither owner nor agent for the property it was offering to the Government.

Second. An opinion on the legality of this condemnation policy in which a private, profitmaking group offered the Government property it did not own and agreed to share the condemnation costs with the Government.

Third. The location and date of acquisition of all lands owned by the subject Dallas syndicate within the bounds cited in the invitation to bid in this matter.

Also, cite whether any of said lands were offered to the Government under this invitation to bid.

The solicitation for proposals as published in the Dallas Morning News on January 3, 1957, was "for the sale or donation to the United States of alternative sites for a Federal office building at Dallas." Owners were informed that they might submit their own proposals and proposals submitted by agents were required to be accompanied by documentary evidence of authority.

The original proposal submitted by the guarantee syndicate specifically stated that it was being submitted pursuant to the next to last paragraph of the solicitation for proposals, wherein the bidders were informed that the Government reserved the right, as its interest might require, to reject any and all offers, and that consideration would be given to sites other than those offered in response to the invitation and that a site deemed more advantageous to the Government than any site offered might be acquired by negotiation or condemnation. The proposal also specifically stated that the property adjoining the 1114 Commerce Street Building, which they urged should be purchased by GSA, would have to be acquired by or on behalf of the Government by negotiation or by condemnation proceedings, and that none of the parties submitting the proposal owned any of the land or any interest therein or had any authority as agent or otherwise to sell, offer for sale, or donate such land to the Government.

The original letter of guarantee attached to the guarantors' proposal was superseded by another letter of guarantee dated December 24, 1957, wherein the guarantors jointly and severally undertook to guarantee that the acquisition cost for the site selected by GSA for construction of the new building would not exceed $1 million, and, in the event the acquisition cost exceeded such amount, to pay to the Government or at its direction all sums in excess of $1 million necessary to acquire the full fee simple title to the property. By letter of February 28, 1958, referring to the letter of December 24, 1957, each of the guarantors was notified that the Government was actively beginning proceedings for acquisition of the proposed new site.

Regarding your first question, it is our view that the proposal submitted by the syndicate was not intended to be a bid in response to the advertisement. Rather, it was an offer that if the Government would select and asquire one of the sites specifically described in their proposal, the syndicate would pay any excess of the acquisition cost over the amount stipulated in the offer, to the extent of $200,000. Thus, it is clear that the syndicate did not offer to sell any site to the Government. Presumably, as you suggest, the guarantee offer was not made without some motive on the part of the guarantors, such as enhancement of the value of their own properties. However, there is nothing in the record to indicate that they would personally benefit in any manner different in nature from the benefits which would normally be expected to accrue to any owners of property in the vicinity of the site selected.

It has been held that a voluntary donation or contribution of cash may not be accepted by a Government official in the absence of specific authority (36 Comp. Gen. 268. However, we do not believe that the acceptance of the guarantee in this instance is legally objectionable, in view of the provisions of 40 U.S.C. 298a, under which the Administrator of GSA is authorized to accept on behalf of the United States unconditional gifts of real or personal property, or other property, in aid of any project or function within his jurisdiction. Although in this instance the offer of the gift was conditioned upon selection of a particular site by the Government, the gift itself was to be outright and absolute, and we do not interpret the word "unconditional" in the statute as preventing the acceptance of such an offer. Accordingly, in answer to your first question, it is our opinion that the proposal of the syndicate was not illegal from that standpoint, even though the syndicate or its individual members may stand to realize some indirect profit by the Government's acquisition of one of the sites forming the basis of the guarantee proposal.

Regarding your second question, as stated above, we do not consider that the syndicate offered the Government property it did not own. On the contrary, the syndicate's proposal specifically stated that none of the parties submitting the proposal owned any of the land suggested for selection as a site and that none of them had any authority as agent or otherwise to sell, offer for sale, or donate such land. The amended proposal as set forth in the letter of December 24, 1957, was submitted "in order to induce the United States * * * to select and acquire the hereinafter described property as a site for a Federal building." The proposal was made in consideration of selection and acquisition by the United States of one of the suggested sites. By guaranteeing that the acquisition cost of the property suggested "shall not exceed the sum of $1 million" the syndicate did, in effect, indirectly agree to share the condemnation costs with the Government, if such costs exceeded that amount. As we pointed out in the answer to the first question in view of the provisions of 40 U.S.C. 298a such a guarantee would not appear to be legally objectionable in the absence of other considerations even though the syndicate might profit from selection by GSA of one of the suggested parcels.

Because of the particular and unusual circumstances leading up to the selection of the site, it is understandable that the former owners of the property taken might question the propriety of the action taken. "Since a declaration of taking has now been filed in the U.S. District Court for the Northern Division of Texas, any question as to the legality of the taking which may arise out of the peculiar circumstances of the guaranty would appear to be one to be put in issue before the court for determination, since it has exclusive jurisdiction over all matters pertaining to the taking of the land." Your second question is answered accordingly.

As to question 3 our auditors have reviewed the Dallas County plat records showing the present ownership of property within the area included in the solicitation for proposals. The property ownerships of the numbers of the syndicate in the downtown Dallas area are set out on the attached sheet marked "Exhibit 1" and shown in green on the attached large map of the Dallas business district, marked "Exhibit 2." The areas outlined in red on exhibit 2 represent the sites offered under the solicitation. It is noted that lots 2 and 3 in block No. 352 are owned by Justin S. McCarty, one of the guarantors, and that this site was offered in response to the solicitation by William M. Alexander, as agent.

In examining the land records it was observed that, beginning near the end of the year 1955 and spring of 1956 and continuing through 1959, a large number of lots and parcels of land in the blocks to the north of the Commerce Street site were acquired in the name of S. P. Cimiotti, trustee. These sites are marked in red on exhibit 3 and it will be noted that several of such sites are immediately across Commerce Street from the site selected for the new Federal building. The deeds conveying title to the trustee did not disclose the names of the trustors or the purpose of the trust and we did not find a trust agreement on record. Attached as exhibit "4" is a list of the lots in question, which indicates the pages of the platbooks on which the transfers, and the dates thereof, are shown. Photostatic copies

from the Dallas County platbooks covering the area within the solicitation for proposals are also enclosed.

If any additional information or assistance should be desired concerning this matter we shall be glad to furnish same upon your request.

Sincerely yours,

JOSEPH CAMPBELL,
Comptroller General of the United States.

REPORT OF COMMITTEE TO INFORM THE PRESIDENT

Mr. McCORMACK. Mr. Speaker, your committee appointed to join a committee of the Senate to inform the President that the Congress is ready to adjourn, and to ask him if he has any further communications to make to the Congress, has performed that duty. The President has directed us to say that he has no further communication to make to the Congress.

SINE DIE ADJOURNMENT

Mr. McCORMACK. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 745) and ask for its immediate consideration.

The Clerk read as follows:

Resolved by the House of Representativse (the Senate concurring), That the two Houses of Congress shall adjourn on Thursday, September 1, 1960, and that when they adjourn on said day, they stand adjourned sine die.

The resolution was agreed to.

A motion to reconsider was laid on the table.

BUDGET REQUESTS AND APPROPRIATIONS FOR THIS SESSION OF THE CONGRESS

Mr. CANNON. Mr. Speaker, in conformity with the customary procedure at the close of the session I include statistical tabulations and related data summarizing actions by the 2d session of the 86th Congress on the appropriation bills.

The tabulation by bills is necessarily limited to those processed by the Committee on Appropriations through the annual appropriations bills and does not therefore reflect action on those parts of the President's budget recommendations disposed of through revenue bills or the "backdoor" appropriation bills processed outside regular appropriation channels, or other budgetary actions. Disposition of all these propositions and Executive revision of revenue collection and disbursement estimates—all these factors will join with action on the regular appropriation bills to influence the final Treasury position and the January budget prediction of a $4.2 billion surplus for the current fiscal year 1961.

Authoritative data as to final disposition of pertinent features of the record-breaking 1961 budget of the President will not be available for a few weeks, but we can summarize the action on the principal spending measures—the regular appropriation bills.

Mr. Speaker, the House has processed 19 bills during the session. Budget estimates of appropriations submitted to the House by the President in this session, and considered in bills from the Committee on Appropriations, totaled $73,613,979,421. These totals do not include the permanent appropriations recurring automatically under existing law without necessity of annual congressional action; the January budget estimate for these totaled $10,166,000,000, of which $9,500,000,000 was estimated for interest on our monstrous public debt. These latter amounts are likewise subject to some revision in the next several weeks based on information not presently available.

The Committee on Appropriations reduced the President's request for appropriations by $2,475,914,958, recommending a total of $71,138,064,463. With one major and two minor exceptions, every bill reported was below the amount the President asked us to appropriate in his record-breaking budget. The defense bill, reported before Khrushchev wrecked the summit meeting, was only nominally above the budget. But the Congress has developed a special addiction to excessive appropriations in the Labor-HEW bill in consequence of which it was reported out nearly $184 million above the President's suggestions.

Contrary to committee recommendations, the House added back a total of $209,374,500, so the bills went to the Senate at an aggregate of $71,347,438,963—the substantial amount of $2,266,540,458 below the budget estimates considered on this side of the Capitol.

The Senate, characteristically, went above the House totals by $3,796,071,712 and above the corresponding budget estimates of $73,845,974,490 by $1,297,536,185. They asked $75,143,510,675.

With the exception of some of the defense items and possibly a scattered handful of others, every Senate addition could have been dispensed with and we could have saved billions without impairment to essential services and programs.

But at the conference tables, the other body was so insistent that we were compelled to yield substantial amounts beyond the House position. In classic tradition the Senate continues to violate the constitutional intent sponsored by Madison who insisted the Senate should participate in the appropriations process so as to act as a brake on an impulsive and extravagant House.

But the situation operates in the reverse. They not only increase the regular appropriation totals drastically but last year and the year before, they originated some 12 Treasury backdoor measures totaling about $10 billion.

One of the most flagrant and recurring "backdoor" measures is the housing bill. The other body passed a bill this year carrying some $1,690 million in "backdoor" provisions, all above the budget, but it failed of final passage. A similar House bill also died.

On yesterday, the Senate attached to a minor and unrelated House bill two more "backdoor" housing provisions totaling $550 million above the budget. The House concurred without debate. This is a classic example of the evil of the "backdoor" technique—appropriating in the dark, and abdicating the initial appropriating powers of the House to the Senate.

Another "backdoor" bill, $300 million above the budget, involved direct veterans loans.

The periodic highway program, for years a "backdoor" feature operating under the contract authority device, was also enacted.

A summary of the major identified "backdoor" appropriation bills enacted during the session follows:

	Executive request	Enacted	Above Executive request
Housing (public debt borrowing authority):			
College loans		$500,000,000	+$500,000,000
Public facility loans	[1] $20,000,000	50,000,000	+30,000,000
Direct veterans loans (public debt borrowing authority)		[2] 300,000,000	+300,000,000
Total	20,000,000	850,000,000	+830,000,000

[1] The 1961 portion of a total of $100,000,000, which, under the Executive proposal, was to be subject to annual appropriation act control.
[2] For 2-year period.

Consequently, the bills sent to the President total $73,634,335,992, a net decrease of $211,638,498 below corresponding budget requests. We have made necessary upward adjustments in the defense bill following the wrecking of the summit conference, and we have indulged in excesses on some of the other bills, as every Congress does, but nevertheless, we have kept the appropriation bills below the total asked by the President in his record-breaking budget.

The outstanding item on the list of bills sent to the President is the $661 million increase in the defense bill. It is excessive because, like the budget, it appropriates for obsolete and wasteful weapons and defense concepts, although necessarily revised in some particulars.

Another significant bill in which we exceeded the budget—by $333,948,350—is the Labor-HEW bill. We have developed an addiction to increasing that bill far beyond amounts they can intelligently use.

The second supplemental bill—the last one adopted—is also significantly above the budget requests, as the following table shows.

The appetite of bureaucracy is insatiable. If their appropriations were doubled, or tripled, they would still ask more. Before the regular foreign-aid bill had been signed, they were insisting that the conference reductions be restored, notwithstanding the regular bill was nearly $500 million above the previous year. And the Senate complied to the extent of $190 million, notwithstanding they had, only a few days earlier, agreed to the amounts in the regular bill.

The tabulation by bills follows.

Final table of appropriation bills, 86th Cong., 2d sess.

[Does not include any "back door" appropriation bills. Also excludes permanent appropriations]

[1] Excludes permanent appropriations, estimated in 1961 budget at $10,166,000,000, which is subject to some revision.

NOTE.—Indefinite appropriations are included in this table.

So, Mr. Speaker, while we cannot for some weeks determine with precision the status of the session appropriations because of uncertainties involved, there are some salient statistics and data about which there are no uncertainties.

RECORD BREAKING BUDGETS

The law requires the President to make and submit the budget recommendations both as to taxes and appropriations. All fiscal recommendations start with the Executive. He makes the budget, not Congress. It includes only what he urges, what he approves, what in his judgment is necessary. He is by law required to recommend cuts in appropriations of any magnitude he feels is warranted and to recommend revisions of basic legislation to correspond. He is dutybound to recommend any changes in tax rates he believes justified—either up or down.

In the current fiscal year 1961 the budget exceeded all previous estimates. It proposed to take in $84 billion—the largest total ever requested, in war or peace.

They do not have to urge extension of war tax rates in time of peace—as in the 1961 budget and in every past budget from the administration. This alone accounts for much of the January budget surplus estimate—and I emphasize it—is only an estimate—of $4.2 billion. Every authoritative indication is that when the President officially revises revenue and spending estimates for fiscal 1961 in the next few weeks, the $4.2 billion will have vanished and only a nominal surplus, or even another deficit, will take its place.

When the Clerk read the President's budget message to the House last January, it was immediately apparent that the goals announced did not correspond to some features of the attached budget. And it disclosed beyond all challenge that this administration, after 8 years in office, has not and could not at such late date accomplish the laudable fiscal objectives promised in the 1952 and 1956 campaigns.

The January message urged restraint but in the same pages proposed to spend $1.4 billion more in 1961 than in 1960. Furthermore, the President had declared war on excessive spending. He was quoted:

I think every place we are spending too much money. * * * We must start right from the biggest and go right down to the smallest.

He decried what he termed "loose handling of our fiscal affairs." But the last budget submitted shortly thereafter proposed to spend more. And it also proposed increased appropriations, both large and small.

But, Mr. Speaker, so that there will be no doubt that the messages and pronouncements about economy and restraint on the one hand, and the budget estimates on the other hand, go in opposite directions, I submit several sets of official figures. They need little or no explanation. They speak for themselves.

APPROPRIATION INCREASES REQUESTED BY THE PRESIDENT

Although administered by the present administration, the 1954 budget was prepared by the previous administration. The fiscal 1955 budget, submitted in January 1954, was the first budget prepared and submitted by the present administration. From that budget to this budget, they have urged higher and higher appropriations each year as the following published figures on Presidential budget estimates considered in the appropriation bills disclose:

	President's budget estimates
83d, 2d (fiscal 1955 and prior)	$57,422,327,386
84th, 1st (fiscal 1956 and prior)	62,030,092,195
84th, 2d (fiscal 1957 and prior)	68,587,724,820
85th, 1st (fiscal 1958 and prior)	73,113,555,340
85th, 2d (fiscal 1959 and prior)	81,737,060,999
86th, 1st (fiscal 1960 and prior)	83,452,687,259
86th, 2d (fiscal 1961 and prior)	[1] 84,011,974,490

[1] Includes $10,166,000,000 January budget estimate for permanent appropriations, which is subject to some later revision, though not substantial.

Mr. Speaker, these are significant and revealing figures. And they are staggering. Imagine asking appropriations more than $26 billion above those proposed in their first budget. It is incredible. And it is billions away from repeated pledges and promises.

SPENDING INCREASES

The regular appropriation bills no longer fully disclose what goes out of the Treasury. We now have the backdoor bills and every other conceivable gimmick to get money out of the Treasury to avoid passing the acid test of annual appropriations review. The more fully informative and all-inclusive index to the trends are the amounts disbursed—whether from frontdoor, backdoor, sidedoor, or trapdoor appropriations. The ever-increasing amounts expended during the present administration are shocking. And the official Treasury figures are conclusive in the matter. Take the figures from July 1, 1953, the beginning of the fiscal year 1954, when they assumed full control of collecting and spending. Here they are, and interpretation of the trend is inescapable:

Budget expenditures

	Rounded amounts
Fiscal 1954 (from July 1953)	$67,800,000,000
Fiscal 1955	64,600,000,000
Fiscal 1956	66,500,000,000
Fiscal 1957	69,400,000,000
Fiscal 1958	$71,900,000,000
Fiscal 1959	80,700,000,000
Fiscal 1960	77,300,000,000
Fiscal 1961 (this is the January estimate; subject to revision)	[1] 79,800,000,000

[1] The President's estimates; subject to probable substantial upward revision, but these are his proposals. And for simplicity, expenditures from highway trust fund beginning with 1957 are excluded.

Net budget receipts, expenditures, and deficit (−) or surplus (+), 7 fiscal years 1954–60

[In billions]

Fiscal year	Net budget receipts	Net budget expenditures	Deficit (−) or surplus (+)
1. Fiscal 1954 (from July 1953)	$64.7	$67.8	−$3.1
2. Fiscal 1955	60.4	64.6	−4.2
3. Fiscal 1956	68.1	66.5	+1.6
4. Fiscal 1957:			
(a) Including highway trust funds	72.5	70.3	+2.2
(b) Excluding highway fund as per budget	71.0	69.4	+1.6
5. Fiscal 1958:			
(a) Including highway trust fund	71.2	73.5	−2.3
(b) Excluding highway fund as per budget	69.1	71.9	−2.8
6. Fiscal 1959:			
(a) Including highway trust fund	70.4	83.4	−13.0
(b) Excluding highway fund as per budget	68.3	80.7	−12.4
7. Fiscal 1960:			
(a) Including highway trust fund	81.0	80.3	+0.7
(b) Excluding highway fund as per budget	78.4	77.3	+1.1
Total, all 7 years:			
(a) Including highway trust fund	488.3	506.4	−18.1
(b) Excluding highway fund as per budget	480.0	498.2	−18.2

Mr. Speaker, can there be any question that these figures unerringly disclose failure to deliver on the promise of a $60 billion budget? Can they contend that these figures tabulating what they spent bear any resemblance to promised retrenchment?

DEFENSE AND NONDEFENSE SPENDING

There is a general tendency to explain these steadily increasing requests and phenomenal spending budgets as required by the necessities of national security and defense. But contrary to the general impression, the preponderance of increased spending is in the nondefense items, not the defense budgets. The following table serves to prove the excessive spending is in the nondefense items.

Net budget expenditures, defense and nondefense, 7 fiscal years, 1954–60

[In billions]

Fiscal year	Major national security		All other programs		Total net expenditures	
	Defense, military	Total	As per budget	Including highway trust fund	As per budget	Including highway trust fund
Fiscal 1953 (Korean war year)	$43.6	$50.4	$23.9	$23.9	$74.3	$74.3
Fiscal 1954 (beginning July 1953)	40.3	46.9	20.9	20.9	67.8	67.8
Fiscal 1955	35.5	40.6	24.0	24.0	64.6	64.6
Fiscal 1956	35.8	40.6	25.9	25.9	66.5	66.5
Fiscal 1957	38.4	43.3	26.1	27.0	69.4	70.3
Fiscal 1958	39.1	44.1	27.8	29.4	71.9	73.5
Fiscal 1959	41.2	46.4	34.3	37.0	80.7	83.4
Fiscal 1960	41.2	45.6	31.7	34.7	77.3	80.3

Net budget expenditures, defense and nondefense, 7 fiscal years, 1954–60—Continued

[In billions]

Fiscal year	Major national security		All other programs		Total net expenditures	
	Defense, military	Total	As per budget	Including highway trust fund	As per budget	Including highway trust fund
Fiscal 1961 (tentative; subject to revision)	[1] $41.0	[1] $45.6	[1] $34.2	[1] $37.1	[1] $79.8	[1] $82.7
Comparisons:						
(a) 1960 compared with last war year (1953)	−2.4	−4.8	+7.8	+10.8	+3.0	[2] +6.0
(b) 1960 compared with 1st year of present administration (1954)	+0.9	−1.3	[3] +10.8	[4] +13.8	+9.5	+12.5
(c) 1960 compared with 1st year showing surplus under present administration (1956)	+5.4	+5.0	+5.8	[5] +8.8	[6] +10.8	[7] +13.8

[1] Original January budget estimate of the President, subject to revision in next few weeks.
[2] Represents 8.1 percent increase over war year of 1953.
[3] Represents 51.7 percent increase over 1954.
[4] Represents 66.0 percent increase over 1954.
[5] Represents 34.0 percent increase over 1956.
[6] Represents 16.2 percent increase over 1956.
[7] Represents 20.8 percent increase over 1956.

NOTE.—Highway trust fund began with fiscal year 1957.

SEVEN-YEAR COMPARISONS

Mr. Speaker, it is pertinent to compare the condition of Treasury finances as administered in the last 14 years, 7 under the present administration—fiscal 1954 through fiscal 1960—and the immediately preceding 7 years—fiscal 1947 through fiscal 1953. The figures are official and are final. In 3 of the 7 years under the previous administration, we were at war in Korea.

The present administration has taken more taxes from the people than ever before.

The present administration has spent more of the people's funds; they have spent everything they took in and borrowed billions besides and spent that in addition.

The present administration has operated consistently in the red. They have not lived within the national income.

The present administration has raised the public debt to the highest point in the history of the Nation.

In consequence, the cost of living reaches a new record high practically every 30 days.

These official figures are submitted in substantiation:

7-year comparative figures on income, spending, deficits or surpluses, and debt changes

[In billions of dollars]

7-year tax rate, net budget receipts:	
Under present administration (fiscals 1954–60)	480.0
Under previous administration (fiscals 1947–53)	329.3
Present administration over previous	+150.7
7-year outgo, net budget expenditures:	
Under present administration (fiscals 1954–60)	498.2
Under previous administration (fiscals 1947–53)	335.0
Present administration over previous	+163.2
7-year deficits:	
Under present administration (fiscals 1954–60, all peacetime years)	−18.2

7-year comparative figures on income, spending, deficits or surpluses, and debt changes—Continued

7-year deficits—Continued	
Under previous administration (fiscals 1947–53, of which 1951–53 were war years in Korea)	[1] −5.7
Present administration over previous	+12.5
7-year changes in Federal public debt:	
Under present administration (July 1953 to July 1960—from $266.1 to $286.3 billion)	+20.2
Under previous administration (July 1946 to July 1953—from $269.4 to $266.1 billion)	−3.3
Present administration over previous	+23.5

[1] The net deficit during the Korean war years, fiscals 1951–53, was $9.9 billion. Thus, the 4 peacetime years, fiscals 1947–50, showed a net surplus of $4.2 billions.

NOTES: For simplicity here and so as to tie directly to official "budget" figures, amounts applicable to the highway trust fund for fiscals 1957–60 have been omitted.

THE PUBLIC DEBT

Mr. Speaker, the inevitable consequence of living beyond income is our stupendous national debt. It has been necessary to borrow from future generations to pay current expenses. When the present administration assumed full fiscal control, the debt was down to $266,100 million from a world War II high of $279,213 million. But on last December 2 it reached the highest point since the Republic was founded—$292,707,614,012.11.

The Federal debt now represents about $1,600 for every man, woman, and child in America. If State and local debt is included, the per capita figure approximates $2,000.

They have increased the debt by $20,200 million in 7 years, and that in a period of recordbreaking tax takes. Spending more than income, the President has asked Congress, on seven successive occasions, including this year, to raise the old debt ceiling. Failure to live within income has forced step-by-step, piecemeal conversion of the so-called temporary ceilings into permanent status.

Here are the condensed figures:

The public debt—7 fiscal years

[In billions]

1. Actual increase, 7 fiscal years (1954–60):	
July 1953	$266.1
July 1960	286.3
Increase in the 7 years	+20.2

NOTE.—Old statutory limit of $275 billion raised as follows:

For fiscal 1955 by $6 billion (temporary).
For fiscal 1956 by $6 billion (temporary).
For fiscal 1957 by $3 billion (temporary).
For fiscal 1958 by $5 billion (temporary).
For fiscal 1959 by $8 billion (permanently to $283 billion); $5 billion (temporarily to $288 billion).
For fiscal 1960 by $10 billion (permanently to $285 billion); $10 billion (temporarily to $295 billion).
For fiscal 1961 by $8 billion (temporarily to $293 billion).

With the inflationary pressures and decline in popularity of Government bonds attending the profligacy of living beyond income, the cost of borrowing and refinancing the debt has risen phenomenally. It is incredible but true that, without the Congress turning a hand, interest cost on the debt in fiscal 1960 was estimated $1,700 million above the actual fiscal 1959 cost. That was the estimate. It actually cost $1,589 million more than in 1959. I include pertinent data:

Interest on the public debt

1. The debt:	*Billion*
June 30, 1959	$284.7
June 30, 1960	286.3
2. Interest on the debt:	***Million***
Fiscal 1959	$7,592
Fiscal 1960	9,181
(Increase of $1,589 million, fiscal 1960 over fiscal 1959.)	
Fiscal 1961 (estimate in January budget)	[1] 9,500

[1] Tentative; subject to revision.

3. In the fiscal year 1960 just closed June 30 last, interest on the debt averaged $25,153,425 every day, $1,048,09 every hour, $17,468 every minute.

4. In fiscal year 1961, interest on the debt is estimated in the January budget to average $26,027,300 every day, $1,084,400 every hour, $18,000 every minute.

COST-OF-LIVING INCREASES

The inevitable result of inflationary spending is to hike the cost of food, clothing, housing, and all other items entering into the cost of living. The official index has been registering new highs for the cost of living and new lows for the value of the dollar nearly every 30 days as the following chart indicates:

And our gold reserves have been steadily dwindling as foreign claimants demand gold instead of dollars in settlement of accounts. Our reserve is now at $19 billion, down $600 million from a year ago. Potential claims and required reserves now exceed our supply. Confidence in the dollar has steadily deteriorated.

Consumer Price Index and purchasing price of the dollar

	Consumer Price Index (1947–49=100)		Purchasing power of the dollar [1] (calendar year 1939=100)

RECORDBREAKERS

To summarize these documented facts, Mr. Speaker, every breakable record has been broken in the last 7 years.

The President's budget has set several records on tax take—this 1961 budget of $84 billion in revenues is the highest ever known in war or peace. It tops them all.

The administration set a peacetime spending record in fiscal year 1959 when they dished out $80.7 billion.

They set a peacetime record last year when they asked for appropriations of $83.4 billion. They are breaking that record this year.

They set another record when the public debt reached the highest point ever attained—in war or peace—last December 2—$292.7 billion.

The cost-of-living index reached an alltime high only last month, and every indication points to still further high-water marks.

The purchasing power of the dollar hit a new low only last month—down to 46.9 cents.

Any way you measure the situation, any way you compare the record, the facts lead to the same inescapable conclusion: In the last 7 years, the laudable objectives, the promises and pledges have not been met, cannot be met, and will not be met.

AUTHORITY TO SIGN ENROLLED BILLS AND JOINT RESOLUTIONS

Mr. McCORMACK. Mr. Speaker, I offer a House concurrent resolution (H. Con. Res. 746) and ask for its immediate consideration.

The Clerk read as follows:

Resolved by the House of Representatives (the Senate concurring), That notwithstanding the sine die adjournment of the two Houses, the Speaker of the House of Representatives and the President of the Senate be, and they are hereby, authorized to sign enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING OF HOUSE RULES AND MANUAL

Mr. McCORMACK. Mr. Speaker, I offer a resolution (H. Res. 644) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That a revised edition of the Rules and Manual of the House of Representatives for the 87th Congress be printed as a House document, and that 1,600 additional copies shall be printed and bound for the use of the House of Representatives, of which 700 copies shall be bound in leather with thumb index and delivered as may be directed by the Parliamentarian of the House for distribution to officers and Members of Congress.

The resolution was agreed to.

A motion to reconsider was laid on the table.

REPORTS OF COMPTROLLER GENERAL OF THE UNITED STATES

Mr. McCORMACK. Mr. Speaker, I offer a resolution (H. Res. 645) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That, notwithstanding the sine die adjournment of the House, reports of the Comptroller General of the United States made to the Congress pursuant to the Government Corporation Control Act (31 U.S.C. 841 et seq.), shall be printed during such adjournment as House documents of the second session of the 86th Congress.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CLERK AUTHORIZED TO RECEIVE MESSAGES FROM SENATE

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that notwithstanding the sine die adjournment of the House, the Clerk be authorized to receive messages from the Senate.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

AUTHORIZING THE SPEAKER TO ACCEPT RESIGNATIONS, AND APPOINT COMMISSIONS, BOARDS, AND COMMITTEES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that notwithstanding the adjournment of the 2d session of the 86th Congress, the Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PRINTING OF REPORTS FILED BY INVESTIGATING COMMITTEES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that reports filed with the Clerk following the sine die adjournment by committees authorized by the House to conduct investigations may be printed by the Clerk as reports of the 86th Congress.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

GENERAL LEAVE TO EXTEND

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that all Members of the House shall have the privilege, until the last edition authorized by the Joint Committee on Printing is published, to extend and revise their own remarks in the CONGRESSIONAL RECORD on more than one subject, if they so desire, and may also include therein such short quotations as may be necessary to explain or complete such extensions of remarks; but this order shall not apply to any subject matter which may have occurred, or to any speech delivered, subsequent to the adjournment of Congress.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

EXTENSION OF REMARKS BY COMMITTEE CHAIRMEN AND RANKING MINORITY MEMBERS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the chairmen of all the standing committees and subcommittees of the House may extend their remarks up to and including the publication of the last RECORD and to include a summary of the work of their committees; also that the ranking minority member of such standing committee or any subcommittee may have the same permission to extend their remarks and to include a summary, if they desire, from their point of view, separately from that of the chairman.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

MANAGERS OF TELEPHONES, HOUSE OF REPRESENTATIVES

Mr. McCORMACK. Mr. Speaker, I offer a House resolution (H. Res. 646) and ask unanimous consent for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That effective September 1, 1960, the positions of Assistant Floor Manager of Telephones (one minority) shall be at the basic rate of $4,500 per annum. The additional sums necessary shall be paid from the contingent fund of the House until otherwise provided by law.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, until recently there has been a basic pay differential of not to exceed $1,000 in the salaries paid the majority and minority managers of telephones and the assistant majority and minority managers of telephones in the House of Representatives.

The present basic salary paid the majority and minority managers is $5,500 while the basic salary currently paid the assistant majority and minority managers is $3,800, a difference of $1,700.

The assistant floor managers of telephones are the lowest paid of the House floor employees and had their last pay raise in July of 1955.

There was an understanding with the minority assistant manager of telephones that upon his completion of active military service and his return to work in January 1959, an adjustment in compensation would be made.

The proposed basic increase to equalize the above-mentioned salaries would be $700, an increase in basic pay from $3,800 to $4,500 for the assistant majority and minority managers of telephones.

EMPLOY THE HANDICAPPED—A TRIBUTE TO PAUL A. STRACHAN

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, a few days ago the Post Office Department issued a stamp designed to attract attention to the effort of the "Presidents' Committee on Employ the Physically Handicapped."

The idea of such a Committee was born in the fertile brain of Paul Strachan, who himself is deaf, and therefore one of those he wanted to keep.

A resolution was passed by the Congress to provide for the Presidents' Committee and for purposes of administration it was placed in the Department of Labor. It functions there now. The resolution provides that the first week in October of each year be designated by the President as "National Employ the Physically Handicapped Week."

This movement conceived by Paul Strachan, has met with such success and today many thousands of handicapped persons are gainfully employed. They have been proven to be efficient workers when assigned to duties they can perform.

Paul Strachan is now retired and living in Florida but he still retains his interest in the handicapped.

As this special stamp goes on sale throughout the Nation I wish to pay tribute to Paul Strachan whose vision and determination has so greatly benefitted those having physical disabilities. Because of his efforts they were helped and the Nation has found a new source of manpower.

Let us never forget Paul Strachan who fought the good fight for those who needed the chance—his efforts will live forever.

Handicapped persons everywhere are deeply indebted to Paul Strachan for his untiring work throughout the years in their behalf. He was the leader for many years in the passage of legislation in their behalf. It was my pleasure, with other Members, to cooperate with him. His whole life has been dedicated to the cause and best interests of the poor, the afflicted, the underprivileged, the exploited, and particularly those with permanent physical disabilities and illnesses.

Paul Strachan is one of the finest and noblest minded persons I have ever met.

In his retirement I wish for Paul Strachan every happiness and success in the years that lie ahead for him.

EXTENSION OF REMARKS BY COMMITTEE CHAIRMEN AND RANKING MINORITY MEMBERS

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HARRIS. Mr. Speaker, I should like to ask a clarifying question of the gentleman from Massachusetts, the majority leader. A unanimous-consent request was made a moment ago that the chairman of all committees and the ranking minority members thereof might have permission to file certain statements as to the activities of the committees, and so forth. Do I correctly understand that if that is done, now, the latest procedure is that the Government Printing Office will not print a pamphlet on the same subject matter? There was a statement to that effect in the RECORD day before yesterday.

Mr. McCORMACK. I am sorry, I am unable to answer the question. Perhaps the chairman of the Committee on House Administration can answer it.

Mr. BURLESON. That is a rule adopted by the Joint Committee on Printing.

Mr. HARRIS. That you can file for RECORD the committee activity report, but if you do you cannot get a printed pamphlet of it, as we have heretofore, for distribution? On the other hand, we can get the printed pamphlet for distribution, but if we do we cannot put it in the RECORD? Is that what I am to understand the gentleman's announcement is?

Mr. BURLESON. That is correct. I am not too sure I follow the gentleman in every implication, but the rule is simply that a duplication is not permitted. One or the other is acceptable.

Mr. HARRIS. Heretofore we have been able to do that, and I think it has been a very fine procedure, because each Member who desires it has a printed pamphlet he can use, instead of having to take the CONGRESSIONAL RECORD around in his hip pocket, which is not very convenient. It seems to me it is a rather unusual procedure that you cannot in this way meet the convenience of the Members of the House, and I do not understand it.

Mr. BURLESON. I think the gentleman will find that was a rule adopted in the 85th Congress.

Mr. HARRIS. In my own experience it was not applicable to my committee, because I put it in the RECORD and had pamphlets printed, too.

Mr. BURLESON. Perhaps no one challenged the gentleman.

Mr. HARRIS. May I say to the distinguished majority leader that I think consideration should be given to changing the rule.

TABLE OF APPROPRIATION BILLS, 86TH CONGRESS, 2D SESSION

Mr. TABER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TABER. Mr. Speaker, the following table shows the fiscal estimates for the present Congress and the appropriations and the amounts that each bill is above or below the budget:

Table of appropriation bills, 86th Cong., 2d sess.

Bill No.	Title	Budget estimates	Final action, amount as approved	Increase or decrease compared to budget estimates
	1960 APPROPRIATIONS			
H.J. Res. 621	NASA supplemental	$23,079,000	$23,079,000	
H.R. 10743	2d supplemental	1,018,504,888	955,370,000	−$63,134,885
H.J. Res. 765	Labor supplemental	8,000,000	6,000,000	−2,000,000
	1961 APPROPRIATIONS			
H.R. 10233	District of Columbia	(242,403,000)	(239,470,433)	(−2,932,567)
	Loan authorization	(18,700,000)	(20,100,000)	(+1,400,000)
	Federal payment	31,533,000	27,533,000	−7,000,000
H.R. 10234	Commerce	799,615,000	729,624,375	−69,990,625

Table of appropriation bills, 86th Cong., 2d sess.—Continued

Bill No.	Title	Budget estimates	Final action, amount as approved	Increase or decrease compared to budget estimates
	1961 APPROPRIATIONS—Continued			
H.R. 10401	Interior	$550,330,300	$557,667,600	+$7,337,300
H.R. 10569	Treasury-Post Office	4,897,853,000	4,841,914,000	−55,939,000
H.R. 11389	General Government	14,627,500	14,207,500	−420,000
H.R. 11390	Labor-HEW	4,020,221,981	4,354,170,331	+333,948,350
H.R. 11666	State-Justice-Judiciary	733,030,395	705,032,567	−27,997,828
H.R. 11776	Independent offices	8,417,397,000	8,311,893,400	−105,503,600
H.R. 11998	Defense	39,335,000,000	39,996,608,000	±661,608,000
H.R. 12117	Agriculture	4,135,263,190	3,994,097,600	−141,165,590
	Loan authorizations	(367,000,000)	(577,000,000)	(±210,000,000)
H.R. 12231	Military construction	1,188,000,000	994,855,000	−193,145,000
H.R. 12232	Legislative	133,413,485	129,470,410	−3,943,075
H.R. 12326	Public works	4,013,793,180	3,969,982,485	−43,810,695
H.R. 12619	Mutual security	4,281,704,000	3,722,350,000	−559,354,000
H.R. 12740	Supplemental	169,327,840	138,293,740	−31,034,100
H.R. 13161	2d supplemental	72,280,731	162,186,981	+89,906,250
	Total, 1961	72,796,300,602	72,649,886,989	−146,503,613
	Total, all bills	73,845,974,490	73,634,335,992	−211,638,498

This table shows on its face value a reduction of $211,638,498, but that is not the whole story. Backdoor appropriations show in the following table the total $850 million, and make the record bad: An increase of $830 million over the budget:

	Executive request	Enacted	Above Executive request
Housing (public debt borrowing authority):			
College loans		$500,000,000	+$500,000,000
Public facility loans	[1] $20,000,000	50,000,000	+30,000,000
Direct veterans loans (public debt borrowing authority)		[2] 300,000,000	+300,000,000
Total	20,000,000	850,000,000	+830,000,000

[1] The 1961 portion of a total of $100,000,000, which, under the executive proposal, was to be subject to annual appropriation act control.
[2] For 2-year period.

This makes the overall total of appropriations $74,464,335,992, and the amount of $618,369,502 above the budget.

THE FATE OF H.R. 5132, THE RESERVE OFFICERS' INCENTIVE ACT OF 1959

Mr. RIVERS of South Carolina. Mr. Speaker, I ask unanimous consent to revise and extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS of South Carolina. Mr. Speaker, I wish to take this opportunity to call the attention of the House to the action taken by the other body in respect to H.R. 5132.

H.R. 5132, otherwise known as the Reserve Officers' Incentive Act of 1959, was passed unanimously by this body on the 20th of March 1959.

The purpose of this House-passed legislation was to provide Reserve officers on active duty with some degree of career stability. Every Member of this body should realize that approximately 60 percent of all officer personnel on active duty with the Armed Forces are Reserve personnel. Despite this fact, only so-called Regular personnel are provided any reasonable degree of career security. Thus, these Regulars are, for practical purposes, assured the right to remain on active duty for a period of time sufficiently long to enable them to achieve immediate retirement benefits. For those Regulars, who, because of one reason or another, are involuntarily released prior to reaching this important objective, the law provides a substantial severance payment in the amount of 2 months' pay for each year of active duty performed by them.

On the other hand, their Reserve contemporaries, who can be distinguished from the Regulars only by virtue of their categorization as "Reserves," have no similar assurances. However, they are presently provided, under certain limited circumstances, a so-called readjustment payment equivalent to one-half month's pay for each year served on active duty, if released prior to achieving retirement eligibility.

The net result of this inequitable difference in military personnel management is the fact that out of a total of 325,000 officers presently on active duty, each year there occurs a junior officer turnover affecting approximately 90,000 officers. This turnover in junior officer personnel generates fantastic training and personnel costs which could, in large part, be eliminated by persuading these young Reserve officers to continue on extended active duty for another 4 to 10 years.

I need not bore you with the tremendous implications of these facts. However, it should be apparent that despite the obvious and pressing requirement for short-term career junior officers in the armed services, the Defense Department has been unable administratively to provide adequate incentives to retain these Reserve personnel on extended active duty beyond their periods of obligated service.

The Cordiner committee, which made an extensive study of this problem, recommended corrective legislative action. The Defense Department, after much prodding from the House Committee on Armed Services, finally forwarded to the Congress a legislative proposal which was designed to correct this difficulty.

The subcommittee of which I am chairman exhaustively studied this proposal. Upon conclusion of our analysis of the problem and the recommendations of the Department of Defense, both our subcommittee and the full Committee on Armed Services concurred, for practical purposes, in the legislative proposal of the Department of Defense. The House action on the 20th of March 1959 indicated the support of this action by this body.

Briefly, the proposal, as embodied in H.R. 5132, contemplated that in the future every Reserve officer on active duty beyond his 2-year period of obligated service, would be provided a written contract prescribing his period of future service together with a provision which would assure him, upon completion of the contract, of a bonus payment of 2 months' pay for each year of service performed under the contract.

Simply stated, it would guarantee him a bonus equivalent to that provided a Regular released under similar circumstances. However, more importantly, it would recognize in advance the short-term nature of the reservist's career, and both the reservist and the military would be in a position to plan intelligently for the future.

Unfortunately, the Senate, apparently because of the press of business, took no action on this House-passed bill, H.R. 5132, until late yesterday when it passed H.R. 5132 with an amendment.

The action taken by the Senate strikes all after the enacting clause and substitutes a simple increase of one-half month per year in the readjustment pay provided Reserve officers who are involuntarily separated from active duty.

In view of this significant change made by the Senate there exists an obvious and pronounced difference of opinion between the House and the Senate on the proper legislative approach to this problem.

I regret exceedingly the action of the Senate on H.R. 5132.

It must be apparent to all that a reasonable conference on the divergent views expressed in the House and Senate versions of this legislation, because of the lateness of the hour, is impossible.

I am of the firm conviction that acceptance of the Senate amendment by the House would do nothing more than result in a great disservice to all Reserve officers who are now, or may in the future, be on active duty. Such action would almost certainly preclude the possibility of the development of the passage of this absolutely essential legislation during the coming session.

Under these circumstances, I have no alternative but reluctantly to recommend that the House permit this legislation to die.

To accept the Senate amendment would be a capitulation that I am un-

willing to make. I cannot possibly recommend to any colleagues in this House that they become a party to an action that would be a grave disservice to thousands of loyal Reserve officers now serving their country in uniform.

THE DISTURBED FARMERS OF THE CORN BELT

Mr. JENSEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. JENSEN. Mr. Speaker, it is now crystal clear that the Democrat-controlled Committees on Agriculture of both Houses of this Congress are not one whit concerned about the distressed farmers of the Corn Belt.

They have refused to bring a bill of any nature for the relief of our Midwest farmers to the floor of either House during this extended session of Congress, not even a bill to extend the conservation reserve section of the Soil Bank Act, which expires next December 31, irrespective of our urgent sincere pleadings, which leaves our farmers in a most uncertain situation.

The Democrats think it is good politics for them. I say it is downright dirty politics at the expense of our farmers.

RELIEF OF CERTAIN ALIENS

Mr. WALTER. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the resolution, House Joint Resolution 721, with amendments of the Senate thereto, and disagree to the amendments of the Senate.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, strike out all after line 2 over to and including line 2 on page 2.

Page 2, line 3, strike out "SEC 2. For" and insert "That, for".

Page 2, line 8, strike out "3" and insert "2".

Page 2, line 13, strike out "4" and insert "3".

Page 2, strike out all after line 17 over to and including line 2 on page 3.

Page 3, line 3, strike out "6" and insert "4".

Page 3, line 5, strike out "Lorne" and insert "Loene".

Page 3, line 8, strike out "7" and insert "5".

Page 3, after line 17, insert:

"SEC. 6. For the purposes of sections 101(a)(27)(A) and 205 of the Immigration and Nationality Act, Kim Hyoung Geun shall be held and considered to be the minor natural-born alien child of Mr. and Mrs. Burlin B. Hamer, citizens of the United States."

Page 3, after line 17, insert:

"SEC. 7. For the purposes of the Immigration and Nationality Act Maria Luisa Martinez, Angel Ardaiz Martinez, Franciszek Roszkowski, Stamatis Zeris, Andros Szasz, Matias T. Falcasantos, Eduardo Giron Rodriguez, Cesar S. Wycoco and Kyung Ok Ahn shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fees. Upon the granting of permanent residence to each alien as provided for in this section of this Act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available."

Page 3, after line 17, insert:

"SEC. 8. For the purposes of the Immigration and Nationality Act, Man-Yeh Chow shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act. The number of refugees to whom permanent residence in the United States may be granted under the provisions of section 6 of the Refugee Relief Act of 1953, as amended, is hereby reduced by one."

Page 3, after line 17, insert:

"SEC. 9. Notwithstanding the provisions of section 212(a)(9) of the Immigration and Nationality Act, Janis Papulis may be issued a visa and be admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that Act: *Provided*, That the exemption provided for in this Act shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this Act."

Page 3, line 18, strike out "8" and insert "10".

Page 3, line 18, after "of" where it appears the second time, insert "sections 1 through 6 of".

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Senate amendments were disagreed to.

A motion to reconsider was laid on the table.

OPERATION VERACITY

Mr. RHODES of Arizona. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. RHODES of Arizona. Mr. Speaker, my colleague from Connecticut, CHESTER BOWLES, has disappointed me three times this week. First, I was disappointed at his failure to appear in response to my invitation to discuss Operation Veracity openly with me on the floor of the House on Monday. On Tuesday I was similarly disappointed. Now a statement has been issued in the name of Mr. BOWLES purportedly dealing with Operation Veracity. It is so replete with name calling and smear attacks that I have difficulty in identifying the authorship with my distinguished colleague. I cannot believe that a man with the fine reputation enjoyed by Mr. BOWLES could have authored such a statement.

The release attributed to the gentleman from Connecticut completely ignores the untrue statements in the Democratic platform which were pointed out and proved to be false by Operation Veracity. Instead, it has aimed a low blow at an operation which the Republican Members of the House have tried to conduct, and I believe have succeeded in conducting, on a high ethical and moral plane.

Lawyers have a saying that "if the law is against you, talk about the facts; if the facts are against you, talk about the law; if both are against you, talk about the opposing counsel." Since Mr. BOWLES can find no comfort in a study of the merits of Operation Veracity, he has chosen to center his attack on personalities. I had expected better of him.

DALLAS LAND ACQUISITION

The SPEAKER. Under previous order of the House, the gentleman from Texas [Mr. BROOKS] is recognized for 15 minutes.

Mr. BROOKS of Texas. Mr. Speaker, the matter of the Dallas land acquisition by the Government was brought up by our distinguished colleague from the city of Dallas. I was shocked that he would bring up a matter of this kind, and I will tell you why. We talked about a news release here today but we never did get down to why it had been issued. Concisely, the problem is this: The Government Operations Subcommittee is interested in a bipartisan study of the efficiency and economy in Government land acquisition. We have tried to be fair to Republicans and Democrats. We do our best to consistently follow the spirit and the letter of the rules of the House and the Government Operations Committee. We have investigated land acquisitions in Republican districts and in Democratic districts when buildings were being built and when they were finished and when they were being started. The reason our subcommittee got into this particular acquisition is this: I will tell you concisely. We got letters from people in Dallas complaining that they were victims of unfair treatment. Some of them were not wealthy and some of them pretty wealthy. I will read this one letter to you quickly that we received from one of these people whose land was taken away under this circumstance: That adjacent property owners would pay the Government everything in excess of a given amount which it would cost the Government. The person who wrote this letter was one of those whose property was seized through this odd Government policy, which places the Government in virtual partnership with a private syndicate in exercising the Federal right of eminent domain.

This, to my mind, is selling the right of eminent domain, which the U.S. Government has as a sacred trust, to the high bidder, in this case the adjacent landowner who will benefit and profit from the building of a $43 million Federal Government building on the site that they help to pay for, and to take away property at the same time from other people. This is not fair and I want to point it out.

I received this letter from a person in Dallas, and I want to read it to you here:

DALLAS, *February 20, 1960.*

HON. JACK BROOKS,
New House Office Building,
Washington, D.C.

DEAR CONGRESSMAN BROOKS: I am enclosing a tear sheet of the Dallas Morning News with story pertaining to the new Federal Center site. I am a widow in my later years and my husband bequeathed to me one-half

interest in three parcels of property on Commerce Street, which parcels of property have been incorporated in the new Federal Center.

My properties were sold out from under me, as I never gave my consent to offer my properties as part of a Federal Center site, nor was I ever approached regarding same.

A syndicate of wealthy men in Dallas offered my properties, and also, without my consent, priced my property to the Government.

Please permit me to protest against the acquisition procedures, which I believe to be unfair and perhaps illegal. I heartily endorse a full investigation of all the facts. Thank you for your kind efforts and interest in seeing that justice is done.

Yours truly,

MRS. ESTHER ZWEIG.

I think this letter speaks with simple eloquence of how one victim, in this case an elderly widow, feels about the method the Government used in taking her property. How could we fail to heed the cry for help of this abused citizen and not persist in our investigation?

Now, gentlemen, this is what the true problem is: This 14-man syndicate, by its own contract, said that this contract was to induce the Federal Government to select this site nearby to a reported $14 million worth of their own property. As a part of the inducement they said in their guarantee contract with the U.S. Government:

We will pay all the money it costs the Government to acquire this land in excess of $1 million.

The GSA reported the syndicate has paid into the U.S. Government $310,600 as their inducement to the Government to buy this particular site. If there is any doubt about whether that was the basis for the selection of the site, I quote to you from a letter from the Administrator of the General Services Administration, who said in his letter to me of February 24, 1960:

This site was selected only after an understanding had been reached with the 14 local businessmen who had submitted the above-mentioned offer, whereunder they agreed to pay so much of the purchase price of the selected site as exceeded $1 million.

Now, this is not a Dallas, Tex., issue. This is an issue which concerns all the people of this country. It is a precedent-setting policy which this Government and this Congress should not have. They do not want it; do not need it. It could set neighbor against neighbor all over this country from coast to coast and from Alaska to Hawaii. It means you can tell your neighbor: "I am going to get your land condemned, and I am going to profit from it; I will help pay for the condemnation. You will get just the same amount of money and the Government will get a little money and the Government will take your land and I will profit from it."

This study is no attack on any people of Dallas. We have been examining a Government contract which happens to concern land in that city. I would make this same statement and the same study if it was in anybody's district, including my own. We are interested in contractual facts, not in personalities or character assassination. If we have any accusations to make we make them openly, to a man's face.

I would add this one thing, that I believe if our friend from Texas, my colleague, would spend a little more time working with Republicans and Democrats in this Congress trying to get a $43 million Federal building built in his district, which is an admirable program—if he would work at that and not spend his time complaining about a legitimate investigation which is not trying to stop his building from being built, and has no effect on it, and use that complaint as a vehicle to get reelected, I think both the people of Dallas and he would be better off.

Mr. CURTIS of Missouri. Mr. Speaker, a point of order. I think the gentleman's words should be taken down as improper where he says that he was using this as a vehicle to get reelected.

However, Mr. Speaker, I will withdraw that if the gentleman will proceed properly.

Mr. BROOKS of Texas. I will point out that if I had a proposal to build a $43 million building in my district I would be working with the Republicans and the Democrats, and anybody who thinks that it would not help me get reelected is foolish.

Mr. CURTIS of Missouri. I withdraw the point of order, Mr. Speaker.

Mr. BROOKS of Texas. I think the issues have been stated. The real question is: Is it an ethical, moral, fair way of doing business for the Government to be paid by a third party to condemn the property of another party—especially when it raises the value of the third party's property.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. BROOKS of Texas. I yield.

Mr. HOFFMAN of Michigan. The gentleman is not charging the gentleman from Dallas [Mr. ALGER], with anything improper, is he? And had no intention of it; he is just giving him a little bit of good political advice.

Mr. BROOKS of Texas. I am just trying to help him, to be fair to him.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield for a little clarification?

Mr. BROOKS of Texas. I yield to the gentleman from Missouri.

Mr. CURTIS of Missouri. I think the gentleman from Texas has misconstrued the matter. There is no complaint about this subcommittee going into this investigation; quite the contrary, I know very well that the subcommittee is doing that. The question revolves around the subcommittee's action itself and whether or not there has been a violation, I may say, of the House rules, including issuing derogatory information about citizens of this country without the committee itself acting upon that information. Let me ask the question I wanted to ask.

Mr. BROOKS of Texas. Another question?

Mr. CURTIS of Missouri. Yes. The question I wanted to ask is this: After you received these letters requesting an investigation and started to proceed, did you call in the people on the other side so as to get their views in a hearing to find out what they had to say?

Mr. BROOKS of Texas. Yes; on February 8——

Mr. CURTIS of Missouri. No; I said after.

Mr. BROOKS of Texas. You asked me if we had. I will answer your question. You ask it, I will answer it. We got some letters, got some calls. We then held a hearing. We got some more letters. People felt they were being abused in that Dallas deal and they wanted us to help.

Mr. CURTIS of Missouri. What was the date of the hearing?

Mr. BROOKS of Texas. The date, I believe, was February 8, when we heard Mr. Karl Wallace, Public Buildings Commissioner from the GSA, and other GSA officials. The meeting was attended by two Republicans and two Democrats.

Mr. CURTIS of Missouri. The letter you wrote was after the hearing.

Mr. BROOKS of Texas. We got a letter after that. We got one before and we got one afterward.

Mr. CURTIS of Missouri. The question I asked was: Did you gentlemen after you got these letters complaining about the situation, and got the gravamen of their complaint, did the committee call people on the other side for a hearing?

Mr. BROOKS of Texas. There was no need to call anyone else. The agency making the contract was the focal figure in our study. The facts spoke for themselves. We got a complete report from the GSA, and we subsequently requested and obtained a detailed report from the General Accounting Office.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield further?

Mr. BROOKS of Texas. I yield for one further question.

Mr. CURTIS of Missouri. I just wish to clear up a point. The gentleman, then, is saying that the committee itself did not call any witnesses on the other side, that you relied simply upon the GAO report. Am I correct in that?

Mr. BROOKS of Texas. The committee has relied on undisputed factual evidence, substantiated by the General Services Administration and the GAO as to the actual terms of the contract under which the General Services Administration selected the site. A certain group had offered $310,600 as an inducement to the Federal Government. The terms of the contract were confirmed to us by the GSA and the GAO. There is no doubt about the facts; they are all contained in the contract. I have a copy of this contract before me right here.

Mr. CURTIS of Missouri. The gentleman is so wrong when he says that. Of course he should call the other side before issuing any statement.

Mr. ALGER. Mr. Speaker, will the gentleman yield?

Mr. BROOKS of Texas. I yield.

Mr. ALGER. All of us are interested in trying to protect the property owners. My question now is: Did the gentleman take into account the GAO report?

Mr. BROOKS of Texas. The gentleman took full account of the General Accounting Office report and quoted it extensively in his release because he wanted to be fair as to these facts about private people paying the Federal Gov-

ernment to condemn property other than their own. There is no doubt about that. The proposal was investigated. The people first offered $200,000. Then they proceeded to ante up the kitty a little to induce the Federal Government to take that site.

Mr. ALGER. Mr. Speaker, will the gentleman yield for another question?

Mr. BROOKS of Texas. I just want to read one more statement here. We never have alleged that this was actually a criminal procedure, and we pointed out in our release that the General Accounting Office said it was not illegal, but we do say it was an unwise procedure and that condemnation was such a touchy issue with people all over the country that it should not be unfairly exercised. To induce the Government to abuse the right of eminent domain is unpardonable.

Mr. ALGER. Will the gentleman yield for another question?

Mr. BROOKS of Texas. I yield for one further question.

Mr. ALGER. Does the gentleman feel that I am complaining about the Dallas building in order to build up some kind of a campaign issue? Is that what I understood the gentleman to say?

Mr. BROOKS of Texas. I do not know what the gentleman is trying to do.

Mr. ALGER. Let me restate it now. A Member of Congress was denied the General Accounting Office report at the gentleman's instructions; correct or incorrect?

Mr. BROOKS of Texas. Obviously, this is kind of foolish, but I will tell you what happened.

We have a very fine member of our committee who is a Republican, and he wrote me for the General Accounting Office report after the newspapers had asked for it. The subcommittee was studying it. It seemed like a reasonable thing to have one of my Republican colleagues request it. I wrote him a letter and sent him a copy of the General Accounting Office report. The staff administrator sent a copy to him, keeping the original in the subcommittee files.

The next day one of my other Republican colleagues I do not know as well, although he is from Texas, apparently went over to the subcommittee and demanded this out of the subcommittee. He wanted to get it, he said. The staff administrator of the subcommittee said something like "Well, I cannot let it out of here unless the chairman agrees, since there is only one copy left." I had given one away. This colleague came over and asked me yesterday afternoon in the Speaker's lobby.

Mr. ALGER. The gentleman is not answering my question.

Mr. BROOKS of Texas. He asked me could he borrow that original. I said "Did you not read the one I gave my friend from Michigan?" He said something such as, "I read it, but I am not satisfied. I want to see the original."

I said, "Do you not have a copy? The copy I sent my Republican colleague from Michigan is an exact duplicate. We got it from the Comptroller General." He sent me an original and a copy.

He said, "I want to read the original." I said, "All right, go over and read it until you turn blue, but you cannot have it because we have only one."

That is how that argument came about.

Mr. ALGER. Then the question is this: The gentleman's staff was instructed not to let anyone see it? That is the question.

Mr. BROOKS of Texas. I do not know.

Mr. ALGER. I asked your assistant.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. BROOKS of Texas. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. You never find me betraying a friend or doing a nasty, dirty trick.

The SPEAKER pro tempore. The time of the gentleman from Texas has expired.

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. BROOKS] may proceed for 5 additional minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. This is a very simple matter. I understand the gentleman from Dallas, a distinguished Texan, stated the issue, but the real question was whether or not Members were entitled to information, is that not it?

Mr. ALGER. I would say to the gentleman I tried to get that through in my earlier statement.

Mr. HOFFMAN of Michigan. The gentleman from Texas, Mr. ALGER, came to me because I happened to be the ranking minority member. I had no part in your investigation. I do not know whether it was good or bad.

Mr. BROOKS of Texas. Good.

Mr. HOFFMAN of Michigan. I assume the investigations were good because the gentleman did it. Mr. ALGER said he wanted to know about this. I think he said that some newspaperman wanted this report. I said that the law as I understand it is you can go ahead and get it. He could not get it. I got in touch with JACK BROOKS and he sent it right over to me. There was a stamp on there "not for publicity," or something of that kind.

Then the gentleman from Texas said or asked: "What have you got?" I said, "Here it is. JACK sent it over. This is it." He said, "I want to see it." I said, "The statute gives you the right to look at it." He said he asked JACK and he asked the Clerk, and he did not get it.

Then he came back to me and I gave him the copy he gave me. There is nothing wrong about that. Is that not a clear statement of the matter? When he asked for it you gave it to him.

Mr. BROOKS of Texas. Yes. He could read the copy I gave you.

Mr. HOFFMAN of Michigan. He wanted to look at the original.

Mr. BROOKS of Texas. Yes. He can read it again if he wants to.

Mr. HOFFMAN of Michigan. Yes. I will give it back to him. I do not care, I am not interested.

Mr. SMITH of Mississippi. Mr. Speaker, will the gentleman yield?

Mr. BROOKS of Texas. I yield to the gentleman from Mississippi.

Mr. SMITH of Mississippi. The gentleman from Texas [Mr. ALGER], in his remarks mentioned the gentleman from Alabama.

Mr. Speaker, will the gentleman yield?

Mr. BROOKS of Texas. I yield to the able and distinguished gentleman from Mississippi.

Mr. SMITH of Mississippi. The gentleman from Alabama came up and asked me to explain the situation in regard to the Public Works Committee. I think it should be pointed out that at the last meeting of the Public Works Committee one of the minority members of the committee, saying that he spoke in behalf of the gentleman from Texas [Mr. ALGER], raised the question that the gentleman from Texas [Mr. ALGER], was being persecuted because his project in Dallas had not been approved by the Public Works Committee. I think it is pretty obvious that the Subcommittee on Public Buildings has every reason in the world to hold up our determination of this project until these items are clarified. If the situation does not exist, it should be stated. It is pretty obvious it does exist. During the time when the gentleman from Texas [Mr. ALGER], has been a Member of the Congress, which happens to coincide with the existence of the present administration, the Public Works Committee has approved more public buildings in Dallas County than any other county in Texas. In addition, many other buildings have been built by Federal agencies that do not come under the jurisdiction of the Public Works Committee. And, I think it is within the realm of possibility that the gentleman from Dallas, who is the only pure politician in this entire august body of this House of Representatives, is trying to raise the idea that he is being persecuted, and he wants the citizens of Dallas County to send him back again so that he can stand stalwart as the 99.9-percent pure Member to resist all of us politicians who have ulterior motives.

Mr. BROOKS of Texas. Mr. Speaker, I yield back the balance of my time.

HALPERIN LOST HIS U.S. CITIZENSHIP

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Pennsylvania [Mr. WALTER] is recognized for 15 minutes.

Mr. WALTER. Mr. Speaker, it must have been a great shock to every citizen of the United States to find in the daily press a report on Maurice H. Halperin, a Communist and an agent of the international Communist conspiracy and of the Soviet Union, who, pursuant to a decision of the Supreme Court of the United States, has been issued a passport and is now working against the United States in Moscow by providing political and economical guidance to the Communist movement in Latin America, including Cuba.

The files of the Committee on Un-American Activities indicate in brief, that Maurice H. Halperin was born on

March 3, 1906, in Boston, Mass. He was a member of the Communist Party in Oklahoma prior to 1942 and a member of the Communist Party in Washington, D.C., from 1942 to at least 1944, whereupon, I might add, some stupid person, or a Communist, put him into the Office of Strategic Services.

Halperin, who refused to tell a congressional committee whether he is a Communist, entered Mexico on November 28, 1953, and has not returned to the United States. He was in contact with, and regarded as a leader of the American Communist colony in Mexico. This colony consists of Frederick Vanderbilt Field, Hugo D. Butler, Joan Abelson, George Pepper, Mr. and Mrs. David Drucker, Albert Multz, Bart and Edna Van der Shelling, Max and Nina Lieber, Mr. and Mrs. Phil Stein, Dr. Jake Levine, and until they fled to the Soviet Union, Mr. and Mrs. Alfred J. Stern—she is the former Martha Dodd.

According to an article which appeared in the September 2, 1957, issue of Ultimas Noticias, Halperin is reported to have facilitated the flight from Mexico of Albert K. Stern and Martha Dodd Stern, who were charged with espionage, by arranging passage for them to Prague, Czechoslovakia, under the name of "Escamilla."

As this House well knows, repeated attempts to have the Congress adopt passport legislation which would permit the Secretary of State to refuse the issuance of passports to identified Communists whose trips abroad would be damaging to the interest of the United States, have failed because of the resistance of a handful of Members of the other body.

Thus, legislation which would at least partially restore order where a 5 to 4 decision of the Supreme Court of the United States has exposed the United States to a clear and present danger, has—most regrettably—not been enacted.

However, it is my opinion that the ruling of the small majority of the Supreme Court of the United States in the *Kent* and *Briehl* case (357 U.S. 116) does not, in fact, deprive the Secretary of State of using his statutory powers in the field of passport issuance so as to prevent people like Halperin & Co. from roaming freely around the world and lending yeoman service to the Soviet Union.

The dissenting opinion written by the truly great jurist, Justice Clark, in which Justices Burton, Holland, and Whittaker concurred, clearly indicates where the Secretary of State could find statutory authority to deny passports to Communists without violating the constitutional principles upon which the majority of the Supreme Court of the United States based the Kent and Briehl decision. Briefly, the authority of the Secretary of State rests upon section 215 of the Walter-McCarran Act—Immigration and Nationality Act, title 8, United States Code, section 1185—upon sections 2 and 6 of the Internal Security Act—title 50, United States Code, sections 781, 785—and upon the discretionary nature of passport issuance itself, clearly stated in the basic passport law which is the act of July 3, 1926.

All the Secretary of State should do in order to have his authority restored after it was fractured by the Supreme Court of the United States, is to request the President of the United States to issue rules pursuant to section 1 of the 1926 act.

The continuing negligence displayed by the Department of State in obtaining such rules from the President, cannot be justified by the Department's reliance upon the enactment of new legislation. True, new legislation is highly desirable, but I wish to state emphatically that it is not necessary for the purpose of preventing the issuance of passports to Soviet agents.

However, there is a much more important task for the State Department to attend to immediately. According to a memorandum on Halperin prepared by the Department of State and printed on page 17792 of the CONGRESSIONAL RECORD of August 26, 1960, he has informed the U.S. Embassy in Moscow on July 15, 1960, that he is employed by the Soviet Academy of Sciences, directly subordinate to the Council of Ministers of the U.S.S.R. and therefore clearly a governmental institution of the Soviet Union.

There is no question that section 349 (a)(4) of the Walter-McCarran Act is applicable in Halperin's case. That section of the Immigration and Nationality Act provides that any person who is a national of the United States, whether by birth or naturalization, shall lose his nationality by accepting, serving in, or performing the duties of any office post or employment under the government of a foreign state, and so forth.

This is the same section of the law which, pursuant to my urging the Department of State, has applied to American citizens who have entered into the service of Cuba under Fidel Castro. I was glad to note that pursuant to my recommendations these persons were deprived of their U.S. citizenship, and certificates of loss of citizenship required by section 358 of the Walter-McCarran Act have been issued.

It is now the duty of the Department of State to draw the conclusions from it on findings and proceed immediately with the issuance of a certificate of loss of citizenship in the case of Maurice H. Halperin, thus automatically invalidating his passport.

The law is clear in that respect. The facts have been ascertained by Halperin's own admission that he has accepted employment from the Soviet Government. Action by the Department of State must be taken forthwith.

This, however, should not relieve the Department of State of their duty to look up the applicable law, passport, and nationality, at least from time to time, and make these laws work so as to prevent traitors from using American passports for the benefit of the Soviet Union.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. I am aware of the importance of the work in behalf of our country and our people that the distinguished gentleman from Pennsylvania and the other members of his committee are doing, because 26 years ago, as the gentleman from Pennsylvania well remembers, I was chairman of the committee that investigated communism, nazism, and fascism. Out of that investigation there came what is known as the Smith Act, the Foreign Registration Act, introduced by me, and other legislation.

The American people are deeply indebted to the sterling and courageous leadership of the gentleman from Pennsylvania [Mr. WALTER] and the other members of his committee for the great work they are doing and have done in detecting and exposing Communist activities and Communists not only in the United States but elsewhere throughout the world.

May I ask my friend, who in his position has such a profound knowledge of these activities, are the Communist activities in the United States increasing? Have they increased in recent months?

Mr. WALTER. The Communist has become encouraged, I think, by the apathy of the American people. I think this was dramatized by this very disgraceful performance out in San Francisco when a meeting of the Committee on Un-American Activities considering important legislation was almost broken up by a group of Communists who had encouraged some schoolchildren and college students to participate in this very disgraceful performance.

The thing that I think has encouraged those people to go on with their activities is the fact that the newspapers do not tell the entire truth about what occurred. The California newspapers, at least some of them, said that the Committee on Un-American Activities was responsible for the rioting by having these demonstrators removed from the building in which the hearings were being held. That is not the fact, and the people that wrote the stories know that it is not the fact. These rioters were removed from the building because the judges of the courts that were sitting at that particular time directed the police to clear the building so that the legal business could be conducted.

It just seems to me that these very clever foreign agents realized that somewhere they had friends, and that their activities are not exposed in the proper light. Of course, our committee is not interested in exposure for exposure's sake, but it is entirely impossible to conduct hearings without, of course, mentioning some things which expose operations of people who just do not like to have their activities discussed.

I am sure that the gentleman agrees with the Director of the Federal Bureau of Investigation that the small hard core of Communist agents is tougher and more encouraged at this moment than they were 5 years ago.

Mr. JOHANSEN. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Michigan.

Mr. JOHANSEN. I would like to ask my distinguished chairman of the Committee on Un-American Activities if in

substance the point he is making with respect to the handling by the State Department of the case he is discussing is not simply one that where there is a will to cope with these problems, there is an abundance of ways, and legal ways, in which to do it.

Mr. WALTER. Of course, there are. And in addition to that, from a practical standpoint, Mr. Halperin has applied for a renewal of his passport while he is in Moscow. Suppose the representative of the Department of State just refused to issue the passport. To what court would Mr. Halperin appeal in an attempt to have the Supreme Court ultimately direct the issuance of the passport? So from a practical standpoint, I just do not see why the Department of State here has announced they are powerless to prevent this Communist employee, and to all intents and purposes, citizen, from obtaining the protection that comes to the holder of a U.S. passport.

Mr. JOHANSEN. I would like to ask my distinguished chairman a further question as to whether in the whole area of combating communism and of standing firm against Communist countries, if in the final analysis the key factor of all is not the will on the part of the leadership of the Nation and on the part of the people?

Mr. WALTER. Of course it is, and I am sure that we must wake up or there will not be very much that can be done about it.

Mr. JOHANSEN. I associate myself with the chairman's statement.

Mr. WALTER. I thank the gentleman.

The SPEAKER pro tempore (Mr. MILLS). The time of the gentleman has expired.

ACTIVITY REPORT OF COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. HARRIS. I ask unanimous consent that I may be permitted to extend in the RECORD an activity report of the 86th Congress of the Committee on Interstate and Foreign Commerce.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

PRINTING IN PAMPHLET FORM ACTIVITY REPORT, COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that notwithstanding the announcement that was in the RECORD, I believe yesterday or the day before, that the activity report of the Committee on Interstate and Foreign Commerce of the 86th Congress may be printed in pamphlet form for distribution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. SPRINGER. Mr. Speaker, does that not also include within that report the report of the special subcommittee on legislative oversight?

Mr. HARRIS. No; it does not. It is the legislative activity of the Committee on Interstate and Foreign Commerce. We have all been interested in the equal time provision of broadcasting facilities of this country. The Members of the Congress have been very zealous of the equal time provision, that it be adhered to not only to letter of the law but in the spirit of the law.

I have sought information from my colleagues on many points that have been raised. I have had many requests made of me with reference to this particular part of the Communications Act of 1934. I have received many communications. Some of them are difficult to respond to. I have one today that I wish to call to the attention of the House and perhaps ask the advice of anyone who cares to offer it. This communication is from an outstanding radio and TV celebrity by the name of Groucho Marx. Groucho sends me a wire, as chairman of the Committee on Interstate and Foreign Commerce, and he proposes a problem dealing with discrimination and equal time. I would like to read this to the House at this time. It is from Los Angeles, and it states:

> As a stanch defender of equal time, I call to your attention the following wire sent to both Vice President RICHARD NIXON and Senator JOHN F. KENNEDY and request proper action of your committee. Wire follows:
>
> "Your announced scheduled appearance on the nationally televised Jack Paar show has prompted me to call to your attention that portion of Federal Communications Act relating to equal time in the matter of political campaigns. I feel your exclusive appearance on the Parr show is discriminating against me, since I have a show in many ways similar to the Paar show. In the interest of fair play to comedian interviewers, I ask that you consider a similar appearance at your earliest convenience on the Groucho show. There are many advantages. Since we are on the air at an earlier hour, our total listening audience is many times that of the Paar show. May I point out that any voter worth his salt is in bed asleep by 11 p.m. I promise you no commercials will interrupt your portion of our show. We could conduct our conversation either live, on tape, or film, the latter method allowing you complete freedom of editing. In the interest of equal time for myself and our large national audience, I respectfully request a reply at your earliest convenience."
>
> Regards.
>
> GROUCHO MARX.

And he is asking me to give this my attention. It does raise a question of equal time in a different light, and I solicit your advice as to how to answer this question.

SUGAR LEGISLATION

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Oregon [Mr. PORTER] is recognized for 30 minutes.

Mr. PORTER. Mr. Speaker, we have put sugar legislation on the backburner. I predict it is going to boil over and as it crystallizes, many people, perhaps Members of this House are going to be burned for not meeting their responsibilities.

There are two propositions that I want to discuss briefly in the closing hours of the Congress. First, the House should have an opportunity to discuss whether to give the President the power to cut the Dominican sugar quota. Second, the President should have been given that power.

What did we do in July? We passed the Sugar Act in the closing hours.

But we never once knew how it would work to give the Dominican Republic a multi-million-dollar bonanza. That point was never raised on the floor or elsewhere to my knowledge before by anyone on the committee or off.

What did we do the other day? I wonder how many here knew what we did day before yesterday when the sugar bill that passed the House was brought up with no advance notice, was brought up without an explanation and no discussion under unanimous consent. We did not consider what we were doing. There was no opportunity properly to consider it. I suppose we should have been diligent and known what the situation was, but we were not and were given no proper opportunity.

Then what happened? It went over to the Senate. The Senate added the President's request for full discretion to cut the Dominican allocation. I do not know why the administration did not take a strong position before the committee in the House with its problem. That is a mystery to me. The committee, I understand, was unanimous. More mystery.

Nevertheless this question has never been before this House for discussion of whether or not we should cut the added sugar quota for the Dominican Republic. We have never discussed it. I think we could disagree on whether or not we should give the President the unqualified power, but I do not believe any Member contends it was really discussed nor that we should not have an opportunity to discuss it on the floor. It was important enough that we should have discussed it. It should have had the full attention of this House.

Mr. GATHINGS. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I would like to finish my statement, but I will yield to the gentleman briefly.

Mr. GATHINGS. I agree with the gentleman wholeheartedly that the House should have been given the facts on this most vital issue. I appreciate the gentleman's taking this time to discuss this problem. I do not feel that we as an Agriculture Committee should have passed on such a far-reaching foreign policy as was done in this instance. It is the prerogative of the executive branch of Government.

Mr. PORTER. I thank the gentleman. His point is a good one. I agree with my able colleague, Mr. MORSE, the senior Senator from Oregon, who last night in the Senate said this was not a matter of dollars but a matter of foreign policy and a very important issue which certainly merited our full attention.

Mr. GATHINGS. Mr. Speaker, will the gentleman yield further?

Mr. PORTER. I yield.

Mr. GATHINGS. I just want to say that at the time the committee acted and reported out the bill that was brought here and passed by unanimous consent yesterday, it was the attitude of all those on both sides of the aisle in the committee that it represented the attitude and feeling of the President of the United States and the State Department. We felt that at the time. Later we learned that was not the case.

It is a serious mistake to adjourn this Congress sine die without taking action on sugar legislation. The President should be given the discretion he seeks. We should firmly support our Government's action taken recently in the Conference of Organization of American States. To fail to do so would be imprudent and unwise.

Mr. PORTER. I understand and I agree with my good friend from Arkansas. I am not sure that the solution adopted by the House—in good faith, I am sure—would have been workable.

The bill as amended did come back from the Senate. It went to the committee. The chairman of the committee—I do not see him on the floor, although I notified him about these remarks so that he could be here—had a meeting of the committee this morning. I understand the vote was 19 to 11 in the committee not to call it up, not to let us have any chance to talk about it here, not to let it go to conference.

Trujillo has been condemned officially by our Government. He was called in a Senate hearing by Under Secretary of State Dillon a torturer, a murderer, a tyrant. He was called a dictator by Secretary of State Herter down in San José. Now if we do not act we permit Trujillo to get $35 million for the extra sugar. We agreed to the Government imposing sanctions in accordance with the meeting at San José where Trujillo was condemned for his many crimes, but now we find that the law we are responsible for here makes it necessary to pay $35 million for sugar that otherwise I am told would not be sold by the Dominican Republic. We are giving him a $13 million or $14 million premium over the present world market price of sugar.

The world price for that sugar as of yesterday was 3¼ cents, but we will pay Trujillo a premium price of $13 to $14 million. So we will help this man Trujillo, whom we rightly and at long last condemn, and in spite of our agreement with the other nations of the hemisphere. We are doing one thing with one hand, and another with the other, but we do not discuss the question on the floor in connection with the legislation.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I would like to finish my statement.

Mr. ABERNETHY. The gentleman has asked some questions, and I would like to give him some answers.

Mr. PORTER. I refuse to yield at this time.

Mr. ABERNETHY. That is what I expected.

Mr. PORTER. I shall be glad to yield to the gentleman later.

The House bill says if the OAS acts with regard to economic sanctions, then the President would have the power he has requested. I understand that is not practical under the circumstances. I do not think it is necessary.

The agreement we signed in Costa Rica provides:

> Partial interruption of economic relations of all the member states with the Dominican Republic beginning with the immediate suspension of trade in arms, and implements of war of every kind.
>
> The Council of the OAS, in accordance with the circumstances, and with due consideration for the constitutional or legal limitations of each and every one of the member states, shall study the feasibility and the desirability of extending the suspension of trade with the Dominican Republic to other articles.

We can go ahead and act under this agreement that we signed. It is a vital matter of our foreign policy. Our President has decided we should go ahead and break off diplomatic relations as we agreed to do. If this law remains and the President is obliged to carry it out, we will be spending $35 million for this 322 million tons of sugar from the Dominican Republic simply because we here in the House did not act responsibly.

We had an alternative. The Senate bill which we never got a chance to consider here provided the President have the same power we gave him with regard to Cuba. He could cut the whole additional quota, and he would. The Senate voted for that 61 to 17 last night. The leadership on both sides of the aisle joined in passing that amendment to the House bill.

I am aware that the leadership here wanted this matter discussed, that the leadership on both sides wanted it discussed, but even so we were not able to have it discussed because of the lateness of the session.

We now have two alternatives. The President can, under his reserve power, decide not to give the Dominican Republic this boon, this benefit. He can order it omitted. He could, perhaps, do this under his emergency powers. That is a legal question. I do not know the answer at this time. I do not like to see the President do that in violation of laws enacted by the Congress of the United States. But I recognize he does have emergency powers. I recognize that just the other day we authorized an appropriation of a half billion dollars for Latin American countries because we are concerned about the progress communism is making down there.

What are we doing here? Nothing, not even a proper debate. We are going to be, at best, the laughing stock of Latin America and the world. On the one hand, our Government is stating: Trujillo, you are a very bad man, so we are cutting off diplomatic relations with you. We are going to take certain sanctions against you. We do not like you.

On the other hand, we are spending $35 million for Trujillo's sugar. Seventy percent of all the sugar down there is owned by Trujillo himself. There is one company owned almost wholly by North Americans. Seventy percent of the big profits, and they will be big profits, will go to Mr. Trujillo himself because he controls that much of the sugar. What kind of policy is that? Fantastic, distressing, tragic.

I imagine the President is studying this question of the extent of his powers. I have talked to members of the State Department. If the President decides he has to follow the law in this case, if he cannot use his reserve powers and there is a question as to whether he can ignore the law requiring this additional allocation to the Dominican Republic, then if he cannot do it under his reserve powers, the question will have to be put to Congress. From what we decided to do at San José with the other nations, it seems to me that the President would be justified in calling the Congress into special session after the elections to take up this matter. Then we could have on the floor of the House the kind of discussion that was had on the floor of the Senate. The other body's discussion, because of the lateness of the hour this morning, does not appear in the RECORD available to us this afternoon. We need a discussion of that sort in the House to see whether we are going to support the Government in its policy against Trujillo or not. We are in dire need of a policy which will make us more successful in Latin America than we have been.

I say in conclusion that we have been in trouble in Latin America for many years because we have been treating dictators down there as though they were respectable, because we wanted them as allies in the cold war. We have not been giving Latin America the economic assistance that it deserves. Now, when we are getting on the road to better policies, what does this House do when it refuses to discuss a vital matter of spending $35 million extra down in the Dominican Republic, a country with which we have just broken off diplomatic relations, a country against which we have joined all of the other countries of the hemisphere except one in agreeing to levy sanctions. It does not make sense. It does not do credit to this House or to the great Committee on Agriculture.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Mississippi.

Mr. ABERNETHY. The gentleman just used the remark that it does not make sense. Does it make sense to cut off 322,000 tons on the one hand and continue to purchase 131,000 tons on the other? Does that make sense?

Mr. PORTER. I prefer that all of it be cut off.

Mr. ABERNETHY. I did not ask the gentleman if he preferred to do it. The proposal was to cut off 322,000 tons of sugar that was allocated to the Dominican Republic which was taken away from Cuba. On the other hand, we purchased under the basic act 131,000 tons. Now, does it make sense to cut off that on the one hand, tonnage which was given recently, and continue to do business on the other?

Mr. PORTER. It makes more sense to cut off 322,000 than not to cut it off. I would prefer that it all be cut off, but I will take what we can get.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Wyoming.

Mr. THOMSON of Wyoming. Is it not a fact that under the basic act these quotas have already been picked up and the only thing involved is this additional allotment given by the act of last July?

Mr. PORTER. I do not understand that all of the present quota allotment has been picked up.

Mr. THOMSON of Wyoming. Once it is in transit, you cannot do anything about it.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Now, we have Castro in Cuba.

Mr. PORTER. We do.

Mr. McCORMACK. I did not want him. I knew he was a Communist or Communist controlled before he took over. You are going to have a dictator, anyway, are you not?

Mr. PORTER. I do not think so.

Mr. McCORMACK. You do think so?

Mr. PORTER. No; I do not think so.

Mr. McCORMACK. You did not think so in Cuba?

Mr. PORTER. Let me say to my friend that I shared the hopes of the State Department and many others that Castro meant what he said in regard to free elections and human rights. He did not, and I criticized him more than any other Member of this House, and I tried to improve that situation.

Mr. McCORMACK. That was after the fact, when the damage was done.

Mr. PORTER. I do not believe that a dictatorship is inevitable in Cuba or the Dominican Republic or any place else. I think the cause of freedom will prevail but only when a country like the United States stands up for what it believes instead of sneaking out and treating Trujillo, Franco, Stroessner, Chiang-Kai-shek, and other dictators as though they were respectable.

Mr. McCORMACK. I had a talk with the gentleman and I told the gentleman that Castro would be anti-American and Communist inclined.

Mr. PORTER. I remember that, yes.

Mr. McCORMACK. I analyzed that pretty well. Now, if Trujillo goes out, who is going to go in? Can you tell me?

Mr. PORTER. I would be delighted to see him out.

Mr. McCORMACK. Who is going to go in?

Mr. PORTER. What we have to do here was decided by the OAS.

Mr. McCORMACK. I am sick and tired of those of us who think of the national interests of the United States being put in a position where we are misunderstood.

Mr. PORTER. I understand that the OAS——

Mr. McCORMACK. How many dictators are there in the OAS?

Mr. PORTER. There are still some. There is Mr. Stroessner of Paraguay and Mr. Somoza of Nicaragua.

Mr. McCORMACK. I can name some more. I would have started by naming a few who are not. It would be less trouble.

Mr. PORTER. Nevertheless, we do have an international organization. It has made a decision. We have signed this decision. Are we going to carry out this decision of our Government or are we going to attempt to defeat it by inaction in this Congress and give Mr. Trujillo $35 million, at least 70 percent of which will go into his own pocket?

Mr. COOLEY. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I yield to the chairman of the committee.

Mr. COOLEY. Does the gentleman know what they did at San José? Has the gentleman read the resolution?

Mr. PORTER. I have it right here.

Mr. COOLEY. Did the OAS vote to use economic sanctions against the Trujillo government other than on the shipment of arms?

Mr. PORTER. The language, which I have already read earlier in these remarks, was this. They agreed:

> Partial interruption of economic relations of all the member states with the Dominican Republic beginning with the immediate suspension of trade in arms, and implements of war of every kind.

Mr. COOLEY. Read on.

Mr. PORTER (continuing):

> The Council of the OAS, in accordance with the circumstances, and with due consideration for the constitutional or legal limitations of each and every one of the member states, shall study the feasibility and the desirability of extending the suspension of trade with the Dominican Republic to other articles.

Cutting out the additional tons of sugar quota is not suspension of trade. It is the denial of a benefit.

Mr. COOLEY. We promised to study it along with our friends in the Organization of American States.

Mr. PORTER. This I submit is not a sanction that we are suggesting here.

Mr. COOLEY. What is it?

Mr. PORTER. This is the denial of a benefit. There is no reason why we have to benefit Trujillo by $35 million of additional sugar purchases at $12 million above the world market price.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. PORTER. Of course.

Mr. McCORMACK. We have now broken diplomatic relations with the Dominican Republic. Does the gentleman think we should break diplomatic relations with Castro's Cuba now?

Mr. PORTER. No. I personally am opposed to breaking relations with any nations in the world, however bad the government. I think we ought to have relationships with China, because we are going to need China in the matter of disarmament, if we are ever going to have any.

I think the OAS could have gone other ways but they decided on this way. We are a party to this. This is a way in which the whole hemisphere got together to say emphatically that we do not like Trujillo. And I am satisfied that it will be effective in showing to the Dominican people and to others that we do not like this murderer and torturer Trujillo, to use the words of Under Secretary Dillon.

Mr. ALFORD. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I yield to the gentleman.

Mr. ALFORD. I would like to ask the gentleman two questions. First, do you or do you not agree that both Castro and Trujillo are dictators?

Mr. PORTER. Of course, they are dictators.

Mr. ALFORD. Do you favor Castro over Trujillo—yes or no?

Mr. PORTER. They are both dictators, and, like most Americans, I strongly dislike all tyrants.

Mr. ALFORD. Do you favor Castro over Trujillo—yes or no?

Mr. PORTER. Of the two——

Mr. ALFORD. Yes or no; for the record.

Mr. PORTER. Of the two, Castro is far preferable. In Trujillo-land, they have far more torture and killing, they have had terror for years with little prospect of change in the direction of less terror and more freedom. There is a social and economic revolution with a multitude of serious faults going on in Cuba today. This is why we were not able to get a stronger statement in the OAS. There is a revolution going on in Cuba, a social and economic revolution. There is land reform, which our Department of State has said that we are certainly not opposed to. They are building schools. They have, of course, done many things wrong. The hysterical statements of Castro against the United States have been most unfortunate and incredibly wrong for the most part. He is a dictator. Cuba does not have the usual human rights. There is no freedom of the press or any freedom of dissent. There are no free elections. This is bad. But there is a significant difference between the frozen society, the zombies in the well-kept graveyards in the Dominican Republic and what is going on in Cuba. Cuba has some chance of evolving into freedom. The Dominican Republic's first necessity is to get rid of Trujillo and repudiate him and his kind.

I like the idea of a trusteeship of the Dominican Republic by the OAS. In fact, I proposed this in June in Venezuela. The Secretary of State proposed it in San José. It was rejected by the other nations but the idea is not dead. All we have to do is make it clear that the United States no longer dominates the OAS, but is a coequal member with the other nations. This is the fact but it is not well enough realized just yet.

This is what we should do in carrying out our policy of self-determination of peoples and to prevent the bloodshed and chaos which is sure to come in one form or another when their dictator falls.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Mississippi.

Mr. ABERNETHY. I want to be sure I understood the gentleman. Did I understand the gentleman to say he would prefer Castro over Trujillo? Did I understand the gentleman to say that?

Mr. PORTER. Will the gentleman be more specific?

Mr. ABERNETHY. Does the gentleman prefer that if we are going to have international relations with either of the countries we have them with that led by Castro or that led by Trujillo?

Mr. PORTER. Let me point out to the gentleman that as far as their Communist connections now are concerned, they are now very similar. Mr. Trujillo's son, Rambis, is in the Soviet Union right now. He has allowed Communists to come into his country. They are now the only organized party there, just as they were the one party allowed by Batista in Cuba. The situation as far as communism goes is practically identical.

Mr. ABERNETHY. Another question: If I understood the gentleman correctly a moment ago with regard to breaking off relations, if the gentleman had the privilege of doing something about it, he would restore relations?

Mr. PORTER. Yes. I think, however, that the decision of the Organization of American States must be respected. It was not what we wanted at San José, but we are part of an international organization. We have to make compromises there just as we make compromises here. We have to keep our word, which we have not in this House done by not acting on the President's request for power to cut the Dominican quota.

Mr. ABERNETHY. Does the gentleman feel there was considerable footdragging in the Organization of American States as regards Castro and his regime?

Mr. PORTER. I do feel many of the nations were reluctant to condemn Cuba outright, because they know the social and economic revolution going on in Cuba has a powerful appeal to the peoples of Latin America. They want to condemn communism, yes, but they do not condemn a progress which has long been delayed in allowing these people to get into the 20th century and have a little better lot in life than they have had.

Mr. BENTLEY. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Michigan.

Mr. BENTLEY. The gentleman said he favored severing relations with the Dominican Republic because of the Organization of American States' resolution. If we saw fit to do so, we could sever relations with the regime in Cuba regardless of what decision the Organization of American States would take?

Mr. PORTER. That is correct. I do not favor severing relations. We have to keep negotiating as best we can, and not give up just because we do not like the government.

Mr. BENTLEY. Since by the gentleman's own definition the nationalist regime on Taiwan is a bad government, he means to say we should keep relations there?

Mr. PORTER. By all means. I think we should keep relations there. If we could get the Taiwanese a little more democratic government, I think it would be all to the good.

THE OAS MAKES HISTORY

The Organization of American States, acting through the meeting of its Foreign Ministers in San José, Costa Rica, last week broke new ground. In condemning the government of Generalissimo Trujillo of the Dominican Republic and imposing sanctions on it, the OAS fulfilled hopes and promises that its creators and well-wishers have fostered for generations. One might say that the hemispheric organization has come of age.

It goes without saying that one must accept the judgment of the sixth meeting of consultation of the Ministers of Foreign Affairs of the hemisphere as authoritative. Men of the stature and responsibility of Secretary Herter and the Latin American statesmen present do not lightly condemn a fellow member on grave charges and demand sanctions that have never been applied before.

The long and reprehensible career of Rafael Leonidas Trujillo is now branded by his peers for what it has been known to be—a record of flagrant interference in the affairs of other hemispheric nations. Behind this condemnation is an implicit recognition of the fact that for 30 years General Trujillo has had a tyrannical dictatorship typical of the personalist military regimes that have plagued Latin American history since the wars for independence. Everywhere in the hemisphere except in the Dominican Republic and Paraguay this old-fashioned Caudillo-type dictatorship has been overthrown and left behind. General Trujillo and General Stroessner of Paraguay are anachronisms whose survival has long outraged Latin American opinion.

This is aside from the specific offenses of which the Dominican dictator has now been held guilty by the Foreign Ministers. For the first time obviously incontrovertible proof of General Trujillo's misdeeds was offered by the Venezuelans, who deserve the thanks of the hemisphere for their determination and courage in pressing their charges home. It was accepted by the Foreign Ministers that the Trujillo regime connived at a plan to drop leaflets over a Venezuelan city, issued diplomatic passports to Venezuelans who took part in the military uprising of April 1960, and gave material and moral support to the men who tried to kill President Betancourt, of Venezuela on June 24.

If the Foreign Ministers had only passed judgment and sanctions the San José meeting would have been of primary importance in hemispheric history, but they seem ready to go further. They are opening the way to a change in the Dominican regime from a dictatorship to a democracy.

This is hinted at in the paragraph where the OAS is authorized to discontinue its sanctions if "the Dominican Republic should cease to constitute a source of danger to the peace and security of the hemisphere." Secretary Herter offered a suggestion last week to send a commission to the Dominican Republic to supervise democratic elections. This move in itself was historymaking and while not specifically adopted by the meeting it remains on record and may be picked up later.

The Foreign Ministers now move on to the case of the conflict between Cuba and the United States. This is a different and far more difficult problem to handle. One can only predict that more drama will be seen and more history will be made this week in San José.

AN INTER-AMERICAN FIRST: ORGANIZATION OF AMERICAN STATES BODY'S VOTE TO PUNISH TRUJILLO PAVES WAY FOR DEALING WITH SUBVERSION

(By Tad Szulc)

SAN JOSE, COSTA RICA, August 22.—The Organization of American States inaugurated last week what is perhaps a new chapter in international relations. This came about when the conference of foreign ministers here voted to apply sanctions against the dictatorship of Generalissimo Rafael Leonidas Trujillo Molina in the Dominican Republic. This is possibly the first time in the history of international organizations that a member state has been punished in peacetime for actions against another country.

The punishment, which was ordered because of General Trujillo's interference in Venezuela, consists of a break in diplomatic relations and economic sanctions. The inter-American system thus may have pioneered a method of dealing with the current aggression in the world: undercover efforts to upset constituted governments.

The action by the foreign ministers may someday be applied to Cuba, if the regime of Premier Fidel Castro goes as far in encouraging and aiding subversion in other American countries as has the Dominican Republic in Venezuela. In the Dominican case, these attempts included a plot to assassinate President Romulo Betancourt last June 24.

FOREIGN MINISTERS WORRIED

Cuba's desire to "export" her revolution is seriously worrying the foreign ministers, who opened a new conference here today to deal with the Cuban situation. Although there is no disposition by anyone, even by the United States, to think in terms of sanctions against the Castro regime at this point, the Dominican precedent will hover in the background.

Created as the Pan American Union in the last decade of the 19th century, the inter-American organization was the first effective international group of this type. Its security system and peacemaking machinery, operating through consultative meetings and the building of a continental jurisprudence, was in some ways the forerunner of the League of Nations and of the United Nations. However, only in 1947 did the inter-American reciprocal assistance treaty give the organization power to act in hemispheric and extracontinental situations.

The inter-American principle that agression against one state constitutes aggression against all of them, inspired the North Atlantic Treaty Organization and subsequent regional security arrangements.

Now the organization's application of the 1947 treaty against the Dominican Republic for aggressive acts of intervention in peacetime has contributed a way of dealing with the spreading practice of attempting to overthrow another nation's government by subversion.

Collective action or sanctions, of course, are not new ideas in international relations. In modern terms, the alliance of "Kings Against the People" called for collective measures if the security system of European empires were threatened by the liberal movement of the mid-19th century.

The League of Nations only once actually invoked formal sanctions. It was against Italy for her military attack on Ethiopia. That was a war situation, in 1935, and the sanctions were not very effective because the League's members could not bring themselves to deprive Italy of the oil that Mussolini needed to continue his African conquest.

The United Nations acted collectively in 1950 in sending forces to Korea, but, again, it was a wartime situation. The United Nations subsequently condemned Communist China for its intervention in Korea—also a wartime situation and one against a nonmember of the United Nations.

In that case the United Nations also recommended an embargo on arms for Communist China. The United Nations presence in the Suez area since 1956, in Lebanon in 1958, and now in the Congo also constituted actions in military situations.

But if the ministers here feel pleased over their action against General Trujillo, they are also beginning to have worried second thoughts about what they have done.

By rejecting a U.S. proposal that would have related the idea of punishing Trujillo to a system of insuring transition to a democracy in the Dominican Republic, they may well have opened the way for a dangerous power vacuum, which could create a new problem.

Fighting for survival, General Trujillo now has turned against the United States and has begun a strange flirtation with communism. If this is designed to show the United States that a mistake was made by disregarding his warnings that his regime was the only alternative to communism, this maneuver could also boomerang, both against the dictator and against the inter-American system.

In allowing the Communists to return to the Dominican Republic and to organize themselves, General Trujillo is creating the possibility that when he falls—which is regarded here now as just a question of time—the Communist party will be the only effectively functioning political group in his country. The Dominican Republic has not seen genuine democratic political activity in the 30 years of General Trujillo's rule.

This is similar to what happened in Cuba when Gen. Fulgencio Batista, the dictator, was ousted. The reported Communist infiltration of the Castro regime can be said to be a result of the absence of other organized political groups.

PROCEDURE OF THE HOUSE OF REPRESENTATIVES

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Missouri [Mr. CURTIS] is recognized for 10 minutes.

Mr. CURTIS of Missouri. Mr. Speaker, previously there was a colloquy between the gentleman from Texas [Mr. ALGER] and the gentleman from Texas [Mr. BROOKS] involving committee procedure. My concern with the situation as expressed in that debate was my concern, which I think I have shown over a period of years, in the House procedures, that we follow as best we can the best procedure. I regret to say that the gentleman from Texas [Mr. BROOKS] and the gentleman from Mississippi [Mr. SMITH], who participated, attempted to get the debate off on a tangent, and far from talking about the issue involved, indulged in regrettable personalities. I hope when the time comes to revise their remarks they will look them over very carefully.

The issue was not, as the gentleman from Texas [Mr. BROOKS] sought to put it, whether the subcommittee of which he is chairman, of the Committee on Government Operations, should have been investigating the situation. Quite the contrary. There is complete agreement that that was a matter that the congressional committee should investigate. But I emphasize that it should be a committee. There has been a great tendency, as I have observed here in the House, for committees actually to want to usurp what is really the decision of the House and to fail to recognize that a committee is really the handmaiden and creature of the House, designed to gather together information and then report to the House with its advice.

In a similar provision, regrettably, there is sometimes the tendency on the part of whoever happens to be a chairman of a committee or of a subcommittee to usurp what is really the power of the committee and to act as the chairman without consultation or regard for what the committee itself would do. In this area I think we find the gravamen of the complaint that has been registered on the floor of the House. It was clearly established that the gentleman from Texas when he issued a press release in which he had the names of all the subcommittee attached to the bottom did not take this up with the subcommittee at all. It was never discussed there. It was simply a statement issued by himself, yet, in the guise of being committee action. The more serious matter though was that this press statement actually contained accusations which were derogatory of certain citizens of the United States who were involved in this matter that the committee was investigating. We have been through this matter many, many times. In fact, we had new rules established several years ago for our committees to follow so that we would not unintentionally impugn the reputations of some of our citizens without being very careful that we had given them certain rights to come before the committee; they had a right to answer; and even then there would have to be committee action before the material or the information upon which the derogatory statements might be made was issued to the press.

In this instance, of course, the chairman on his own admission, under my interrogation, had never called before the subcommittee the people on the other side, the people who were charged with either misfeasance or nonfeasance and, yet, again the chairman took it upon himself in complete violation of the rules of the House, I might say, to issue this statement. The second or the third major point, of failure to follow correct procedures, I think, lies in the failure of this subcommittee to act promptly upon this information that they gathered. They submitted the question to the General Accounting Office for investigation, apparently, back in February. A report was made on April 4 and, yet, it was not until just today or the day before yesterday that the chairman, without, again I say, referring the matter to the subcommittee, issued a press release. But, no action was taken apparently by the subcommittee during these almost 5 months of elapsed time. The gentleman from Texas [Mr. BROOKS] stated that the subcommittee was busy. I daresay it was busy. On the other hand, it is going to be quite interesting when this committee files its statement, and I hope it does, of the number of meetings it held during this period of 5 months and its activities, just to put it against this situation of letting a matter that contained, apparently, according to the chairman, derogatory information in regard to certain citizens of this country, without acting upon it, and then waiting until the last day and issuing not a report to the House, if you please, but actually issuing a press release.

Mr. ALGER. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Texas.

Mr. ALGER. I want to commend the gentleman and to thank him for getting to the heart of the problem which possibly earlier we did not do as completely as I had hoped, namely, this matter of procedure. We did not get into the details of the project. I had not so intended although I would welcome the opportunity to get into the details of site acquisition. I was concerned about this press release that went out which purported to be the opinion of the subcommittee, but which now has been clearly stated to be just that of the subcommittee chairman.

Secondly, the fact that I was denied a GAO report by the gentleman from Texas [Mr. BROOKS] and in that denial I represented all other Members of the House who similarly could be denied. I want to thank the gentleman for pointing this out to the House.

Mr. CURTIS of Missouri. I think it was quite clear that that is exactly what he was talking about, and he was discussing this from the standpoint of committee procedure and felt it had been very unfair; it had created damage to the reputations of people in his community. The tragedy of this was that the gentleman from Texas [Mr. BROOKS] did not answer these charges, but attempted to divert the attention of the House to entirely extraneous matters and then resort to something which I thought was very unfortunate; that was, to attack the integrity of the gentleman from Texas [Mr. ALGER] by suggesting that his interest in this matter was something other than what he had stated on the floor to be, a question of procedure. The gentleman from Mississippi echoed those statements. I know the gentleman from Texas [Mr. ALGER] very well, and I think most Members do, and we all respect him for a man who has strong beliefs. I disagree with him on some of those beliefs, but I have yet to see him take an act that was improper other than in a sincere effort to benefit the people of his community generally. Instead of having a debate that could have been sensible, and discussing the issues here, by resorting to that kind of attack, it made this whole matter regrettable.

I trust that those who are interested in House procedure will read the debate on this matter, and consider the issues we have tried to bring out here, because the precedents of the House are not available for one party over another. They are the basis of democratic government in this country, and I know every one of us on both sides are very jealous that those precedents be followed, and when they are shown to be wrong that they be corrected, so that we can conduct the affairs of this Nation in the best procedure possible.

I yield back the remainder of my time, Mr. Speaker.

HON. FRANK M. COFFIN

Mr. MORGAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. MORGAN. Mr. Speaker, it is with mixed feelings that I call attention to the fact that our colleague and my dear friend, FRANK M. COFFIN, will not be with us in the 87th Congress. I deeply regret the fact that we will not have the benefit of his outstanding skill as a legislator and his profound knowledge of foreign affairs during the next Congress. At the same time, I wish him every success in his aspiration for the governorship of the State of Maine, and I know from my own personal knowledge, based on our close association since his election to the 85th Congress and his appointment at that time to the Foreign Affairs Committee, that he has all those qualifications necessary to make an outstandingly good Governor.

FRANK COFFIN is an indefatigable worker. He is a young man of boundless energy and as a member of the Committee on Foreign Affairs early distinguished himself for his pioneer work in efforts to strengthen the ties of friendship and understanding between the United States and Canada. His study on European Economic Regionalism has been of great value to the Committee on Foreign Affairs and is looked upon as the outstanding text on this important and complex subject.

I wish FRANK COFFIN the best of success in November, for our loss on the committee will be a great gain for the people of Maine in securing his services as Governor. I shall always consider FRANK COFFIN as my close personal friend and shall seek to keep that friendship close in the years ahead.

HON. CHESTER BOWLES

Mr. MORGAN. Mr. Speaker, I wish to take this opportunity to say a few words in praise of the Honorable CHESTER BOWLES, who is retiring voluntarily from the House of Representatives. CHESTER BOWLES is a truly dedicated public servant whose long and distinguished career leads me to hope that the termination of his membership in the House of Representatives will not mark the end of his public service, but that it will open a new phase of even more important work for our country.

CHESTER BOWLES has served but a single term in the House of Representatives. Although the junior majority member on the Foreign Affairs Committee, his experience and background have made him a senior in our committee councils; and it is with a sincere and deep regret that I note his intention to leave the Congress. However, I respect his motives for so doing and know that he only did so because he conscientiously felt such a course would improve his ability to render other valuable service.

It is not often that the Foreign Affairs Committee has the opportunity to welcome to its membership a member who has served with distinction as an Ambassador to a major power. He brought with him a profound knowledge of the existing problems in the field of foreign affairs and many worthwhile new ideas for meeting them. In his comparatively short service as a member of the Foreign Affairs Committee, he has made an outstanding contribution and won a host of new friends. As he leaves the House he will take with him our very best wishes for his continued success in a career of public service. He is too valuable and able a public servant to be permitted the luxury of retirement to private life.

HON. DONALD LESTER JACKSON

Mr. MORGAN. Mr. Speaker, it has been my privilege and honor to serve with DONALD LESTER JACKSON as members of the Committee on Foreign Affairs. Although of the opposite party, DON JACKSON early won the admiration and the abiding friendship of his colleagues on our committee for his expert knowledge of foreign policy matters and the nonpartisan spirit in which he used his legislative skill to help secure the enactment of essential foreign policy legislation.

DON JACKSON'S service on the committee has been characterized by an intensive study of United States-Latin American relations, and he has become expert and well versed in the subject. He has also undertaken special study missions to the Far East and to the Mediterranean area, and his services during the early days of his tenure were of particular help in the arrangements which finally led to strategic trusteeship status for the Pacific islands.

DON JACKSON has seen fit to retire from public office, and I wish him well in whatever further activity he may engage. I also hope that we will not lose contact and that the committee may from time to time enjoy the benefit of his keen knowledge and expert advice.

HON. ALVIN M. BENTLEY

Mr. MORGAN. Mr. Speaker, I express my deep sense of regret that the Committee on Foreign Affairs will not have the benefit during the 87th Congress of the wise counsel and deep knowledge of foreign affairs of our friend and colleague, ALVIN M. BENTLEY, who has served ably and continuously on our committee since the 83d Congress.

AL BENTLEY brought to the Committee on Foreign Affairs absolutely unique qualifications for his service. Prior to his election to Congress he was a career Foreign Service officer and served with great distinction in many positions at home and abroad. On the Foreign Affairs Committee he has served as the ranking minority member on the Subcommittee on State Department Organization and Foreign Operations and is the second ranking minority member on the Subcommittee on Europe. He also participated in a number of special study missions to Europe for the Committee on Foreign Affairs, and his findings and observations have been of great value to the committee.

Although he is a member of the minority party, I have always considered him an extremely valuable member of the committee and one of the most hard-working members. As chairman, I am indeed sorry that we shall not have in the next Congress the benefit of his vast experience, his parliamentary skill, and his profound knowledge of world problems.

DISTRICT OF COLUMBIA CRIME

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Alabama [Mr. ROBERTS] is recognized for 10 minutes.

Mr. ROBERTS. Mr. Speaker, recently, before Congress recessed for the national political conventions, a shocking incident occurred on the streets of Washington. Four Capitol pages were stabbed, robbed, and beaten by a gang of young hoodlums.

Luckily, none of the boys was seriously hurt and the stolen articles did not amount to very much.

One of these boys is from Anniston, Ala., and is here because I thought he would benefit from the association with other boys serving as pages in the House. You can imagine the sense of responsibility I feel for this young man, who is an outstanding student back home, active in his school and church.

When this attack occurred, I naturally was distressed. For some time, I have felt that incidents such as this happen—and this is not the first time pages have been attacked—because we as Congressmen do not provide adequate after work or after school supervision to the young men we bring to Washington.

I have urged that we provide a dormitory for the pages with study and recreation facilities which will keep them occupied and under supervision during the evenings. Certainly, housing these boys in private homes over the city and allowing them to come and go as they please is not proper.

And, while I still support those who are working for adequate housing and other facilities for pages, I am not sure that this is enough.

Since that pre-recess attack on the four page boys which I earlier mentioned, at least one of these boys—the fine Alabama boy who I brought here—has been the object of two other attacks by young ruffians. All three of these attacks were unprovoked and, of course, unwarranted. The third of these incidents occurred last Saturday night when the young man was leaving Griffith Stadium with a friend to come to my house where the Alabama boy is residing.

The police and detective forces of the District of Columbia have been most courteous and resourceful in these incidents and have been as diligent as possible in apprehending the attackers. Several of these hoodlums have been arrested and are in the process of being tried for their alleged crimes.

But the very fact that these things can happen in this city, to be frank, makes me more than a little angry and

disturbed. Have the streets of Washington, D.C., been turned into the black paths of an uncivilized jungle? What if these young men had been young women or older ladies—wives and mothers? We occasionally read of terrible things happening here. I had been inclined to discount some of the more rabid talk about Washington delinquency, the stories that women are afraid to walk downtown at night, that they sit afraid behind locked doors and barred windows in their own homes and apartments. But perhaps I have shared the widespread sentiment which is allowing this very situation to exist.

It seems to me to be high time that we quit pooh-poohing Washington crime. I certainly am not sufficiently wise in matters of law enforcement to suggest here and now a guaranteed solution to this problem.

It may be that we need more policemen patrolling the streets of Washington. I am told that this is so. It may be that we need more police dogs to deter criminal elements. I am told that this is effective. It may be we need more judges and court personnel. I understand that the judicial system of the District is woefully overworked.

What I believe is that we must provide whatever is needed—money, personnel, judges—to insure that the city of Washington once again becomes the wholesome and clean city it was intended to be. How can we, sitting in the halls of the world's most powerful legislative body, hope to provide leadership and inspiration to the nations of the free world when we are surrounded in our work and home lives with rampant crime? It seems to me that we need to remove first the beam that is in our own eye by curing the blight which seems to be sweeping the Nation's Capital.

Mr. Speaker, I ask unanimous consent to insert in the RECORD at this point an editorial from the Mobile Press of Saturday, August 27, 1960, and to read the same.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. ROBERTS. This editorial is entitled "Crime in the Capital." It reads as follows:

CRIME IN CAPITAL

It is time that someone respectfully suggests to candidates of the two major parties that they work out some plan to rescue Washington, D.C., from its status as a jungle of crime.

For the 18th consecutive month, crimes have increased in the National Capital.

Here is the unhappy record for June: Ninety-seven cases of criminal homicide, 153 of rape, 1,315 of robbery, 3,093 of aggravated assault, 4,446 of housebreaking, 915 grand larceny, 8,173 of petty larceny, and 2,074 of automobile theft.

Reports continue to tell of shocking crimes perpetrated by bands of youths that roam the streets, beating, robbing, and knifing people.

Women dare not walk the streets of Washington after night, for fear of attack by hoodlums.

Were Washington located in a Deep South State, we could expect northern politicians to concern themselves with the city's crime problem.

But these gentlemen are too busy "reforming" the South and meddling into affairs of far off nations to concern themselves with the tragic situation in our Capital City.

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. ROBERTS. I yield.

Mr. KYL. I want to congratulate and thank the gentleman from Alabama for the very fine statement he has made. Because of an interest in juvenile delinquency particularly it has been my privilege to accompany several members of the Juvenile Bureau of the Metropolitan Police Department in their nightly patrols, and to investigate rather thoroughly the personnel, the filing systems and so on of the Metropolitan Police Juvenile Bureau. I want to say those people are doing a wonderful job under very, very difficult circumstances. I would hope that every Member of Congress who has any interest in crime in general and in juvenile delinquency in particular would have the opportunity to see the heavy load these people have and the difficult situations under which they operate.

Again I want to thank the gentleman for the very fine statement he has made.

Mr. GRANT. Mr. Speaker, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from Alabama.

Mr. GRANT. I wish to compliment and thank the gentleman from Alabama for bringing this to the attention of the House. I think it should be done more often. The gentleman hit the nail on the head a moment ago when in enumerating some of the things that should be done he said that we should remember in dealing with the criminal element at any place there is nothing which stops crime as much as swift, positive, and prompt action on the part of the courts.

Mr. ROBERTS. I thank the gentleman.

AIR POLLUTION ACTIVITIES OF HOUSE SUBCOMMITTEE ON HEALTH AND SAFETY

Mr. ROBERTS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. ROBERTS. Mr. Speaker, the Subcommittee on Health and Safety of the Committee on Interstate and Foreign Commerce has been very active during the 86th Congress in discharging its responsibilities in the field of air pollution control.

Early in the first session, we held hearings on six bills to extend the Federal air pollution control program. At that time we reviewed in detail progress being made as the result of Federal aid. The hearings have been printed and are available from the committee.

My bill, H.R. 7576, to extend the program and to clarify the language of the original act, was enacted into law—Public Law 86-365.

In July 1959, the subcommittee held hearings on H.R. 1346, by the gentleman from Ohio [Mr. SCHENCK], ranking minority member of the subcommittee, to prohibit the use in commerce of motor vehicles which discharge substances into the atmosphere in amounts found by the Surgeon General to be dangerous to human health. The gentleman from Ohio later made some revisions and reintroduced the bill as H.R. 8238, which was favorably reported by the subcommittee.

The bill was revised in committee to direct the Surgeon General to make a study and report to Congress within 2 years of the effect on human health of the discharge of harmful exhaust gases by motor vehicles. This was enacted into law—Public Law 86-493.

This is a real constructive and far-reaching step to solve one of the great air pollution control problems.

In February of this year the subcommittee held hearings on another important aspect of the air pollution control problem, that of the so-called blow-by fumes from automobile engines, which engineers say are an important source of unburned hydrocarbons which pollute the air.

A very cheap method of eliminating this source of air pollution by piping the blow-by gases back into the cylinders have been developed. The automobile manufacturing industry has agreed to install the device on all new vehicles built in the United States for sale in California not later than the 1961 models.

The subcommittee wanted to know why, in view of the fact that the device is being installed in California, it could not be installed on all 1961 models sold in the United States. In this, we were supported by the Honorable Arthur Flemming, Secretary, Department of Health, Education, and Welfare.

The answer of representatives of the automobile manufacturing industry was that they would "make any proven air pollution control device available to any area that needs or wants it."

I think the record establishes beyond a doubt that we need this simple, inexpensive device. Apparently, the only way we are going to convince the industry that we want it is by passing legislation either at the Federal or local level, or both.

When Secretary Flemming appeared before the subcommittee, he urged favorable action on a proposed bill to amend the Air Pollution Control Act to:

First, eliminate the time limitation—June 30, 1964—and $5 million ceiling on annual appropriations included in the current act;

Second, authorize the Surgeon General to make investigations and to hold public hearings on air pollution problems which are interstate in nature or are of broad significance; and

Third, delete the requirement for allotment of funds appropriated from grants-in-aid and contracts in accordance with regulations prescribed by the Secretary of Health, Education, and Welfare.

I introduced the legislation proposed by the Secretary which became H.R. 10696. Arrangements were made to hold public hearings in California to get the

views and suggestions of those most experienced and knowledgeable in the area where the greatest progress has been made in air pollution control. For reasons beyond my control, it was necessary to cancel these hearings.

On June 28, the other body passed S. 3108. As introduced, S. 3108 was identical with my bill, H.R. 10696, introduced at the request of Secretary Flemming. As passed, however, S. 3108 did not eliminate the time limitation and the $5 million ceiling, as suggested by the Secretary but extended the act to 2 additional years, to June 30, 1966, and retained the $5 million limit on appropriations. Also, the Secretary's request made in the third item above was eliminated in the legislation sent the House.

Due to the lateness of the session, the subcommittee was unable to reschedule public hearings to consider the Secretary's proposals and the Senate amendments. I am hopeful that we can hold public hearings to consider the proposals of the Secretary later in the year to have a record for consideration early in the next Congress.

In the meantime, I invite comments and suggestions from all Members regarding the three proposals made by the Secretary as outlined above and included in H.R. 10696.

TWENTY-FIRST ANNIVERSARY OF NAZI ATTACK ON POLAND

The SPEAKER. Under previous order of the House, the gentleman from Illinois [Mr. PUCINSKI] is recognized for 5 minutes.

Mr. PUCINSKI. Mr. Speaker, 21 years ago today on September 1, 1939, at 4 o'clock in the morning, the heroic people of Poland suffered the most devastating armed attack every recorded up to that point in history, when Nazi Stukas and Messerschmidts invaded that country and launched World War II.

I would not want this Congress to adjourn today without paying tribute to these indestructible Poles who so heroically withstood this monstrous attack and continued to fight the Nazis for 21 days before they were forced to capitulate.

The stubborn and monumental defense of Poland against the highly mechanized Nazi army has stirred the imagination and admiration of the entire world, and the determination which these people of Poland demonstrated in defense of freedom for those 21 tragic days served as an inspiration for the duration of the war.

Even though they were held captive by their Nazi oppressors, these heroic people continued the fight in the Polish underground. They had formed armies which had escaped from Poland and fought on the side of the allies throughout the world until V–E Day.

Let us never forget, however, that Hitler would not have launched the invasion of Poland 21 years ago today, if he had not first negotiated the treacherous Ribbentrop-Molotov agreement with the Soviet Union.

Even though the heroic Poles must today suffer the indignity of living under Communist oppression, they shall never forget that in the hour of Poland's greatest struggle against Nazi troops—17 days after the invasion—Communist troops stabbed this gallant nation in the back by invading Poland from the east.

The same spirit of dedication to freedom which prevailed among the Polish people during the Nazi-Soviet invasion of their nation prevails today and I am sure they will never accept communism, no more than they would tolerate Nazi rule.

It is indeed tragic, Mr. Speaker, that despite the heroic efforts of the Polish people in defense of freedom not only in their own country but throughout the world, despite their tragic sacrifices, the Polish people continue today—21 years after the war—to be deprived of full and official recognition to Poland's western boundaries not only by the United States but the rest of the free world.

I would not want this day to pass and have Congress adjourn without paying tribute also to all the other countries which subsequently fought in the cause of freedom. Our own American soldiers ultimately were drawn into this world holocaust, and had demonstrated gallantry and heroism that was beyond the imagination of man up to that time.

I am sure every American today will join with those of us in Congress in paying tribute to those who are not here today, those who made the supreme sacrifice, our American soldiers and our allied soldiers, in the cause of freedom. I am sure our condolences go out to the Gold Star Mothers, to those gray-haired ladies who today live in lonely silence.

I am sure, Mr. Speaker, that today the world will look back upon this 21st anniversary of the beginning of World War II and the great price that the entire world had to pay that freedom may reign, and look at this 21st anniversary as a reminder of the great and tragic cost of freedom. Freedom is a tremendous costly commodity.

Certainly there were those who during World War II made these great sacrifices and today it becomes rather lamentable when so many people, comfortable in their daily existence, are willing perhaps to make concession after concession and follow a philosophy of peace at any price, completely unmindful of the fact that when a nation looks only to its personal comforts and overlooks the great tragedies and cost of freedom, sooner or later that nation may suffer the loss of its own freedom.

We are today locked in a deadly battle with international communism. There is no question but that in the great anxiety of World War II many mistakes and concessions had to be made, because we had 11 million American boys scattered all over the world, and every second that that war continued meant the life of another American soldier. Today, unfortunately, through the treachery and despotism of the Communist rulers in the Kremlin, we find ourselves again locked, perhaps, in a greater battle. And, I hope that this 21st anniversary of the beginning of World War II will strengthen us in our belief as Americans that we must be prepared, to be firm; be prepared to make the sacrifices that may need to be made. We may very well have to make sacrifices when we find a Communist bastion only 90 miles from the shores of Miami, Fla. And, I believe that on this 21 anniversary we Americans must rededicate ourselves to the unyielding principle that costly as is the price of freedom, this is the only thing worth fighting for. We do not have to have war. Obviously we want to do everything we can to avoid war, and the record is crystal clear that we Americans did everything we could right up until this tragic hour of 4 o'clock in the morning of September 1, 1939, to avoid war. But I hope this Nation will never again permit itself to become so weak, either morally or militarily, that war again will be inevitable.

I hope this 21st anniversary of the beginning of World War II will remind the entire free world that dealing from a position of strength and resolute firmness against any nation that would threaten our freedom is the best and only guarantee for peace.

Mr. JOHANSEN. Mr. Speaker, I commend the gentleman from Illinois [Mr. PUCINSKI] for reminding this House of the solemn and tragic anniversary of the start of World War II which this day marks, and for calling attention to the successive violations of rights and denials of freedom to Poland under the Nazi and Communist dictators.

I wonder whether this House is aware of an announcement from Moscow on this first day of September 1960—as reported a short time ago on the Associated Press ticker—that the leader of the Communist tyranny, Nikita Khrushchev, has decided to attend the 15th session of the United Nations Assembly which convenes in New York City September 20.

My colleagues will recall that this House adjourned its first session last September on the eve and under the shadow of the first visit of Mr. Khrushchev to the United States.

Now, on the very last day of the 2d session of the 86th Congress we are regaled with the information that once again this man—of whom the American people and the world know a great deal more than they knew 1 year ago—is to set his feet on our shores.

The fact that he comes this time under the guise of an official representative of Soviet Russia to the United Nations Assembly, the fact that he comes allegedly under the protections and immunities of his diplomatic status, and the fact that the State Department solemnly assures us that there is nothing we can do—under treaty obligations and other legislative provisions which past Congresses have ratified and enacted—to avoid such a desecration of the soil of the United States, does not lessen my repugnance at the news and does not alter my conviction that his sole purpose is to use the United Nations and the dateline "New York City" for his own propaganda objectives of weakening, discrediting and destroying the United States.

My own strong feelings on this matter were expressed in a telegram which I

sent to Secretary of State Christian Herter on August 10, when I first learned of reports of Mr. Khrushchev's possible return visit to the United States under the guise of a United Nations delegation head.

The text of this telegram follows:

Hon. CHRISTIAN HERTER,
Secretary of State,
Washington, D.C.:

For the salvation of the very soul of America, quite as much as for her national security and survival, I respectfully but insistently urge immediate categorical and ironclad assurance that Khrushchev will not be an officially welcomed guest or a tolerated visitor under any guise or pretext anywhere within U.S. boundaries during the remainder of President Eisenhower's administration.

I recall it was at a so-called Soviet press conference that Khrushchev first claimed as his "right" an invitation to the United States which ultimately led to his previous calamitous visit.

History gives signs of repeating itself with his current press conference hints that he wants to attend the United Nations General Assembly session opening in New York September 20.

I believe it will be an intolerable and incomprehensible affront to this Nation, to the American people, and to the President of the United States if such a possibility is not foreclosed forthwith by our Government.

Khrushchev canceled his invitation to President Eisenhower to visit Russia. He torpedoed the summit conference. He brutally and grotesquely insulted the President. He helped engineer Communist riots to prevent President Eisenhower visiting Tokyo. In this hemisphere he pronounces the Monroe Doctrine dead, scorns the Organization of American States, infiltrates and dominates Cuba, and threatens the United States with a rain of missiles if we make any significant move to deny him a free hand in his insolent interference in that unhappy island. He brainwashes Francis Powers and publicly degrades him in a cruel burlesque of judicial processes more obscene than the ancient Romans' public parading of captured enemies in bonds.

To tolerate his presence on American soil under the quibbling technicality of diplomatic immunity as a delegate to the United Nations, when he obviously intends such a maneuver as the means of intruding in our presidential election campaign, as an opportunity for spewing his evil propaganda from within the country he is determined to destroy, and to use the United States as a base for his forays into Cuba, Mexico, or other Latin American countries, would reduce the United Nations as an agency of peace and justice to a total farce.

As a Member of Congress, Mr. Secretary, I plead that your reaction to this incredible impudence may be swift, clear beyond the possibility of misunderstanding or misinterpretation by the American people and Khrushchev himself, and irrevocable to the point that there can be no subsequent modification, evasion or reversal of our firm position.

Congressman AUGUST E. JOHANSEN.

I also include at this point the reply to this telegram in the form of a letter from Assistant Secretary of State William B. Macomber, Jr., in behalf of Secretary Herter, as follows:

DEPARTMENT OF STATE,
Washington, D.C., August 18, 1960.

The Honorable AUGUST E. JOHANSEN,
House of Representatives.

DEAR MR. JOHANSEN: Prior to his departure for the Organization of American States meeting in San José, Costa Rica, the Secretary requested me to reply to your telegram of August 10. We in the Department of State fully understand and sympathize with the concern which prompted your message urging that assurances be given that Chairman Khrushchev will not be permitted to enter the United States during the remainder of President Eisenhower's administration.

At the present time, however, we have no firm indications that Chairman Khrushchev is, in fact, planning to head the Soviet delegation either to the United Nations Disarmament Commission or to the General Assembly. If he should chose to do so, I understand his admission to the United States for this purpose could not be precluded under the terms of the United Nations Headquarters Agreement (P.L. 357, 80th Cong.), or those of the International Organizations Immunities Act (P.L. 291, 79th Cong.).

If Chairman Khrushchev should decide to represent the Soviet Government at sessons of one or more United Nations bodies at the United Nations Headquarters in New York, this would not in any sense imply that he was either a guest of the U.S. Government or that he was being officially welcomed to U.S. territory.

If I can be of further assistance to you in this matter, please do not hesitate to let me know.

Sincerely yours,
WILLIAM B. MACOMBER, Jr.,
Assistant Secretary.

I cannot refrain from a number of observations regarding this reply.

I sincerely wish that I could accept with positive conviction the statement that "we in the Department of State fully understand and sympathize with the concern which prompted" my message. I must say, in all candor, that in my opinion if there were a genuine understanding of, and sympathy with, the concern which prompted my message, the State Department would have voiced to Mr. Khrushchev and to the world in clarion tones its profound distrust of the Soviet Premier's motives and intentions in visiting the United Nations as head of the Russian delegation—in view of his performance only a few months ago at Paris. I know of no such official and public expressions by the State Department.

With respect to the statutes cited by Secretary Macomber which preclude any objection to Mr. Khrushchev's attendance at the General Assembly session, I concede that on the basis of the letter of the law as set forth in these acts of the Congress, the State Department has the technicalities on its side. But I am reminded of the admonition of Scripture that "the letter killeth, but the spirit giveth life." And I recall that the noble declarations of the United Nations Charter are dedicated to the purposes of "international peace," and to the development of "friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples," and I believe that if Mr. Khrushchev and the government he will represent at New York starting September 20 were judged either by the letter or the spirit of these objectives both he and his nation would be barred from attendance thereat.

The only scrupulous and meticulous observance of the requirements of the charter and of our own implementing legislation, it would appear, is directed to the technicalities of Mr. Khrushchev's alleged right to make New York City the launching pad of his newest anti-American propaganda weapons.

Finally, Mr. Speaker, I accept Secretary Macomber's statement that Chairman Khrushchev's attendance at the General Assembly session "would not in any sense imply that he was either a guest of the U.S. Government or that he was being officially welcomed to U.S. territory"—I accept this statement as an implied pledge and a test of the good faith of the State Department.

I wonder just how long this implied pledge will be good for. I hope and pray that it will be the firm and unyielding position of the Government of the United States. But I will add that if the humblest and most subordinate member of the State Department, or any other representative of the Government of the United States, is permitted to participate in the reception of Mr. Khrushchev on the occasion of his newest invasion of this country, I will regard it as a shameful violation of the implied pledge and a further shameful act of appeasement to this chief enemy of the United States.

What is infinitely more important, I believe that all right-thinking citizens of the United States will also so regard it.

THE UKRAINIAN CONGRESS COMMITTEE OF AMERICA

Mr. DADDARIO. Mr. Speaker, this fall marks the 20th anniversary of the establishment of the Ukrainian Congress Committee of America. On this occasion I would like to extend my greetings to the committee, and its members, and to congratulate it on the excellent job it has done in the past 20 years.

The Ukrainian Congress Committee is composed of approximately 1,400 civic, religious, social, and political groups. It is a national organization of Americans of Ukrainian background, with a membership of 2½ million persons. The committee has a dual purpose: to educate and inform the American people regarding true conditions behind the Iron Curtain, and to fight for the right of the Ukrainian people to self-determination and a democratic, free and independent country. As the voice of the 40 million Ukrainians enslaved by Russia, the Ukrainian Congress Committee has pledged itself to expose Soviet tyranny in all its forms. It has, for example, exploded the myth of a unified, homogeneous society in the Soviet Union. It has emphasized the fact that the non-Russian peoples of the U.S.S.R. far outnumber the Great Russians. It has brought to light the various atrocities committed by Russia under the leadership of Nikita Khrushchev, from Vinnitsa in the Ukraine to bloody Hungary.

The committee strives to keep all Americans constantly aware of the almost hopeless life led by the people under Communist rule. It aids the free world in our struggle against communism by attempting to dispel any illusions we might have regarding the Soviet totalitarian form of government. The role of the committee and its chairman, Dr. Lev E. Dobriansky, in formulating and

organizing Captive Nations Week is indicative of the effective job that the committee is doing in this regard.

On this 20th anniversary I can only wish the Ukrainian Congress Committee a speedy and successful end to their endeavors. The people of America and all the free world join me, I am sure, in the hope that the world will soon see an end to tyranny and slavery in all forms, and that the satellite nations will be able to join the free community of states as equals.

GENERAL LEAVE TO EXTEND

Mr. THOMSON of Wyoming. Mr. Speaker, I ask unanimous consent that, in connection with the special order with reference to Senator O'MAHONEY earlier on this legislative day, all Members may be permitted to revise and extend their remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

THE SUGAR SITUATION

The SPEAKER. Under previous order of the House, the gentleman from Wyoming [Mr. THOMSON] is recognized for 15 minutes.

Mr. THOMSON of Wyoming. Mr. Speaker, it is a sad moment to make what I am sure will be my last remarks on the floor of this House. I have profound respect for legislative bodies, having served in the State legislature as well as in this great body. I feel very strongly the prerogatives of the legislative and the responsibility of the legislative, and it is with profound regret that the last remarks that I should make here must be somewhat critical of the current action of this body. The remarks I intend to make are directed to the so-called sugar situation existing at this time.

Mr. Speaker, I come from an area where the amount of sugar produced is small, but it is a very important commodity. It has a profound impact on the domestic economy, and as an American Representative in the Congress I have always advocated a sugar supply for the people of the United States at a right price. The action that was taken last July was not one in which we could take pride. What we finally ended up doing was to pass an act that expires March 31, 1961. Now, mind you, this leaves the domestic industry in uncertainty, and it is not good for the country from the standpoint of having an adequate sugar supply, because they have to plant by that time, and the producers that I have in my area as well as the refiners who are going to refine the sugar have to be able to plan. I think it is regrettable that we did not extend this act so that we could have provided certainty, and I also think it is unfortunate that we did not have the opportunity to discuss it on the floor.

I believe that the deficit should have been granted the domestic producers and an additional quota should be granted to them so as to again provide for greater certainty and to help in this agricultural problem of surpluses and excess acreages which confronts us. But even with my profound interest in that, with the recent action taken in the Congress, the other issue even transcends that of the complications of the domestic industry. That is the question of how our foreign affairs of this country shall be handled in these critical times.

Mind you, I became concerned last October, in October 1959, and wrote to the Secretary of State to do something about the Cuban situation. In March of 1960 the President requested authority with respect to Cuba so that he could take economic action. That request languished in the Committee on Agriculture of the House of Representatives from that time until late June.

No hearings could be had. We merely heard words that we read in the press that no such request would be granted, that the Democratic leadership of that committee would only permit a simple extension of the act for 1 year, giving Cuba all the sugar it would ordinarily get under the provisions of the then act.

I think it is indeed unfortunate for the country that this time elapsed between March of 1960 and July of 1960 before any action was taken to give the President the authority he wanted. Had that action been taken by that Democratic-controlled committee promptly, and the President given this authority, in my humble opinion, the possibility of more precipitate action now in the Cuban situation might have been avoided. At least the situation would have been improved in Cuba by early action. As it was we had no hearings.

You remember what happened on the floor of this House. It went over to the other body and we ended up in conference. The committee report on the present bill which is now about to die without action, H.R. 13062, points out the position of the House conferees. At the same time that this Cuban situation was being considered, as is pointed out in the committee report from the Committee on Agriculture:

> The bill H.R. 12311—
>
> This is the act we passed in July—
>
> was under consideration in the Committee on Agriculture. The committee report states representatives of the State Department appeared before the committee and requested that the language in subparagraph 408(b)(2)(iii) be modified in such manner that the President would not be required to obtain the sugar covered by that subparagraph on a pro rata basis from countries now having a share of the U.S. quota. It was specifically stated that the State Department had the Dominican Republic in mind and that it might prove embarrassing if the Dominican Republic received its full share of the quota which might be withdrawn from Cuba.

So, Mr. Speaker, the Department made its position clear then. But with the situation developing as it did, in early July, just previous to adjournment, in the late hours of the evening or the early hours of the morning, we took a bill that came back from conference that we were sure was inadequate. Then a new bill was introduced, a new request was made by the Executive. Again we have a situation developing here where the House Committee on Agriculture is taking over the foreign affairs of this country and undertakes to make an amendment to the administration proposal and offer it on the floor of this House. All of us knew we could not take issue with the committee action or we would be minimizing the chances of getting any action at this session. So we had to let it go to the other body, counting on it being put in shape and coming back in a form that would be adequate. It was put in shape in the other body, but we were never permitted even a vote.

Let me point out to you what a simple reading of the House bill will show, and which makes it really a nullity so far as the action of the Congress is concerned.

There is an old adage that a court will not do a useless act. Neither should a legislative body do a useless act.

The committee amendment that was put on this bill that was presented to us yesterday in the House, provided that action can be taken with regard to the Dominican Republic only:

> *Provided*, That if at any time after this Act goes into effect, collective economic sanctions against one or more of the countries from which purchases are to be made under the provisions of this subsection are agreed upon by and between the United States and other countries, pursuant to treaty.

There would have to be another meeting of the Organization of American States.

Then the No. 2 requirement is that:

> Effective specific actions to implement such sanctions are undertaken by a majority provided in the treaty of such other treaty signatories, the President may discontinue, in whole or in part.

There is some confusion about whether there would have to be a new treaty signed, but be that as it may, you would have to have first, another meeting of the OAS, and No. 2, you would have to have the majority of those states take some effective action to impose and implement sanctions before the President could act at all. His hands would be completely tied until a majority had acted. All this had to be done before October 15, 1960, or it could not be done at all. It is obvious nothing could be done to get things in order before that date, so it really meant nothing.

It went over to the other body and they debated it on the floor, and by an overwhelming vote they came up with a bill that simply gives the President the authority he asked for. It provides:

> Except that any amounts which would be purchased from the Dominican Republic under the foregoing provisions of this subparagraph (iii) need not be purchased or may be purchased from other foreign countries, or domestic producers without regard to allocation.

That is a really simple way of handling it. Now as we adjourn, Mr. Speaker, we apparently again will do nothing to implement a request from the Executive.

The thing, however, that is disturbing to me is that apparently the foreign

affairs of this country have been turned over to the Democratic majority of the House Committee on Agriculture. If I understand it correctly, it was more or less a party-line vote, whether to accept the Senate amendment or insist on the House position when that committee met this morning. I do not believe we are ready to turn the foreign affairs of this country over to such a few on that committee with experience not in foreign affairs but in agriculture. But be that as it may, may I point out, No. 1, that the President has had a consistent position of requesting this authority to deal with the Dominican Republic, just as he earlier asked for authority to deal with Cuba. The other body seems to agree with that position. I understand that the majority leader in the other body, who is a candidate for Vice President in the Democrat Party, supported that proposition. The bill comes back over here and apparently the Democratic leadership on the House Committee on Agriculture takes a strictly opposite view and blocks its even coming to a vote in this body, so that none of us can support the proposition in which we may believe, whichever way it is, and mind you, I am not taking any part in whether the Dominican Republic should be handled this way or that or whether Trujillo is a saint or a sinner, although I have my own views.

I find the platform of the other party states:

> We will overhaul our administrative machinery so that America may avoid diplomatic embarrassments and at long last speak with a single confident voice in world affairs.

This is the one test we have had since that platform was written for the American public to judge whether or not the Democrat Party can perform on the promise. And what has happened? The other body, in which both of their candidates for President and Vice President takes one position and this body takes another, and nothing happens. Is that a single confident voice in world affairs? Does that hold promise of the foreign affairs of this country being handled well and with dispatch should their party succeed in November? It goes far beyond party lines. It seems to me that when the foreign affairs of this country are turned over to the Democratic majority on the House Committee on Agriculture, it is "a time for concern."

I do not believe, Mr. Speaker, with all due deference to this committee, that the situation in which they have placed American agriculture recommends that the foreign affairs of this country be turned over to them. They are at least informed and make a particular study of agriculture, but in the field of foreign affairs they have usurped his duties and responsibilities and have chosen to deny the President in this administration to speak out with that single confident voice. It would seem to me the American people would think long about this. It is disturbing to me that we, as a legislative body, must admit defeat in trying to take care of this situation, and place the United States—not the President—but the United States, in an embarrassing position in the effort to cement relationships in Latin America and act in concert with our neighbors to whom we are bound under treaty. It seems to me, Mr. Speaker, that we should be able to do better than that. I wonder if this is another evidence of the complete collapse of "the new frontier," a sample of what to expect in "the time for greatness and the time for leadership" that is boasted about these days by Democrats in the press?

Mr. SPRINGER. Mr. Speaker, will the gentleman yield?

Mr. THOMSON of Wyoming. I yield to the gentleman from Illinois.

Mr. SPRINGER. First of all, I would like to commend the gentleman for the statesmanlike way in which he has tried to present the facts and the issues on this matter. In all the years that I have served in this body with the gentleman from Wyoming, I have watched very carefully how diligently he has worked in behalf of the people of the State that he represents. I know how hard he has worked for the sugar growers in Wyoming and how he has spoken out on every occasion when the opportunity has presented itself to speak out in their behalf. To me that is the real sign of a person, being sent here to represent his people, who does represent them ably and conscientiously. I hope the gentleman will carry the interests of the State of Wyoming to the other body after January 1, and this will be the one opportunity I will have to say what high personal regard I have had for him during all the years that I have been associated with him. May I say, too, Mr. Speaker, it has been a real pleasure on my part to know him and to work with him in the Congress of the United States.

Mr. THOMSON of Wyoming. I thank the gentleman.

The SPEAKER. The time of the gentleman from Wyoming has expired.

ACCOMPLISHMENTS OF THE 86TH CONGRESS—SPECIAL SESSION

Mr. STRATTON. Mr. Speaker, many of us who are Members of this House are likely to be asked, in the weeks ahead, just what this special, post-convention session of the 86th Congress accomplished. So much emphasis has been placed on what was not accomplished, that some of us may be apt to forget that there were a number of very substantial legislative accomplishments in this brief session, too. With the thought that in the rush toward final adjournment later today, many of my colleagues may perhaps have overlooked it, I include herewith for their information an article summarizing these accomplishments written by Robert K. Walsh and published today in the Washington Evening Star. I believe that Mr. Walsh has performed a very useful service for all of us as we return home to report to our constituents on our discharge of their public trust. The article follows:

CONGRESS DID MUCH—AND LEFT MUCH UNDONE

(By Robert K. Walsh)

The 86th Congress is leaving in its wake today important bills that sank beyond recovery or survived possibly beyond recognition. But it also delivered a substantial legislative charge at its short August session.

Democratic leaders, particularly the party's presidential and vice presidential candidates, Senators KENNEDY and JOHNSON, saw their hopes dashed for the passage of minimum wage, medical care, housing and school construction measures of the kind they wanted.

The performance of the Senate since it returned August 8, and of the House since it got down to business August 22, nevertheless gave the Democrats cause to deny "do nothing" charges and enabled Republicans to answer complaints of obstructionism. Its record will be warmed over by controversy through the election campaign.

TWENTY THOUSAND BILLS

All bills that fail of enactment at final adjournment will be dead. That includes the vast majority of the 20,000 Senate and House bills hopefully introduced since the 86th Congress began in January, 1959. Many, however, are certain to be tried all over again in the next Congress.

Most Members likewise will try again to be reelected in November for the 87th Congress. Four Senators and more than 30 House Members thus far have announced they will retire.

A half dozen House Members intend to seek Senate seats or gubernatorial chairs. Three House Members already have met defeat in party primary elections. Additional incumbents may lose in November. All 437 House seats and about one-third of the 100 Senate seats are involved in the 1960 elections.

WHAT WAS ACCOMPLISHED

The list of major measures that Congress did not pass at its post-convention session far exceeds in prominence and publicity the amount of legislation it actually agreed on. But in less than 4 weeks in an unprecedented session amid the tense atmosphere of election-year campaigning on the Senate floor, Congress approved:

A modified plan of Federal financial assistance to States for medical care for elderly persons, with funds from general Treasury revenues rather than through the social security taxes. The same bill made important changes in various social security system provisions.

A 12-nation treaty banning nuclear weapons development in the Antarctic and "freezing" present territorial claims there.

A $3.7 billion appropriation for military and economic assistance to foreign countries, with exclusion of the Castro Cuban regime.

A $500 million authorization to help Latin American countries in social and economic development and a $100 million authorization for Chilean earthquake rehabilitation. Funds will not be appropriated until next year.

A $162 million supplemental appropriation bill restoring $65 million of the $215 million previously cut from the foreign aid bill.

Regular 1961 fiscal year appropriation bills for the operation of the Labor; Health, Education, and Welfare; State; and Justice Departments and the Federal judiciary. These total more than $5 billion.

A $3.9 billion appropriation bill for public works projects.

GREAT DEBATES SET UP

Suspension of the Federal Communications Act "equal time" requirement so that the 1960 presidential and vice presidential candidates can stage TV-radio debates without obliging broadcasting networks to give corresponding time to fringe-party nominees for those offices.

A measure setting Federal criminal penalties for persons convicted of payola dealings, rigged quiz shows and other abuses in the TV-radio industry.

A bill strengthening retirement provisions and improving standards for Foreign Service personnel.

A bill to safeguard homeowners by requiring bonding of persons engaged in repair work.

A program of health benefits for retired Government employees.

A stabilization plan for the mining of lead and zinc by small domestic producers.

A move to increase the price-support level for manufacturing milk and butterfats at approximately market levels until March 31, 1961.

A stop-gap housing bill to continue home-repair loan insurance authority and provide $500 million for college dormitories and $50 million for community facilities until October 1961.

A rider added to the District police and firemen pay raise bill authorizing FBI Director J. Edgar Hoover to receive his full $22,000 salary annually when he retires.

A resolution favoring a convention of NATO nations' delegates to achieve greater cooperation and unity of purpose.

Authorization for taxpayers to choose an overall limitation of the foreign tax credit in their income tax returns.

CHIEF CASUALTIES

The chief legislative casualty at the post-convention session was the legislation to increase the present $1 an hour Federal minimum wage and broaden coverage. The Senate and House passed different bills but conferees were unable to agree.

Senate and House versions of legislation for Federal financial aid to States to build schools (and for teachers' salaries in the Senate bill) were blocked by a House Rules Committee coalition of Republicans and Southern Democrats who refused to permit appointment of House conferees.

The Rules Committee divided 6 to 6 and thus blocked an omnibus housing bill from going to the House floor. The Senate earlier this year had passed a similar measure.

A bill allowing labor unions to picket one of several firms at a joint construction site was shelved in the Senate Labor and Public Welfare Committee.

A bill for appointment of some 30 additional Federal judges was approved by the House Judiciary Committee but was never called up by Democratic leaders.

A resolution opposing the making of Supreme Court recess appointments went through the Senate but not the House. The House but not the Senate passed a bill allowing professionally employed persons, principally doctors, tax deductions of up to $2,500 a year if they set aside a part of their income for voluntary pension plans.

The Senate but not the House favored creation of a Federal Freedom Academy for training against Communist tactics.

RIGHTS LAW RECALLED

This summary does not include numerous other bills that Congress approved or rejected at its 1960 session from January 6 until July 3 when it recessed for the national party conventions at Los Angeles and Chicago.

Enactment of a civil rights bill was a high point during that period. When the Senate reconvened August 8, Republicans attempted unsuccessfully to force consideration of additional civil rights proposals. A measure of that kind was tabled.

Other major enactments earlier this year by the 86th Congress included a constitutional amendment resolution to allow District residents to vote for President and Vice President, a Federal employee pay raise, ratification of the Japanese security treaty, disclosure of expense accounts of Members of Congress and a $293 billion temporary limit on the public debt.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment a bill and joint resolutions of the House of the following titles:

H.R. 12574. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician, and for other purposes;

H.J. Res. 402. Joint resolution granting the consent and approval of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes; and

H.J. Res. 704. Joint resolution to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag," and for other purposes.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 3524. An act to provide for a Commission on Presidential Office Space.

U.S. CONSTITUTION 175TH ANNIVERSARY COMMISSION

The SPEAKER. Pursuant to the provisions of section 1, Public Law 86–650, the Chair appoints as members of the U.S. Constitution 175th Anniversary Commission the following Members on the part of the House to serve with himself: Mr. BYRNE, of Pennsylvania; Mr. DELANEY, of New York; and Mr. TABER, of New York.

SUGAR BILL

Mr. COOLEY. Mr. Speaker, I ask unanimous consent to address the House for 10 minutes.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. COOLEY. Mr. Speaker, I listened with great interest to the speech just delivered by the gentleman from Wyoming. I hope we may be able to keep this record straight. I have not up to now trespassed upon the patience of my colleagues in the House of Representatives in connection with the sugar program, but I feel in justice to our committee and to my colleagues in the House of Representatives I should now make some remarks about it.

In the first place, the gentleman who has just addressed the House attempted to indict the Democratic members of the House Committee on Agriculture. Well, he cannot indict the Democratic members without indicting his own colleagues, the Republican members of that great committee, because every Republican on that committee voted for the House bill. The committee amendment, which is the heart of this issue, was adopted by the unanimous vote of the Committee on Agriculture. The members of this committee know and understand the problems involved in the far-reaching ramifications and international implications of the bill we reported. After careful consideration, after conference with representatives of the executive branch of the Government, the State Department and Agriculture, we brought a bill to this House that met with the approval of every Member of the House. If the gentleman from Wyoming [Mr. THOMSON] voted against it I am not aware of it. If the gentleman from Oregon [Mr. PORTER], who spoke earlier today, voted against the bill, I am not aware of it. It was a unanimous vote.

Now, going back just a little to July, when we were considering a similar extension of the law for 1 year, almost every segment of the sugar industry of America agreed to that 1-year extension. All the refineries, all of the industrial users, the bottlers and the bakers, and all consumers agreed to the 1-year extension. Every country participating in our quota system came to me and said that they were in favor of the 1-year extension. But they all insisted that if we opened the quota provisions they wanted an opportunity to be heard. I assured every one of them that when we opened the quota provisions everyone would be given full and ample opportunity to present their views. So we assumed that the 1-year extension was agreeable.

We passed the 1-year extension in July. That went to conference, and it was not the Members of the House that shortened that 1-year extension. The Senate conferees insisted that we provide a shorter period. So we said, "All right. How about 6 months?" They said, "No. That is too long." The reason we asked for 6 months was that we know what is involved in drafting new sugar legislation and we know the time that is consumed in conducting long hearings.

We thought we could do an intelligent, constructive job, free from pressure, if we could have the entire first session of the next Congress to write a bill. I assured the membership of this House that our committee would conduct a very careful study of the sugar problem.

There is not a man in this House who can go back to his constituents and explain the sugar program in detail; not one. I have lived with it for 25 years, and I know I could not do it, and I think I know as much about it as any other Member. It is a complicated problem. In 1956, after long work by the committee, it passed this House by unanimous vote, with very limited debate. I said at that time, if you will remember, that this bill is so complicated and so involved that it is not possible for me to explain it in detail within the time at my disposal. I said, "You will have to take it on faith." And the House accepted it on faith, and it passed the Senate and went to the White House.

This program has operated so well and so smoothly for so long that the average housewife in America is not aware of the fact that there ever was a sugar problem. It has been an outstanding success.

When we came to consideration of the bill that became law last July, in came

the Department of State officials who had assured us they had no intention of using the power they were asking to cut quotas against Mr. Castro. The President said himself:

> I want no reprisals against the Cuban people. They are a friendly people and we want to keep them friendly.

Very soon, however, he asked for this power. We asked "Why do you want the power if you do not intend to use it?" The answer came back, "Well, we would like to have the power so that if we do need it we can use it. We do not intend to use it in any drastic fashion. We will take away a little quota here and make adjustments." They wanted us to abdicate and turn over this important authority over commerce to the executive branch of the Government—to wit, the President—who in turn would refer it to some bureaucrat downtown, which is what he has done.

So we said, "No, we will not give you that power unless we, the Congress, can direct you in the acquisition of sugar from other sources in the event you reduce the sugar quota of Cuba." So we wrote it out, tried to make it plain. We put in the bill a provision that every little nation participating in the program which had a quota of not more than 10,000 or less than 3,000 tons should be given a quota of 10,000.

Knowing that the Philippines has an abundance of sugar, we said "We will set aside 15 percent for the Philippines." Then we said to the President, "Then you go to the full duty countries, Peru, the Dominican Republic, Mexico, and Nicaragua, exhaust their supplies, and then you can go into the world market and authorize the purchase of sugar so as to provide an adequate supply for our domestic consumption."

Representatives of the Department told us they could live with that bill. So then, Mr. Speaker, we reported out the bill. We were told finally that the reason they wanted this power to exercise over the people of Cuba was to be able to assure the American consumer of an adequate supply. We import more than 3 million tons of sugar from Cuba annually. Over 2 million had already been delivered into our market.

When we granted this power it was not going to be used directly. You know what happened. The President refused to give Cuba 700,000 tons to which she would otherwise have been entitled. I have not heard a man on our committee complain about that action, although the State Department has told us they wanted to apply this quota gradually, take a little bit at a time. I remember the gentleman from Texas [Mr. POAGE], vice chairman of my committee, said, and I concurred with him, that if you are going to employ economic sanctions and use it against Castro let us throw the book at him, go all the way.

The SPEAKER. The time of the gentleman from North Carolina has expired.

Mr. POAGE. Mr. Speaker, I ask unanimous consent that the gentleman from North Carolina may proceed for 5 additional minutes.

Mr. SPRINGER. Mr. Speaker, I am not going to object to this additional 5 minutes for the gentleman from North Carolina but I think it is time things were brought to a close and that we adjourn some time soon.

Mr. McCORMACK. I may say to the gentleman from Texas that we are waiting on the Senate to pass the sine die adjournment resolution.

Mr. SPRINGER. If that is the case I will not object.

Mr. COOLEY. I thank the gentleman very sincerely, and I wish to say to the House that I was reluctant to leave and come back here and take the floor to discuss this matter. The reason I am here now is other people opened up the discussion. Some people complain that we had not discussed it, as if we were afraid to discuss it. But there was no need to discuss a bill that passed here in less than a minute's time. Nobody objected, nobody asked any questions.

Let us go back to what has happened. Mr. Castro's government has turned upon us viciously and has committed all sorts of high crimes and misdemeanors—murder, yes, robbery, larceny, and everything you can describe, against the American people. He has taken over hundreds of millions of dollars' worth of property owned by American citizens.

I have no brief for Mr. Castro. I did not have enough respect for him to go to hear him speak when he came to Washington, nor did I go to the reception at the Embassy that was given in his honor. I think I knew what was going to happen.

I happened to be in Havana just 2 short weeks before Mr. Batista left Cuba. You could feel it in the air. Everybody knew that Mr. Castro was on the way to Havana. But before he reached the city of Havana, our State Department went running down the road to put their arms around him and pat him on the back and say "You are our boy," in effect.

Nobody here seems to be jumping on Mr. Castro and all of his communistic activities. I have been trying to get the State Department to draw up a bill of indictment and to file it with the OAS for months.

What is the explanation for all this on the part of our State Department, when dealing with Mr. Castro? He accused us of blowing up a ship in Havana Harbor, burning his canefields, harboring murderers and war criminals. He has accused us of everything, yet we do not complain about Mr. Castro's accusations. We go to the OAS and pick up a dictator by the name of Trujillo and denounce him for crimes and misdemeanors that he has committed in the past. They allege he committed these crimes. Somebody in our committee room said: We assume he is guilty of the crimes of which he was accused. A member of our committee reminded the witness of the fact that under our ancient legal jurisprudence a man is presumed to be innocent and not presumed to be guilty.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. We find ourselves in the position in connection with the national interests of our country, which should be paramount, where we broke diplomatic relations with a regime that is strong and dictatorial, yet was friendly to us; a regime that was strongly anti-Communist. We continue to maintain diplomatic relationships with the Castro regime that hates America. If they are not Communist, they are aggressively pro-Communist. How is that consistent with the national interest of our country, and I would debate that with the gentleman from Wyoming or anyone, on the question of breaking relations with a friendly country that is anti-Communist, and continue relations with a country that hates America and is pro-Communist.

Mr. COOLEY. I appreciate the gentleman's remarks. And, I do not want anybody to understand that I am defending Mr. Trujillo or his government. He is a dictator and he is known to have been a dictator for 30 years. He is running his business there, and everything indicates that he intends, at least in December, which is a very short time away, to hold municipal elections. That is some evidence of his intention to bring about a better government. He has committed himself to hold a general election 2 years from now. Now he is improving rather than deteriorating, and it is difficult for me to understand why we have jumped on him so violently now.

After we passed our law in July and went home, believing that the law of the land would be recognized and some dignity accorded it, we found out that when they started to apply the formula they disregarded the law. They gave sugar to the little countries first, and the Philippines next, and some to the full-duty countries next, but when they got down to the Dominican Republic they said, "We will set that aside and not authorize the purchase of that sugar." There is nothing in the law about suspending authorization or delaying the shipment of sugar. As the result of all these steps, you and I know that sugar has been selling at the highest price that it has sold for in 40 years.

Where will we get our 1961 supply from? We will not be looking around for 700,000 tons; we will be looking around for 3.2 million tons of sugar in the good year of our Lord 1961, because we are not going to bring it in from Cuba. And, if the administration has its way, we will not bring this 300,000 tons in from the Dominican Republic. And, you add those two together, and it is 3.5 million tons short. And, when we pointed that out to the Secretary, he said, "Oh, well, the American consumers will be willing to bear that burden of additional price." The impact has already hit the sugar industry.

Now, the power they wanted was for a specific purpose. I asked him the question. I said, "Mr. Secretary, do you

entertain even the remotest hope that Mr. Trujillo will purge himself; will bring about the necessary reforms in his government and comply with all of the provisions of the charter?" He said, "No, sir." I said, "Then, you want this power to use by unilateral action against his government for the purpose of bringing about the downfall of the government?" He said, "Well, I don't like the word 'downfall.'" I said, "What word would you put in the place of it?" He said, "Change." So then I said, "You are advocating this economic pressure to bring about a change in some foreign government in the Western Hemisphere?" And he said, "Yes."

Now, that is the record. That is exactly why they want the power. Then I asked him if the Dominican Republic could survive if economic sanctions were applied by the other American States, and he said, "No." We asked the question, "Who would be Mr. Trujillo's successor?" Of course, no one knows. But, it is clear to see what will happen. We are preparing a perfect setup, a pushover, if you please, for another little Castro to step into the Dominican Republic. Now, if we want that, that is up to the Congress, but because the President, through somebody in the State Department, wants this economic pressure, are we in the Congress, the Congress of our great country, going on record declaring economic warfare against a country in this hemisphere?

That is the reason that I objected to giving the President this power. But we did provide, very cautiously and very wisely, that if the Organization of American States adopted an appropriate resolution calling upon its members to apply economic sanctions to the Dominican Republic and such sanctions were applied, we would give the President complete power to move in and take every pound of sugar away from them.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Iowa.

Mr. GROSS. Was not the President given practically the same power in the bill that was enacted yesterday authorizing $500 million to be spent for South America? The President could use the power of that money in any way he saw fit, that economic power.

Mr. COOLEY. Mr. Castro says that is a bribe that we are dangling over their heads, to bribe the members of the O.A.S. And that it was another bribe when we took the sugar away from him and gave it to Costa Rica and Panama and Haiti and some of the other countries.

Mr. GROSS. I am not saying it is right, but I am saying that apparently it is a case of semantics.

Mr. COOLEY. Certainly. I heard the gentleman's argument and observations yesterday and they were very persuasive.

Now, what reason on earth would these 34 men on the House Committee on Agriculture have to do anything that they did not think was in the interest and welfare of the people of America?

Now let me turn to the events of the past few days. As I have previously stated, the Committee on Agriculture met in executive session a week ago last Monday and would have on that day reported a bill providing a simple extension of the existing law through the calendar year 1961, so that we might have adequate time in the new Congress to work out a new basic sugar program.

On that day we were first informed of the demand of the administration that we give the President this new power to take unilateral punitive action against the Dominican Republic. So, instead of reporting the bill on Monday, August 22, we met on Tuesday to hear the Under Secretary of State argue for this power they were asking for. For the rest of that week the committee struggled with this problem. No member of the committee seemed willing to give the State Department all it was asking for.

Then, last Monday, August 29, we met again. And the committee unanimously rejected the proposal made by the State Department and unanimously approved the amendment giving the President the authority to cut our purchases from the Dominican Republic if such action was agreed upon and put into effect by the Organization of American States.

The House approved this bill and its amendment without a dissenting vote.

The Senate Committee on Finance took the bill and made some changes in our amendment. After studying the changes, the vice chairman of our committee, Mr. POAGE, and I discussed them with all the members of the committee we could find on the floor, which was a majority of the committee. All were agreeable to accepting the Senate changes.

Thereupon I informed the distinguished chairman of the Senate Finance Committee that we could agree to their amendments and I felt sure the House would concur.

Then, to my surprise and shock, the administration, which had indicated it could accept our House bill, reversed its position and persuaded the Senate to adopt—without hearings or mature consideration—the very provision which the Committee on Agriculture had unanimously rejected after a full week's consideration.

What position could I take, Mr. Speaker, aside from my own deep convictions on this matter, but to uphold the action of the Committee on Agriculture and of the House in this matter?

In an effort to again seek the direction of the committee, I called an emergency executive session for 11 o'clock this morning. In that session I was directed by a majority vote of the committee to take all possible steps to prevent concurrence in the Senate amendment, both on the floor and in conference, in the event a conference should be asked by the Senate.

But the Senate did not ask for a conference. They merely sent their bill over here on a take-it-or-leave-it basis. Even so, Mr. Speaker, I have gone over to the Senate and discussed this matter with several distinguished Members of that body and they were unanimous in advising me that there would be nothing accomplished by a conference—that there was no real area of compromise.

Therefore, Mr. Speaker, our only recourse appears to be the action the House is taking—let the sugar bill go over until January.

We do not need a bill at this time. The present law does not expire until March 31, 1961, and there will be plenty of time before that to extend its expiration date, if that should seem advisable—as I rather anticipate it will.

The only urgency for a bill at this time was the administration's demand for this grant of power to the President over the Dominican quota.

I think the House is wise in permitting the law to remain as it is, at least until January, so that the administration will be compelled under the existing provisions of law to carry out the allocations it has already made to the Dominican Republic and give our sugar market the supplies that it needs from that source.

The SPEAKER. The time of the gentleman from North Carolina [Mr. COOLEY] has again expired.

OBSERVANCE OF THE 100TH ANNIVERSARY OF GEN. JOHN J. PERSHING

Mr. WHITENER. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. WHITENER. Mr. Speaker, on May 16 of this year the House adopted House Joint Resolution 640, which was finally adopted also by the other body. This was a resolution commending the late Gen. John J. Pershing on the 100th anniversary of his birth, which will occur in a few days. On September 13 we will be observing the 100th anniversary of the birth of this distinguished Missourian and American.

This legislation enjoined the Department of Defense and other departments of the Government to take due notice of this significant occasion in American history. I am sorry to report that on the basis of responses to inquiries that I have been able to make it seems there is not much zeal on the part of these agencies for recognizing the great late General Pershing. I am afraid that we will see no cooperation, for reasons which are difficult to understand.

The Veterans of World War I, Inc., a national organization, has been very zealous in bringing about a proper observance of this significant occasion. But their leaders report to me that they are making little headway. An example of the failure of the administration to take notice of this occasion in a proper way is the recent refusal of the Post Office Department to issue a commemorative stamp as requested by many organizations.

I am afraid that we are seeing here again the truth of the statement of Rudyard Kipling in his poem that—

> It is Tommy this and it is Tommy that
> When the bands begin to play.

Certainly General Pershing, when the guns were firing and the bands were playing, received the plaudits of this Government, but now apparently he is a forgotten man.

Mr. LIBONATI. Mr. Speaker, will the gentleman yield?

Mr. WHITENER. I yield to the gentleman from Illinois.

Mr. LIBONATI. Mr. Speaker, I was very proud to have served in World War I as a lieutenant under General Pershing and I would say to the gentleman from North Carolina that no man in the history of our country has ever placed himself in a more important strategic position than did General Pershing in protecting the honor of the American troops as a fighting unit in World War I under American command. We will not talk about his contributions in connection with the Panama Canal, the Mexican campaign or service in the Philippine Islands, but we will say that in 8 months he alone with his officers drilled and trained the greatest army that ever took the field in defense of a war to end all wars, and that he, under circumstances of pressure, resolved that the integrity of the American forces would be maintained and they would be under one command, an American command. It was demanded of him that the American forces be integrated with the French and English armies. He stated in conformity with his judgment that the unity of control should remain under American command, and thus the victories in the field were American victories.

Mr. WHITENER. I thank the gentleman from Illinois, and express to him my appreciation for his effort in our Judiciary Committee and also on the floor of the House in bringing about the passage of this resolution.

In conclusion, I should like to commend our distinguished colleague from Missouri [Mr. HULL], and the Senator from Missouri [Senator SYMINGTON], for their action in introducing a bill to provide for a monument to this great American here in the city of Washington. I hope it will be acted upon favorably and that this truly great nonpolitical general in our history will receive the plaudits of the American people on the 100th anniversary of his birth, to which he is entitled in such a magnificent manner.

DECISIONS AND DEVELOPMENTS IN THE FIELD OF COLLUSIVE AGREEMENTS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, I include in my remarks an address made by Mr. Stephen E. McCloskey, chairman of the labor relations commission of the Commonwealth of Massachusetts, entitled "On Decisions and Developments in the Field of Collusive Agreements." The speech was made before the fifth annual conference at the Association of State Labor Relations Agencies at the Hotel Hershey, Hershey, Pa., Tuesday, August 30, 1960.

Mr. McCloskey is an outstanding leader in the field of labor relations. He is very cognizant of the difficulties confronting management and labor, and has done much to solve labor disputes that have arisen in the Commonwealth of Massachusetts. He has always been a strong believer in the rights of union members to collective bargaining; he has always insisted and held that it is vital that the unions adhere to their contracts with employers, so that industrial peace can be secured. I commend Mr. McCloskey's speech as being constructive, enlightening, and informative as to advancements made in the field of labor relations:

ON DECISIONS AND DEVELOPMENTS IN THE FIELD OF COLLUSIVE AGREEMENTS

(Remarks of Stephen E. McCloskey, chairman, Labor Relations Commission, Commonwealth of Massachusetts)

Mr. President, officers of the association, distinguished guests, chairman and members of State labor relations agencies and their guests, I am happy to be here again and I deem it an honor and a privilege to be given the opportunity of addressing you on the occasion of your 5th annual conference. Thank you for the invitation.

His Excellency, Gov. Foster Furcolo, has asked me to bring to you the greetings of the Commonwealth of Massachusetts, and to extend to you an invitation to visit Boston for your annual conference in 1961.

Under the Massachusetts Labor Relations Act, the ban of employer unfair labor practices is intended to produce the type of industrial relations wherein employers and the representatives of their employees deal at arm's length across the bargaining table. These employer unfair practice bans aim at eliminating all those employer activities by means of which employees are prevented from selecting and operating under bargaining representatives of their own choosing. The ban on employer domination or interference in the formation of labor unions slips into this design as one of its essential parts.

We are well aware that one of the principal ways in which employers traditionally interfered with and discouraged organizational activities was by providing assistance in the creation of or by the direct or indirect creation of company unions, unions which were actually no more than puppets. As unscrupulous employers planned, these unions could not engage in arm's-length bargaining with their employers. They were not designed to do so in theory and they did not do so in practice. A few dishonest and traitorous leaders had sold out their fellow employees. The leaders of the company unions did not bargain in good faith and follow the dictates of the majority of their fellows, as they were bound to do under the law. Rather, they followed the dictates of the employer. The State and Federal statutes, therefore, included provisions forbidding the employer practice of dominating or interfering in the formation of labor unions. Most of the statutes on the State and Federal level were almost identical and on the State level were commonly referred to as Baby Wagner Acts.

To dwell at length on the evidence necessary to support a finding that a union was company dominated or that there was undue interference or support of the union by the company would be repetitious of facts that you men encounter frequently in discharging your duties as officials of State labor relations agencies.

Perhaps my observations as a labor official and as chairman of the Massachusetts Labor Relations Commission will provide you with information of interest concerning my State.

Many of you may not be aware that Massachusetts is generally first to show the way to other States not only by a wise and judicious interpretation of the law but also by enacting into law much needed social and labor legislation. In this connection, I am reminded of a leading Massachusetts case that just about ended the criminal conspiracy doctrine established by the famous Philadelphia Cordwainer's case.

In 1836, a few years prior to the famous Massachusetts case of *Commonwealth* v. *Hunt*, the New York Supreme Court deciding *People* v. *Fisher*, read into an exceedingly vague statute a legal bar against labor activity comparable to that of common law conspiracy. The legislature had enacted that "if two or more persons shall conspire * * * to commit any act injurious to the public health, to public morals, or to trade or commerce; or for the perversion or obstruction of justice or the due administration of the laws—they shall be deemed guilty of a misdemeanor." A group of journeymen shoemakers, organized in a club, were indicted under this statute for striking to procure the discharge of a workman who accepted wages lower than the minimum approved by them. If they were guilty at all under this law, it was for a conspiracy to commit an act injurious to trade or commerce.

A provision of such generality was not much of a guide. But the court readily accepted the responsibility of using it to convict the defendants. It saw the issue as one of a conspiracy to raise wages. Artificially high wages meant correspondingly higher prices for boots, which prevented local manufacturers from selling as cheaply as their competitors elsewhere. Furthermore, the community was deprived of the services of the man whose discharge was effected by the union. Such results were, in the court's opinion, clearly injurious to trade and commerce, and their causes should be punished under the statute.

These and numerous other criminal convictions of workers for taking advantage of what they regarded as their ordinary civil privilege to exercise their right to work or not work, under such terms as they saw fit, bred ill-feeling throughout the East. Mobs of laborers held mock trials of judges and hung them in effigy to show their resentment at being treated as common criminals for having done what they believed they had a perfect right to do. Juries were refusing to convict in some of these prosecutions, in spite of clearly proved cases of criminal conspiracy under the prevailing law. Even the press attacked judicial statements that the unions were of foreign origin or were mainly upheld by foreigners. These were implications that were patently false. News of these events traveled fast. The owners of the newly established textile and shoe factories in Massachusetts were as much concerned over the judicial treatment of organized labor as were the unions themselves.

In the case of *Commonwealth* v. *Hunt* our superior court had convicted seven members

of the Boston Journeymen Bootmakers' Society for organizing a strike, in September 1840, against an employer who had hired and retained one Jeremiah Horne, a journeyman, who was not a member of the society. The indictment had charged them with having unlawfully, perniciously, deceitfully, unjustly, and corruptly conspired not to work for any master who employed any workman not a member of their union, after he was notified to discharge such workman; with having compelled by these means at least one master named Isaac B. Wait to discharge Horne; and with the "wicket and unlawful intent to impoverish" and to keep him from pursuing his trade. The trial judge had instructed the jury that the indictment set forth a course of conduct amounting to criminal conspiracy. This meant that if such acts were proven at the trial, a verdict of guilty should follow.

The convicted shoeworkers appealed to the highest court of the State on the ground that the indictment had not charged a crime. Its decision came down in 1842, Chief Justice Shaw writing the opinion for the court. He was no lover of unions and probably believed them to be thoroughly vicious. In other connections he showed himself unsympathetic to wage earners by preventing them from recovering damages against their employers for personal injuries due to the defective conditions of premises and appliances or because of the carelessness of fellow employees. This had the effect of lessening the overhead risks of infant industry at the expense of workers who could ill afford to bear them.

Nevertheless, he realized from reading the newspapers that Massachusetts workers would react violently if courts persisted in calling them criminals for trying to advance their interests by their refusal to work. He knew that the fortunes of many a future old Boston family were tied up in the newly built mills and that a wave of strikes, on the heels of the recent depression, could easily finish them off. Such a disaster, in turn, might have political repercussions fatal to the proposed tariff believed necessary for the protection of incipient industry. Something simply had to be done to discourage the indiscriminate use of the doctrine of criminal conspiracy against the workers.

Shaw rose to the occasion in an opinion which was a masterpiece of tact and technicality. He disregarded the adverbs in the indictment as mere recital—wishful thinking by the prosecuting attorney. All the indictment really charged, he said, was the intention of the society to induce all those engaged in the same occupation to become members of it. This was not an unlawful objective designed for the purpose of securing power. Such power, he said, might be used for useful and honorable purposes as well as for dangerous and pernicious ones. If the latter were the real ends in view, and were susceptible of proof, they should have been specially charged. For all the court could tell from the indictment, the purposes of the society might be laudable, such as discouragement of the use of ardent spirit. "Such an association might be used to afford each other assistance in times of poverty, sickness and distress; or to raise their intellectual, moral and social conditions; or to make improvement in their art; or for other proper purposes." If this were so, the indictment could not support a conviction. And the court refused to assume that the workers' objectives were bad.

Everyone, including the court, knew what the union's purposes really were, even if they had not been set forth in the indictment. Hence this decision, issued by perhaps the most able State judge of his time, gave the doctrine of criminal conspiracy a considerable setback. Shaw had not abolished the doctrine of criminal conspiracy as some wishful thinkers think he did. But by so obviously sidestepping the real issue in the case as a matter of expedience, he discouraged the use of this doctrine for many years. And, as Dean Landis, of Harvard Law School, a prominent writer in this field, has remarked about Shaw's opinion, "he foreshadows clearly the doctrine of a later day that the legality of a strike is to be made to depend upon the end sought to be attained."

Common law criminal conspiracy has never again played a prominent part in the control of labor unions by American courts, although it was used occasionally after the Civil War to break up strikes. Parliament by statute formally discarded this doctrine for all time in 1875, after English labor unions had achieved substantial political power. But in America it just faded away, perhaps chiefly because the courts developed a much more effective means of control in the injunction.

A few years short of a century later, a racketeer in Worcester, Mass., had created a dummy union and was extorting through fear and threats, protection money from employees through employers in the area. The practice was sure to spread to other cities and towns unless it was stamped out immediately. The union, which was known as the Central Massachusetts Industrial Union, was alleged to have received financial or other support from the employers. In fact, the union, which had all the earmarks of a paper local as we know it today, had as its president a local racketeer and gunman. The gunman had forced a group of cleaners and dyers in Worcester, Mass., by threats and fear of physical violence to recognize said union and deduct 25 cents a week from the pay of its employees. The money was subsequently paid over to Joseph Genduso, president of said union, who was in fact the Central Massachusetts Industrial Union.

Upon charges filed in March 1938, only a few months after the Massachusetts Labor Relations Commission had come into existence, by the American Federation of Labor and the Amalgamated Clothing Workers of America, two labor organizations acting independently, the commission after investigation issued its complaint against those employers who had entered into contract with the Central Massachusetts Industrial Union. The complaint alleged that each one of the respondents had engaged in unfair labor practices within the meaning of section 8 (1) and (2) of the State Labor Relations Act in that each one of the respondents dominated or interfered with the administration of a labor organization known as the Central Massachusetts Industrial Union, or had contributed financial or other support to said labor organization and had conspired with one Joseph Genduso, president of said labor organization, to so dominate and interfere with the administration of said labor organization or to contribute financial or other support to the same.

Some of the respondents filed an answer denying generally the commission of any unfair labor practice and, in some cases, setting up certain other special defenses.

All of them appeared by counsel at a hearing which was held on April 20, 21, and 25, 1938, before the commission. Joseph Genduso and the Central Massachusetts Industrial Union also appeared at said hearing and were represented by counsel. At the beginning of the hearing, the Amalgamated Clothing Workers of America, Local 16, appeared and asked permission to withdraw all charges on the grounds that said Local 16 was no longer a party of interest for the reason that, by agreement between Local 16 and the American Federation of Labor, exclusive opportunity and right to organize the employees of the several respondents had been left to the American Federation of Labor.

The commission commenced taking testimony on April 20 and continued through April 21, when counsel for all the respondents and counsel for Joseph Genduso and his union requested an adjournment until April 25, at which time and place said counsel stated to the commission they would present to it an agreement arrived at as the result of a joint conference between themselves, which might be acceptable to the commission and which might permit prompt termination of the proceedings without further hearing.

The adjournment was granted and on April 25 counsel presented a stipulation to the commission by which, without the admission of any of the facts alleged, they consented to the issuance of the order hereinafter stated.

Upon the entire record in the case, upon the basis of the above-mentioned stipulation, pursuant to section 10(c) of the State Labor Relations Act, hereby orders that each of the respondents, its agents, successors and assigns, shall:

(1) Cease and desist from in any manner interfering with, restraining or coercing their employees in the exercise of their rights to self-organization, to bargain collectively through representatives of their own choosing, and to engage in concerted activities, for the purpose of collective bargaining or other mutual aid or protection as guaranteed in section 7 of the State Labor Relations Act;

(2) Cease and desist—

(a) From requiring as a condition of employment membership in the Central Massachusetts Industrial Union;

(b) From encouraging membership in said union or any other labor organization of their employees, and from discouraging membership in any other organization;

(c) From deducting dues for said union from the wages of its employees and from soliciting for members during working hours and on the property of the several respondents;

(d) From in any manner dominating or interfering with the administration of the Central Massachusetts Industrial Union or any other labor organization and from contributing any support to said labor organization or any other labor organization;

(3) Take the following affirmative action which the commission finds will effectuate the policies of the act;

(a) Withdraw all recognition of the Central Massachusetts Industrial Union as representative of their employees for the purpose of dealing with the several respondents concerning grievances, labor dispute of wages, rates of pay, hours of employment, or conditions of work and completely disestablish the Central Massachusetts Industrial Union as such representative;

(b) Post immediately notices to their employees in conspicuous places throughout their several shops and stores stating—

1. That said union is so disestablished and that the respondents will refrain from any official recognition thereof;

2. That to secure employment in the respective shops and stores of the respondents, a person need not become a member of said union;

3. That the contract or contracts signed with said unions is or are void and of no effect;

4. That the respondents have ceased and desisted as provided in sections 1, 2, and 3 of this order;

5. Keep such notices posted for a period of 30 days from the date of posting;

6. File with the labor relations commission on or before the 10th day from the date

of service of this order a report in writing setting forth in detail the manner and form in which they have severally complied with the foregoing requirements.

The fact that the commission proceeded in such a forthright and unrelenting fashion to dispose of this case to the satisfaction of the affected employees in the area, undoubtedly discouraged similar activities in our Commonwealth by such unsavory characters as Mr. Genduso. Attorneys and examiners assigned to the case were threatened but this did not deter them in their investigation and prosecution of the case. Representatives of the district attorney's and attorney general's offices were present at the hearings and this probably was responsible for the complete capitulation of Mr. Genduso and the respondents in the case. The stipulation presented to the commission agreeing to the issuance of the above order was designed to prevent the presentation of damaging evidence that would lead to further criminal prosecution. However, our investigation was made available to the district attorney's office and further criminal prosecution followed.

Massachusetts is fortunate in being free from the above-described type of collusive agreement as well as other types of collusive and conspiratorial agreements between employers and paper locals or other employer-dominated and supported unions.

This is due in no small measure to the alert and militant effort of Massachusetts labor leaders, who with the cooperation and assistance of our commission and the National Labor Relations Board have never permitted such agreements and arrangements to exist.

I am proud to be a member of the Massachusetts Labor Relations Commission, which has so admirably and effectively discharged its duties in the past, and as the person charged with the direction and control of this commission, I can assure you that it will continue—at least under my direction—to effectively and impartially carry on the traditions of the past, thereby fulfilling its mandate under our law, to Massachusetts labor and management.

In closing, I want you gentlemen to know that it is my observation that with the type of officials who are members of our various State agencies, whom I have met here and in Detroit, such agreements and arrangements as we have discussed here today will be thoroughly investigated, exposed and eliminated forthwith upon discovery in your respective States.

Thank you for inviting me to participate in your conference. I have looked forward to attending it and I have enjoyed every minute. The hospitality of Mike Crosetto and his board and the hospitality of the hospitality room provided by Mr. Bowers has been wonderful.

PUERTO RICAN-AMERICAN COOPERATION IN ATOMIC ENERGY DEVELOPMENT

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. PRICE] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PRICE. Mr. Speaker, recently my friend and colleague, CHET HOLIFIELD, chairman of the Joint Committee on Atomic Energy's Subcommittee on Legislation, represented the Joint Committee at the groundbreaking ceremonies in Puerto Rico for the AEC-Puerto Rico Water Resources Authority atomic powerplant, utilizing nuclear superheat.

I believe CHET HOLIFIELD had some important things to say as to the lessons to be learned from this Puerto Rican project as an example for United States-Latin American development and arrangements for cooperative projects with other less developed countries.

I would like to introduce Mr. HOLIFIELD's speech in the RECORD at this point:

PUERTO RICAN-AMERICAN COOPERATION IN ATOMIC ENERGY DEVELOPMENT

(Remarks by Hon. CHET HOLIFIELD, Democrat of California, Joint Committee on Atomic Energy, at the dedication of the Puerto Rican atomic powerplant August 23, 1960)

Upon behalf of the Joint Congressional Committee on Atomic Energy, I want to extend congratulations to our fellow citizens of Puerto Rico, to Gov. Muñoz Marín, and to the Puerto Rico Water Resources Authority on the occasion of the dedication of this atomic power project.

It is routine procedure for speakers at a dedication ceremony to declare that it is indeed an historic occasion. However, in this case, I sincerely believe that we are taking note today of a quite remarkable occasion. Let me explain why this dedication of a nuclear power project in Puerto Rico seems an important event to me.

This atomic powerplant, and the Puerto Rican nuclear center, signify several important milestones in U.S. atomic development and United States-Latin American relationships. First, on their merits they will be a significant part of the research and development effort of the United States in the field of atomic power and basic research in atomic energy. Secondly, they show how the democratic process (and I use a little "d" although this is an election year) works to achieve real progress, in contrast to the dictatorial approach used in places not so far from here. Finally, and hopefully, it is possible that what we have learned—and are learning — here may have application throughout Latin America, and elsewhere in areas of the world which are in need of development.

For only a few decades ago, Puerto Rico certainly qualified as an underdeveloped area. We became aware of your problems of poverty, and lack of food, clothing, housing, and gainful work. In those days there seemed to be not much hope for the future.

However, the years of the New Deal for the United States included a New Deal for Puerto Rico, and out of this beginning has grown your Operation Bootstrap. I have been much impressed by what I have heard and read about your successes, under able leadership, in raising the standard of living, developing and attracting new industry, improving education, building decent housing, and carrying forward all of the other activities required for achieving a life of decency and dignity for the people of Puerto Rico.

One of the absolutely essential factors in achieving what you have achieved so far, and in continuing with your remarkable progress, is an abundant supply of electric power at a reasonable cost. I congratulate you and your Puerto Rico Water Resources Authority for the zeal, courage and competence with which you have overcome many obstacles to provide the ever-increasing amounts of power required for Operation Bootstrap. I understand that the authority is one of the fastest, if not the fastest, growing electric utility systems in the United States. I am informed that in less than 20 years you have succeeded in increasing your production of power by more than 10 times; that from a peak load of 18,000 kilowatts in 1941, your authority is now planning for a peak demand of more than 500,000 kilowatts within the next 2 years.

This is amazing growth and an amazing achievement even in the rapidly growing electric power industry.

It is especially noteworthy because, in addition to the usual problems of very rapidly expanding electric power systems, the authority has faced acute shortages of technically trained personnel and a lack of local fuel supplies.

Today, less than 20 years after the creation of the authority, only 12 years after the inauguration of Operation Bootstrap, and 8 years after your attaining Commonwealth status with a new constitution, Puerto Rico is stepping forward into another new frontier—the frontier of atomic power, beyond which if we are successful lies a new and immense source of low-cost energy for the people of the world.

I would think this a less notable occasion if this nuclear plant were simply being built here by the Federal Government as a showpiece, with little or no direct participation by the people of Puerto Rico and the engineers of your water resources authority. The fact is, of course, that quite the contrary is true.

That this project is now to go forward is due in large part to the leadership, the initiative, and the persistent efforts of Gov. Luis Muñoz-Marín (chairman of the board of the authority) and Mr. S. L. Descartes, until recently the executive director of the authority. Equally important, authority engineers have contributed very substantially to the detailed conception and design of what will be a pioneering reactor in the advancing technology of atomic power. We know that for a number of years the authority has sent its bright young engineers to our great atomic laboratories at Argonne and Oak Ridge and elsewhere for training.

This, it seems to me, is a matter of great importance, because in Latin America and in other areas of the world live millions of people who are engaged in a similar struggle to industrialize their countries and raise miserably low living standards. To do this, they must have power, just as Puerto Rico has to have more and more power—for your homes, your new industries, and rural electrification. Puerto Rico's rapid progress must be greatly encouraging to these other peoples. If you now show that it is possible in so short a period of time also to begin to develop and exploit this new source of energy from the atom, the value of Puerto Rico as a demonstration and as a center for training and information for underdeveloped areas everywhere will acquire a new and exciting facet.

Now I do not wish to give anyone the impression that atomic power development, as such, will be the panacea for the ills of underdeveloped countries. For most areas the utilization of increased energy from conventional sources—waterpower, oil, and coal where available—will make the most sense economically as the first step. But we have found that just the competitive threat of atomic power has had a beneficial effect on conventional fuel costs. And there is no doubt that a long-range atomic power development program, tied in with basic scientific research in all fields of atomic energy, will ultimately pay off.

And let me say that I have no doubts about your ability to make an important contribution in this new endeavor.

If I were not convinced that you will succeed, and succeed impressively, there

would be no nuclear power project to dedicate today. We who are on the Congressional Joint Committee on Atomic Energy do not recommend an atomic power project as an act of charity or as a ceremonial gesture of good will. We believe strongly that public funds should be invested in a nuclear power project only if there is a clear promise that the investment will result in substantial and important contributions to technical knowledge.

As you know, atomic power today is expensive. It is not yet competitive from an economic standpoint for civilian use. The basic objective of our Federal atomic power program is not now and never has been simply to build kilowatts of atomic power capacity. The objective is to develop and build facilities and to finance research through which the scientists and the engineers can learn how, as expeditiously as possible, to build commercial atomic power plants that will produce electricity at low cost, safely and reliably.

This project in Puerto Rico offers a good example of the Joint Committee's policies in respect to atomic power. The Atomic Energy Commission first proposed a nuclear powerplant in Puerto Rico in early 1957, following an announcement by Dr. Milton Eisenhower in 1956, to be part of your nuclear energy training center for Latin America. The Joint Committee turned down this recommendation because the Atomic Energy Commission proposed constructing a type of reactor which we already knew how to build. It would have contributed nothing to advancing the technology, although it might have been a nice showpiece. The Joint Committee indicated it would be interested only in a proposal which promised a further step ahead in power reactor technology.

In all honesty, I must say that that probably would have been the end of the project if the Puerto Rico Water Resources Authority at that point had not shown some rather remarkable initiative. Your authority selected one of America's best qualified reactor engineering firms under the direction of Dr. Walter H. Zinn, who is perhaps our most distinguished reactor designer. As a result of his collaboration, the concept for the nuclear superheat reactor was developed which now is to be built and operated here.

The authority took the initiative also in convincing the Atomic Energy Commission and the Joint Committee that the concept was sound, and that the project would indeed contribute greatly to power reactor technology. The fact is that this will be one of only two reactors in our entire program to explore the vitally important field of nuclear superheating. Furthermore, this reactor is to be designed and built as a truly experimental facility—not just a power producer—so that many valuable experiments can be performed with it to increase our understanding of how to design more efficient, more economical atomic power plants as time goes by.

This facility, therefore, is important not just to Puerto Rico and, indeed, not just to Latin America as a new training facility. It is important to the total U.S. program for atomic power development. We expect great technical contributions from this plant and from the engineers of your authority which will operate the plant and conduct many of the experiments.

I cannot resist the opportunity to say that the Joint Committee on Atomic Energy claims considerable credit for this project. We not only insisted that a project be undertaken which would contribute very importantly to our technical development program. We also actively supported the authority's proposal once it was clear that the authority was recommending a technically valuable type of facility and, equally important, possessed the engineering competence to do a good job of operating the plant once it was built.

At the request of Chairman CARL DURHAM and myself in June 1958, the Commission submitted a report to the Joint Committee on the authority proposal. The Joint Committee on its own initiative recommended, and Congress later that year approved, funds for engineering studies of the authority concept. The studies made good progress and the concept looked increasingly promising. We were surprised and disappointed, consequently, when the AEC informed the Joint Committee in April of 1959 that the proposed reactor was too exotic and that there were doubts about building it at a distant point like Puerto Rico.

Senator CLINTON ANDERSON, who became chairman of the Joint Committee again in January 1959, and I both urged the AEC to reconsider, since we felt quite strongly that this was a worthwhile undertaking and should certainly proceed without further delay. I can tell you too, that Commissioner John Graham, who is with us today, has also been an invaluable friend and supporter of this project in the Commission.

In June 1959, Congress accepted the Joint Committee's recommendation and authorized the design and construction of a reactor superheat project. The location and sponsor was left up to the Atomic Energy Commission to decide on technical grounds. For a month or so, it was nip and tuck as to whether we could get the necessary appropriations enacted, and then whether the Budget Bureau would let AEC begin to spend them. It was at this time that AEC Commissioner Graham made a trip down here for firsthand discussions. I am delighted that further studies since then have confirmed our belief that this is a desirable step forward, and that the negotiations between AEC and the authority on the joint financing of this project met with success.

I might also say that the project represents to me a most desirable and wholesome type of partnership between public agencies for the public benefit. All of the information developed from the research program with the reactor will be made available to the public. All of the patents obtained will be available to industry, private and public, on a royalty-free, nonexclusive basis. This is as it should be from the expenditure of public funds.

This is not the first occasion, of course, for this type of collaboration between public agencies in Puerto Rico. Your authority and the Rural Electrification Administration have worked together for years in your highly successful and still expanding program for bringing the blessings of electricity to the rural people of the island. I understand that your authority has called upon the Department of the Interior and Tennessee Valley Authority for advice and assistance in planning and designing your ever-growing generating and transmission system. This is the kind of fruitful collaboration which should go on, and I am glad that now, in the newest frontier of the power industry, we have brought in the Atomic Energy Commission as a new partner in Puerto Rico's outstanding power program.

This nuclear facility which we are dedicating today, like so much that is being done by the Commonwealth of Puerto Rico, has a larger significance than its contribution to the progress of the island economy and to the effectiveness of the American atomic power program. Beyond this, and certainly of equal importance, it will be an important element in the nuclear energy center here for all of Latin America. This project and this center will be another demonstration for this region and for the world of how a free people, operating through the institutions of a freely elected and democratic government, can apply effectively our modern technology to improve and advance the general welfare.

I had occasion yesterday to fly over a nearby troubled island which is apparently trying another approach to developing its resources—through the method of authoritarian control, playing the dangerous game of flirting with communistic advisers. I am sure that the differences in the democratic and Communist ways of life will become very strikingly demonstrated in these islands of the Caribbean. The people of many nations are watching this demonstration of two opposing philosophies.

Under the dedicated leadership of Gov. Muñoz Marín, Puerto Rico is demonstrating in a dramatic way the vitality and the vigor with which the people of a progressive democratic society can build for themselves a better way of life.

As a fellow American, I am proud of Puerto Rico and I wish you well in your new endeavors.

PENNSYLVANIA RAILROAD STRIKE

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Maryland [Mr. JOHNSON] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. JOHNSON of Maryland. Mr. Speaker, I rise on this occasion as the House of Representatives rapidly approaches the hour of adjournment to express my deep concern over the rail strike which has shut down the Pennsylvania Railroad system. This strike more than inconveniences thousands of stranded passengers, it strikes an economic blow in 13 States serviced by the Pennsylvania Railroad—and particularly the Eastern Shore of Maryland. While this strike, gentlemen, affects the economic lifeline to the auto, steel, and coal industries, to me, as the Representative of the First Congressional District of Maryland—which comprises that historical area known as the Eastern Shore—I know an economic blow of catastrophic proportions confronts my people.

The Pennsylvania Railroad carries coal to the famous Delmarva Peninsula, and a possible power block looms because coal is used to generate electricity for the area. But more than this, the great poultry industry with 50 million broilers will be without feed ingredients within a few days, the famous seafood and canning industries of the Delmarva Peninsula will be confronted by an economic disaster from which, I fear, they will be long recovering.

This morning I dispatched a telegram to the President of the United States, asking him to exercise the great influence his Office commands by personally calling upon Mr. A. J. Greenhall, president of the Pennsylvania Railroad system, and Mr. Michael J. Quill, president

of the Transport Workers Union, to expeditiously settle their differences.

An unprecedented number of telegrams and telephone calls from my constituents have arrived in my office today requesting an immediate settlement of this tragic strike. Their economic lifeline now severed, leaves them with no other alternative but to call upon reasonable men to reason together.

On the way to the office this morning I heard several individuals deplore the tragedy of this strike by the inconveniencing of thousands who would use the railroad facilities on the eve of Labor Day vacation period. I can appreciate this feeling, but gentlemen, the economic paralysis of our Eastern Shore is of greater concern to me than looked for pleasures of a Labor Day vacation.

I hope the Members will join me in urging the early conclusion of this disastrous strike. I know the people of the Eastern Shore will be most appreciative of your efforts, not only in their behalf, but also for the economic welfare of our Nation as well.

AMERICAN MEDICAL ASSOCIATION SCARE PROPAGANDA: LET THE PEOPLE DECIDE

Mr. PORTER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD today following the special orders of the day and to include extraneous material.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. PORTER. Mr. Speaker, at the height of the Senate debate on the medical care of the aged bill—H.R. 12580—there appeared in the newspapers throughout the country a full-page advertisement under the caption—"Medical Care for the Aged—Let's Help Those Who Need Help."

This was the climax of the American Medical Association's desperate campaign to defeat the Forand bill and other proposals which would use the social security mechanism to provide medical care for our older citizens. So far this campaign has been successful with the Congress but it is my earnest conviction that the views of those in our system of government who have the last word on such subjects—the people of the United States—will ultimately prevail.

AMA DELUGE OF SCARE PROPAGANDA

It is impossible to answer all of the deluge of scare propaganda which cascades upon the American people from the headquarters of the AMA in Chicago. I cannot, however, let the full-page ad of August 17 pass without comment.

The AMA declaration starts off with the not too startling assertion that Americans believe that "helping others is the decent thing to do. But helping those who don't need help doesn't make much sense."

The full-page advertisement goes on to state that the House-passed bill, in providing a Federal-State "means test" program, meets the criteria of helping people who are really in need.

With the proposition that we must take care of our needy I heartily agree. We do need a good program for people on old-age assistance and for those who are medically indigent. The Congress, the Federal executive branch, and the States have been remiss in this area in the past and the recent report of the Advisory Council on Public Assistance has pointed out the "glaring deficiencies" in the public assistance programs.

LET'S DEAL IN FACTS—ALL OF THEM

The weakness of the AMA position is not in their recent espousal of a greatly expanded State-Federal medical plan for the needy but the fact that they present this program as the total solution to medical care for elderly and a complete substitute for the social insurance method. This I believe is the fundamental fallacy of their position which should be pointed out to the American people. The AMA ad grandly proclaims:

> Our older citizens deserve every consideration. Certainly they are entitled to the chance to live their lives as fully as possible, with dignity and independence, with faith and pride in themselves.

But how can the AMA maintain that this is a program that promotes dignity and independence? The House bill, and the almost identical Senate proposal which was approved by the Congress, are both based on the public assistance means test approach. Such a program allows the State through a caseworker to make a humiliating investigation of an individual's income and resources—and even the income and resources of his relatives—in determining eligibility for payments. It is a program which has traditionally been based upon idea that the payment is an act of charity on the part of the Federal and State Government.

It seems only too obvious, in my view, that if you are looking for the preservation of an individual's dignity and independence you inevitably must look to the social insurance approach. This method insures against need, and insures against dependency and indignity that accompanies need. To me the idea of making contributions during one's working lifetime to take care of possible illnesses in retirement years is fully in accord with our best American traditions.

The fact that an individual may never use this protection or, perhaps, has other income or resources to pay for such care does not disturb me in the slightest—for this is the very same type of insurance protection that was made available for workers under social security for retirement and survivor benefits in 1940 and for disability benefits in 1957.

SOCIAL SECURITY APPROACH MEANS INDEPENDENCE

One of the basic reasons for the growth of the old-age and survivors insurance system has been the fact that it does protect the independence and self-respect of the American worker. It has also been demonstrated that the social security administrative mechanism can do the job with unparalleled efficiency.

A Life magazine editorial of April 25, 1960, in discussing the medical care for the aged issue, tried, in its words, to "separate its social realities from its politics, and facts from principles." The editorial stated in part:

> Unquestionably, many older Americans (15.8 million are over 65) are in real need. The average $72 a month they draw from social security scarcely provides food and shelter, much less for the medical expenses which increase with age. Few are in a position to meet the cost of chronic illness from which many suffer. Yet even to get charity care—itself inadequate in quantity and often inferior in quality—they must suffer the indignity of a pauper's oath.
>
> Can their need for medical aid be provided by private, voluntary Blue Cross-type plans? These are expanding, but can never meet the whole need. Premiums for the aged as a separate group are prohibitively high. The least burdensome method of insurance is for the whole society to spread the costs over the whole working life cycle. The cheapest and most logical way of doing this, whether by the Forand bill or a better one, is by extending the existing system of social security.
>
> To provide this aid need not be socialized medicine, as opponents claim, since payments could be made through private channels and patients select their own doctors and hospitals as before.
>
> The first question of principle is whether this form of aid will undermine the private duty of providing for one's own old age through old-fashioned virtues like foresight and thrift. Being a floor, not a ceiling, it need not do so. Individuals will still have plenty of incentive to save for the future, though less fear of it.

There are two other aspects of the AMA full-page ad which I find particularly galling. First, the old familiar lament that under the social security approach the Federal Government will be "telling the doctors how to practice medicine; telling the nurses how to nurse; telling the hospital how to handle its patients." This is the old socialized medicine pitch which just 4 years ago the AMA was using so vociferously in an attempt to kill the disability program. In reality all the social security approach legislative proposals have adequate safeguards against the socialization of medicine since they are designed to preserve freedom of choice and the doctor-patient relationship.

The minority report of five members of the Senate Finance Committee emphasized this point:

> Under any amendment, individuals would continue to exercise whatever choice they now have in regard to the persons or institutions from whom they obtain care. Our amendment (Kennedy-Anderson) would in no way impair the freedom of physicians to practice as they choose. Nor would it affect their responsibility for recommending and certifying the type of care necessary, whether in a hospital, a skilled nursing home, or the patient's own home. On both physicians and hospitals would continue to rest responsibility for developing improved methods of caring for aged persons, utilizing less expansive forms of care when they would prove

constructive, and speeding rehabilitation so as to avoid permanent invalidism.

There is also the question of the consistency of the AMA position on socialized medicine inasmuch as they seem to give unqualified approval to the public assistance medical program. Under these programs the Federal Government does not guarantee an individual that he will receive care in the hospital of his choice. Moreover, States set fee schedules for participating physicians and enter into contracts with certain hospitals to provide care to needy individuals on a specified cost basis. This power in the States, for some mysterious reasons, does not invoke the wrath of the AMA but those social security approach proposals which grant much more circumscribed powers to the Federal Government are described ominously in the full-page ad as "placing your health care under the Federal Government's thumb."

WHAT ABOUT COSTS?

Finally, there is the question of costs and that of fiscal responsibility. The AMA complains in the full-page ad that "the cost of such a program eventually would be staggering, and would make a serious dent in the pay envelopes of millions of Americans covered by social security."

What are the facts? The Kennedy-Anderson amendment—the latest and most refined of the social security approach proposals—is in exact actuarial balance and, thus, soundly financed. It provides hospital, nursing home, home nursing, and outpatient diagnostic services which total exactly one-half of 1 percent of payroll. To finance these benefits the amendment levies a social security tax increase equivalent to this precise amount—an increase on the tax of both the employer and employee of one-fourth of 1 percent. The workers of this country, as demonstrated by the testimony and letters in the Senate hearings, have indicated that they are willing to pay this additional amount.

As to future liberalizations, it should be made clear that the American worker has watched his social security system very closely. The result has been a sound system the solvency of which has been attested to recently by the financial experts of the Advisory Council on Social Security.

It would also be axiomatic that the American worker is capable of deciding at which point social security taxes are becoming a burden, and will so inform his elected representatives without any prodding by the AMA.

WHAT ABOUT FISCAL RESPONSIBILITY?

As to fiscal responsibility, the Kennedy-Anderson amendment is fully self-financing while the funds for the public assistance liberalizations will have to come from general revenue. The latter must come from increased taxation or reduction of other budget items if further increases in the Federal debt are to be avoided. The Finance Committee minority report points to some of the long-range cost aspects of the public assistance approach and the savings in such expenditures which will be effectuated through the use of a social security program:

> Only the social security system can provide medical care insurance for the aged in a satisfactory manner. If medical care costs are not met by social insurance, increasingly they will have to be met through the less satisfactory method of relief. Almost $400 million a year is now being spent by Federal, State, and local governments for medical care under the old-age assistance program; the committee bill would increase this to close to a billion dollars, and this would be just the beginning. In the absence of social insurance protection the present drain on general revenues will more than double in the next several years. A total of $2 billion to $2.5 billion in Federal and State funds would be required to meet the total need.

In the coming months the American people are going to make an important decision as to the method which will be used in supplying protection to our older citizens against the ever-increasing cost of adequate medical care. The people are entitled to all the facts and should not be forced to rely solely on argumentation by organizations with fixed and inflexible positions who can afford full-page advertisements.

ALL IS NOT BLACK

We are indebted to the AMA, however, for reminding us of our basic purpose; that our senior citizens are entitled to the chance to live their lives as fully as possible, with dignity and independence, with faith and pride in themselves.

The social security medical care approach to me is the logical way to make this objective a reality. The AMA program, on the other hand, is a snare and a delusion when it is characterized as the total answer to the need for action in this area. Let the people, with full knowledge of the facts and issues, decide.

CAMPAIGN ETHICS

Mr. HEMPHILL. Mr. SPEAKER, I ask unanimous consent to address the House for 5 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. HEMPHILL. Mr. Speaker, we have heard many speeches and read many articles on campaign ethics, Operation Veracity, clean campaigning, and so forth. But what about excessive expenditures of money in a campaign to defeat a Member of Congress?

Recently I read an Associated Press news release from St. Louis, Mo., dated August 25, with headlines saying: "Missouri GOP Hopes to Win House Seat in the 11th District." This newspaper article quoted Republican National Committeeman Francis C. Corley, as saying that $50,000 would be required "to win in the 11th District of Missouri," to defeat MORGAN M. MOULDER. The paper stated that:

> Corley addressed a luncheon gathering of 50 persons, including members of Missouri Republicans Unlimited, Inc., the party's fund raising arm.

The newspaper quoted Mr. Corley as follows:

> It will take $50,000 to win in the 11th of Missouri. Half of this sum to be raised in the district.

Now, Mr. Speaker, the election laws of Missouri prohibit the spending of such a large amount of money in a congressional district campaign. But regardless of the law to provide for honest elections, here we have an example of contempt for the law and a brazen plan to spend this great sum of money, more than the total salary of a term of office in Congress, to defeat an honest, outstanding, able, and courageous Member of Congress.

Where is the $50,000 or more, to defeat MORGAN M. MOULDER coming from? Is this huge sum of money coming from the people of the 11th Congressional District he so diligently represents in Congress? Or is the $50,000 or more coming from the big selfish interests who seek special privileges from our Government?

Mr. Speaker, I have faith in the people and I don't believe that they can be bought or bribed with any amount of money to turn against their friend, a man like MORGAN M. MOULDER.

Mr. Speaker, I yield back the balance of my time.

RECESS

The SPEAKER. The House will stand in recess subject to the call of the Chair.

Accordingly (at 5 o'clock and 44 minutes p.m.) the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, at 6 o'clock and 30 minutes p.m., the House was called to order by the Speaker.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment concurrent resolutions of the House of the following titles:

> H. Con. Res. 745. Concurrent resolution establishing that when the two Houses adjourn on Thursday, September 1, 1960, they stand adjourned sine die.
>
> H. Con. Res. 746. Concurrent resolution authorizing the Speaker of the House of Representatives and the President of the Senate to sign enrolled bills.

The message also announced that the Senate had passed a resolution as follows:

> S. Res. 389. *Resolved*, That a committee of two Senators be appointed by the Presiding Officer to join a similar committee of the House of Representatives to notify the President of the United States that the two Houses have completed the business of the session and are ready to adjourn unless he has some further communication to make to them.

OZARK RIVERS NATIONAL MONUMENT

Mr. CURTIS of Missouri. Mr. Speaker, I have today introduced a bill which would provide for the development as a national recreational area within the National Park Service of the Current and Eleven Point River area of southeastern Missouri. This development has been studied and supported by the Missouri Division of Resources and Development and by the State legislature. In a report recently published, the National Park Service added its support to the proposal for an Ozark Rivers National Monument, as this has come to be called.

The basic aim of this proposal is to maintain the natural beauty of this stream system for the use and enjoyment of everyone. As a crowding and increasingly complex civilization takes one and then another location of natural beauty and outdoor recreation, I think it is important that we set aside areas in our country where these may be preserved. The Current and Eleven Point River area is one of these.

I would like at this point to quote a portion of the summary of the Park Service report on the Ozark Rivers National Monument:

THE STUDY IN BRIEF

"Only a few miles by today's standards from St. Louis or Kansas City or Memphis lies a portion of the Ozarks still relatively wild and natural. The Ozarks are old—mellow with the beauty of great age—remnants of an ancient mountain range. Uplift and water have molded them. Climate has influenced them.

"Today, this particular area houses a unique complex of springs and rivers, caves and sinks, plants and animals. Here are many springs—some giant, some small. Here are spring-fed rivers, the Current, the Jacks Fork, and the Eleven Point—cold, clear, abounding with bass and goggle-eye.

"Here are caves created by waters of the past, many containing an unusual variety of multicolored formations, some still uncharted. Here are interesting sinks—ground surface reminders of cave roof fall-ins below. Here are found the shortleaf pine, oaks of many names, the redbud, the red wolf, the osprey, and the pileated woodpecker—overall, a surprisingly varied ecology.

"Nearly 10,000 years ago, Early Man lived beside these same waters. He too must have marveled at the springs and the rivers flowing from them. More recently, the Indian, the Frenchman, the Spaniard, the logger, each had his day. Descendants of settlers who came mainly from the Appalachians now people the area. Much of the folk culture and character of early American society remains with them.

"For years—largely because of this unusual combination of natural values—there has been interest in preservation of parts of this scene. Four State parks have been established—three along the Current River and one along the Jacks Fork. Two wildlife areas have been set aside by the Missouri Conservation Commission.

"As early as 1950, the State of Missouri recognized a need to preserve the natural qualities of the Current and Eleven Point Rivers. As recently as January 1959 the Missouri Legislature asked the Congress of the United States to establish a national recreation area to preserve the free-flowing qualities of these very rivers.

"Here in the heart of the Ozark Plateau lies a unique opportunity to set aside an outstanding type of area—one not now represented in the national park system. Here, too, is the opportunity to preserve still unspoiled rivers with many miles of shoreline.

"To preserve this area, establishment of an Ozark Rivers National Monument, as part of the national park system, is now proposed. The monument, consisting of approximately 113,000 acres, would be located along some 190 miles of the Current, Jacks Fork, and Eleven Point Rivers. This area would contain the most important portion of these scenic rivers as well as some 13 named caves, 11 geological sites, more than 40 archeological sites, several fine ecological sites, and many springs and sinks.

"Natural concentration of these features in the river valleys makes possible their preservation for public enjoyment in relatively narrow strips of land. It would be difficult to find an area where so much beauty and variety can be preserved by setting aside so little. A sizable block along the Current River has been included to allow preservation of a significant example of typical Ozark topography. Preservation of the area's fragile qualities, while allowing its use, would be the basic objective of all planning, development, and administration.

"Here would be an area preserved for use of people—an opportunity to float the Current or the Jacks Fork or the Eleven Point, to watch the osprey at work, to try camping on a gravel bar, to test the boater's or fisherman's skill, to watch the Ozarks' renowned fall colors pass by, or perhaps even just to loaf. Hiking along the riverbank or to some remote cave, sink, or site where man of yesterday lived; wandering through little known Powder Mill Cave or into spectacular Jam Up Cave; climbing down a shaded trail to magnificent Greer Spring—all of these and many other opportunities would be available to the visitor. A carefully developed interpretive program would add to his enjoyment and understanding of the area."

One of the questions that arises in establishing such a recreational area, especially one which is to include long, narrow strips of property bordering rivers, is that of the best manner of maintaining this property in the state of natural beauty which we seek.

In the bill which I have introduced I have included for consideration a plan of acquisition which would help answer this question. I propose that the Federal Government purchase the land which it will need for campsites, picnic areas, administrative buildings, and the other public services necessary in connection with a national park; and at the same time purchase a scenic easement along each bank of the rivers, leaving ownership of these lands in the hands of the present owners but restricting the use of the banks to a certain distance from the river to pursuits not inconsistent with the overall purpose of the park.

This easement along the river would operate in a manner similar to the setback ordinances of many cities which require so many feet of yard between the street and the front of the building on a particular lot. Also similar to the setback ordinances, this easement would operate as only a partial restriction on the full use and enjoyment of the property owner. In this case most of the riparian owners are farmers; their profitable utilization of the riverbank property, especially in light of bank stabilization, could easily be integrated with the use of the river for outdoor recreation.

In view of the needs of our people for areas of outdoor relaxation and enjoyment, and in view of the widespread support for developing the Current and Eleven Point Rivers area for these purposes, I urge favorable action on this bill by the Congress.

IS THE FEDERAL GOVERNMENT OVERCENTRALIZING, OVERCONGESTING, AND OVERBUILDING THE DISTRICT OF COLUMBIA?

Mr. REUSS. Mr. Speaker, earlier this month I urged the House Committee on Government Operations, of which I am a member, to make a comprehensive study of executive branch policies and practices relating to Federal decentralization, relocation, and dispersal. My request is set forth in the following letter to the gentleman from Illinois, the Honorable WILLIAM L. DAWSON:

AUGUST 3, 1960.

Hon. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I write to urge that the Committee on Government Operations, through an appropriate existing subcommittee or perhaps a special subcommittee, undertake as promptly as possible a study on the important policy question of the decentralization of facilities and operations of the executive branch of the Federal Government.

It seems to me that the question of Federal decentralization, relocation and dispersal falls clearly within the jurisdiction of the Committee on Government Operations, because it is directly related to the efficient and economical functioning of our Government.

The executive branch now employs approxi 2,170,000 civilians inside the United States. Even if the Federal Government assumes no additional responsibilities in the future, it is reasonable to assume that the number of Federal employees will continue to increase roughly in proportion to the increase in our total population. There is surely no reason to assume that the responsibilities of the Federal Government will diminish in the foreseeable future. And even if the number of Federal employees does not increase, it is obvious that the Government must continue, and accelerate, the present program of erecting new buildings to modernize its physical plant, to replace inefficient space with usable facilities, and to house its employees and its operations in permanent, well-designed working quarters rather than in unsightly temporary buildings and in expensive, inadequate rented space.

The question of where Federal employees and Federal buildings will be located in the future is one that, in my judgment, cries out for immediate study and long-range planning. The executive branch and each of its departments and agencies should be requested to set forth current and future plans for expansion, construction, and employee location, and their policy, if any, with respect to decentralization, dispersal, or relocation.

The Congress, it seems to me, has a larger duty than merely approving or disapproving

the construction of individual Federal buildings or facilities in particular locations.

Because of the size and complexity of the executive branch, the Congress needs to be assured that the various departments and agencies are, to the maximum extent possible, coordinating their activities in these areas, and needs to be assured that there is a clearly understood and accepted policy on Government decentralization—for or against—based on sound thinking and proper planning.

I submit that the Committee on Government Operations is the most appropriate agency of the Congress to require the presentation by the executive branch of its plans and programs, to insist on the development of a coordinated and clear policy on decentralization, and to assist in the formulation of such a policy.

The fact is that there now is no policy.

Because of my own concern about this matter, I requested the Legislative Reference Service of the Library of Congress in January of 1960 to prepare a memorandum for me concerning decentralization policy and practice in the executive branch. A copy of the Legislative Reference Service memorandum is enclosed.

In summary, main findings of the Legislative Reference Service study are as follows:

1. "The Eisenhower administration has not declared, adopted or acted upon any form of overall policy for or against administrative decentralization."

2. "No universally understood or accepted program of administrative decentralization is being followed or is in existence."

3. "Most of the departments and agencies do not have established or announced programs or plans of their own for administrative decentralization."

4. While some decentralization has taken place within some departments and agencies since 1953, "this decentralization has been in response to specific situations rather than as a part of a very broad policy."

In essence, the Library of Congress points out that there has been no long-range planning and coordination in the executive branch concerning decentralization, and precious little thought given to the subject within individual departments and agencies.

Yet it is evident that the future location of Federal employees and Federal facilities is of vital importance to the District of Columbia and the surrounding area; to other cities and metropolitan areas in the United States which might be selected as the sites of decentralized Federal operations; and, most importantly, to the efficient and economical functioning of the Federal Government in a manner best calculated to serve the public interest.

The Commission on Organization of the Executive Branch of the Government, the first Hoover Commission, in its report of May 20, 1949, pointed out that, while economy in administration can often be achieved through centralization, it is also possible to overcentralize, with the result of increasing costs and decreasing efficiency. The Commission (p. 37) stated that its task forces had found "overcentralized operations which are resulting in inefficient and expensive management." The report went on:

"Our task forces also found many instances where headquarters officials in Washington still cling to the power to make decisions even in matters of minor importance. This, too, has resulted in interminable delays in getting things done, has stultified initiative in the field services, and has resulted in decisions being made which have not taken due account of variations in local conditions."

The Commission concluded that further decentralization was needed. But, with a few exceptions such as in the Post Office Department, little has been done.

Obviously, there are certain "headquarters" functions of the Government which must be performed at the seat of government. Obviously, too, there are certain functions which are clearly field services, and can only be effectively performed in the field away from Washington, D.C.

There are, however, many operations of government which do not fall clearly into the "headquarters" category or the "field" category. It is with these operations that we must be increasingly concerned. We must determine whether they can best be performed in the District of Columbia, or elsewhere.

In these days of modern, rapid communication and transportation it seems to me that there are fewer and fewer functions which really need to be performed in Washington, D.C. A number of questions occur:

How many additional Federal employees are to be brought into the District of Columbia and surrounding area? How many new Federal buildings are to be built in or near the District? How can the District, Maryland, and Virginia make logical plans for the orderly development of the National Capital area unless the Federal Government's intentions are known on a reasonably long-range basis?

What has been and will be the effect on the metropolitan area and its people of the location of the Atomic Energy Commission and the Central Intelligence Agency outside but within a few miles of the District? Is this decentralization? Is this relocation or dispersal in the civil defense sense? Does it make sense?

If the Government continues to expand and build in the District and nearby area, what will be the cost, in terms not only of land and buildings, but in terms of congestion, vulnerability, highways, mass transportation, parking, housing, and other requirements of modern living and working?

Would not the Government save money, and maintain or improve efficiency of operations and service to the public, by locating elsewhere in the Nation certain new operations, new buildings, new employees, which need not be at the seat of the Government? Should not the Government consider the relocation to other areas of some operations which need not be in Washington, D.C.?

The decentralization of appropriate Government operations and personnel from Washington to other areas would, in my opinion, result in savings and increased efficiency in the Federal Establishment; it would reduce Government costs and overall congestion in the District of Columbia and vicinity; and it would contribute greatly to the economic health and stability of the communities and areas into which Federal operations and employees were transferred.

I make no bones about the fact that I personally feel that the Federal Government should decentralize. A part of this feeling is based upon my distress at seeing, over the last few years, the removal by the Federal Government from Milwaukee of a number of regional offices and employees, and the reduction in force of others.

While these actions have been taken in the name of efficiency and economy by the present administration, they have been harmful to Milwaukee and Wisconsin both in terms of a loss to the economy and a reduction of service to the public. Furthermore, I strongly suspect that an accurate analysis of the effects of the removal and reduction of Federal operations in Milwaukee would show the alleged efficiency and economy to be false.

However, my concern goes beyond the loss of rank by Milwaukee as a Federal operations center. I believe we are in danger of overcentralizing, overbuilding, and overcongesting in the District of Columbia, and possibly even in some other areas where the Government has regionalized to a great extent. A thorough study by the Committee on Government Operations might reach a different conclusion.

But I do think there is a huge gap in Federal planning when the executive branch has no policy, and few departments or agencies have even thought about decentralization, relocation, or dispersal.

Since we all hope and expect our Government to endure, and to operate efficiently, economically, and in tune with modern times, I respectfully urge that the Committee on Government Operations undertake a comprehensive study of Government practices and policies relating to decentralization.

Sincerely,

HENRY S. REUSS,
Member of Congress.

There follows a report prepared at my request by the Legislative Reference Service of the Library of Congress:

THE LIBRARY OF CONGRESS,
LEGISLATIVE REFERENCE SERVICE,
Washington, D.C.

To: Hon. HENRY S. REUSS.
From: History and Government Division.
Subject: Administrative decentralization in the executive branch.

On the basis of information obtained from a variety of departments and agencies in the executive branch of the Federal Government, it can be stated that the Eisenhower administration has not declared, adopted, or acted upon any form of overall policy for or against administrative decentralization.

It would be virtually impossible to approach all executive agencies on this subject, but sufficient data have been obtained from a sufficient number of those most likely to be affected or in the best position to know to make it quite clear that no universally understood and accepted program of administrative decentralization is being followed or is in existence.

A second generalization, not so sweeping in its nature, can also be made. It is that most of the departments and agencies do not have established or announced programs or plans of their own for administrative decentralization. There have been exceptions to this statement, such as the Post Office Department and the Office of Civil and Defense Mobilization discussed briefly below, but in general it is valid.

A third generalization might be stated in the following terms. Administrative decentralization has occurred within some departments and agencies since 1953. This decentralization has been in response to specific situations rather than as a part of a very broad policy.

The basic criterion that appears to have been observed is that decentralization has taken place whenever the circumstances indicated that it would lead to better, more efficient, and more economical administration without impairment of services, or that services would be improved. There is considerable unanimity among the departments and agencies on this point.

In view of the functions it performs, the Bureau of the Budget is probably the most likely single agency to be in a position to survey administrative decentralization throughout the entire executive branch. Information on this subject from the Bureau was obtained primarily from Messrs. Carey and Levi, the latter being in the Bureau's Office of Management and Organization.

Both men emphasized that no overall policy in favor of or against decentralization can be said to exist. It was pointed out that such decentralization as has taken place has been done largely on an ad hoc basis whenever an evaluation of all the factors indicated that it would, on balance, be beneficial.

There is some concern with regard to administration about regional or area boundary lines among agencies already decentralized into field offices. Frequently these regional areas differ from agency to agency with the result that there is unnecessary confusion with regard to certain services or functions. Some of the agencies involved are now attempting to work out a plan for more regional boundary lines to be shared in common.

The President's Advisory Committee on Government Organization was also contacted on this issue of decentralization. Its staff director, Arthur A. Kimball, said that this was not a subject in which the committee would have a direct interest as such, but to the best of his knowledge no general policy of decentralization was in effect.

A third body within the Executive Office of the President which might have direct concern in, and knowledge about, administrative decentralization is the Office of Civil and Defense Mobilization. Its Assistant Director in charge of Plans and Operations, Lewis E. Berry, stated that he knew of no general, Government-wide policy regarding administrative decentralization. He added that although OCDM has a long-range interest in this subject, its main concern is with what should be done in case of attack or under wartime conditions.

With regard to Government agencies, OCDM is concerned about problems of dispersal or relocation, which may be related to, but surely are not the same as, administrative decentralization, as the latter term is generally used. Mr. Berry mentioned the removal of the Atomic Energy Commission to Germantown, Md., as being brought about, in part at least, by the dispersal policy. The movement of the Central Intelligence Agency to Langley, Va., might be another example, but, as Mr. Berry also went on to say, these changes in location of only a few miles can hardly be considered as essentially dispersal efforts.

Mr. Berry said that most agencies have a plan or policy for the removal and safeguarding of personnel in case of attack. The OCDM also has recommended to the agencies that they have some geographical site in mind to move to in case of an emergency.

From the General Services Administration, Gerald S. Radley of the Office of the Assistant Commissioner for Planning, told the Legislative Reference Service that he knew of no overall Government program about decentralization. Mr. Radley, who works with the allocation of space for Government agencies, went on to say that decentralization policies are not the concern of GSA, but that this agency is very much affected by decentralization after it has been decided upon. Mr. Radley also observed that, on the basis of his experience, there is no particular uniformity among the departments and agencies with regard to their policies or the extent of their decentralization.

Although numerous offices in the Defense Department were contacted, little could be learned about its decentralization policies. Those persons who made any comments believe that there is no broad, standing policy as such, but that decentralization takes place when a move would seem desirable for the general operation of the Department. The Department of the Army's decentralization of its records to St. Louis, Kansas City, and other areas was given as an example. The effort to get more information from the Department of Defense is being continued.

The Department of Agriculture has always been one of the most decentralized of all Federal Government agencies. This is almost inevitable considering the nature of its work. The Department was reorganized in 1953 under Reorganization Plan No. 2 of that year with some decentralization resulting therefrom.

The Office of Administrative Management in the Department told the Legislative Reference Service that most decentralization has been carried out as the apparent need or occasion for it arose. In other words, broadly speaking, decentralization in the Department of Agriculture has been in accord with the general pattern for the executive branch in that it has been accomplished in specific cases to meet specific situations rather than as a part of a general or established policy.

As an example, it was pointed out that on two occasions since 1953 the Office of Personnel has in a sense decentralized its authority by granting field offices greater discretion in the classifying and hiring of employees.

As in the case of the Department of Agriculture, the Post Office Department must be extensively decentralized in order to perform the services for which it was established. The Post Office Department differs from the other agencies covered in this report in that it has had since 1953 an extensive, planned policy of decentralization which has now been carried out. This information was provided by Howard Lewis of the Department's Office of Public Information.

In 1954 the Post Office Department began the decentralization of some of its functions and authority to 15 regional offices in cities throughout the United States. At the time, there were no regional offices of this type. This program was completed in a period of 2 to 3 years and has been working well.

The idea behind it was that there were a great many more or less routine administrative matters that could be handled more quickly, wisely, and efficiently at something closer to the local level. The regional offices have been given considerable administrative discretion, according to Mr. Lewis, and it has worked to the advantage of the entire Department—here in Washington and in the field as well.

This decentralization was in accord with the beliefs of both the first and the second Hoover Commissions, and it was singled out for praise in a special memorandum on Post Office Department operations prepared by the Citizens Committee for the Hoover Report.

Information on the subject of administration decentralization is still being sought from the Departments of Health, Education, and Welfare, Treasury, Commerce, and Interior. If it should have any special value, or affect in any way what has been said in this memorandum, it will be passed along to you as soon as it can be obtained.

The Legislative Reference Service sincerely hopes that the information contained in this memorandum will be of value to you.

FREDERICK L. SCOTT.

I hope, Mr. Speaker, the study will be undertaken and that it will have a constructive result.

THE HONORABLE SAM RAYBURN

The SPEAKER. Will the gentleman from Illinois [Mr. ARENDS] kindly take the chair?

Mr. ARENDS assumed the chair as Speaker pro tempore.

The SPEAKER pro tempore. The chair recognizes the gentleman from Massachusetts, the majority leader, Mr. MCCORMACK.

Mr. MCCORMACK. Mr. Speaker, as you have once said, this has been a fruitful Congress and historic happenings have occurred during this Congress. It has been a hard-working Congress.

It is not my purpose to discuss the considerations, conclusions, and actions of Congress on this occasion, but to express to the membership of the body—and I know I also speak for our beloved Speaker—our sincere thanks for the unselfish cooperation that you have given to the Speaker and myself during the past 2 years.

I have always tried to be fair to every Member of the House, to try to prepare the program in such way as would recognize the exigencies that confronted each Member, and to do it insofar as I could. One of the primary duties of the majority leader—the Speaker has expressed it so well from his angle—I consider to be that of protecting the rights of the individual Member, to see that the rights of the individual Member, particularly of the minority party, are not trespassed upon. I hope I have, to the extent it is humanly possible for me to do so, accomplished that fundamental objective during this Congress.

Each and every one of us is a Member of this great body, and we are here in our own right. I never forget that fact. I recognize the fact that there is a quality possessed by each Member—there must have been—for the people of his district to elect him here, whether for 1 term, 10 terms, or 20 terms; and the more terms one is elected from his district the more profound is the respect and confidence of the people of that district in him. I have always kept in mind that fact, and I realize and appreciate very much the extreme consideration extended to me by all of the Members. In saying that I recognize my own human weaknesses.

If on any occasion I have said anything that has disturbed any Member, I want to assure him it was not intentional; and if anyone has any thought in his mind as a result of any action or expression of mine that disturbs him, I offer him my apology, because I never intend to hurt anybody. I always want to do the things that I would want to have someone else do to me if they were in my place as majority leader.

I particularly want to express my thanks to the minority leader and the minority whip. CHARLIE HALLECK recognizes the responsibilities of responsible leadership; LES ARENDS recognizes the responsibilities of responsible leadership. Responsible leadership recognizes that fact. There has never been any disturbing atmosphere between Speaker RAYBURN and myself and CHARLIE HALLECK and LES ARENDS. Naturally, I particularly refer to CHARLIE HALLECK because he is the leader of the Republican Party in this body.

CHARLIE HALLECK'S word is his bond. CHARLIE HALLECK has always been frank.

When you take anything up with him, he has always frankly expressed himself, and he has always frankly given his opinion and his word, which, as I said, has always been his bond.

So, without going any further, I think I have covered enough so that you all know of my deep feeling of appreciation. I want to express my sincere thanks to all of the Members for your kindnesses and courtesies on behalf of the Speaker and myself, and again I particularly pay my tribute to my very dear friend from Indiana, the distinguished Republican leader, CHARLIE HALLECK.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Indiana, the minority leader, Mr. HALLECK.

Mr. HALLECK. Mr. Speaker, I offer a resolution (H. Res. 647) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That the thanks of the House are presented to the Honorable SAM RAYBURN, Speaker of the House of Representatives, for the able, impartial, and dignified manner in which he has presided over the deliberations and performed the arduous duties of the Chair during the present term of Congress.

Mr. HALLECK. Mr. Speaker, we are approaching the end of another session of the greatest legislative body on earth—the Congress of the United States.

It has been my high privilege to serve in one body of this Congress—the House of Representatives—for 25 years.

For the most of this time the man who has occupied the chair of the Speaker of the House has been SAM RAYBURN of Texas.

I happen to be a Republican, and he is a Democrat.

Speaking politically—and politics does have some consideration around here—maybe I can be forgiven if I say that from that standpoint I might wish history could have been otherwise.

But that is not the only consideration.

As far as I am concerned, since history dictated that for most of my career the Speaker of the House be a member of the opposition party, let me be quick to say that I can conceive of no one more qualified by experience, by wisdom, and by character to carry the burden of his high office than SAM RAYBURN.

The whole world admires a man of granite.

SAM RAYBURN, with the long span of his years of service, with his devotion to the cause for which he has dedicated his life, and with the integrity from which he has never wavered, has himself chiseled a monument of Americanism which will never erode in the hearts and minds of the people who have known him, and who have worked with him here in this Chamber.

I happen to have a conviction that a man born in this wonderful country of ours owes a full measure of his talents to the total welfare of our Nation.

SAM RAYBURN has given this full measure.

Through the years he has been my friend, as I hope he feels I have been his friend.

Together, at such times as it has been my privilege, we have consulted on legislation vital to all citizens.

Never have I found him unfair. Never have I found him arbitrary.

Rather, to me, is SAM RAYBURN a man wise in the complicated mechanics of legislation, a man who understands that the science of politics is a science of compromise.

But most of all, have I found in SAM RAYBURN a statesman who has a deep conviction that ours is the greatest Government ever devised by the mind of man and who is dedicated to making it work so that our free way of life shall endure through all time. [Applause, the Members rising.]

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

The SPEAKER pro tempore. It is unanimous, and that is the way it should be, Mr. Speaker.

The SPEAKER resumed the chair.

The SPEAKER. Mr. HALLECK and Members of the House of Representatives of the 86th Congress.

We have come to the close of one of the busiest and, in my opinion, one of the most fruitful sessions of Congress it has ever been my privilege to serve in. I am winding up my 24th term. Throughout all the years in which I have served with something like 3,000 men and women in this House, I can look back on each and every one of them as men and women of high character, splendid people, and true representatives of their people. In being true representatives of their people they have served not only their people but the people of our beloved country.

I shall never cease to hold in grateful memory the kindnesses and the compassion with which you have treated me. As Mr. HALLECK said, this is an arduous and onerous position. Just 44 men have held it. Through the kindness of my folks back home and through your favor, I have served as Speaker longer than any other man in the history of the country, and on September 16 I will have wound up 16 years in this position. I want to say again to you, as I have said so often, that the House of Representatives has been my life and it has been my love. I never had any ambition to be a Governor or a Senator. I wanted to come to this body and stay here as long as my people favored me. They have been kind and fine to me as you have been.

We have a great and glorious country. It does not have a long history, but it has a glorious history. No people on the face of the earth who live today or who ever did live have ever lived under a government where the people, the individual man and woman, boy and girl, has as much liberty or enjoys as much freedom. It has been my purpose, and I trust in some way that I have lived up to it, and from the first time that I ever took this gavel, it was my hope, my trust and my ambition that I would uphold the dignity and the prerogatives of the House of Representatives against all winds—it mattered not from where they came. So today my heart is full of gratitude to you. I know you have worked hard—each and every one of you. I know you deserve some rest and change, and I trust that you get it to the fullest degree. I trust that when you come back here on the 3d of next January, you will be in good health, ready to go to work in doing the world's great work, because the Members of this House of Representatives are challenged to do the world's great work and part of that work is to keep our country strong, that it may remain free. We are faced with people throughout the earth, and especially in one part of it, whose people know no freedom and whose rulers acknowledge no God.

That makes it a dangerous world in which we live, I think the most dangerous which the civilization, yes, the Christian civilization that we know and love, has ever faced. It stands in greater danger today that it has at any time in the Christian era.

I know you are determined, have been in these past sessions, and that you will be in the sessions to come, and dedicated to keeping this country strong and keeping it free.

As you go home I wish you everything that is good. I wish that your people will receive you as you should be received, and that they will show appreciation for the great and the fine work you have done.

God bless you and keep you every one.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. THOMPSON of New Jersey (at the request of Mr. TAYLOR of North Carolina), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. ALGER, for 15 minutes, today.

Mr. WALTER, for 15 minutes, today.

Mr. PORTER, for 30 minutes, today.

Mr. BROOKS of Texas, for 15 minutes, today.

Mr. CURTIS of Missouri, for 10 minutes, today.

Mr. ROBERTS, for 10 minutes, today.

Mr. PUCINSKI, for 5 minutes, today.

Mr. THOMSON of Wyoming, for 15 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. MACHROWICZ.

Mr. COAD and to include extraneous matter.

Mr. BYRNES of Wisconsin in two instances and to include extraneous matter.

Mr. TOLL and to include extraneous matter.

Mr. DULSKI and to include extraneous matter.

Mr. SMITH of Iowa and to include extraneous matter.

Mr. STRATTON and to include extraneous material.

Mr. WALTER and to include extraneous matter.

Mr. STRATTON and to include extraneous matter.

Mr. HOLIFIELD in two instances and to include extraneous matter.

(At the request of Mr. THOMSON of Wyoming, and to include extraneous matter, the following:)

Mrs. DWYER.

Mr. KEITH in two instances.

Mr. WALLHAUSER.

Mr. HOEVEN.

Mr. KEARNS.

Mr. RHODES of Arizona.

(At the request of Mr. MCCORMACK, and to include extraneous matter, the following:)

Mr. KARTH.

Mr. KITCHIN.

Mr. JOHNSON of Colorado.

Mr. SANTANGELO in two instances.

Mr. O'HARA of Michigan in three instances.

Mr. UDALL in two instances.

Mr. THOMPSON of New Jersey.

Mr. BUCKLEY.

Mr. TELLER.

Mr. MAHON.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2074. An act for the relief of Eric and Ida Mae Hjerpe;

H.R. 4306. An act to provide education and training for the children of veterans dying of a disability incurred after January 31, 1955, and before the end of compulsory military service and directly caused by military, naval, or air service, and for other purposes;

H.R. 4428. An act for the relief of the legal guardian of John David Almeida, a minor;

H.R. 5396. An act to amend title 28 of the United States Code to provide for transfer of cases between the district courts and the Court of Claims and for other purposes;

H.R. 7618. An act for the relief of H. P. Lambert Co., Inc., and Southeastern Drilling Corp.;

H.R. 7877. An act for the relief of Vladislav Fotich;

H.R. 11561. An act to authorize and direct the Secretary of the Army to convey part of lock and dam numbered 10, Kentucky River, Madison County, Ky., to the Pioneer National Monument Association for use as part of a historic site;

H.R. 11573. An act to provide for the free entry of an electron microscope for the use of William Marsh Rice University of Houston, Tex., an electron microscope for the use of the University of Colorado Medical Center, Denver, Colo., and for other purposes;

H.R. 12993. An act to amend the District of Columbia Teachers' Salary Act of 1955, as amended.

ADJOURNMENT

Mr. MCCORMACK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER. In accordance with the provisions of House Concurrent Resolution 745, the Chair declares the 2d session of the 86th Congress adjourned without day.

Accordingly (at 6 o'clock and 52 minutes, p.m., Thursday, September 1, 1960), the House adjourned sine die.

BILLS AND JOINT RESOLUTIONS ENROLLED AFTER SINE DIE ADJOURNMENT

Mr. BURLESON, from the Committee on House Administration reported that on September 2, 1960, that committee had examined and found truly enrolled bills and joint resolutions of the House of the following titles:

H.R. 383. An act to authorize the annexation of certain real property of the United States by the city of Wyandotte, Mich.;

H.R. 816. An act to convey certain lands in Oklahoma to the Cheyenne and Arapaho Indians, and for other purposes;

H.R. 1526. An act for the relief of F. P. Tower, Lillie B. Lewis, the estate of Manuel Branco, John Santos Carinhas, Joaquin Gomez Carinhas, and Manuel Jesus Carinhas;

H.R. 2565. An act to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations;

H.R. 3536. An act for the relief of Guadalupe Villarreal, Jr.;

H.R. 7810. An act to credit periods of internment during World War II to certain Federal employees of Japanese ancestry for purposes of the Civil Service Retirement Act and the Annual and Sick Leave Act of 1951;

H.R. 7990. An act to provide for the conveyance of certain lands of the United States to the Citizen Band of Potawatomi Indians of Oklahoma;

H.R. 8156. An act for the relief of Jack Kent Cooke;

H.R. 8166. An act for the relief of the Crum-McKinnon Building Co., Billings, Mont.;

H.R. 8424. An act to amend section 505 of the Classification Act of 1949 with respect to positions in the Library of Congress;

H.R. 8665. An act to amend the act entitled "An act to establish a memorial to Theodore Roosevelt in the National Capital" to provide for the construction of such memorial by the Secretary of the Interior;

H.R. 9715. An act for the relief of Otis Drinkard;

H.R. 10087. An act to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit;

H.R. 10311. An act providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724), shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas;

H.R. 10341. An act to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health;

H.R. 10548. An act to amend the Helium Act of March 3, 1925, as amended, for the defense, security, and the general welfare of the United States;

H.R. 10586. An act to enable the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corp. of the Church of Jesus Christ of Latter-day Saints;

H.R. 10841. An act to amend the Tariff Act of 1930 to place bamboo pipe stems on the free list;

H.R. 10960. An act to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, and for other purposes;

H.R. 11322. An act for the relief of Col. Joseph A. Nichols;

H.R. 11380. An act for the relief of Mr. Joe J. Farmer;

H.R. 12043. An act to amend sections 22, 23, and 24, title 13, United States Code, and for other purposes;

H.R. 12383. An act to amend the Federal Employees' Compensation Act to make benefits more realistic in terms of present wage rates, and for other purposes;

H.R. 12458. An act to increase the amount authorized to be appropriated for the work of the President's Committee on Employment for the Physically Handicapped;

H.R. 12536. An act relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price;

H.R. 12574. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician, and for other purposes;

H.R. 12580. An act to extend and improve coverage under the Federal old-age, survivors, and disability insurance system and to remove hardships and inequities, improve the financing of the trust funds, and provide disability benefits to additional individuals under such system; to provide grants to States for medical care for aged individuals of low income; to amend the public assistance and maternal and child welfare provisions of the Social Security Act; to improve the employment compensation provisions of such act; and for other purposes;

H.R. 12659. An act to suspend for a temporary period the import duty on heptanoic acid, and for other purposes;

H.R. 12699. An act to cancel a deed of trust to the United States from the predecessor in name of Gallaudet College and any evidence of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other purposes;

H.R. 12759. An act to amend title V of the Agricultural Act of 1949, as amended, and for other purposes;

H.R. 13021. An act to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes;

H.R. 13053. An act to increase the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia, the U.S. Park Police, the White House Police, and for other purposes;

H.R. 13066. An act to amend section 4(a) of the Securities Exchange Act of 1934, as amended;

H.R. 13161. An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes;

H.J. Res. 311. Joint resolution authorizing the erection of a statue of Taras Shevchenko on public grounds in the District of Columbia;

H.J. Res. 402. Joint resolution granting the consent and approval of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes;

H.J. Res. 704. Joint resolution to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag," and for other purposes;

H.J. Res. 723. Joint resolution extending an invitation to the Federation Aeronautique Internationale to hold the 1962 world sport parachuting championships at Orange, Mass.; and

H.J. Res. 784. Joint resolution amending the act of July 14, 1960, to extend the time within which the U.S. Constitution 175th Anniversary Commission shall report to Congress, and including certain amendments relating to housing.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED AFTER SINE DIE ADJOURNMENT

Pursuant to the authority granted the Speaker by House Concurrent Resolution 746, 86th Congress, he did on September 3, 1960, sign enrolled bills and joint resolutions of the House of the following titles:

H.R. 383. An act to authorize the annexation of certain real property of the United States by the city of Wyandotte, Mich.;

H.R. 816. An act to convey certain lands in Oklahoma to the Cheyenne and Arapaho Indians, and for other purposes;

H.R. 1526. An act for the relief of F. P. Tower, Lillie B. Lewis, the estate of Manuel Branco, John Santos Carinhas, Joaquin Gomez Carinhas, and Manuel Jesus Carinhas;

H.R. 2565. An act to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations;

H.R. 3536. An act for the relief of Guadalupe Villarreal, Jr.;

H.R. 7810. An act to credit periods of internment during World War II to certain Federal employees of Japanese ancestry for purposes of the Civil Service Retirement Act and the Annual and Sick Leave Act of 1951;

H.R. 7990. An act to provide for the conveyance of certain lands of the United States to the Citizen Band of Potawatomi Indians of Oklahoma;

H.R. 8156. An act for the relief of Jack Kent Cooke;

H.R. 8166. An act for the relief of the Crum-McKinnon Building Co., Billings, Mont.;

H.R. 8424. An act to amend section 505 of the Classification Act of 1949 with respect to positions in the Library of Congress;

H.R. 8665. An act to amend the act entitled "An act to establish a memorial to Theodore Roosevelt in the National Capital" to provide for the construction of such memorial by the Secretary of the Interior;

H.R. 9715. An act for the relief of Otis Drinkard;

H.R. 10087. An act to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit;

H.R. 10311. An act providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724), shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas;

H.R. 10341. An act to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health;

H.R. 10548. An act to amend the Helium Act of March 3, 1925, as amended, for the defense, security, and the general welfare of the United States;

H.R. 10586. An act to enable the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corp. of the Church of Jesus Christ of Latter-day Saints;

H.R. 10841. An act to amend the Tariff Act of 1930 to place bamboo pipe stems on the free list;

H.R. 10960. An act to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, and for other purposes;

H.R. 11322. An act for the relief of Col. Joseph A. Nichols;

H.R. 11380. An act for the relief of Mr. Joe J. Farmer;

H.R. 12043. An act to amend sections 22, 23, and 24, title 13, United States Code, and for other purposes;

H.R. 12383. An act to amend the Federal Employees' Compensation Act to make benefits more realistic in terms of present wage rates, and for other purposes;

H.R. 12458. An act to increase the amount authorized to be appropriated for the work of the President's Committee on Employment for the Physically Handicapped;

H.R. 12536. An act relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price;

H.R. 12574. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician, and for other purposes;

H.R. 12580. An act to extend and improve coverage under the Federal old-age, survivors, and disability insurance system and to remove hardships and inequities, improve the financing of the trust funds, and provide disability benefits to additional individuals under such system; to provide grants to States for medical care for aged individuals of low income; to amend the public assistance and maternal and child welfare provisions of the Social Security Act; to improve the employment compensation provisions of such act; and for other purposes;

H.R. 12659. An act to suspend for a temporary period the import duty on heptanoic acid, and for other purposes;

H.R. 12699. An act to cancel a deed of trust to the United States from the predecessor in name of Gallaudet College and any evidence of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other purposes;

H.R. 12759. An act to amend title V of the Agricultural Act of 1949, as amended, and for other purposes;

H.R. 13021. An act to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes;

H.R. 13053. An act to increase the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia, the U.S. Park Police, the White House Police, and for other purposes;

H.R. 13066. An act to amend section 4(a) of the Securities Exchange Act of 1934, as amended;

H.R. 13161. An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes;

H.J. Res. 311. Joint resolution authorizing the erection of a statue of Taras Shevchenko on public grounds in the District of Columbia;

H.J. Res. 402. Joint resolution granting the consent and approval of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes;

H.J. Res. 704. Joint resolution to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag," and for other purposes;

H.J. Res. 723. Joint resolution extending an invitation to the Federation Aeronautique Internationale to hold the 1962 world sport parachuting championships at Orange, Mass.; and

H.J. Res. 784. Joint resolution amending the act of July 14, 1960, to extend the time within which the U.S. Constitution 175th Anniversary Commission shall report to Congress, and including certain amendments relating to housing.

And enrolled bills and joint resolutions of the Senate of the following titles:

S. 882. An act for the relief of the heirs of J. B. White;

S. 1092. An act to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes;

S. 1545. An act to amend the Federal Aviation Act of 1958 so as to authorize elimination of a hearing in certain cases under section 408;

S. 1663. An act directing the Secretary of the Interior to convey certain property in the State of North Dakota to the city of Bismarck, N. Dak.;

S. 1670. An act to provide for the granting of mineral rights in certain homestead lands in the State of Alaska;

S. 1740. An act to amend section 202(b) of the Communications Act of 1934 in order to expand the Federal Communications Commission's regulatory authority under such section;

S. 1764. An act to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard;

S. 1898.
